301(b)(2) of the Act; and may not include species whose presence or abundance is attributable to alternative effluent limitations imposed pursuant to section 316(a).

§ 125.72 Early screening of applications for section 316(a) variances.

(a) Any initial application for a section 316(a) variance shall include the following early screening information:

(1) A description of the alternative effluent limitation requested;

(2) A general description of the method by which the discharger proposes to demonstrate that the otherwise applicable thermal discharge effluent limitations are more stringent than necessary;

(3) A general description of the type of data, studies, experiments and other information which the discharger intends to submit for the demonstration; and

(4) Such data and information as may be available to assist the Director in selecting the appropriate representative important species.

(b) After submitting the early screening information under paragraph (a), the discharger shall consult with the Director at the earliest practicable time (but not later than 30 days after the application is filed) to discuss the discharger's early screening information. Within 60 days after the application is filed, the discharger shall submit for the Director's approval a detailed plan of study which the discharger will undertake to support its section 316(a) demonstration. The discharger shall specify the nature and extent of the following type of information to be included in the plan of study: biological, hydrographical and meteorological data; physical monitoring data; engineering or diffusion models; laboratory studies; representative important species; and other relevant information. In selecting representative important species, special consideration shall be given to species mentioned in applicable water quality standards. After the discharger submits its detailed plan of study, the Director shall either approve the plan or specify any necessary revisions to the plan. The discharger shall provide any additional information or studies which the Director subsequently determines necessary to support the demonstration, including such studies or inspections as may be necessary to select representative important species. The discharger may provide any additional information or studies which the discharger feels are appropriate to support the demonstration.

(c) Any application for the renewal of a section 316(a) variance shall include only such information described in paragraphs (a) and (b) of this section and § 124.73(c)(1) as the Director requests within 60 days after receipt of the permit application.

(d) The Director shall promptly notify the Secretary of Commerce and the Secretary of the Interior, and any affected State of the filing of the request and shall consider any timely recommendations they submit.

(e) In making the demonstration the discharger shall consider any information or guidance published by EPA to assist in making such demonstrations.

(f) If an applicant desires a ruling on a section 316(a) application before the ruling on any other necessary permit terms and conditions, (as provided by § 124.57), it shall so request upon filing its application under paragraph (a) of this section. This request shall be granted or denied in the discretion of the Director.

[*Comment:* At the expiration of the permit, any discharger holding a section 316(a) variance should be prepared to support the continuation of the variance with studies based on the discharger's actual operation experience.]

§ 125.73 Criteria and standards for the determination of alternative effluent limitations under section 316(a).

(a) Thermal discharge effluent limitations or standards established in permits may be less stringent than those required by applicable standards and limitations if the discharger demonstrates to the satisfaction of the director that such effluent limitations are more stringent than necessary to assure the protection and propagation of a balanced, indigenous community of shellfish, fish and wildlife in and on the body of water into which the discharge is made. This demonstration must show that the alternative effluent limitation desired by the discharger, considering the cumulative impact of its thermal discharge together with all other significant impacts on the species affected, will assure the protection and propagation of a balanced indigenous community of shellfish, fish and wildlife in and on the body of water into which the discharge is to be made.

(b) In determining whether or not the protection and propagation of the affected species will be assured, the Director may consider any information contained or referenced in any applicable thermal water quality criteria and thermal water quality information published by the Administrator under section 304(a) of the Act, or any other information he deems relevant.

(c)(1) Existing dischargers may base their demonstration upon the absence of prior appreciable harm in lieu of predictive studies. Any such demonstrations shall show:

(i) That no appreciable harm has resulted from the normal component of the discharge (taking into account the interaction of such thermal component with other pollutants and the additive effect of other thermal sources to a balanced, indigenous community of shellfish, fish and wildlife in and on the body of water into which the discharge has been made; or

(ii) That despite the occurrence of such previous harm, the desired alternative effluent limitations (or appropriate modifications thereof) will nevertheless assure the protection and propagation of a balanced, indigenous community of shellfish, fish and wildlife in and on the body of water into which the discharge is made.

(2) In determining whether or not prior appreciable harm has occurred, the Director shall consider the length of time in which the applicant has been discharging and the nature of the discharge.

Subpart I—Criteria Applicable to Cooling Water Intake Structures Under Section 316(b) of the Act [Reserved]

Subpart J—Criteria for Extending Compliance Dates Under Section 301(i) of the Act

§ 125.90 Purpose and scope.

Under sections 301(i)(1) and (2) of the Act, extensions of the 1977 statutory deadline for compliance with certain treatment requirements may be granted by the Director through permit issuance or modification. This Subpart establishes criteria for granting these extensions and the method for incorporating these extensions into permits issued under section 402(a) of the Act.

§ 125.91 Definition.

For purposes of this Subpart, "construction" includes any one of the following: preliminary planning to determine the feasibility of treatment works; engineering, architectural, legal fiscal, or economic investigations or studies, surveys, designs, plans, working drawings, specifications, procedures, or other necessary actions, erection, building, acquisition, alteration, remodeling, improvement, or extension of treatment works, or the inspection or supervision of any of the foregoing items

provided that completion of the facility and attainment of operational level by no later than July 1, 1983, is a reasonable expectation.

§ 125.92 Requests for permit modification and issuance under section 301(i)(1) of the Act.

Any owner or operator of a publicly owned treatment works (POTW) that requires construction to achieve limitations under sections 301(b)(1)(B) or 301(b)(1)(C) of the Act may request modification or issuance of a permit extending the date for compliance with these limitations in accordance with the provisions of § 124.51(c).

§ 125.93 Criteria for permit modification and issuance under section 301(i)(1) of the Act.

No request for a permit modification or issuance under section 301(i)(1) shall be granted unless the Director finds that the POTW requires construction to achieve limitations under sections 301(b)(1)(B) or 301(b)(1)(C) of the Act and did not complete construction for either of the following reasons:

(a) The issuance of a notice to proceed under a construction contract for any segment of Step 3 project work (or if notice to proceed is not required, the execution of the construction contract) occurred before July 1, 1977, but construction could not physically be completed by July 1, 1977, despite all expeditious efforts of the POTW (see initiation of construction as defined in 40 CFR § 35.905 for Step 3); or

(b) Federal financial assistance was not available, or was not available in time for construction required to achieve these limitations, and the POTW did not in any significant way contribute to this unavailability or delay.

§ 125.94 Permit terms and conditions under section 301(i)(1) of the Act.

(a) All permits modified or issued by the Director under section 301(i)(1) of the Act shall contain at a minimum the following permit terms and conditions:

(1) the shortest reasonable schedule of compliance for achievement of limitations under sections 301(b)(1) (B) and (C) but in no event later than July 1, 1983. This schedule shall be based upon the earliest date that Federal financial assistance will be available and construction can be completed and on any additional information submitted by the POTW or otherwise available.

(i) When a facility plan has been approved in accordance with 40 CFR 35, Subpart E, this schedule shall contain dates certain for the completion of actions leading toward the attainment of statutory treatment limitations.

(ii) When the POTW has not completed Step 1 of the construction grants process in accordance with 40 CFR 35, Subpart E, this schedule shall contain a date certain for the submission of a facility plan (completion of Step 1) upon which date the permit should be set to expire. In this case, in order to assure compliance by the POTW by July 1, 1983, the following requirements must be met:

(A) Certification by the State, based on its one or five year project priority list developed pursuant to 40 CFR 35.915(c), that funding will be available in time to ensure compliance by July 1, 1983; and

(B) Reporting once a year (if necessary) by the POTW as to its progress in obtaining Federal funding.

[*Comment:* EPA recognizes that the date for submission of the facility plan may not take into account all the uncertainties of the Step 1 planning process. Because of the uncertainties inherent in the Step 1 planning process, EPA recommends that section 301(i)(1) requests (and permit issuance) for projects that are presently in Step 2 or 3 should be acted on *before* requests from projects in Step 1. When Federal funding in the form of a Step 2 construction grant award is made available, and the Step 1 permit has expired, the permit is to be reissued containing a date certain schedule derived from the facility plan and coordinated with the State Project Priority List.]

(2) A statement ensuring compliance with requirements under sections 201 (b) through (g) of the Act consistent with the terms of the POTWs construction grant.

(3) Abatement practices and interim effluent limitations reflecting optimum operation and maintenance of the existing facilities. These shall include:

(i) Adequate operator staffing and training;

(ii) Adequate laboratory and process controls; and

(iii) Effluent limitations derived from reports of operation and maintenance inspections conducted by EPA or the State, or other guidance.

[*Comment:* Only in exceptional circumstances should in-depth plant evaluations be conducted, e.g., when existing information does not represent the true capabilities of the plant.]

(4) Interim effluent limitations reflecting other non-capital intensive measures for increased pollution control. This shall include any possible minor facility modifications such as piping changes, additional metering and instrumentation or the use of skimming and vacuuming equipment. When an existing POTW is currently violating limitations imposed under section 301(b)(1)(C) of the Act, interim effluent limitations shall be established to minimize adverse water quality impact; these limitations shall not be made less stringent or allow more pollutants to be discharged than are currently being discharged during the term of an extension granted under section 301(i)(1) of the Act.

(b) If a POTW has industrial users, any permit issued or modified by the Director under section 301(i)(1) shall contain any terms and conditions necessary to ensure compliance with 40 CFR 403.

§ 125.95 Requests for permit modification or issuance under section 301(i)(2) of the Act.

Any owner or operator of a point source other than a POTW that will not achieve the requirements of sections 301(b)(1)(A) and 301(b)(1)(C) of the Act because it was scheduled to discharge into a POTW that is presently unable to accept the discharge without construction, may request modification or issuance of a permit extending the date of compliance with these limitations in accordance with the provisions of § 124.51(b).

§ 125.96 Criteria for permit modification or issuance under section 301(i)(2) of the Act.

No request for a permit modification or issuance under section 301(i)(2) of the Act shall be granted unless the Director finds that the discharger has failed to achieve the requirements of sections 301(b)(1)(A) and 301(b)(1)(C) of the Act because it was scheduled to discharge into a POTW that is presently unable to accept the discharge without construction, and:

(a) The discharger has indicated an intent to discharge into the POTW before July 1, 1977, in one of the following ways:

(1) The discharger was issued a permit before July 1, 1977, based upon a discharge into a POTW;

(2) The discharger had a binding contractual obligation before July 1, 1977, (enforceable against the discharger) to discharge into a POTW. Contracts which can be terminated or modified without substantial loss and contracts for feasibility, engineering and design studies do not constitute a contractual obligation under this paragraph.

(3) A construction grant application made by the POTW before July 1, 1977, clearly demonstrated that the discharger was to discharge into the POTW; or

(4) Engineering plans, architectural plans or working drawings prepared for

the POTW before July 1, 1977, clearly demonstrated the discharger was to discharge into the POTW. Plans and drawings, such as those accompanying a bona fide application for a Federal construction grant, are sufficient only to the extent that they were truly representative of the intent of the discharger and the POTW;

(b) The Director finds that the discharger has acted in good faith in its efforts to effectuate discharge into the POTW and to minimize or abate pollution prior to discharge into the POTW. This shall include the following findings:

(i) Failure of the discharger to meet the July 1, 1977, deadline was for reasons beyond its control;

(ii) A history of a high degree of commitment to meet the requirements of the Act as manifested by cooperation with the State or EPA in attempting to resolve disputed issues;

(iii) No history of unjustified delay;

(iv) No past serious or intentional violations of the Act; and

(v) All reasonable measures are being taken to expedite compliance.

[*Comment:* The Director may also consider whether the discharger has operated its facilities competently and responsibly and the exent to which the discharger has completed the necessary prerequisites to having its waste treated by the POTW.]

(c) The POTW will be in operation and available to the discharger July 1, 1983;

(d) The POTW will be able to meet secondary treatment and water quality standard effluent limitations by July 1, 1983, after receiving the waste from the discharger;

(e) The discharger and the POTW have entered into an enforceable contract providing that:

(i) The discharger agrees to discharge its waste to the POTW;

(ii) The POTW agrees to accept and treat that waste by a date certain; and

(iii) The discharger agrees to pay all user charges and industrial cost recovery charges required under section 204 of the Act; and

(f) In the case of a discharge into an existing POTW, such POTW has been granted an extension under section 301(i)(1) of the Act.

§ 125.97 Permit terms and conditions under section 301(i)(2) of the Act.

All permits modified or issued by the Director under section 301(i)(2) of the Act shall contain at a minimum the following permit terms and conditions:

(a) The shortest reasonable schedule of compliance leading to discharge into the POTW, not to extend beyond the earliest date practicable for compliance, or beyond the final compliance date of any extension granted to the appropriate POTW under section 301(i)(1) of the Act, but in no event later than July 1, 1983. This schedule shall be based upon the earliest date by which the appropriate POTW can receive the waste from the discharger and the discharger can complete the necessary prerequisites to having its waste treated by that POTW.

(b) Achievement of effluent limitations and standards under sections 301(b)(1)(A) and 301(b)(1)(C) of the Act by the same final date in the schedule established in paragraph (a) of this section in the event that the permittee does not discharge its wastes to the POTW by the date established under paragraph (a) of this section.

(c) Abatement practices and interim effluent limitations reflecting optimum operation and maintenance of the discharger's existing facilities. These shall include:

(1) Effective performance of facility design removals;

(2) Adequate operator staffing and training; and

(3) Adequate laboratory and process control.

(d) Interim effluent limitations reflecting other non-capital intensive measures for increased pollution control.

(e) Requirements to meet applicable toxic effluent standards and prohibitions after they are promulgated under section 307(a) of the Act.

(f) Requirements to ensure compliance with:

(1) Pretreatment requirements imposed by the POTW pursuant to any extension granted to the POTW under section 301(i)(1);

(2) Any State or local pretreatment requirements; and

(3) Pretreatment standards as promulgated under section 307(b) of the Act.

[*Comment:* The legislative history cites the following example: "[I]f an industry is planning on participating in a municipal system which will not be available until January 1983, that industry would still have to install and operate pretreatment facilities within the time specified for compliance at the time the applicable pretreatment standard was promulgated and in no event later than three years from the date of said promulgation. Thus, if the pretreatment regulations are promulgated March 1, 1979, and require compliance within two years, that industry would be required to comply by March 1, 1981." H.R. Rep. No. 95–830, 95th Cong., 1st Sess., 12712 (daily ed. Dec. 6, 1977).]

(g) Any water conservation requirements necessary to carry out the provisions of the Act or imposed by the POTW pursuant to the contract executed between the discharger and the POTW.

[*Comment:* The existence of such a contract is a prerequisite to granting an extension under section 301(i)(2)(B) of the Act and § 125.96(e).]

Subpart K—Criteria and Standards for Best Management Practices Authorized Under Section 304(e) of the Act

§ 125.100 Purpose and scope.

This Subpart describes how best management practices (BMPs) for ancillary industrial activities under section 304(e) of the Act shall be reflected in permits, including best management practices promulgated in effluent limitations under section 304 and established on a case-by-case basis in permits under section 402(a)(1) of the Act. Best management practices authorized by section 304(e) are included in permits as requirements for the purposes of sections 301, 302, 306, 307, or 403 of the Act, as the case may be.

§ 125.101 Definition.

"Manufacture" means to produce as an intermediate or final product, or by-product.

§ 125.102 Applicability of best management practices.

Dischargers who use, manufacture, store, handle or discharge any pollutant listed as toxic under section 307(a)(1) of the Act or any pollutant listed as hazardous under section 311 of the Act are subject to the requirements of this Subpart for all activities which may result in significant amounts of those pollutants reaching waters of the United States. These activities are ancillary manufacturing operations including: materials storage areas; in-plant transfer, process and material handling areas; loading and unloading operations; plant site runoff; and sludge and waste disposal areas.

§ 125.103 Permit terms and conditions.

(a) Best management practices shall be expressly incorporated into a permit where required by an applicable EPA promulgated effluent limitations guideline under section 304(e);

(b) Best management practices may be expressly incorporated into a permit on a case-by-case basis where determined necessary to carry out the provisions of the Act under section 402(a)(1). In issuing a permit containing BMP

requirements, the Director shall consider the following factors:

(1) Toxicity of the pollutant(s);

(2) Quantity of the pollutant(s) used, produced, or discharged;

(3) History of NPDES permit violations;

(4) History of significant leaks or spills of toxic or hazardous pollutants;

(5) Potential for adverse impact on public health (e.g., proximity to a public water supply) or the environment (e.g., proximity to a sport or commerical fishery); and

(6) Any other factors determined to be relevant to the control of toxic or hazardous pollutants.

(c) Best management practices may be established in permits under paragraph (b) of this section alone or in combination with those required under paragraph (a) of this section.

(d) In addition to the requirements of paragraphs (a) and (b) of this section, dischargers covered under § 125.102 shall develop and implement a best management practices program in accordance with § 125.104 which prevents, or minimizes the potential for, the release of toxic or hazardous pollutants from ancillary activities to waters of the United States.

§ 125.104 Best management practices programs.

(a) BMP programs shall be developed in accordance with good engineering practices and with the provisions of this Subpart.

(b) The BMP program shall:

(1) Be documented in narrative form, and shall include any necessary plot plans, drawings or maps;

(2) Establish specific objectives for the control of toxic and hazardous pollutants.

(i) Each facility component or system shall be examined for its potential for causing a release of significant amounts of toxic or hazardous pollutants to waters of the United States due to equipment failure, improper operation, natural phenomena such as rain or snowfall, etc.

(ii) Where experience indicates a reasonable potential for equipment failure (e.g., a tank overflow or leakage), natural condition (e.g., precipitation), or other circumstances to result in significant amounts of toxic or hazardous pollutants reaching surface waters, the program should include a prediction of the direction, rate of flow and total quantity of toxic or hazardous pollutants which could be discharged from the facility as a result of each condition or circumstance;

(3) Establish specific best management practices to meet the objectives identified under paragraph (b)(2) of this section, addressing each component or system capable of causing a release of significant amounts of toxic or hazardous pollutants to the waters of the United States;

(4) The BMP program:

(i) May reflect requirements for Spill Prevention Control and Countermeasure (SPCC) plans under section 311 of the Act and 40 CFR Part 151, and may incorporate any part of such plans into the BMP program by reference;

[*Comment:* EPA has proposed section 311(j)(1)(c) regulations (43 FR 39276) which require facilities subject to NPDES to develop and implement SPCC plans to prevent discharges of reportable quantities of designated hazardous substances. While Subpart K requires only procedural activities and minor construction, the proposed 40 CFR 151 (SPCC regulations) are more stringent and comprehensive with respect to their requirements for spill prevention. In developing BMP programs in accordance with Subpart K, owners or operators should also consider the requirements of proposed 40 CFR 151 which may address many of the same areas of the facility covered by this Subpart.]

(ii) Shall assure the proper management of solid and hazardous waste in accordance with regulations promulgated under the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976 (RCRA) (40 U.S.C. 6901 *et seq*). Management practices required under RCRA regulations shall be expressly incorporated into the BMP program; and

(iii) Shall address the following points for the ancillary activities in § 125.102:

(A) Statement of Policy;
(B) Spill Control Committee;
(C) Material Inventory;
(D) Material Compatibility;
(E) Employee Training;
(F) Reporting and Notification Procedures;
(G) Visual Inspections;
(H) Preventive Maintenance;
(I) Housekeeping; and
(J) Security.

[*Comment:* Additional technical information on BMPs and the elements of a BMP program is contained in a publication entitled "NPDES Best Management Practices Guidance Document." Copies may be obtained by written request to Edward A. Kramer (EN-336), Office of Water Enforcement, Environmental Protection Agency, Washington, D.C. 20460.]

(c)(1) The BMP program must be clearly described and submitted as part of the permit application. An application which does not contain a BMP program shall be considered incomplete. Upon receipt of the application, the Director shall approve or modify the program in accordance with the requirements of this Subpart. The BMP program as approved or modified shall be included in the draft permit (§ 124.31). The BMP program shall be subject to the applicable permit issuance requirements of Part 124, resulting in the incorporation of the program (including any modifications of the program resulting from the permit issuance procedures) into the final permit.

(2) Proposed modifications to the BMP program which affect the discharger's permit obligations shall be submitted to the Director for approval. If the Director approves the proposed BMP program modification, the permit shall be modified in accordance with § 122.31, *provided* that the Director may waive the requirements for public notice and opportunity for hearing on such modification if he or she determines that the modification is not significant. The BMP program, or modification thereof, shall be fully implemented as soon as possible but not later than one year after permit issuance, modification, or revocation and reissuance unless the Director specifies a later date in the permit.

[*Comment:* A later date may be specified in the permit, for example, to enable coordinated preparation of the BMP program required under these regulations and the SPCC plan required under 40 CFR 151 or to allow for the completion of construction projects related to the facility's BMP or SPCC program.]

(d) The discharger shall maintain a description of the BMP program at the facility and shall make the description available to the Director upon request.

(e) The owner or operator of a facility subject to this Subpart shall amend the BMP program in accordance with the provisions of this Subpart whenever there is a change in facility design, construction, operation, or maintenance which materially affects the facility's potential for discharge of significant amounts of hazardous or toxic pollutants into the waters of the United States.

(f) If the BMP program proves to be ineffective in achieving the general objective of preventing the release of significant amounts of toxic or hazardous pollutants to those waters and the specific objectives and requirements under paragraph (b) of this section, the permit and/or the BMP program shall be subject to modification to incorporate revised BMP requirements.

Subpart L—Criteria and Standards for Imposing Conditions for the Disposal of Sewage Sludge Under Section 405 of the Act [Reserved]

Subpart M—Ocean Dumping Criteria Under Section 403 of the Act [Reserved]

PART 402—COOLING WATER INTAKE STRUCTURES [DELETED]

8. 40 CFR Part 402 is deleted.

PART 403—GENERAL PRETREATMENT REGULATIONS FOR EXISTING AND NEW SOURCES OF POLLUTION

9. 40 CFR Part 403 is amended as follows:

A. The Table of Contents is amended by revising the heading for § 403.11 to read as follows:

* * * * *

§ 403.11 Approval procedures for POTW pretreatment programs and revision of categorical pretreatment standards.

* * * * *

B. Section 403.7 is amended by revising paragraph (e)(3) to read as follows:

§ 403.7 [Amended]

* * * * *

(e) * * * (3) The Regional Administrator may agree, in the Memorandum of Agreement under 40 CFR 123.7, to waive the right to review and object to Submissions for authority to revise discharge limits under this section. Such an agreement shall not restrict the Regional Administrator's right to comment upon or object to permits issued to POTWs except to the extent permitted under 40 CFR 123.7(b)(3)(i)(D).

* * * * *

C. Section 403.8 is amended by revising the first sentence of paragraph (f)(2)(vii) to read as follows:

§ 403.8 [Amended]

* * * * *

(f) * * * (2) * * * (vii) Comply with the public participation requirements of 40 CFR Part 25 in the enforcement of National Pretreatment Standards.

* * * * *

§ 403.9 [Amended]

D. Section 403.9(d) is deleted and §§ 403.9(e) and (f) are redesignated as §§ 403.9(d) and (e), respectively.

§ 403.10 [Amended]

E. Section 403.10(d)(1) is amended by deleting the words "set forth in § 403.10(b)" from the first and second sentences.

F. Section 403.10 is amended by revising paragraph (f)(1) to read as follows:

* * * * *

(f) * * * (1) Legal Authority. The Attorney General's Statement submitted in accordance with paragraph (g)(1)(i) shall certify that the Director has authority under State law to operate and enforce the State pretreatment program to the extent required by this Part and by 40 CFR 123.32. At a minimum, the Director shall have the authority to:

* * * * *

G. Section 403.10 is amended by revising paragraph (g)(1) to read as follows:

* * * * *

(g)(1)(i) A statement from the State Attorney General (or the Attorney for those State agencies which have independent legal counsel) that the laws of the State provide adequate authority to implement the requirements of this Part. The authorities cited by the Attorney General in this statement shall be in the form of lawfully adopted State statutes and regulations which shall be in full force and effect before the time of approval of the State pretreatment program.

(ii) Copies of all State statutes and regulations cited in the above statement.

* * * * *

H. Section 403.10 is amended by revising paragraph (g)(3) to read as follows:

* * * * *

(g) * * *

(3) Any modifications or additions to the Memorandum of Agreement (required by 40 CFR 123.7) which may be necessary for EPA and the State to implement the requirements of this Part.

* * * * *

I. Section 403.10 is amended by revising paragraph (h)(2) to read as follows:

* * * * *

(h) * * *

(2) Commence the program revision process set out in 40 CFR 123.61. For purposes of that section all requests for approval of State pretreatment programs shall be deemed substantial program modifications. A comment period of at least 30 days and the opportunity for a hearing shall be afforded the public on all such proposed program revisions.

* * * * *

J. Section 403.10(i) is amended by substituting the words "this Part" for the words "paragraph (g) of this section" in both places they appear.

K. The heading of § 403.11 is revised to read as follows:

§ 403.11 Approval Procedures for POTW Pretreatment Programs and Revision of Categorical Pretreatment Standards.

L. Section 403.11 is amended by revising the first sentence to read as follows:

"The following procedures shall be followed in approving or denying requests for POTW Pretreatment Program approval:"

* * * * *

M. Section 403.11 is amended by deleting all references to § 403.10(f) and (g).

N. Section 403.11(a) is amended by changing the reference in two places from "§ 403.9(e) and (f)" to "§ 403.9(d) and (e)."

O. Section 403.11(b)(1)(i) is amended by deleting from the first sentence the words "shall be published in the Federal Register in the case of a State Submission and"

P. Section 403.11(b)(1)(i)(A) is deleted and subparagraphs (B) and (C) are redesignated to (A) and (B) respectively.

Q. Section 403.11 is amended by revising subparagraph (b)(1)(i)(B), (formerly (b)(1)(i)(C)), to read as follows:

* * * * *

(b) * * *
(1) * * *
(i) * * *

(B) Publication of a notice of request for approval of the Submission in the largest daily newspaper within the jurisdiction(s) served by the POTW.

* * * * *

R. Section 403.11 is amended by substituting the words "30 days" wherever the words "45 days" appear.

S. Section 403.11(b)(2)(ii) is amended by deleting the words "a State or."

T. Section 403.11(e) is amended by deleting the words "or Director."

Office of the Secretary

Regional Action Planning Commissions Operations; Administration

DEPARTMENT OF COMMERCE

Office of the Secretary

[13 CFR Part 540]

Regional Action Planning Commissions Operations; Administration

AGENCY: The Special Assistant for Regional Development, Office of the Secretary, Department of Commerce.

ACTION: Proposed rule.

SUMMARY: The Department of Commerce proposes to amend its existing reuglàtions on the Regional Action Planning Commissions to include requirements governing Commissions' administrative responsibilities and the administrative requirements they apply to financial assistance recipients. The objectives of the revisions are to include some requirements previously specified in Secretarial Guidelines, to make general improvements in existing regulations, to add administrative procedures based on past experience in implementing Commission programs, and to make the regulations easily understandable. If adopted, the new rules will enable the Commissions to handle their administrative responsibilities in a more efficient, economical manner. The rules will also be consistent with standard Federal fiscal policies and will insure that grantees and contractors fulfill their responsibilities as recipients of public funds. The proposed rules porvide that individual Commissions may adopt internal codes which, when approved by the Secretary, will supplant these regulations.

DATES: Comments must be received on or before August 6, 1979.

ADDRESS: Send comments to: Office of Regional Development, Room 2092, Main Commerce Building, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: Ms. Jane Lollis, Office of Regional Development, Room 2092, U.S. Department of Commerce, Washington, D.C. 20230. Telephone: (202) 377–5203.

SUPPLEMENTARY INFORMATION: In March, 1978, the Special Assistant for Regional Development of the Department of Commerce and the Federal Cochairmen of the Regional Action Planning Commissions authorized under Title V of the Public Works and Economic Development Act (42 U.S.C. 3181 *et seq.*) initiated discussions regarding the development of minimum administrative policies and procedures applicable to the Regional Commissions. The need for new guidelines or regulations arose for the following reasons:

(1) Basic administrative and program guidelines and rules had not been thoroughly reviewed since 1970 and new requirements affecting Federal programs have been added and others changed;

(2) The commissions are not federal agencies nor are the Federal Cochairmen employees of the Department of Commerce, so that the management procedures of the Department do no apply;

(3) Since the Commissions are neither state nor local governments, they are subject to none of the procedures applicable to these grantees;

(4) To strengthen the State-Federal partnership and provide the necessary accountability by both partners, clear standards were needed for operation of the commissions;

(5) More comprehensive and precise management procedures were needed to allow for better management by the Commissions and to prevent improprieties.

In order to be enforceable by the Secretary, the rules applicable to the Commissions must be in the form of regulations, developed after public comment; at the same time, any administrative code adopted by the Commissions require both the approval of the Secretary and minimum adherence to the published regulations.

As a result of these discussions, Department of Commerce staff prepared for review a set of draft administrative regulations, which were presented to the Federal Cochairmen in June, 1978. At the request of the Federal Cochairmen, it was agreed in July, 1978, that the Cochairmen also would develop a comprehensive draft document, in consultation with the regional commissions and the Department, incorporating the draft regulations and treating additional areas of internal Commission management. It was further agreed that publications of these regulations would be delayed pending the submission of a draft of the code. On April 9, 1979, the Federal Cochairmen transmitted this draft, entitled the "Uniform Commission Code," to the Secretary, the Commissions and the member Governors for review and comment.

The rules proposed today respond to problems cited in the now completed audit reviews of commission programs and incorporate portions of the Uniform Code which properly may be classified as administrative rules. The Department views this publication as a continuation of the consultation process involving the Department, the Federal Cochairmen, the member Governors, Commission staff, and the public. Also, proposed § 540.201 provides that a commission may adopt its own administrative code which, when approved by the Secretary as meeting the standards of these regulations, will take effect instead of the regulations. The Department anticipates that most Commissions will choose to adopt their own code. We intend to work closely with the Federal Cochairmen and the Governors to insure that any codes include those minimum standards and procedures which will assure sound fiscal management and proper accountability to the public, the Congress and the President. These regulations will be the basic reference for development of the codes in those areas involving the use of Federal funds.

What is the plan for obtaining public comment?

By publication of the proposed regulations, the Department invites interested members of the public to submit their comments. Simultaneously, we are forwarding copies of the proposed rules to the Federal Cochairmen and the Governors who are members of the Commissions, the Chairmen of the House and Senate committees and subcommittees charges with oversight of the commission program, and to the Advisory Commission on Intergovernmental Relations and the National Governors Association. Depending upon the nature and extent of comments received, the Department may initiate a second cycle of public comments.

Are these "significant regulations" as defined in Executive Order 12044?

Executive order 12044 and Department of Commerce Administrative Order 218–7 set forth requirements for improving significant regulations issued by the Department of Commerce. The Special Assistant for Regional Development has determined that these proposed administrative regulations are not "significant," primarily because: they have limited impact on the public; the standards are the minimum for good management and compliance will not be burdensome; the programmatic authorities of the commissions are not affected; and the standards prescribed will not cause major shifts of resources within a commission's budget. Although Executive Order 12044 does not apply to these regulations, the Department feels that is has met the purposes of the Order by its consideration of the need for

regulations and the examination of alternatives, the previous and proposed consultation procedures, and the adherence to standards of plain English during the drafting process.

What will these regulations accomplish?

These regulations reflect the delegation of the Secretary's project approval process and the consequent administrative duties flowing from that delegation. The Regional Development Commissions are joint State/Federal entities authorized to engage in a variety of development planning and financial assistance actitivies. They receive their funding from the Secretary of Commerce, who exercises administrative and program oversight, along with each Commission's Presidentially-appointed Federal Cochairman. Under Executive Order 11386, the Secretary provides Federal policy guidance to the Federal Cochairmen. Under Section 701 of the Public Works and Economic Development Act, 42 U.S.C. 3211, the Secretary is authorized to adopt regulations applicable to the Regional Commissions and the Secretary's functions. The proposed regulations have been drafted under this authority and are applicable to the operations of the Regional Commissions. They do not apply to the operation of each Federal Cochairman's office (or staff), which remains subject to Federal laws and standards.

The application of minimum fiscal and management standards for commissions is an objective shared by the Congress, the Department of Commerce, the Federal Cochairmen and the Governors in improving the accountability for the use of public funds by the commissions. The present administrative standards have proved to the inadequate to meet changing conditions, Federal requirements and authorities since 1970. The Commissions and the Department have found that many problems have arisen due to out-dated or non-existant policies and procedures, especially in the area of grant and contract administration. Accordingly, these proposed regulations are intended to provide minimum standards for Commission's administrative policies and procedures in order to prevent problems and assure that public funds are bing utilized efficiently for the purposes authorized by Congress. These proposed regulations are based on the OMB Circulars A-110 and A-102 relating to grants administration and they impose the same basic requirements on the commissions as the Circulars impose on other federal grantees. Should the Commissions wish they can develop rules for themselves over and above these new requirements.

The proposed regulations are divided into two subparts. Subpart A deals with the transfer of funds to the commissions for their administrative expenses. Subpart B contains minimum administrative requirements applicable to the following Commission activities:

1. Annual Financial Planning and Fiscal Management;
2. Property Management;
3. Records Management;
4. Procurement;
5. Personnel
   a. Duties of the Executive Director
   b. Pay, Benefits and Expenses
   c. Employee Conduct
6. Specific Uses of Funds
7. Commission Financial Assistance
   a. Administrative Standards
   b. Cost Principles
   c. Use of Grants of Contracts
   d. Provisions of Financial Assistance Agreements
   e. Nondiscrimination

Generally, the standards in Subpart B are those which other Federal agencies apply to recipients of financial assistance and with which Federal grantees are familiar.

Accordingly, it is proposed to revise Part 540 of Title 13 CFR to read as follows:

PART 540—ADMINISTRATION

Subpart A—Administrative Expense Grants

Sec.

540.101 Authority and purpose.
540.102 Procedure for obtaining administrative expenses.

Subpart B—General Administrative Provisions Governing Federally Funded Activities and Expenses of the Commissions

540.201 Purpose.
540.202 Financial plan and fiscal management.
540.203 Cost principles applicable to Commissions.
540.204 Records.
540.205 Property management.
540.206 Procurement by Commissions.
540.207 Personnel.
540.208 Prohibition on use of federal funds.
540.209 Administrative requirements for recipients of Commission assistance.
540.210 Nondiscrimination.
540.211 Remedies for noncompliance.

Authority: 42 U.S.C. 3181 et seq., 42 U.S.C. 3204, 42 U.S.C. 3211, E.O. 11386, Department Organization Order 15-5.

Subpart A—Administrative Expense Grants

§ 540.101 Authority and purpose.

(a) The Secretary is authorized by section 505(b) of the Act (42 U.S.C. 3185(b)) to review and approve the administrative expenses of each Regional Commission, and to pay such expenses as the Secretary approves from Federal funds appropriated for such purposes. For the period ending with the last day of the second full fiscal year following the date of establishment of a Commission, the entire administrative expenses of the Commission shall be paid by the Federal Government. Thereafter 50 per centum of such expenses shall be paid by the Federal Government and 50 per centum by the States in the region, except that the administrative expenses of the Federal Cochairman and the staff shall be paid solely by the Federal Government.

(b) The purpose of this subpart is to outline the procedures by which such administrative expenses will be paid by the Federal Government and to set forth provisions governing the expenditure of those funds.

§ 540.102 Procedure for obtaining administrative expenses.

(a) As a condition to receiving administrative expense funds from the Federal Government, each Commission through the Federal Cochairmen shall submit for approval a financial plan to the Secretary in such form as the Secretary may prescribe.

(b) Such administrative expense funds as are approved shall be made available on a quarterly basis. Approved funds will be deposited into a special trust account established by the U.S. Treasury for the exclusive use of the Regional Commissions. Expenditures from such trust funds shall be made only upon the proper certification of a duly authorized officer of the Commission.

Subpart B—General Administrative Provisions Governing Federally Funded Activities and Expenses of the Commissions

§ 540.201 Purpose

(a) The purpose of this part is to assure that all Regional Commissions follow standard and acceptable procedures in administering programs authorized by the Act and assure that they are administratively accountable for the Federal funds which they receive.

(b) A Commission may adopt a code governing the policies and procedures of

that Commission. Any code duly adopted by a Commission and approved by the Secretary as meeting all the requirements of §§ 540.202–209 of these regulations may be used in lieu of such sections. All amendments to such codes shall be approved by the Secretary before they may become effective. A violation of any provision of a code duly adopted by a Commission and approved by the Secretary under this section may be deemed by the Secretary a violation of these regulations and the terms of the grant.

(c) This Subpart shall become effective on October 1, 1979.

§ 540.202 Financial plan and fiscal management

(a) *General.* Each fiscal year each Commission shall prepare an annual financial plan detailing the anticipated administrative and program expenses of the Commission for the fiscal year as prescribed by the Secretary including, but not limited to, the items set forth below:

(1) For all program areas (i.e., Supplemental Grants, Technical Assistance, Planning, Demonstration Programs) the financial plan shall specify estimated quarterly and total expenditures by appropriate sub-program areas.

(2) For the administrative expenses of the Commission, the financial plan shall specify estimated quarterly and total expenditures by object class.

On or before August 1 of each year, the Commission shall have prepared and voted approval of a financial plan for the next fiscal year.

(b) After approval by the Commission, such plan shall be transmitted through the Federal Cochairman to the Secretary of Commerce for review and approval.

(c) Federal grant assistance may be used only in the performance of the activities and work program outlined in the Commission's approved financial plan prepared pursuant to this section.

(d) When required by the Secretary of Commerce or the General Accounting Office policies and procedures, the Commission shall select qualified certified public accountants to make an annual audit of the financial accounts of the Commission.

(e) *Federal Fiscal Management.* (1) Each Federal Cochairman, working with the Commission, will prepare: (i) All budget requests for Commission activities in appropriate form for presentation before budget authorities and congressional committees;

(ii) All requested Federal financial plans and other documentation required in order to receive appropriated Federal funds from the Department of Commerce.

(2) Under the delegated authority of the Secretary of Commerce (DOO 15–6), the Federal Cochairman acts as grantor of Federal funds to the Commission and insures adherence to the Act and to all Federal guidelines and regulations applicable to such grants. As the Federal member in the Commission, the Federal Cochairman is a recipient with the State Cochairman and the States, of the Federal funds. He or she, similarly, has trusteeship equal with that of the States' for the Commission's trust fund containing program and administrative monies.

(3) As the Federal member on the Commission, the Federal Cochairman acts to effect transfers of supplemental grant funds to appropriate Federal grant-in-aid agencies for projects approved by the Commission. He or she insures that all applicable requirements of the Public Works and Economic Development Act (42 U.S.C. 3181 *et seq.*) and Commission requirements are adhered to by the recipient Federal grant-in-aid agency.

(f) Cash management (reserved).

§ 540.203 Cost principles applicable to commissions

The Secretary and the Federal Cochairman shall apply the principles and standards of Federal Management Circular 74–4 for the purpose of determining the reasonableness, allowability and allocability of costs incurred by the Commission.

§ 540.204 Records

(a) The Commissions shall keep such records as will fully disclose the amount and disposition by the recipients of all the funds received from the Federal Government and all other grantors, the total cost of the project or undertaking in connection with which such assistance is given or used, and the amount and nature of that portion of the cost of the project or undertaking supplied by other sources. These records shall also include (1) a record of key action on individual projects which relate to both award and post-award monitoring, evaluation and close-out, in sufficient detail to understand the history of the project and its current status, and (2) such other records as will facilitate an effective audit.

(b) Each Commission shall assure retention of financial records, supporting documents, statistical records, and all other records pertinent to its activities for a minimum period of three years, with the following qualifications:

(1) If any litigation, claim or audit is started before the expiration of the three-year period, the Commission shall retain the records until all litigations, claims or audit findings involving the records have been resolved and the records released by the Secretary.

(2) If a record or set of records is covered by the Records Control Schedule for Regional Action Planning Commissions (U.S. Department of Commerce, March, 1978), the Commissions shall follow the requirements of the Records Control Schedule.

(c) Unless the Records Control Schedule provides another standard, a record retention period starts from one of the following two dates, whichever is later:

(1) The last day of the Federal fiscal year during which the activities occurred for which the record is kept, or

(2) If the record concerns a project, the last day of the Federal fiscal year in which the project was completed.

(d) A Federal Cochairman or the Secretary may transfer certain Commission records to the custody of the Federal Government when either official determines that the records possess long-term value and gives written notice to the Commission.

(e) The Secretary of Commerce, and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any pertinent books, documents, papers and records of a Commission for the purpose of making audits, examinations, excerpts and transcripts.

(f) A Commission shall provide for public access to the records of grantees that are pertinent to a grant. However, the Commission may impose limitations on access when it can demonstrate to the Secretary of Commerce or his or her designee that such records must be kept confidential and would have been excepted from disclosure pursuant to the Freedom of Information Act (5 U.S.C. 552) if the records had belonged to the Federal Government.

§ 540.205 Property management

(a) Each Commission shall observe the standards in this section relating to the utilization and disposition of property furnished to the Commission by the Federal Government or acquired by the Commission in whole or in part with Federal funds. A Commission may adopt its own standards and procedures governing the management of property acquired by it as long as the provisions of this section are included in the Commission's standards.

(b) The following definitions apply for the purposes of this section:

(1) *Real property.* Real property means land, including land improvements, structures and appurtenances thereto, excluding movable machinery and equipment.

(2) *Personal property.* Property of any kind except real property, i.e. tangible (having physical existence) or intangible (having no physical existence, such as patents, inventions, and copyrights).

(3) *Nonexpendable personal property.* Nonexpendable personal property means tangible personal property having a useful life of more than one year and an acquisition cost of $300 or more per unit. A Commission may use its own definition of non-expendable personal property provided that such definition would at least include all tangible personal property as defined above.

(4) *Expendable personal property.* Expendable personal property refers to all tangible personal property other than nonexpendable property.

(5) *Excess property.* Excess property means Federal property under the control of any Federal agency which, as determined by the head thereof, is no longer required for its needs or discharge of its responsibilities.

(6) *Acquisition cost of purchased nonexpendable personal property.* Acquisition cost of an item of purchased nonexpendable personal property including the cost of modifications, attachments, accessories, or auxiliary apparatus necessary to make the property usable for the purpose for which it was acquired. Other charges such as the cost of installations, transportation, taxes, duty, or protective intransit insurance, may be included in the unit acquisition cost.

(c) *Real property.* No Commission shall use any Federal funds provided by the Federal Cochairman or by other Federal sources to purchase real property. This prohibition does not apply to bona fide Commission grantees, whose acquisition of real property is governed by other regulations in this Part. This prohibition has no relationship to a gift or donation of real property under the authority of 42 U.S.C. 3186(a)(6), which provides the administrative powers of Regional Commissions. If a Commission acquires real property from a recipient of Commission assistance, it shall request and abide by disposition instructions from the Federal Cochairman.

(d) *Nonexpendable personal property furnished by the Federal Government.* Title to Federally owned property furnished to a Commission remains vested in the Federal Government.

(e) *Inventory.* Each Commission shall submit annually to the Federal Cochairman an inventory listing of Federally owned property in its custody. When a Commission no longer needs the property, it shall report the property to the Federal Cochairman for further Federal utilization. If the Federal Cochairman or the Federal agency from which the property was acquired has no further need for the property, it shall be declared excess and reported to the General Services Administration. After completion of Federal review, appropriate disposition instructions will be issued to the Commission.

(f) *Other nonexpendable property.* When nonexpendable tanible property is acquired by a Commission in part or in whole with funds provided by the Federal Cochairman, title shall not be taken by the Federal Government but shall vest in the Commission subject to the following conditions:

(1) For items of nonexpendable personal property having a unit acquisition cost of $1000 or more, the Federal Government reserves the right to transfer title to the Federal Government or to another Commission named by the Federal Government. Title will be transferred only after the Federal Cochairman identifies the property to the Commission in writing and gives thirty days notice to the Commission that the Federal Government intends to transfer title. When the Federal Government exercises the right to take title, the personal property shall be subject to the provisions for federally-owned nonexpendable property discussed in paragraphs (d) and (e) of this section.

(2) The Commission shall use the property for the activities for which it was acquired. When it is no longer needed for the original activity, the Commission may use the property in its other activities sponsored with Federal funds.

(3) Use of any property for non-Commission activities is prohibited unless approved by the Federal Cochairman and the Secretary. The Federal Cochairman may require a Commission to impose user charges if appropriate. (Department of Commerce Administrative Order 203–5 provides guidance relating to the imposition of user charges.)

(4) When the Commission can no longer use the property:

(i) For nonexpendable property with a unit acquisition cost of less than $1,000, it may sell the property and put the proceeds into the account which funded the purchase;

(ii) For nonexpendable personal property with a unit acquisition cost of $1,000 or more, the Commission shall request disposition instructions from the Federal Cochairman, who shall determine whether the property can be used by the Federal Government. If directed to do so, the Commission shall sell the property and reimburse the Federal Cochairman an amount computed by applying to the sales proceeds the percentage of Federal participation in the cost of the original purchase. The Commission may deduct and retain $100 from the Federal share or ten percent of the proceeds, whichever is greater, for the Commission's selling and handling expenses, but this amount shall not exceed 10 percent of the proceeds.

(g) *Intangible Property.* (1) Inventions and Patents. When a program produces patentable items, patent rights, processes or inventions in whole or in part with funds provided by the Federal Cochairman, such facts shall be promptly and fully reported to the Federal Cochairman. The Federal Cochairman will then determine whether to protect the invention or discovery and how the rights in the invention or discovery, including rights under any patents issued thereon, shall be allocated and administered, consistent with Federal patent policies.

(2) Copyrights. The Commission shall reserve to the Federal Cochairman a royalty-free nonexclusive and irrevocable right to reproduce, publish or otherwise use and authorize others to use for Government purposes, any copyrighted materials to which the Commission has such rights.

(h) *Property management standards for personal property.* Each Commission shall have property management standards for personal property which include the following minimum requirements:

(1) Property records shall include—

(i) A description of the property;

(ii) Identifying serial numbers;

(iii) Name of the holder of the title to the property;

(iv) Acquisition date, cost and the name of the vendor;

(v) Percentage of Federal participation in the cost of the activity for which the property was acquired;

(vi) Unit acquisition cost; and

(vii) Ultimate disposition data.

(2) Property owned by the Federal Government shall be marked to indicate Federal ownership.

(3) Except as specified in paragraph (f) of this section, each Commission shall take a physical inventory of property and reconcile the results with the

property records at least once every two years. The Commission shall report results, discrepancies and follow-up to the Federal Cochairman, who will take appropriate action.

(i) *Expendable personal property.* Title to expendable personal property shall vest in the Commission upon acquisition.

(j) Any nonexpendable disposition or inventory adjustment of Commission property shall be noted in the applicable financial records.

(k) *Program Income.* The purpose of this section is to provide standards for Commissions to account for program income resulting from activities financed in whole or in part with Federal funds. Program income means gross income earned by a Commission from activities supported by Federal funds. Such earnings exclude interest earned or advances and may include, but will not be limited to, income from service fees, sales, user charges, and royalties.

(1) Proceeds from the sale of real and personal property, either provided by the Federal Government or purchased in whole or in part with Federal funds, shall be handled in accordance with paragraphs (c) and (f) of this section pertaining to Property Management.

(2) All program income earned during a fiscal year shall be retained by the Commission and, in accordance with the transfer of funds from the Federal Cochairman, shall be:

(i) Added to funds committed to the particular activity from which the program income arose and used to further eligible objectives; or

(ii) Deducted from the total costs of the particular activity for the purpose of determining the next costs on which the Federal share of costs will be based.

(3) Each Commission shall provide for recording the reciept and expenditure of revenues as a part of an activity's transactions when such revenues are specifically earmarked for an activity in accordance with the transfer of funds from the Federal Cochairman.

§ 540.206 Procurement by commissions.

This section prescribes minimum standards for use by each Commission in establishing its own procedures for the procurement of supplies, equipment, and other services in part or in whole with funds provided by the Federal Cochairman. These standards are furnished to insure that such materials and service are obtained in an effective and economical manner.

(a) *Commission responsibility.* The standards contained in this section do not relieve a Commission of the contractural responsibilities arising under its contracts. The Commission is the responsible authority, without recourse to the Department of Commerce, or to the Federal Government, regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements entered into by the Commission in support of activities under financial assistance provided by the Federal Cochairman, subject to any rights of legal appeal which a contractor may have. This includes, but is not limited to: disputes; claims; protests of awards; source evaluations or other matters of a contractural nature. Matters concerning criminal violation of law are to be referred by the Federal or State Cochairmen, Commission members or the staff immediately to the local, state, and/or Federal authority as may have proper jurisdiction.

(b) *Procurement regulations.* A Commission may adopt its own procurement regulations which reflect any applicable State and local law, rules or regulations, provided that procurement made in part or wholly with Federal funds must adhere to the minimum standards set forth in this section.

(c) *Code of conduct for procurement.* Each Commission shall adopt a written code or standards of conduct which shall govern the performance of their officers, employees or agents engaged in the award and administration of contracts. The Commission shall include in this code the standards for employees required by § 540.207 of these regulations.

(d) *Extent of competition.* A Commission shall conduct all procurement transactions (regardless of whether by formal advertising or by negotiation and without regard to dollar value) in a manner that provides maximum open and free competition consistent with these regulations. A Commission shall not award a contract when competition is restricted or eliminated. Examples of restriction of competition or restraint of trade include unreasonable requirements placed on firms in order for them to qualify to do business or situations involving noncompetitive practices among firms. In order to insure objective contractor performance and eliminate unfair competitive advantage, a contractor that develops or drafts for a particular procurement specifications; requirements; a statement of work; or invitations for bids or requests for proposals shall be excluded from competing for and performing work under the ensuing procurement except when the Federal Cochairman gives written approval to a Commission's request to waive this requirement for a particular procurement. A request for a waiver shall include at least the reason for the waiver and the benefits expected from the waiver compared with the required procedures.

(e) *Procurement procedures.* Each Commission shall establish procurement procedures which provide for, at a minimum, the following procedural requirements:

(1) Before making an award, Commission officials shall review proposed procurement actions to avoid purchasing unnecessary or duplicative items. Where appropriate, these officials shall make an analysis of lease and purchase alternatives to determine which procurement approach would result in the most economical, practical procurement.

(2) Solicitations of offers, whether by formal advertising or negotiations, shall incorporate a clear and accurate description of the technical requirements for the material, product, or service to be procured. Such description shall not, in competitive procurement, contain features which unduly restrict competition.

(3) Each Commission shall make positive efforts to utilize small business concerns and minority owned business enterprises as sources of supplies and services. Such efforts should allow these sources the maximum feasible opportunity to compete for contracts utilizing Federal funds.

A Commission must obtain the approval of the Federal Cochairman and the Secretary prior to beginning any steps to procure for itself construction or repair work to realty. At the time of approval, these officials shall provide appropriate guidance to the Commission governing procurement procedures for construction or repair contracts.

(f) *Type of procuring instruments.* The type of procuring instruments used (i.e., fixed price contracts, cost reimbursable contracts, purchase order, etc.), shall be appropriate for the particular procurement and for promoting the best interest of the Commission program involved. (41 CFR 1–3.403 may be used for guidance in selecting the appropriate contract type.) The "cost-plus-a-percentage-of-cost-fee" method of contracting shall not be used.

(g) *Selection of procurement method.*

(1) Whenever feasible, formal advertising, with adequate purchase description, sealed bids, and public openings shall be the preferred method of procurement. However, procurements of $10,000 or less need not be so advertised unless otherwise required by

a State law or regulations. Where such advertised bids are obtained, the awards shall be made to the responsible bidder whose bid is responsive to the invitation and is most advantageous to the Commission, price and other factors considered. (Factors such as discounts, transportation costs, taxes and life cycle costs may be considered in determining the lowest bid.) Invitations for bids shall clearly set forth all requirements which the bidder must fulfill in order for his bid to be evaluated by the Commission. Any or all bids may be rejected when it is in the Commission's interest to do so, and such rejections are in accordance with applicable State law, rules, and regulations.

(2) The Commission may negotiate if it is impracticable and unfeasible to use formal advertising. Generally, the Commission may negotiate procurements if:

(i) The public exigency will not permit the delay incident to advertising;

(ii) The material or service to be procured is available from only one person or firm;

(iii) The aggregate amount involved does not exceed $10,000;

(iv) The contract is for personal or professional services, or for any service to be rendered by a university, college, or other educational institution;

(v) The material or services are to be procured and used outside the limits of the United States and its possessions;

(vi) No acceptable bids have been received after formal advertising. (In such cases, notification of intention to negotiate and reasonable opportunity to negotiate must be given to each responsible bidder who submitted a bid in response to the invitation for bids.);

(vii) The purchases are for highly perishable materials or medical supplies, for material or services where the prices are established by law, for technical items or equipment requiring standardization and interchangeability of parts with existing equipment, for experimental, developmental or research work, for supplies purchased for authorized resale, and for technical or specialized supplies requiring substantial initial investment for manufacture. (Notwithstanding the existence of circumstances justifying negotiation, competition should be obtained to the maximum extent practicable.)

(3) All contemplated sole source procurements where the aggregate expenditure is expected to exceed $10,000 shall be referred to the Federal Cochairman for prior written approval. The file shall include the justification for the sole source procurement and the Federal Cochairmen's written approval.

(h) *Responsible contractors.* A Commission shall award a contract only to a responsible contractor who possesses the demonstrated ability to perform successfully under the terms and conditions of a proposed procurement. The Commission shall give consideration to such matters as contractor integrity, record of past performance, and financial and technical resources or accessibility to necessary resources.

(i) *Commission procurement records.* Each Commission shall maintain records or files sufficient to detail the significant history of a procurement. These records or files shall include, but are not necessarily limited to, information pertinent to the following: rationale for the method of procurement, selection of contract type, contractor selection, and the basis for the cost or price negotiated including the basis for the decision that the cost was reasonable, that the product could be delivered for the price and within the time schedule proposed, evidence of the administering and monitoring actions during contract administration.

(j) *Contract administration.* Each commission shall maintain a system for contract administration to ensure that contractors conform with the terms, conditions, and specifications of the contract or purchase order including modifications, to identify and endeavor to resolve conditions that might adversely affect the Commission's interest, and to ensure that the Commission makes adequate and timely followups of all purchases.

(k) *Contract provisions.* Each Commission shall include, in addition to provisions to define a sound and complete agreement, the following provisions in all procurement contracts or, where applicable, purchase orders:

(1) Contracts shall contain contractual provisions or conditions which will allow for administrative, contractual, or legal remedies in instances where contracts violate or breach contract terms, and provide for such sanctions, penalties, and remedial actions as may be appropriate.

(2) All contracts in excess of $10,000 shall contain suitable provisions for termination by the Commission including the manner by which it will be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated because of circumstances beyond the control of the contractor.

(3) All contracts awarded by a Commission and its contractors as subgrantees having a value of more than $10,000 shall contain a provision requiring compliance with Executive Order 11246, entitled "Equal Employment Opportunity," as amended by Executive Order 11375, and as supplemented in Department of Labor regulations (41 CFR Part 60–1).

(4) Where applicable, all procurements by a Commission in excess of $2,500 that involve the employment of mechanics or laborers shall include a provision for compliance with sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 USC 327–330) as supplemented by Department of Labor regulations (29 CFR, Part 5). Under section 103 of the Act, each contractor shall be required to compute the wages of every mechanic and laborer on the basis of a standard work day of 8 hours and a standard work week of 40 hours. Work in excess of the standard workday or workweek is permissible provided that the worker is compensated at a rate of not less than 1½ times the basic rate of pay for all hours worked in excess of 8 hours in any calendar day or 40 hours in the work week.

(5) All contracts (except those of $10,000 or less) awarded by a Commission shall include a provision to the effect that the Commission, the Federal Cochairman, the Secretary of Commerce and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the contractor which are directly pertinent to a specific program for the purpose of making audit, examination, excerpts, and transcriptions.

(6) A Commission shall require its contractors to maintain all required records for three years after the Commission makes final payments.

(7) Contracts of amounts in excess of $100,000 shall contain a provision that requires the contractor to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act of 1970, (42 USC 1857 et seq.), and the Federal Water Pollution Control Act (13 USC 1252 et seq.), as amended. A Commission shall report violations to the Federal Cochairman, and the Regional Office of the Environmental Protection Agency.

(l) *Technical Evaluations and Cost or Price analysis.* Each commission shall perform and document in the project files a technical evaluation and a cost or price analysis in connection with every negotiated procurement action including

contract modifications. 41 CFR 1-1.305, 306 and 307 provide guidance as to how to perform a technical evaluation. Price analysis may be accomplished in various ways, including the comparison of price quotations submitted, market prices and similar indicia, together with discounts. Cost analysis is the review and evaluation of each element of cost to determine reasonableness, allocability and allowability. The method and degree of analysis, however, is dependent on the facts surrounding the particular procurement. The Commission shall perform cost analysis when the offeror is required to submit the elements of his/her estimated cost for sole source procurements, and when adequate price competition is lacking, e.g., when only a single bid is received and it is impossible to perform a valid price analysis. Price analysis shall be used in all other instances to determine the reasonableness of the proposed contract price.

(m) *Federal review of proposed contracts.* The Secretary of Commerce or his or her designee may require Department of Commerce approval of proposed contracts and related procurement documents (such as requests for proposal and invitations for bids) whenever a Commission's procurement procedures do not comply with this section and the Federal Cochairman and the Commission are notified in writing as to what corrective action is needed. The Secretary shall send copies of such notifications to the Office of Management and Budget.

(n) *Cooperative intergovernmental agreements.*

(1) To foster greater economy and efficiency in public procurement, each Commission is encouraged to enter into cooperative Federal, Commission or State intergovernmental agreements for procurement and/or use of common goods and services. Before such cooperative purchasing agreements are entered into, a Commission shall determine that joint purchases will be, or are being made, in accordance with the procurement standards in this section.

(2) To benefit from federal purchasing resources, a Commission's procurement of supplies, materials, equipment, furniture and services should be channeled through the central procurement office of the Department of Commerce.

§ 540.207 Personnel.

(a) An Executive Director of a Commission is chief administrative officer of the Commission. Subject to the policies and procedures adopted by the Commission and any applicable laws, regulations and guidelines, an Executive Director is responsible for the efficient administrative operation of the Commission and is responsible to the State and Federal Cochairmen of the Commission. Each commission shall assign such duties to the Executive Director as it deems appropriate, but, at a minimum the Executive Director shall have the authority to perform the following duties:

(1) To supervise and manage the Commission staff in carrying out day-to-day operations and to assure that proper administrative functions are accomplished;

(2) To develop the internal administrative structure of the Commission's staff and to assign functions and duties to employees;

(3) In accordance with Commission policies and after any required approval, to develop and execute for an on behalf of the Commission—

(i) Contracts and purchase orders;

(ii) Grant agreements;

(iii) Leases;

(iv) Personnel actions;

(v) Travel orders;

(vi) Any certifications required for the payment of legitimate expenses;

(4) To insure that Commission procedures and practices reflect applicable ethics requirements, codes of conduct and any laws applicable to Commission officials and employees;

(5) To develop a procurement system consistent with applicable requirements and Commission policies;

(6) To prepare an annual Commission budget for presentation to the Commission and such others as directed by the Commission;

(7) To accept, on behalf of the Commission, funds from the Federal Government and the member States;

(8) To develop a system of budget control to insure that obligations never exceed available unencumbered funds.

(b) Each Commission shall provide for legal assistance to assure adequate preparation and review of documents requiring Commission action and qualified legal advice to the Commission and its staff.

(c) An Executive Director of a Commission, and such other officers and employees as the Commission may determine, shall be bonded in such form and amounts as are determined by the Commission.

(d) *Pay, Benefits, Expenses.* (1) Rate of Compensation—The rate of compensation for positions paid in part or in whole from funds provided to a Commission by the Federal Government shall not exceed the rate paid by the Federal Government for similar positions. Each Commission shall establish for Commission employees experience and education requirements comparable to the Federal requirements (or the requirements of the participating State chosen in paragraph (d)(2)(i) of this section) for similar positions. Each Commission shall keep an up-to-date position description for each of its authorized positions, ensure that it is applicable and made available to the employee occupying that position.

(2) Level of Benefits—(i) No Commission shall establish benefits or adopt benefit policies which exceed the policies or levels of benefits provided by the Federal Government to its employees, unless a Commission contracts with a participating State Government for inclusion in a suitable retirement and employee benefit system as provided in 42 U.S.C. 3186(a)(5). Benefits include, but are not limited to, annual and sick leave and other leave, health insurance, life insurance, and retirement benefits.

(ii) No Commission shall permit any employee to carry forward into any calendar year more than 30 days of accumulated annual leave, computed at the beginning of the first complete pay period in the year.

(iii) Any employee who has been advanced annual or sick leave and who terminates his employment before repaying the advance shall make a payment to the Commission for the amount of advanced annual or sick leave outstanding.

(iv) No Commission shall pay or reimburse any employee for any sick leave accrued during service with the Commission, with the Federal Government, or with any State or local government.

(3) Number and Cost of Employees. Each Commission shall list in the annual financial plan the funding source for all persons employed or to be employed by the Commission for the period covered by the financial plan. Each Commission shall limit both the number of persons employed by it and the amount of funds spent for personnel costs to the number and amount set forth in its financial plan as approved by the Secretary. This limitation does not apply to additional employees not in any way compensated from funds provided to a Commission by the Federal Government.

(4) Specific Salary Prohibitions. No Commission shall pay a salary to or supplement, or make any contribution to, the salary of a State Member of a Commission, or a State Alternate, or any person who acts as a State Alternate at

any time. No persons detailed to serve a Commission under authority of Section 3186 (a)(4) of Title 42, United States Code, relating to Commissions' administrative powers, shall receive any salary or any contribution to or supplementation of salary for his services on the Commission from any source other than one of the following:

(i) The State, local, or intergovernmental department or agency from which the person was detailed; or

(ii) The Commission. No Commission shall use any funds provided by the Federal Cochairman for any purpose in order to circumvent these prohibitions. State Members of a Commission, State Alternates, persons acting as State Alternates at any time and persons on detail to a Commission are referred to Section 3186 (c), Title 42, United States Code, to determine their responsibilities and potential liabilities.

(5) Travel Expenses. Reimbursement for travel costs, including transportation, food and lodging costs, incurred by all Commission personnel in performance of their official duties while away from their regular place of duty, shall not exceed the reimbursement provided by the standard travel regulations of the United States Department of Commerce. Each Commission shall adopt as its own policies for authorizing travel the standard travel requlations of the Department of Commerce, contained in Departmental Administrative Order 204–1, except that for air travel.

(i) For a Commission which has an Executive Director, the Executive Director shall authorize and approve first-class air travel and maintain a record of the reason for authorized air travel for a period of three years. No less than every six months (in September and March) the Executive Director shall report to the Federal Cochairman any first-class air travel by Commission employees.

(ii) For a Commission which has no Executive Director, the Federal Cochairman shall be the official to authorize an approve first-class air travel. The Federal Cochairman shall maintain a record of the reason for all authorized air travel for a period of three years.

(6) Payroll and Attendance. Each Commission shall keep time and attendance records on all persons employed by it to assure proper control over the recording of attendance, overtime, sick and annual leave and other absences from duty and the proper distribution of hours by project. Each payroll period, an authorized Commission supervisor or official shall verify, approve and sign the time and attendance records.

(e) *Conduct.* (1) Standards for Employees.—Each Commission shall adopt standards governing the conduct and reponsibilities of its officers and employees. These standards shall incorporate, but not be limited to, all standards made applicable to Commission officers and employees by Federal or State laws, regulations and policies, including the requirements of these regulations. These standards, at a minimum, shall address the following subjects:

(i) Conflicts of interest;

(ii) Outside financial interests;

(iii) Persons engaged in the award and administration of contracts and grants;

(iv) Gifts;

(v) Entertainment;

(vi) Honoraria;

(vii) Reimbursement for expenses;

(viii) Travel and related expenses;

(ix) Use of public funds and public facilities;

(x) Political activities;

(xi) Use and disclosure of official information;

(xii) Non-discrimination;

(xiii) Nepotism;

(xiv) Lobbying.

(2) *Nepotism.* No Commission supervisor or officer shall appoint, employ, promote, advance, or advocate for appointment, employment, promotion, or advancement, in or to a position in the Compission in which he or she serves or exercises jurisdiction or control, any individual who is a relative of the supervisor or officer. From the effective date of this regulation, any individual appointed, employed, promoted or advanced in violation of this section shall not receive any pay derived in whole or in part from funds provided to a Commission by the Federal Government. Relative means an individual who is related to a supervisor or officer as father, mother, son, daughter, brother, sister, uncle, husband, wife, father-in-law, son-in-law, sister-in-law, brother-in-law, stepbrother, stepsister, half brother, or half sister.

(3) *Personal financial interests.* (i) Except as provided in paragraph (e)(3)(ii) of this section, no State Member, Alternate, officer, employee or agent of a Commission shall participate in any proceeding, application, award, selection, determination, grant, contract, procurement, claim, or any other activity in which, to his knowledge, at least one of the following has a financial interest that might cause a conflict of interest or create the appearance of a conflict of interest:

(A) The person himself or herself;

(B) His or her spouse;

(C) His or her minor child;

(D) His or her business partner;

(E) Any organization (other than a State or political subdivision of the State) which employs any person listed in paragraph (e)(3)(i) (A), (B), (C) or (D) of this section;

(F) Any organization (other than a State or political subdivision of the State) in which the person is serving as officer, director, trustee, partner or employee;

(G) Any person with whom he or she is serving as officer, director, trustee, partner or employee in any organization;

(H) Any person or organization with whom he or she is negotiating or has any arrangement concerning prospective employment.

(ii) Exceptions to paragraph (e)(3)(i) of this section may be obtained if the State Member, Alternate, person acting as an Alternate, officer, employee or agent—

(A) First advises the Commission of the nature and circumstances of the activity;

(B) Makes full disclosure of the financial interest in writing; and

(C) Receives *in advance* a written determination made by the full Commission that the interest is not so substantial as to be deemed likely to affect the integrity of the services which the Commission expects from the individual involved.

The Commission shall forward a copy of each of the determinations made under this Rule to the Secretary.

(iii) A Commission may declare void and rescind any contract or other agreement in relation to which it finds that paragraph (e)(3)(i) of this section has been violated. If a Commission chooses not to void and rescind a contract or agreement under these circumstances, it shall forward to the Secretary a report which states:

(A) The factual situation surrounding the contract or agreement;

(B) The personal financial interest involved; and

(C) The reasons for not voiding the contract or agreement.

(iv) State Members, State Alternates, persons acting as State Alternates, officers, and employees of a Commission should refer to 42 U.S.C. 3186, which details prohibitions and penalties for certain personal financial interests.

(v) Paragraph (e)(3) of this section, does not apply to—

(A) The Federal Cochairman; or

(B) Any Federal officer or employee detailed to a Commission pursuant to 42 U.S.C. (a)(3).

These persons remain subject to Sections 202 through 209 of Title 18, United States Code, which proscribe bribery, graft and certain conflicts of interest by Federal officers and employees. A Commission may void and rescind any contract or other agreement in relation to which it finds that any provision of 18 U.S.C. 202–209 has been violated.

(4) *Statement of employment and financial interests.* (i) Each Commission shall identify in its code, regulations or by-laws those officer and employee positions which are subject to the requirement of filing a statement of employment and financial interests.

(ii) At a minimum, each Commission shall require statements of employment and financial interests from the following employees:

(A) The Executive Director; and

(B) Employees in positions whose basic duties and responsibilities require the person to exercise judgment in making a Commission decision or in taking Commission action on

(*1*) Contracting or procurement; or

(*2*) Administering or monitoring grants or contracts.

(iii) A Commission may require other employees to submit a statement if it determines they are in positions having duties and responsibilities which require them to report their employment and financial interests in order to avoid involvement in a possible conflicts of interest situation and to protect the integrity of the Commission.

(iv) At a minimum, the required statement of employment and financial interest shall include the following:

(A) A list of the names of all corporations, companies, firms, or other business enterprises, partnerships, nonprofit organizations and education or other institutions—

(*1*) With which the employee is connected as an employee, officer, owner, director, trustee, partner, adviser, or consultant; or

(*2*) In which he or she has any continuing financial interests, through a pension or retirement plan, shared income, or otherwise, as a result of any current or prior employment or business or professionals association; or

(*3*) In which he or she has any financial interest through the ownership of stocks, bonds, or other securities;

(B) A list of the names of creditors, other than those to whom the employee may be indebted by reason of a mortgage on a property which he or she occupies as a personal residence or to whom he or she may be indebted for current and ordinary household and living expenses; and

(C) A list of interests in real property or rights in lands, including mortgages and trusts, other than property which he or she occupies as a personal residents.

(v) An employee required to submit a statement of employment and financial interests under these regulations shall submit that statement to the Federal Cochairman no later than 90 days after the effective date of these regulations if employed on or before that effective date, or 30 days after his entrance on duty.

(vi) Each employee shall report to the Federal Cochairman changes in, or additions to the information in an employee's statement of employment and financial interests on Sept. 30 each year. If there are no changes or additions, a report indicating that fact is required. Notwithstanding the filing of the annual supplementary statement, each employee shall at all times avoid acquiring a financial interest that could result, or taking any action that would result, in a violation of the financial interest and conflicts-of interest provisions of these regulations and the standards adopted by the Commission.

(vii) The interest of a spouse, a minor child, or a blood relation who is a full-time resident of the employee's immediate household is considered to be an interest of the employee.

(viii) If any information required to be included on a statement or a supplementary statement, including holdings placed in trust, is not known to the employee but is known to another person, the employee shall request that other person to submit information on his behalf.

(ix) A Commission shall not require an employee to submit in a statement or supplementary statement any information about the employee's connection with or interest in a professional society or a charitable, religious, social, fraternal, recreational, public service, civic or political organization, or a similar organization not conducted as a business enterprise. For this purpose, educational and other institutions doing research or related work involving grants of money from or contracts with the Commission are considered business enterprises and are required to be included in an employee's statement of employment and financial interests.

(x) The Federal Cochairman shall hold each statement of employment and financial interests, and each supplemental statement, in confidence. The Federal Cochairman, the State Cochairman, and the Secretary are authorized to review and retain the filed statements. They shall not allow access to, or information to be disclosed from, a statement for any reason other than to carry out the purpose of this section. They shall not disclose information from a statement except as the Federal Cochairman determines for good cause shown.

(xi) The Federal Cochairman and the State Cochairman shall review statements filed under this Section to ascertain whether or not there exists any conflict or apparent conflict between the personal interest of any employee and the interest of the Commission. If any information or any statement discloses a conflict or apparent conflict, the Federal Cochairman shall advise the employee of the apparent conflict and give him an opportunity to explain it.

(xii) The statements of employment and financial interests and supplementary statements required of employees are in addition to, and not in substitution for or in derogation of, any similar requirement imposed by any law, or the regulations of any other Federal agency.

(xiii) If necessary, the Federal Cochairman shall take immediate remedial action to resolve any apparent conflict of interest, including changing the employee's assigned duties, disqualifying the employee for a particular assignment, or requesting the employee to divest himself of his conflicting interest. The Federal Cochairman shall refer for immediate processing cases involving suspension in accordance with § 540.207(e)(7).

(5) *Gifts, entertainment.* (i) A Commission's standards for employees on gifts and entertainment, at a minimum, shall contain the following provisions:

(A) Except as provided in paragraph(e)(5)(i)(B) of this section, no Commission employee or officer shall accept or solicit, directly or indirectly, any gift, gratuity, entertainment, loan or any other thing of monetary value, from a person who—

(*1*) Has or seeks contracts or grant relations or other business or financial relations with the Commission; or

(*2*) Has interests that may be substantially affected by the performance or nonperformance of the employee's or officer's official duty.

(B) Nothing in paragraph (e)(5)(i)(A) of this section shall prohibit—

(*1*) The solicitation or acceptance of any gift, gratuity, favor, loan, entertainment or any other thing of value which arises out of obvious family or personal relationships, such as those between the parents, children or spouse of the employee and the employee, so

long as it is clear from the circumstances that it is the family or personal relationship rather than the business of the person concerned that is the motivating factor;

(2) The acceptance of food and refreshments of nominal value on infrequent occasions in the ordinary course of a luncheon or dinner meeting or other meeting or on an inspection tour where an employee may properly be in attendance;

(3) The acceptance of loans from banks or other financial insitutions on customary terms to finance proper and usual activities of employees, such as home mortgage loans; and

(4) The acceptance of unsolicited advertising or promotional material, such as pens, pencils, note pads, calendars, and other items of nominal value.

(ii) It is the intent of these requirements that an employee avoid any action, whether or not specifically prohibited, which might result in or create the appearance of using public office for private gain, giving preferential treatment to any person, impeding Commission efficiency or economy, losing complete independence or impartiality, making a Commission decision outside official channels, or affecting adversely the confidence of the public in the integrity of the Commission.

(6) *Other provisions.* (i) An employee shall not engage in outside employment or other activity not compatible with the full and proper discharge of the duties and responsibilities of his Commission employment.

(ii) For the purpose of furthering a private interest, an employee shall not, directly or indirectly use, or allow the use of official information obtained through or in connection with his Commission employment which has not been made available to the general public.

(iii) An employee shall not directly or indirectly use, or allow the use of, Commission property of any kind including property leased to the Commission, for other than officially approved activities. An employee has a positive duty to protect and conserve Commission property, including equipment, supplies, and other property entrusted or issued to him.

(7) *Reports, sanctions, appeals.* (i) Whenever it is reported that an employee has committed any act prohibited under any section of this Subpart or has any unresolved conflict of interest which may warrant the imposition of any of the sanctions provided in this Section, the reported violation or conflict shall be processed in substantial compliance with the procedure established in paragraphs (e)(7)(ii) through (iv) of this section. This procedure shall be in addition to any other procedure or sanction required by law.

(ii) Any report under paragraph (e)(7)(i) of this section shall be investigated by Commission staff or may be referred by the Federal Cochairman to the Department of Commerce for investigation. Any investigation shall have as its objective the development of all relevant and material facts and circumstances for the information of the Federal Cochairman and the State Cochairman. The results of the investigation shall be reported to the Federal Cochairman, the State Cochairman, and the Secretary. The two Cochairmen shall study all presented evidence and recommendations and allow the employee involved to present any evidence or statements. After consideration of all material, the two Cochairmen shall determine whether the employee has engaged in a prohibited activity or has an unresolved conflict of interest.

(iii) Any person subject to the Conduct Standards in this Section, who is determined under the procedure in paragraph (e)(7)(ii) of this section to have committed any act prohibited under any Section of this Chapter or to have unresolved conflict of interest which, it is deemed, impairs the Commission's integrity or public confidence in the Commission, shall be dismissed from employment with the Commission or shall undergo suspension (without pay), reprimand, loss of promotion or other sanction as the Federal Cochairman and the State Cochairman jointly deem suitable to impose or require under the circumstances. Such decision may be appealed as provided in the next paragraph.

(iv) An employee subjected to a sanction may appeal a decision of the Cochairmen to the full Commission for a final decision. During the pendency of the appeal, the decision of the Cochairmen shall not be implemented.

(8) *Notice to employees.* The contents of all conduct standards given in or required by this Subpart shall be brought to the attention of the employees of each Commission. Each employee shall certify in writing to the Executive Director that he has read and is familiar with the standards contained in this Subpart and the standards adopted by the Commission pursuant to this Subpart.

§ 540.206 Prohibition on use of Federal funds.

(a) No Commission shall use any funds received from the Federal Government to make, supplement or guarantee a loan.

(b) No part of the Federal grant funds shall be used by any recipient, either directly or indirectly, to assist, solicit, or encourage the relocating of any business establishment from one area to another or to assist, solicit, or encourage the transfer of contract or subcontract work which would result in a transfer of jobs causing unemployment in the area where work was previously performed, or to pay any part of the compensation or expense of employees who may at any time engage in such activities.

(c) No Commission shall use any funds received from the Federal Government for entertainment or gifts.

§ 540.208 Administrative requirements for recipients of Commission assistance.

(a) Each Commission shall adopt and apply the following standards for its recipients of financial assistance:

(1) For Grants to State and Local Governments, the following attachments in Office of Management and Budget (OMB) Circular A–102 (revised as of August 24, 1977)—

(i) A—Cash Depositories;

(ii) B—Bonding and Insurance;

(iii) C—Retention and Custodial Requirements for Records;

(iv) E—Program Income;

(v) F—Matching Share;

(vi) G—Standards for Grantee Financial Management Systems;

(vii) H—Financial Reporting Requirements;

(viii) I—Monitoring and Reporting Program In Performance;

(ix) K—Budget Revision Procedures;

(x) L—Grant Close-out Procedures;

(xi) N—Property Management Standards; and

(xii) O—Procurement Standards.

(2) For grants to and agreements with institutions of higher education, hospitals, and other nonprofit organizations, the following attachments in OMB Circular A–110—

(i) A—Cash Depositories;

(ii) B—Bonding and Insurance;

(iii) C—Retention and Custodial Requirements for Records;

(iv) D—Program Income;

(v)E—Cost Sharing and Matching;

(vi) F—Standards for Financial Management Systems;

(vii) G—Financial Reporting Requirements;

(viii) H—Monitoring and Reporting Program Performance;

(ix) J—Revision of Financial Plans;

(x) K—Closeout Procedures;
(xi) L—Suspension and Termination Procedures;
(xii) N—Property Management Standards; and
(xiii)O—Procurement Standards.

(b) The Federal Cochairman may grant exceptions from the requirements of the attachments listed in paragraphs (a) (1) and (a) (2) of this section when an exception is not prohibited under existing laws and in the best interests of the Commission or necessary to prevent undue hardships or inequity on a grantee or contractor. The Federal Cochairman shall inform the Office of Management and Budget (OMB) in writing with a copy to the Secretary, before granting a request by a Commission for an exception for a Commission financial assistance recipient or class of recipients. (It is the stated policy of the Office of Management and Budget to permit exceptions from Circular requirements only in unusual cases and the Federal Cochairmen are expected to reflect this in their decision.)

(c) If a Commission adopts a form which is a substitute for or is a deviation from a form specified in the attachments listed in paragraph (a) of this section, the Federal Cochairman shall inform OMB in writing with a copy to the Secretary, before the form is put into effect or use.

(d) *Cost principles and standards.* (1) *State and local governments.* When a Commission enters into a grant or contract with a State or local government, the Commission shall apply the principles and standards of Federal Management Circular (FMC) 74–4 for determining reasonableness, allowability and allocability of costs. Under this requirement, references in FMC 74–4 to the term Federal Government or Federal grantor agency shall be read as references to the Regional Commission. Except as authorized in Section C of Attachment B of the Circular, no Commission shall grant exceptions to the principles and standards of FMC 74–4 for any grantee or contractor.

(2) *Educational institutions.* When a Commission enters into a grant or contract with an educational institution, it shall apply the provisions of OMB Circular A–21 (formerly FMC 73–8) for determining the reasonableness, allowability and allocability of costs. Under this requirement, references in A–21 to the Federal Government or to the Federal grantor agency shall be read as references to the Regional Commission.

(3) When a Commission enter into any contract with an individual or a commercial organization, it shall apply the provisions of Subpart 1–15.2 of the Federal Procurement Regulations (41 CFR Subpart 1–15.2) for determining the reasonableness, allowability, and allocability of costs. Under this requirement, references in Subpart 1–15.2 to the term Government, Federal Government or Federal agency shall be read as references to the Regional Commission.

(4) When a Commission enters into an agreement with a nonprofit organization not covered under paragraphs (g)(1) or (2) of this section, it shall apply the provisions of Department of Commerce Cost Principles for Non-Profit Organizations or an equivalent set of Federal cost principles (such as 41 CFR 1–15.2) for determining the reasonableness, allowability and allocability of costs. Under this requirement, references in this document to the term Department, Government, Federal Government or Federal agency shall be read as references to the Regional Commission.

(5) Each Commission shall incorporate the appropriate requirements of this Section into the terms of its grants, contracts and agreements.

(e) In any specific situation involving the transfer of funds to a recipient, a Commission must decide whether to use a grant instrument or a contract.

(1) If the principal purpose of the instrument is the acquisition, by purchase, lease or barter, of property or services for the direct benefit or use of the Commission, the Commission shall use a contract and may not use a grant.

(2) If the principal purpose of the instrument is financial assistance to the recipient in order to accomplish a public purpose of support or stimulation authorized by Title V of the Public Works and Economic Development Act, the Commission should use a grant and not a contract. However, the Executive Director may determine in a specific instance that the use of a contract is appropriate.

(f) Financial assistance activities of a Commission shall meet the following requirements:

(1) A grant or contrat may be entered into by a Commission only for a purpose or purposes authorized by Title V of the Public Works and Economic Development Act of 1965, as amended, 42 U.S.C. 3181 *et seq.*

(2) No grant or contract shall be awarded unless there is an approved application from the proposed recipient which discloses how the funds will be used. Each grant or contract shall contain a description of the work to be accomplished under the grant or contract (the "scope of work"). The scope of work shall identify the specific activities which are supported by the financial assistance and the final work products, if any. Each grant or contract shall identify the goals and objectives of the assistance and shall be supported by approved plans, budgets and other information submitted to the Commission by the applicant/recipient which indicate how the funds will meet these objectives and enable the Commission to perform technical evaluations and cost/price analyses.

(3) No grant or contract may be entered into by a Commission for the purpose of funding an individual's salaried position in a unit of government or for paying the salary of any individual. However, all or any part of the compensation (and allowable benefits) of an individual may be a cost charged to grant or contract funds as an expense of carrying out specific duties detailed in the scope of work for the grant or contract. The amount of cost charged will depend upon the services rendered and the extent of benefits received pursuant to grant or contract objectives in accordance with applicable cost principles. Under no circumstances shall grant or contract funds be used to pay any portion of the compensation of a Governor or an Alternate or any person who acts as an Alternate.

(4) A grant or contract with a unit of State or local government shall not provide for payments to cover expenses for general activities which the unit normally incurs to carry out its general governmental responsibilities. Such assistance would be an unauthorized subsidy. A grant or contract shall be for specific, defined tasks or projects.

(5) The Commission shall assess the results of each completed project in relation to its established objectives, measure the overall results of program accomplishments in terms of contributions to each Commission's basic goals and objectives and assure that the evaluation activities are fully documented in the project files. Monitoring and final evaluation and approval of performance under a grant or contract shall not be delegated or assigned to a person who is not an official or employee of the Commission.

(g) *Audit resolutions and project closeout.* (reserved)

(h) Each Commission shall adopt the following:

(1) Procedures for keeping apprised of the status of each project assisted;

(2) Procedures requiring that contract or grant changes be accomplished by formal amendment of the agreement.

that there be adequate consideration for the change if it involves increased funding, and that project files are kept up to date;

(3) Procedures to ensure that payments to recipients do not exceed identified requirements;

(4) Policies for differentiating administrative expenses from programmatic expenditures; and

(5) Requirements for the establishment and maintenance of an official file on each project.

(l) The Secretary shall assist each Commission, when appropriate, to adopt any regulations necessary to implement the provisions of this Section.

§ 540.210 Nondiscrimination

The provisions of Title IV of the Civil Rights Act of 1964 shall apply to the Commission as an agency empowered to extend Federal financial assistance and as a recipient of such assistance. The Commission shall adopt as its own the Regulations of the Department of Commerce implementing Title VI (15 CFR, Subtitle A, Part 8). The Commission and every program or activity receiving Federal assistance directly or indirectly from or through the Commission, shall be subject to an comply with those Regulations. Since a primary objective of such Federal financial assistance is to provide employment, the employment practices provisions of those Regulations shall be applicable to the Commission and to its Federally assisted programs and activities. The Commission may issue rules, regulations, orders and instructions to further implement Title VI and the Regulations, and may obtain assistance from the Department of Commerce, with its concurrence, to aid the Commission and the Federal Cochairman in carrying out its responsibilities under Title VI and the Regulations.

§ 540.211 Remedies for noncompliance

In appropriate circumstances, and after due notice and adequate opportunity for hearing, the Secretary may suspend the financial assistance provided under Title V of the Public Works and Economic Development Act of 1965, as amended, 42 U.S.C. 3181 *et seq.*, upon the formal finding that the Commission is in violation of the terms of the grant offer or the provisions of these Regulations.

Robert M. Ramer,

Deputy, Office of Regional Development; Acting Special Assistant for Regional Development.

June 1, 1979.

Part IV

Department of Transportation

Materials Transportation Bureau

Display of Hazardous Materials Identification Numbers; Improved Emergency Response Capability; Proposed Rule

DEPARTMENT OF TRANSPORTATION

Materials Transportation Bureau

[49 CFR Part 172]

[Docket No. HM-126A; Notice No. 79-9]

Display of Hazardous Materials Identification Numbers; Improved Emergency Response Capability

AGENCY: Materials Transportation Bureau, Research and Special Programs. Administration, Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking.

SUMMARY: The Materials Transportation Bureau (MTB) proposes to adopt a numerical identification system for hazardous materials transported in commerce. These identification numbers would be required to be displayed on shipping papers and packages in association with the required hazardous material descriptions. They would be required to be displayed on orange panels affixed to portble tanks, cargo tanks, and tank cars containing hazardous meterials. The purpose of the proposed regulations is to improve the capability of emergency response personnel (fire, police, et al) to quickly identify hazardous materials and to assure the accurate transmission of information to and from the scenes of accidents involving hazardous materials.

DATES: Comments must be received on or before August 7, 1979.

ADDRESS COMMENTS TO: Dockets Branch, Materials Transportation Bureau, Washington, D.C. 20590 (telephone: 202-472-2726). It is requested that five copies be submitted.

FOR FURTHER INFORMATION CONTACT: L. Metcalfe, Standards Division, Office of Hazardous Materials Regulation, Materials Transportation Bureau, Department of Transportation, Washington, D.C. 20590, 202-426-0656.

SUPPLEMENTARY INFORMATION: This Notice proposes the adoption of an identification numbering system for hazardous materials based primarily on the system adopted for worldwide use by the United Nations Committee of Experts on the Transport of Dangerous Goods. Use of the identification numbering system will provide for improved identification of hazardous materials and the communication of information concerning the handling of such materials when they are involved in transportation accidents. Display of identification numbers would be required in connection with descriptions on shipping papers, on packages of 110 gallons capacity or less, and would be required on orange panels affixed to portable tanks, cargo tanks and tank cars. The MTB believes the use of identification numbers will provide an improved capability to quickly obtain and transmit accurate information about hazardous materials involved in accidents in order to obtain information necessary to deal with such accidents. Another element the MTB believes to be important in providing an improved emergency response capability is a manual it has under development. It will associate identification numbers with brief, concise instructions that will assist emergency personnel during the first minutes of a hazardous materials accident.

Many expressions of interest concerning the need to improve hazardous materials emergency response capabilities have been received from members of Congress, the National Transportation Safety Board, the Secretary of Transportation's Hazardous Materials Task Force, state officials, and most important, fire, police and other emergency service organizations. The MTB believes that the improvements proposed in this Notice will, if adopted, provide the basis for an improved emergency response capability that is not presently available through direct use of technical names; e.g., hexadecyltrichlorosilane (UN 1781), to identify hazardous materials and accurately and quickly communicate information about them.

The primary drafters of this Notice are Alan I. Roberts and Lee E. Metcalfe of the Materials Transportation Bureau.

Background

On June 25, 1975, the Hazardous Materials Regulations Board (HMRB) published in the **Federal Register** (40 FR 26688, Docket HM-126) a request for public comment on hazard information systems. The request listed nine factors to be considered in the evaluation of a hazard information system:

1. Capability of the general public to recognize the existence of the immediate dangers presented by a material;
2. Presentation of information in a manner so that the general public will be able to accurately transmit basic information to emergency response personnel;
3. Compatibility, intermodally and internationally;
4. Capability of application to both bulk and non-bulk shipments;
5. Capability of functioning without use of a manual or other subsidiary documents;
6. Capability to meet the needs of emergency response personnel, carriers, shippers, and the general public;
7. Capability of integration with documentation, packaging, and vehicle identification requirements to help insure accuracy;
8. Capability of implementation without undue economic burden on shippers and carriers; and
9. Capability of indicating degree of hazard.

The request for public comments went on to describe nine different systems that either had been proposed to the Department or were known to be supported by one or more segments of the affected industry or emergency response community. An exception was the DOT hazardous materials information system which was previously subject of a rulemaking proposal under Docket HM-103. The MTB has considered all of these systems and the comments that were received in response to the request, and is now of the view that none are acceptable for adoption. The following is a summary of some of the reasons for this conclusion:

1. At least two of the systems would employ a preassigned before shipment numbering technique to provide specific action information or an indication of the level of hazard (Hazchem, NFPA 704). Although preassignment of numbers presumably would be made by MTB, commenters have not recommended any criteria except for flammability. Use of preassigned numbers would impose substantial delays on the introduction of new materials into commerce and the extensive effort and resources necessary for implementation would make such a system unworkable.
2. Several of the systems would employ numbers or words based primarily on the hazards or properties of a material (HI, RID/ADR, USCG, IATA, Union Carbide, Air Products, Pennwalt). The MTB believes that reliance on the identification of hazards alone is no longer a feasible approach, that specific identification of many materials is essential to the accomplishment of an improved emergency response program. Communication of hazards is important in the initial phases of an accident, and appropriate first contact handling information can be based on hazards; however, many accident situations dictate the need for more detailed information on how to deal with specifically identified materials. This is particularly so in accidents involving

combinations of hazardous materials as is frequently the case in major train derailments.

3. One system would call for shippers to furnish the carrier an emergency response form that would move with each rail car (Canadian Transport Commission). While the basic idea has merit, the MTB considers that (1) such a system would result in the production of emergency response information widely varying in content based on subjective judgments of different shippers, except where industry associations might prepare response information for common materials; (2) the enforceability of such a requirement without detailed Government guidelines would be questionable; and (3) while such a program may be workable for bulk shipments and full loads, the huge amount of paperwork involved would make its implementation impracticable for less-than-carload shipments.

4. One system would call for display of the order of severity in three risk categories—health, flammability, and reactivity (NFPA 704). The MTB and its predecessor have examined the utility of such a system on several occasions. However, no criteria have been suggested for the health and reactivity presentation; therefore, qualitative evaluations must be made in assigning levels of hazard (hence, the preassignment factor discussed in 1 above). In addition, this proposed system places too many hazard factors into three fields, thereby precluding appropriate assessment. Examples are the assignment of health hazard level three to chlorine, liquid oxygen, sodium hydroxide (lye), hydrogen sulfide, and tetraethyl-lead, and the assignment of reactivity level one to calcium oxide (quicklime), antimony pentachloride and chromic acid. The kind of hazard and the extent of the hazard posed by each of these materials is very different from that posed by the others that share the same assigned number. The appropriate action required to handle accidents invoving these materials also is quite different in each case. Consequently such a system is not appropriate for use in a transportation emergency response situation.

The MTB believes that determination of the degree of hazard beyond an examination of the properties of a material requires an assessment of the environment and circumstances at the scene of an accident. In most instances, a preliminary determination of risk can be made based on the information obtained at the scene of an accident. If the initial assessment reveals that a potentially serious situation exists; e.g., a large spill from a tank vehicle placarded POISON and bearing an identification number, then, beyond that basic initial response information provided in the proposed manual, a call should be made to the central response information center to obtain expert advice in fully assessing the level of risk based on the accident environment; i.e., topography, wind direction, proximity to habitations, configuration of the accident, etc., and the properties and quantity of the spilled material in relation thereto. It is not conceivable that all the factors that must be considered in determining risk can be transmitted directly from placards on transport vehicles. Therefore, the identification numbering system has been selected as the best means to assist in quicker and more accurate determinations of risk.

The MTB extends its appreciation to the many individuals, companies, and organizations for their considerable efforts in preparing and submitting comments in reply to the Request for Public Comment. A number of comments were accepted and previously adopted under Docket HM–112, and others not directly related to the proposals in this Notice will be considered in a future rulemaking action.

Of all the comments received in response to the Request, the MTB finds those presented by the Association of American Railroads (AAR) particularly supportive of the concepts on which the proposals in this Notice are based. For this reason, we restate a large portion of the AAR comments:

The Basic Requirements of a Hazard Information System

The communication of hazard information is a very difficult task. It must be capable of use by many different groups, each with a different need for information, and it must be usable in an emergency environment without requiring the use of potentially unavailable supplementary materials. The information which it transmits must be easily recognized, quickly understood and accurately communicated.

Who Needs a Hazard Information System?

The most general answer to this question is that anyone who may potentially come in contact with a transportation accident involving hazardous materials needs an information system in order to be able to make intelligent decisions about the safety of his own life and property and about the lives and property of others.

The general public is the broadest and most inclusive subcategory of people with a need. This group includes both those who are at the scene of an incident and know it and those who are in proximity and are not aware of it. As a rule of thumb, it is probable that no system of hazard information will protect those who are not able to immediately view the sight of the incident except as it alerts those who are in proximity and then pass along the message.

Carrier and shipper personnel are the next group of people with a need for a hazard information system. They may be considered to have certain minimal training in either necessary response countermeasures or in the ability to communicate the fact that an incident involving hazardous materials has taken place.

Emergency response personnel, generally, are taken to be the police and fire departments serving the area in which the hazardous incident takes place. Despite the wide variation in training and competence of such personnel, they are assumed, at a minimum, to be familiar with routine fire fighting and evacuation procedures and, at a more sophisticated level, may be able to apply advanced levels of countermeasure technology.

Expert emergency response teams consist of those with special training in dealing with hazardous commodities. They may be in the employ of shippers and manufacturers, carriers, and governmental agencies. They consist of that group with the highest possible degree of knowledge about the specific commodities involved in particular incidents.

What Is Required of a Hazard Information System?

Each of the four groups outlined above has different needs for a system of hazard information.

The general public should be made aware immediately that a hazard exists and should be able to communicate the very basic facts of that hazard to experts with a higher level of knowledge. These basic facts include the location of the incident, the type of vehicle involved, the occurrence of leakage, fire or explosion and, if vehicle markings are seen, transmission of the fact of such markings or of the wording on them.

Carrier and shipper personnel should be able to communicate all of the information possessed by the general public and, in addition, they should be able to identify the nature of the hazard involved. By having access to the

shipping papers, the carrier and shipper personnel will be able to pass along detailed information concerning the commodities involved to their superiors and to the first emergency units to arrive at the scene. In some instances, carrier and shipper personnel information such as that provided by CHEMTREC.

[Emergency] response personnel require immediate information on the nature of the hazards of the materials involved and any special handling requirements. They should be able to use the information obtained from lower levels of response sophistication to access more detailed data to assist them in handling the specific product involved under the circumstances prevailing at the time of the accident.

Expert emergency response teams need to be able to use the information obtained at the scene and from lower level response groups to provide the most detailed and sophisticated direction for the handling of the incident. They should also be able to assist in proper cleanup and disposal activities following the immediate minimumization of threats to life and property.

Summary

Having analyzed the abilities and needs of those who will have contact with any hazard information system, its essentials are easily stated:

- It must be immediately recognizable as a system describing the existence of a hazard.
- It must be readily understandable by anyone who comes in contact with it.
- The information gained by anyone who comes in contact with it must be readily communicable to all others with a need to know.
- For those with a greater degree of ability, it must be indicative of a reponse pattern applicable to the particular incident.
- It must be uniform among all transportation modes.
- It must be capable of accommodating new hazardous commodities and, for higher levels of sophistication, it would be desirable that it be capable to easy computer implementation.

The Components of the Hazard Information System Developed by the AAR

In this section of the AAR's comments, the primary component parts of our hazard information system will be discussed and, wherever possible, related to the needs of various parties as recognized above.

Shipping Papers

The railroad industry believes that primary reliance must be placed on the shipping papers for information on the name of the product involved and its hazards. Historically, the shipping paper has been seen as the only single source of complete identifying information which travels with a shipment of hazardous materials. Because of all the important exemptions which appear in the regulations for the labeling and placarding of hazardous materials, the complete identification of particular shipments can be accomplished only through the shipping papers which accompany it. The recognition of deficiencies in the current use and content of shipping papers has led to the development of recommendations by the AAR for their correction.

Currently, shipping papers identify only the required classification, that is, the "primary hazard" of the material. This is no longer sufficient; the regulations must be amended to require the inclusion of all major hazards ["major hazards" are those recognized to the tertiary level] for dangerous commodities. This will mean that a shipment of, for instance, sulphuric acid must now be listed on [the] shipping paper as "SULPHURIC ACID, corrosive material, poisonous liquid, Class B."

To make the presence of hazardous materials obvious on the shipping paper, the proper shipping name and all hazards must be listed first and consecutively in each commodity's freight description. The order of materials (regulated or non-regulated) as listed on the shipping paper can be random if this previously described format is employed. The uniform presentation of information on shipping papers will enable transportation and emergency response personnel to readily identify hazardous materials from their descriptions and classifications.

In order to hasten the ability of on-scene personnel to contact those with expert technical information about the commodities involved, an emergency telephone number must be added to the shipping document. This telephone number must provide, on a 24-hour basis, immediate access to emergency assistance from the shipper, a designated industry response group, CHEMTREC, The Bureau of Explosives, or whatever source is deemed by the shipper to be best. It is of the utmost importance that both the immediate and long-term response to a hazardous materials incident be initiated as quickly as possible. In view of the potential for reducing injury, danger to property and adverse environmental consequences, the requirement for an emergency telephone number on shipping documents, to be placed there by the shipper, is a minimal burden.

The railroads of the United States have established a numerical Standard Transportation Commodity Code (STCC) for identifying hazardous materials. The use of STCC numbers is required by mutual railroad agreement and the number is exhibited on waybills covering all shipments. Recent efforts by the STCC Technical Committee of the AAR have resulted in the development of a new series of STCC numbers whose purpose is to specifically identify discrete hazardous materials. This "49-series" was made effective January 1, 1976 and is the vehicle for hazardous materials management which the transportation industry has long needed.

STCC numbers are 7-digit combinations assigned to specific commodities based on hazard characteristics. Within the 7-digit STCC number a means is provided to allow the quick identification of primary, secondary and, in some cases, tertiary hazards, whether or not hazards subordinate to the primary hazard are now recognized by DOT. The 49-series begins with the first two digits, 49, as an identifier for hazardous materials. The next three digits identify the potential hazards of the materials and the final two digits identify the specific commodity * * *.

It is important to note that many materials properly shipped under a general classification, *i.e.*, "flammable liquids, n.o.s.", have now been given specific 49-series STCC numbers based on the specific tariff description currently used. Their movement in transportation is well documented, and therefore, these commodities, as listed in STCC Tariff 1–D (or subsequent revisions), should henceforth be listed in § 172.5 as proper shipping names. The railroads request that the Hazardous Materials Regulations require the shipper to insert the STCC numbers on all shipping papers tendered with goods for transportation. Only [the] shipper knows enough about the materials he produces and ships to ensure the accurate assignment of STCC numbers.

The STCC Code is designed to be flexible and to allow for future expansion to include both new commodities and new combinations of [hazard] classification; a section is already reserved in the STCC Code to designate substances which are environmentally hazardous as defined

by the Environmental Protection Agency.

The precise logic which has been employed to create the 49-series has resulted in numbers whose utility far surpasses those proposed by other organizations including MCA and the United Nations. The middle three digits provide a complete set of numbers to reveal all major potential hazards of each product and this unique feature does not exist in any other system of which the AAR is aware * * *.

The AAR insists that no secondary, untried system of "hazard numbers" be implemented. The 49-series STCC Code is now in existence and in use and the next revision of the Bureau of [Explosives] publication "Emergency Handling of Hazardous Materials in Surface Transportation" will contain a complete listing of all commodities in the 49-series code and the appropriate hazard information for handling emergency situations involving these commodities. A cross reference index will be supplied to locate commodity information if only the 49-series STCC number is known; in addition, a growing number of rail carriers will be able to provide hard copy information about the commodities involved by entering the STCC numbers of commodities involved in incidents into their computers.

Out of an abundance of caution, it must be emphasized that the STCC Code does *not* make the railroads' system just another "numbers game" Hazard Information System. STCC numbers allow precise commodity identification and verification, allow computer accessing for commodity information, provide a means for the retention of hazardous materials movement statistics and assist in the computer generation of shipping documents. They are not intended for use by the general public and, thus, require no first-level-of-response decoding. Their primary purpose is fulfilled at the shipper/carrier interface and in the ability of the shipper or carrier to make precise commodity information known to emergency personnel * * *.

Emergency Action Guide

A unique feature of the AAR Hazard Information System is the Emergency Action Guide for Hazardous Materials Incidents * * *.

The purpose of the Emergency Action Guide is to indicate, primarily for carrier personnel, an initial response pattern to be taken to save lives and prevent injuries. Such an initial response will usually not extend beyond the first fifteen minutes or so following an accident and, with this in mind, the Guide identifies the basic nature of the hazard for each classification of material and describes the "ground rules" for initial emergency action. The Guide, while not suggested as a mandatory requirement, is proposed to be included as part of a trainman's timetable for relevant operations and could be displayed by poster in cabooses and locomotives. When reproduced on durable material, and perhaps folded, such a guide could also be carried in truck cabs, fire engines, and police vehicles. Recommended procedures for using the Guide would include instructions to those to whom it is issued to read it in advance of an emergency in order that, when an emergency occurred, the particular applicable section of the Guide could be easily found.

A basic purpose of the Emergency Action Guide is to fill the gap between the accident and the receipt of information from the party responding to the emergency telephone number and, even if the Guide was not part of the information carried on local community emergency vehicles, it could be available from the train crew, or from the truck driver, to assist the first emergency units on the scene.

The above is not a complete reproduction of the AAR's comments, nor is the copyrighted AAR Emergency Action Guide reproducible in this notice. Sample pages submitted by the AAR may be reviewed in the docket file. However, the quoted comments are representative of AAR's viewpoints concerning matters covered by this Notice. The MTB agrees that primary reliance must still be placed on shipping papers for information relative to "non-bulk" shipments, and that while the display of information on shipping papers has considerably improved following the adoption of regulations under Docket HM-112, further improvements are necessary. The MTB agrees that an identification number should be assigned to hazardous materials for rapid communication of information and employment in the emergency response system. The MTB agrees with the AAR that an emergency action guide or emergency response manual should be employed in the improved system. However, the MTB does not fully agree with the AAR's recommendations on how to accomplish improvements in these three areas.

The Identification Numbers

The MTB is proposing that the UN numbering system be used as the basis for implementation of an improved emergency response system. For a number of years, the United Nations Committee of Experts on the Transport of Dangerous Goods has been assigning identification numbers to specific chemicals and generic descriptions for "dangerous goods." This system is becoming more and more recognized on a worldwide basis. It is referenced in the Dangerous Good Code of the International Maritime Consultative Organization and is under consideration for adoption in the forthcoming standards to be implemented by the International Civil Aviation Organization. This system also is referenced in various procedural documents under development pertaining to international trade documentation. The MTB recently was advised by its Canadian Government counterpart, Transport Canada, that UN identification numbers will be used within Canada in connection with shipments of hazardous materials and that the numbers will be the basis for the Canadian emergency response system.

Several important factors were considered by the MTB in deciding to propose the use of the basic UN numbering system for improved emergency response information:

1. The numbers are assigned by Governmental authorities under the aegis of the Economic and Social Council of the United Nations and have the same meaning throughout worldwide commerce.

2. They have been assigned specifically to identify hazardous materials (dangerous goods) and are intended to have no other meaning or use. Thus, their formulation and application is not dictated by any other competing or overriding considerations.

3. They are assigned, for the most part, to materials requiring separate recognition that are shipped in commercial quantities. Therefore, only four digits are necessary. Other chemical identifier systems have as many as nine digits. The fewer the digits in an identification number, the greater its reliability in an emergency response system employing radio and telephone communications.

4. Numbers are assigned on the basis of the next open number without regard to the particular chemical properties of a material, thereby, avoiding any problems in the availability of numbers for future assignments. Availability of numbers almost inevitably would be a problem if the internal arrangement of digits was meant to have some special meaning; e.g., a chemical grouping or properties assignment. The use of

identification numbers will (1) serve to verify descriptions of chemicals; (2) provide for rapid identification of materials when it may be inappropriate or, even worse, confusing to require display of lengthy chemical names on vehicles; (3) assist in preparation of correct documentation when language translation is necessary; and (4) be an aid in speeding communication of information on materials from accident scenes and the return of more accurate emergency response information. For example, the UN number for acetone is 1090, while the number for acetone cyanohydrin in 1541—a distinction of great importance in conveying appropriate emergency response information.

It is proposed to list UN or U.S. identification numbers in a new column 3a of § 172.101. The number will be preceded by "UN" if the description preceding it is exactly the same or sufficiently similar to the international description (as displayed in the IMCO Code). If the description in § 172.101 is significantly different but addresses the same material as a UN entry, it will be given the same number but will be preceded by "NA" in the United States and Canada. A four-digit number beginning with "9" indicates there is no corresponding UN description (specific or generic) for the material assigned that number. This is the mechanism the MTB and Transport Canada propose to use to assign identification numbers to materials, such as hazardous substances, that have not as yet been assigned numbers by the United Nations Committee of Experts.

The AAR is to be complimented on its attempts to implement a hazardous materials identification numbering system. Its efforts in this regard have, in MTB's opinion, led the way towards providing an improved emergency response capability for hazardous materials. This Standard Transportation Commodity Code (STCC) system, in the absence of any established alternative, is being used in U.S. rail transport with increased frequency. Nevertheless, the MTB believes that what it is proposing in this Notice is preferable to the STCC system as a national, multimodal system for the following reasons:

1. While the 49 STCC series is not to be used for economic purposes, by necessity its formulation was constrained by the need for it to "bridge" into other STCC series numbers established for freight rating/statistical purposes. The following STCC listings illustrate this point:

Specified name in STCC tariff 1-G	STCC number
Combustible liquid n.o.s. (asphalt tile plasticizer)	49 154 06
Combustible liquid n.o.s. (plasticizers, paint, lacquer or varnish)	49 154 10
Combustible liquid n.o.s. (belt dressing)	49 154 16
Combustible liquid n.o.s. (electric wire saturating or finish compound, paraffin base)	49 154 18
Combustible liquid n.o.s. (bay rum)	49 154 20
Combustible liquid n.o.s. (perfumery)	49 154 22
Combustible liquid n.o.s. (after shave lotions)	49 154 24
Combustible liquid n.o.s. (polishing wheel cement thinner)	49 154 26

It is obvious that many STCC entries would serve no useful purpose for improved emergency response. There are a number of entries in Section 172.101 that are end-use terms, a practice which should not be expanded unless proven necessary.

2. If the descriptions in § 172.101 are greatly expanded, as suggested by the AAR, the undesirable result would be reduced accuracy and rapidity of access to information that is essential.

3. The STCC identification numbering system is published in a tariff which is on file with the Interstate Commerce Commission. Additions or deletions are made by, or under the supervision of, representatives of the railroad industry. Neither the transfer of all the listings for hazardous materials in the STCC Tariff nor incorporation of the tariff by reference is appropriate for publication in the Department's Hazardous Materials Regulations. If the AAR believes there are materials inappropriately described by generic descriptions in § 172.101, it should petition the MTB to describe each of them by technical name, thereby affording public participation in a rulemaking proceeding.

4. Recognition of the STCC system is limited to the United States and even within the United States its acceptance and use is further limited—primarily to the shipment of materials by railroad. It is not recognized on a worldwide basis, nor is it likely to be in light of the now-established UN numbering system and the growing applicaton of that system.

Display of the Identification Number

The MTB proposes to require the display of the identification number, as listed in proposed column 3a of § 172.101, on all shipping papers as the third element of a basic description (immediately following the hazard class entry) and on the outside of packagings of 110-gallons capacity or less (immediately following the prescribed shipping name of contents). It also proposes to require that the number be displayed on orange panels affixed to portable tanks, cargo tanks, and tank cars. While not a part of this proposal, the MTB will consider in the future the need to expand the required display of the orange panel to other than bulk shipments of materials.

The MTB believes that the display of the identification numbers must be as uniform as possible to enable ready recognition by emergency response personnel. Further, the MTB recognizes that, with display of the identification numbers on vehicles, it may not be necessary to expand the name marking requirements for tank cars and cargo tanks—an alternative of questionable benefit when complex chemcial names are involved. The display of the numbers on the orange panel will lead to rapid identification of contents. If an identification number addresses a generic description, and such a description is considered inadequate for a particular material, the MTB believes the material should be described in § 172.101 by technical name with an identification number assigned to it following an appropriate rulemaking proceeding. The MTB recognizes that it may have to consider a number of additions and changes to the list of hazardous materials in the future. Concerning the marking of identification numbers on packages, two major factors were considered. First, freight personnel often became the first contact "emergency" personnel when spills and leaks occur. The MTB visualizes that they will be able to make use of the manual in the same manner as emergency response personnel. Sole dependence on complex chemical names without reference to an identification number may lead to an erroneous response. This same view applies to emergency response personnel coming into contact with packages directly in vehicles, on freight docks, or elsewhere. The second factor is the value of the identification number in verifying the shipping information displayed on documents with the information displayed on packages to preclude error.

The Manual

One of the principal comments the HMRB received in response to its proposals under Docket HM-103 was the view that the proposed system (HI) placed heavy reliance on a manual that the HMRB suggested would be placed in each of the 392,000 emergency vehicles (fire, police, etc.) in the Nation. At approximately the same time as the initial proposal under HM-103, the Office of Hazardous Materials initiated distribution of its "Emergency Services Guide for Selected Hazardous Materials" which provides guidance

during the initial phases of an emergency for 45 selected materials that are transported in bulk quantities. To date, more than 880,000 copies of the Guide have been distributed to fire, police, and other emergency services organizations without charge. This fact, plus information that good use has been made of the manual, reinforces the MTB's view that a manual should be a viable part of this improved emergency response effort. It will serve to provide immediate emergency response information, especially important during the first minutes when many judgements and decisions must be made.

The MTB has undertaken the development of a manual of approximately 100 pages that will address virtually all hazardous materials transported in commerce. The manual is being developed on the principle that its statements of information and recommended actions must be concise and clearly understood. In examining other manuals, it is evident that there are only a limited number of recommendations (instructions) that can be given in a manual even though the recommendation may address hundreds of materials. Rather than write a manual with separate instructions for each material—a method that would be unduly burdensome, expensive, and unnecessary—the MTB is planning the manual according to the following format. At the beginning of the manual there will be two lists of virtually all domestic and international shipping names for hazardous materials. The first list will be arranged in numerical order of identification numbers, and the second list in alphabetical order. In both lists, there will be a page reference number associated with each entry. The numbered pages, approximately 60 to 70, will contain initial emergency response information and instructions. Many materials calling for the same initial emergency response action will be covered by the same page of information and instructions. The information pages are being developed in a style similar to those contained in the "HI" manual proposed under Docket HM–103.

The MTB believes that, in many instances, the manual will be all that is needed at the scene of an incident to terminate a minor event or to keep a minor event from becoming a major event of great consequence. However, when a situation requires further assistance, the manual refers the user to CHEMTREC (Chemical Transportation Emergency Center) and other organizations to obtain more detailed information and the help of technical experts.

Other features of the manual under development include (1) display of certain chemical descriptions in red to indicate when evacuation may be necessary; (2) evacuation tables related to small and large spills of the materials listed in red; (3) a page devoted to the display of placards with an indication that the recommendation on a particular page should be followed relative to each placard if, for some reason, shipping papers are not available or the identification number is not displayed; and (4) a typical shipping paper highlighting the description of a hazardous material and its identification number.

Exclusions

The proposals in this Notice do not apply to any material for which its proper shipping description does not have an associated identification number displayed in column 3a of § 172.101. Included in this category would be Consumer commodities, ORM–D and classes A and B explosives.

Consumer commodities properly classed ORM–D due to their quantity and form are not considered to pose a risk sufficient to warrant the application of these requirements. Classes A and B explosives, while under consideration for inclusion in the future, will have to be reviewed in greater detail to determine if a large number of identification numbers are necessary to make more finite distinctions in their risks or if a complete restructuring of the explosives descriptions would be appropriate. The MTB believes that, at the present time, it is desirable to use the "A" and "B" references for explosives presently displayed on shipping papers and placards for direct application in the manual and for communications.

Other Actions

This rulemaking proposal is considered to be a matter of high priority to the MTB. Therefore, other proposals pertaining to the hazardous materials communications regulations will be dealt with in two separate rulemaking actions. Included in these actions will be proposals to (1) permit the use of certain international descriptions (IMCO and forthcoming ICAO descriptions emanating primarily from the UN recommendations); (2) require further description for certain n.o.s. entries; (3) prescribe additional labeling requirements and permit use of certain newly adopted international labels; (4) require a special marking on portable tanks, cargo tanks and tank cars containing unodorized LP gas; and (5) address a number of petitions pertaining to shipping papers, certifications and placarding.

Implementation: Priorities and Costs

The MTB views the timing of the implementation of requirements proposed in this Notice as the major feature of its cost. This view is based on factors such as the present inventories of preprinted shipping documents, premarked (name of contents) inventories of packagings, and the necessary training and education associated with the implementation of the procedures necessary to comply with the regulations proposed herein if they are adopted. Therefore, the MTB believes it should make a statement concerning its contemplated implementation of the regulations proposed in this Notice.

The highest priority will be placed on implementation of documentation and identification (the orange panel) requirements applicable to transportation of hazardous materials in portable tanks, cargo tanks and tank cars. The MTB believes the mandatory compliance date should be no more than one year after the date of publication of the final rule.

The second highest priority will be placed on implementation of the documentation requirements for hazardous materials in packaging (other than bulk) excluding those, such as Consumer commodities, ORM–D, that will not be assigned identification numbers. The MTB believes the mandatory compliance date should be no longer than one year after the date of publication of the final rule.

The lowest priority will be assigned to packaging (less than 110-gallon capacity) markings. The MTB believes that two years should be provided for implementation or, as an alternative, a "grandfather clause" should be provided for packagings in stock prior to the effective date of the new regulations.

Concerning the display of identification numbers on orange panels, the MTB has obtained preliminary cost figures from a major supplier of labels and placards and has determined that, depending on the quantities ordered, the costs of prenumbered panels would be approximately as follows: Panels made of tag board for one time use—10 to 25 cents per panel; panels made of extruded vinyl for short term use—20 to 45 cents per panel; panels made of cast vinyl with plastic coating having an estimated life of five years—36 to 55 cents per panel. The vinyl panels would be adhesive backed to facilitate attachment.

The MTB expects the greatest costs will be incurred in the display of the orange panels on cargo tanks operated by common/contract carriers because of the high frequency in the change of usage of cargo tanks in this particular segment of the transportation industry. This fact is recognized in the existing regulations relative to the marking of the name of contents of cargo tanks. However, the MTB believes the added cost associated with implementation of these proposed requirements is warranted in the interest of providing an improved emergency response capability and is preferable to the alternative of extending the present tanks, as is presently required for portable tanks.

Specific views are invited concerning the proposed implementation of the regulations proposed in this Notice. Commenters should provide factual information concerning inventories of preprinted documents, adjustments in ADP programs, packaging turnover, and training. Broad generalized statements will not beneneficial to the MTB in its efforts to make a serious determination of how the rules are to be implemented, if they are adopted.

In further regard to implementation, the MTB was asked recently if any of the present regulations would preclude application of orange panels such as are proposed in this rulemaking. The MTB's response indicated there is no existing regulation that would prohibit the display of the United Nations identification number after the class entry on a shipping document, nor the display of an orange panel bearing an identification number.

The MTB originally considered that a rulemaking action of this type should be the subject of an advance notice of proposed rulemaking in order to solicit public comments relative to its development. On further consideration, the MTB has decided that a notice of proposed rulemaking is appropriate in order to expedite implementation since the proposals contained herein are confined to one basic issue; i.e., the display of an identification number, with other matters pertaining to improved communications being made the subject of separate rulemaking actions.

Conclusion

The MTB believes (1) adoption of the hazardous materials identification system proposed in this Notice will be a vital initial step in improving emergency response capabilities; (2) that, while the system can function without reliance on a manual, a manual of the type it has under development will significantly enhance emergency response capabilities, particularly during the first minutes of an emergency; (3) the proposed system is compatible intermodally and internationally and will be applicable to bulk and non-bulk shipment to an extent considered necessary; and (4) the proposed system is capable of integration with existing documentation, packaging and vehicle identification requirements that will insure the accuracy of information transmitted to and from emergency response personnel.

In consideration of the foregoing, it is proposed to amend Part 172 of Title 49, Code of Federal Regulations as follows:

1. In § 172.100 paragraph (d) would be amended by adding the following to the end of the paragraph.

§ 172.100 Purpose and use of the table.

* * * * *

(d) * * * Column 3(a) lists the identification numbers assigned to hazardous materials. Those preceded by a "UN" are associated with descriptions considered appropriate for international shipments as well as domestic shipments. Those preceded by an "NA" are associated with descriptions that are not recognized for international shipments, except to and from Canada. If an identification number is the "9000" series, it is either associated with the description of a material that is not appropriately covered by international hazardous materials (dangerous goods) shipping standards or not appropriately addressed by such standards for emergency response information purposes.

* * * * *

2. Section 172.101, the Hazardous Materials Table, would be revised by the addition of column 3(a) to read as follows:

BILLING CODE 4910-60-M

§172.101 Hazardous Materials Table

BILLING CODE 4910-60-C

3. In § 172.202 paragraph (a)(3) would be added and paragraph (b) would be revised to read as follows:

§ 172.202 Description of hazardous material on shipping papers.

(a) * * *

(3) The identification number assigned to the material in § 172.101.

* * * * *

(b) The basic description specified in paragraphs (a)(1), (2) and (3) of this section must be shown in sequence except that the technical name of the material may be entered between the proper shipping name and the class. For example: "Gasoline, Flammable liquid UN 1203;" "Flammable solid n.o.s. UN 1325;" or "Corrosive liquid n.o.s. (Caprylyl chloride) Corrosive material UN 1760."

* * * * *

4. Section 172.300 would be revised to read as follows:

§ 172.300 General marking requirements.

Except as provided by this subchapter, each person who offers a package containing a hazardous material for transportation shall mark the package with the proper shipping name and identification number assigned to the material in § 172.101. However, when it has been determined by the shipper that a package has been previously marked as required for the material it contains, it need not be remarked. This section does not apply to portable tanks, cargo tanks and tank cars.

5. In § 172.328 paragraphs (a) and (b) would be revised to read as follows:

§ 172.328 Portable tanks.

(a) No person may offer for transportation or transport a portable tank containing a hazardous material unless it is marked legibly—

(1) On each side and each end with the identification number specified for the material in § 172.101 on a panel as specified by § 172.332, and

(2) On each side with the proper shipping name of the material in lettering no less than two inches (50.8mm.) in height.

(b) A portable tank marked with the identification number or name of a specific hazardous material may not be used to transport any other material unless the marking is removed, or changed to identify the hazardous material in the portable tank, whichever is appropriate.

* * * * *

6. In § 172.328 paragraphs (a), and (b) and (c) would be revised to read as follows:

§ 172.328 Cargo tanks.

(a) No person may offer for transportation or transport a hazardous material in a cargo tank unless the cargo tank is marked on each side and each end with the identification number specified for the material in § 172.101 on a panel as specified in § 172.332.

(1) A person who offers a motor carrier a hazardous material for transportation in a cargo tank shall provide to the motor carrier the required identification numbers on panels prior to or at the time the material is offered for transportation unless the cargo tank is already marked with identification numbers as required by this subpart.

(2) A person who offers a cargo tank containing a hazardous material for transportation, shall affix the required identification numbers on panels prior to or at the time the material is offered for transportation unless the cargo tank is already marked with identification numbers as required by this subpart.

(3) As an alternative, the marking required by paragraph (a) of this section on the front of a cargo tank may be on the front of a truck-tractor instead of or in addition to the marking on the front of the cargo tank to which the truck-tractor is attached.

(4) Identification numbers are not required on nurse tanks meeting the provisions of § 173.315(m) of this subchapter.

(b) Except as specified in paragraph (a) of this section, when the name of a material or other marking is required by this subchapter to be marked on a cargo tank, it must be legibly displayed in lettering or numbers no less than two inches (50.8mm.) in height.

* * * * *

(e) A cargo tank marked with the identification number or name of a specific hazardous material may not be used to transport any other material unless the marking is removed, or changed to identify the hazardous material the cargo tank contains, whichever is appropriate.

7. Section 172.330 would be revised to read as follows:

§ 172.330 Tank cars.

(a) No person may offer for transportation or transport a hazardous material in a tank car unless the tank car is marked on each side and each end with the identification number specified for the material in § 172.101 on a panel as specified in § 172.322. Also, when required to be marked by Part 173 or 179 of this subchapter, each tank car and tank car tank (DOT 106 or 110) used to transport a hazardous material must be marked as specified in this subpart with the—

(1) Proper shipping name, or

(2) Common name authorized in this subchapter for the material such as "Refrigerant Gas."

(b) The letters in the marking of a proper shipping or common name must be 4 inches (101.6mm.) or more in height with at least a ⅝ inch (15.9mm.) stroke. The separation between each letter must be at least ¾ inch (19.0mm.).

(c) The marked proper shipping or common name must be—

(1) Affixed to both sides of the tank car tank, and

(2) Except for tank cars transporting DOT 106 and 110 multi-unit tank car tanks, readily visible when viewed from each side of the tank car.

(d) A tank car and a tank car marked with the identification number or name of a specific hazardous material may not be used to transport any other material unless the marking is removed, or changed to identify the hazardous material the tank car or tank car tank contains, whichever is appropriate.

(e) For a hazardous material in a DOT 106 or 110 tank car tank,

(1) The identification number specified for the material in § 172.101 must be marked on one panel as specified in § 172.332 that is affixed to the side of the tank,

(2) A motor vehicle or rail car used to transport the tank car tank must be marked on each side and each end with the identification number specified for the material in § 172.101 on a panel as specified in § 172.332, and

(3) If the tank car tank contains chlorine, marking of the name "Chlorine" is not required when the CHLORINE label is used as provided in § 172.405(b).

8. Section 172.332 would be added to read as follows:

§ 172.332 Identification number markings and orange panel specifications.

(a) The orange panel for portable tanks, cargo tanks and tank cars shall be 6¼ inches (16 cm.) high by 16¼ inches (41.5 cm.) wide with a 7/16 of an inch (12 mm.) black outer boarder. An identification number shall be displayed in 4-inch (100 mm.) black Helvetica Medium numerals. Measurements may vary from those specified plus or minus 0.1 of an inch (3 mm.).

(b) The orange display panel may be made of any durable material prescribed for placards in § 172.519, and shall be of the orange color specified for labels or placards in Appendix A to this Part.

(c) The name of a material respresented by an identification

number may be shown in the upper left border of the orange panel in letters not more than 18 points (¼-inch) high.

(d) Except for size and color, the orange panel and identification numbers are illustrated as follows:

(e) The identification number on an orange panel shall be displayed in proximity to any placard required by §172.504.

(49 U.S.C. 1803, 1804; 1808; 49 CFR 1.53, App. A to Part 1, and paragraph (a)(4) of App. A, Part 106.)

Note. The Materials Transportation Bureau has determined that this document does not contain a major proposal requiring preparation of an economic statement under Executive Order 12044 and DOT implementing procedures (43 FR 9582) nor an environmental impact statement under the National Environmental Policy Act (40 U.S.C. 4321 et seq.).

A regulatory evaluation is available in the public docket.

Issued in Washington, D.C., on May 23, 1979.

Alan I. Roberts,

Associate Director for Hazardous Materials Regulation Materials Transportation Bureau.

Part V

Department of Health, Education, and Welfare

Office of Education

Correction Education Demonstration Program

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 161j]

Proposed Rules for the Correction Education Demonstration Program

AGENCY: Office of Education, HEW.

ACTION: Proposed rules.

SUMMARY: The Comissioner of Education proposes to issue regulations to implement the Correction Education Demonstration Project Act of 1978. The program provides financial assistance for the purpose of developing demonstration projects relating to the academic and vocational education of juvenile delinquents, youth offenders, and adult criminal offenders.

DATES: Interested persons are invited to submit written comments, suggestions, or recommendations regarding the proposed regulations on or before August 6, 1979.

Public meetings will be held in each of the ten regions on July 11, 1979. The time for these meetings is—

9:00 a.m.–12:00 Noon.

1:00 p.m.–5:00 p.m.

7:00 p.m.–9:00 p.m.

ADDRESSES: Written comments should be addressed to Dr. James M. Spillane, U.S. Office of Education, Room 2047, FOB–6, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

The locations of the public meetings are—

Region I—Boston—Bunker Hill Community College, Room C 202, Rutherford Avenue, Charlestown, Massachusetts.

Region II—New York—Norman Thomas High School, 111 East 33rd Street, New York City, New York.

Region III—Philadelphia—University City, Holiday Inn, 36th & Chestnut Streets, Philadelphia, Pennsylvania.

Region IV—Atlanta—Suite 2221, 101 Mariette Tower Bldg., Atlanta, Georgia.

Region V—Chicago—Center for Urban Education, 160 West Wendell Street (1050 North Wells), Chicago, Illinois.

Region VI—Dallas—North Lake Junior College, 2000 Walnut Hill Lane, Irving, Texas.

Region VII—Kansas City—Penn Valley Community Junior College, 3201 Southwest Trafficway, Room CC 503, Kansas City, Missouri.

Region VIII—Denver—George Washington High School, Lunch Room, 655 South Monaco Street, Denver, Colorado.

Region IX—San Francisco—Room 209, Federal Office Bldg., 50 United Nations Plaza, San Francisco, California.

Region X—Seattle—Room RC 1132 North Seattle Community College, 9600 College Way North, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Dr. James M. Spillane (202) 245–7292.

FOR INFORMATION ON REGIONAL HEARINGS CONTACT: The appropriate Regional Commissioner for Educational Programs listed below:

Region I, Boston, Dr. Thomas J. Burns, (617) 223–7500.

Region II, New York, Dr. William D. Green, (212) 284–4370.

Region III, Philadelphia, Dr. Albert C. Crambert, (215) 596–1001.

Region IV, Atlanta, Dr. William L. Lewis, (404) 221–2063.

Region V, Chicago, Ms. Juliette Noone Lester, (312) 353–5215.

Region VI, Dallas, Mr. Edward J. Beca, (214) 767–3626.

Region VII, Kansas City, Dr. Harold Blackburn, (816) 374–2276.

Region VIII, Denver, Dr. John Runkel, (303) 837–3544.

Region IX, San Francisco, Dr. Caroline Gillin, (415) 556–4920.

Region X, Seattle, Mr. Allen Apodaca, (206) 442–0460.

SUPPLEMENTARY INFORMATION: The Commissioner is required by law to publish regulations for programs authorized by Congress. Please note that the Congress has not appropriated funds to operate this program in Fiscal Year 1979, and the President's budget does not request funds for Fiscal Year 1980.

The statute and legislative history of the Correction Education Demonstration Project Act, (Section 371–374 of Title III of Pub. L. 95–561) are very brief. The Senate report notes that there are various sources of funds for correction education within the Federal government. It emphasizes, however, that none of these programs is devoted exclusively to the development and implementation of demonstration projects involving new and innovative techniques and methods in the area of correction education.

The statute authorizes demonstration projects relating to academic and vocational education for various categories of offenders. Before proceeding we need to answer a preliminary question: "What is correction education?"

Correction education is education to meet the special educational needs of offenders—needs for individualized instruction and for a high level of supportive services, including transitional services, that enable offenders who have been incarcerated to adjust to the community.

Correction education is also used to refer to any education provided within a correctional facility—a prison or a juvenile training school. Incarceration itself poses special problems for education such as direct coercion to participate, lack of motivation, lack of freedom, and need for increased supervision.

In reviewing the literature on correction education, the Office of Education has noted the following areas of need:

- The need to develop community-based corrections programs which make available a wide range of community services including those of education. This reflects a national trend toward community-based corrections facilities.
- The need to develop transition programs between correctional institutions and the community which offer access to community social and educational services.
- The need for education systems—State educational agencies (SEAs), local educational agencies (LEAs), and institutions of higher education, particularly community colleges, to provide the necessary range of services to clients in community-based correctional facilities.
- The need to develop effective correction education programs for incarcerated offenders that integrate academic and vocational education with necessary supportive services to enable the offender to take best advantage of the education and training.
- The need to coordinate the resources of a variety of public and private agencies to provide services to offenders and ex-offenders.

OE invites promising applications that focus on effective strategies to respond to these areas of need in the field of correction education. At the same time OE seeks comment on whether it should limit the focus of the Correction Education Demonstration Program to one or more specific priority areas.

The authorization for appropriations is $5 million. However, there is a variety of other resources at the Federal, State, and local levels for correction education. For that reason the proposed rules strongly encourage that funds available under this new program be used in conjunction with other resources to bring about improved programs for offenders. Further, applicants must demonstrate coordination with other agencies in their requests for support.

The Commissioner believes it would not be desirable to concentrate funds in large comprehensive projects. Funds, however, could be used to support innovative components of these projects. These components could be part of either new or established projects.

Funds could be used for small projects providing intensive services for a short period of time. They could also be used to bring about more effective coordination of resources at the local level by involving and integrating support and services from a number of different agencies that work with populations of offenders.

Multi-year support of up to three years may be sought for a project.

These are demonstration projects and they must be set up to continue after Federal funding stops. A key consideration in planning for a project must be the assumption of funding at the end of the grant. In proposals for multi-year projects, the applicants must demonstrate increasing levels of local support after the first project year.

The program strategy is to seek out promising demonstration projects. Projects that receive multi-year funding will receive funds in the second or third continuation years for validation of effectiveness.

In each year of the program the Commissioner will bring staff of projects together for a national conference and workshop. The purpose of the national meeting is to facilitate sharing among projects, to provide resources for problem solving, and to provide staff development in areas of need. Where feasible, OE will provide technical assistance to the projects in the form of training flexible enough to respond to a variety of problem areas generated by local projects.

Issues in Developing the Regulations Were: Should OE Only Fund Projects Leading to Comprehensive Education Programs?

A fundamental issue is whether OE should *only* fund projects which will result in comprehensive programs or are parts comprehensive correction education programs including academic and vocational education with necessary supportive services—or—should OE *also* fund projects where only academic or only vocational education would be available. These proposed regulations emphasize the former and permit the Commissioner annually to reserve funds for them, but they do not preclude funding other outstanding projects.

Who Is the Target Population?

One issue considered in developing these regulations was the population to be served. The statute authorized correction education demonstration programs for "antisocial, aggressive or delinquent persons, including juvenile delinquents, youth offenders, and adult criminal offenders." The legislative history refers only to the offender categories.

The Commissioner proposes to interpret the population to be served as limited to offenders—persons who have been found guilty of having committed criminal offenses. Ex-offenders would also be eligible to participate.

The Commissioner believes this is the best interpretation because persons who have not been found guilty of a crime should not need "correction education," and thereby be labeled as offenders. However, the Commissioner seeks comments on this issue, especially on whether to include in the target population—

(a) Persons charged with crimes but diverted from prosecution on the condition they participate in an educational program;

(b) Persons detained in jails or other facilities prior to trail;

(c) Youths charged with status offenses—such as truancy—that would not be crimes if committed by adults; and

(d) Other "aggressive" or "anti-social" persons as determined by school officials.

May Postsecondary Level Courses by Funded?

The statute does not limit academic or vocational education to the elementary and secondary levels. Therefore, the Commissioner considers applications proposing postsecondary academic or vocational education projects.

What Is the Role of Staff Training in a Correction Eduction Project?

The Commissioner considers staff training to a crucial consideration in a correction education project. Training could address the following:

(1) Offender populations are overwhemingly minority populations. However, the staff who work with offenders, whether in prisons, community settings, schools, or institutions of higher education are predominantly non-minority. Correction education staff need training to make them sensitive to the backgrounds and needs of offenders and to equip them with the skills to work with offender populations.

(2) Correction education programs have failed in the past from lack of proper management. This indicates a need for training in management skills for improved delivery of services to offenders.

(3) The integration of academic and vocational education with supportive services appropriate to the needs of offenders is the core of every correction education project. Staff need training in the development of strategies and approaches to bring about this integration.

(4) There is a variety of resources at all levels—Federal, State, and local—that could focus on correction education. Correction education personnel need training in skills to identify, mobilize, and coordinate resources.

How Will Projects be Evaluated?

Projects must include an evaluation that determines whether a project met the special educational needs of the offender group served: whether the offenders learned a vocational skill, or obtained a job. OE will also be interested in any information relating to the reduction of recidivism.

When Must Private School Children be Allowed to Participate?

If an SEA or LEA receives a grant for a project, the project must provide for the comparable participation of members of the target population enrolled in private elementary and secondary schools located in the area served by the SEA or LEA, in accordance with section 902(b) of the Special Projects Act.
(20 U.S.C. 2942(b))

What Other Regulations Apply to This Program?

The proposed regulations for part 161j do not contain certain types of requirements. Those requirements are covered in EDGAR–The Education Division General Administrative Regulations—which will replace the General Provision for Office of Education Programs Regulations and which was published as a notice of proposed rulemaking (NPRM) on May 4, 1979 (44 FR 26308)

Anyone wanting to comment on those requirements should do so in response to the EDGAR NPRM, rather than to this NPRM.

The following items applicable to this program will now be among those covered generally in EDGAR.

How to apply for a grant.

How grants are made.

Certain conditions that must be met by a grantee.

The administrative responsibilities of a grantee.

The procedures the Office of Education uses to get compliance.

Reviewers should be aware that the first "selection criteria" for this program will become part of EDGAR and that those same criteria will apply to all OE direct grant programs, unless they are

specifically excepted on the basis of individual programs.

Summary of Regulations

The proposed rules for the Correction Education Demonstration Program are divided into five subparts.

Subpart A describes the purpose of the program, tells who is eligible to receive grants, notes other regulations that apply to the program, and defines a number of significant terms used in the legislation.

Subpart B provides information on proposed beneficiaries and on the types of projects the Office of Education assists under the program.

Subpart C gives application requirements and information on possible multi-year projects.

Subpart D describes the criteria the Commissioner applies in the evaluation of applications.

Subpart E describes the conditions that grantees must meet.

Invitation To Comment

A public meeting on this Notice of Proposed Rulemaking will be held in each of the ten Federal regions. Since we expect to schedule public meetings for several regulations on the same day, at the same place, we need to get an idea of how many persons are interested in speaking about these regulations. If you are interested in commenting at a public meeting, we encourage you to call the appropriate Regional Commissioner of Education, who will schedule a time for your comments. Persons who do not notify the Regional Commissioner of their intention to comment will be given an opportunity to speak. Those persons making presentations will be called upon according to their prearranged schedule, or if not prearranged, in the order of registration.

We expect that comments on these proposed regulations will be second on the agenda of the public meeting, after the Safe Schools regulations.

In addition, interested persons are invited to submit comments and recommendations regarding the proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this document. All comments received on or before the 60th day after publication of this document will be considered in the development of the final regulations.

All comments submitted in response to this notice will be available for public inspection, both during and after the comment period, in Room 2047, FOB–6, 400 Maryland Avenue, S.W., Washington, D.C. between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

(These proposed regulations are isued under the authority of Sections 371–374 of ESEA, Pub. L. 95–561, 92 Stat. 2222 (20 U.S.C. 3031–3034))

(Catalog of Federal Domestic Assistance Number Not Yet Assigned)

Dated: March 6, 1979.

Ernest L. Boyer,

U.S. Commissioner of Education.

Approved: May 25, 1979.

Joseph A. Califano, Jr.,

Secretary of Health, Education, and Welfare.

Title 45 Code of Federal Regulations is amended to add Part 161j:

PART 161j—CORRECTION EDUCATION DEMONSTRATION PROGRAM

Subpart A—General

Sec.

161j.1 What is the Correction Education Demonstration Program?
161j.2 Who is eligible to apply for financial assistance?
161j.3 Regulations that apply to the Correction Education Demonstration Program.
161j.4 Definition in this part.

Subpart B—What Kind of Projects Does the Office of Education Assist Under This Program?

161j.10 What is a correction education demonstration project?
161j.11 What is the target population to be served by a project?
161j.12 Where may a project be located?
161j.13 Supportive services.
161j.14 Types of projects.

Subpart C—How To Apply for a Grant

161j.20 Application requirements.
161j.21 Duration of Federal support.

Subpart D—How Is a Grant Made?

161j.30 What selection criteria does the Commissioner use?
161j.31 Selection criterion: plan of operation.
161j.32 Selection criterion: quality of staff.
161j.33 Selection criterion: budget and cost effectiveness.
161j.34 Selection criterion: evaluation plan.
161j.35 Selection criterion: adequacy of resources.
161j.36 Selection criterion: likelihood of achieving results.
161j.37 Selection criterion: quality of dissemination.
161j.38 Selection criterion: coordination of resources.
161j.39 Selection criterion: capability to continue project.
161j.40 Geographic and offender population distribution.

Subpart E—What Conditions Must Be Met by a Grantee?

161j.50 Participation of private school children.
161j.51 Use of funds.

Authority: Secs. 371–374 of ESEA, Pub. L. 95–561, 92 Stat. 2222 (20 U.S.C. 3031–3034), unless otherwise noted.

Subpart A—General

§ 161j.1 What is the correction education demonstration program?

The program provides Federal assistance for demonstration projects relating to the academic and vocational education of juvenile delinquents, youth offenders, and adult criminal offenders.

(20 U.S.C. 3032)

161j.2 Who is eligible to apply for financial assistance?

Eligible applicants include—

(a) A State educational agency (SEA);

(b) A local educational agency (LEA);

(c) An institution of higher education;

(d) Any public agency; or

(e) A nonprofit private agency, organization, or institution.

(20 U.S.C. 3032)

§ 161j.3 Regulations that apply to the correction education demonstration program.

(a) *Regulations. The following regulations apply to the Correction Education Demonstration Program:*

(1) The Education Division General Administrative Regulations (EDGAR) in part 100a (Direct Grant Program) and part 100c (Definitions).

(2) The regulations in this part 161j.

(b) *How to use regulations; how to apply for funds.*

The "Introduction to Education Division Program" at the beginning of EDGAR includes general information to assist in—

(1) Using regulations that apply to Education Division programs; and

(2) Applying for assistance under an Education Division program.

(c) *Index to EDGAR.* The EDGAR include an index of the subjects they cover (appendix A to part 100c).

(d) *Definitions in EDGAR.* The following terms used in this part are defined in part 100c:

Applicant
Application
Award
Budget
Commissioner
Institutions of higher education
Local educational agency
Non-profit
Private
Project
Public

State
State educational agency
(20 U.S.C. 3032)

§ 161j.4 Definitions in this part.

As used in this part—

"Adult" means a person who has reached the age of majority under State law;

"Adult criminal offender"; means an adult who has been found by a court to have violated a criminal law;

"Comprehensive correction education program" means a program that integrates academic and vocational education, and supportive services;

"Juvenile delinquent" means a youth has been treated by a court as a youth and found by a court to have violated a criminal law;

"Sentence" means a term of alternate service, confinement, probation, or parole;

"Supportive services" means those services that prepare an offender to function effectively in society by providing the offender with decision-making skills, job interview skills, group and family living skills, interpersonal skills, problem-solving skills, communication skills, and support in other areas appropriate to the needs of the individual offender;

"Transitional services" means special educational or educationally related services provided for those released from institutions and reentering a non-institutional environment in the placement community. These services include pre-release programs and the necessary activities and supportive services to assist the person to reintegrate into the community;

"Youth" means a person under the age of majority as determined by State law; and

"Youth offender" means a youth who has been treated by a court as an adult and found to have violated a criminal law.

(20 U.S.C. 3032)

Subpart B—What Kinds of Projects Does the Office of Education Assist Under This Program?

§ 161j.10 What is a correction education demonstration project?

(a) A correction education demonstration project demonstrates an effective way of delivering academic or vocational education within the framework of a comprehensive correction education program to meet the special educational needs of an offender population. The education may be at the elementary, secondary, or postsecondary level.

(b) A correction education demonstration project may also be a coordinating project that effectively coordinates a variety of resources and agencies to bring about a comprehensive correction education program.

(20 U.S.C. 3032)

§ 161j.11 What is the target population to be served by a project?

A project must serve an offender population: persons who have received sentences as juvenile delinquents, youth offenders, or adult criminal offenders. A project may also serve ex-offenders.

(20 U.S.C. 3032)

§ 161j.12 Where may a project be located?

A project may deliver correction education in any setting appropriate to the offender population to be served, including:

(a) A prison or other closed institution;

(b) A day or residential community-based facility; or

(c) A school, college, or other training facility.

(20 U.S.C. 3032)

§ 161j.13 Supportive services.

A project must provide appropriate supportive services for the population to be served.

(20 U.S.C. 3032)

§ 161j.14 Types of projects.

Types of projects include:

(a) Projects that facilitate the development of effective community-based educational opportunities for juvenile delinquents, youth or adult offenders.

(b) Projects that facilitate offenders' transition between correctional institutions and the community and that offer access to community-based social and educational services.

(c) Projects that are designed to result in the greater involvement of educational systems—SEAs, LEAs, and institutions of higher education—in correction education.

(d) Projects that are designed to result in the development of comprehensive correction education projects to benefit incarcerated offenders.

(e) Projects that are designed to result in the coordination of multiple resources at the local level for the delivery of comprehensive educational services to offenders and ex-offenders.

(20 U.S.C. 3032)

Subpart C—How To Apply for a Grant

§ 161j.20 Applicant requirements.

An applicant shall submit the information required by the Commissioner in the Notice of Closing Date published in the Federal Register and in the application information package.

(20 U.S.C. 3032)

§ 161j.21 Duration of Federal support.

(a)(1) Each grant is for a period of up to one year.

(2) Projects may be designed for a multi-year period not to exceed three years.

(b) An applicant that proposes a multi-year project shall demonstrate—

(1) The need for the multi-year project;

(2) A detailed budget for the first budget period of the project; and

(3) A budget estimate for each budget period of the project after the first budget period.

(c) The Commissioner will review multi-year projects in the second and third continuation years for evidence that the grantee will provide other sources of support to continue the project after Federal funding terminates.

(20 U.S.C. 3032)

Subpart D—How is a Grant Made?

§ 161j.30 What selection criteria does the Commissioner use?

(a) The Commissioner evaluates an application and selects an application for support on the basis of the selection criteria used in 45 CFR part 100a.201–100a.206 (EDGAR) and the criteria contained in these regulations.

(b) The selection criteria in EDGAR constitute 75 possible points. Specific program criteria constitute 27 possible points. The maximum possible point score for each criterion indicates the relative importance assigned to that criterion by the Commissioner as follows:

(20 U.S.C. 3032)

§ 161j.31 Selection criterion: Plan of operation.

(a) The Commissioner reviews an application for information that shows the quality of the plan of operation for the project.

(b) The Commissioner looks for information that shows—

(1) High quality in the overall design for the proposed project; (10 points)

(2) An effective plan of management for the project; (5 points)

(3) An effective plan for training of staff members in needed skill areas; (5 points)

(4) A clear description of how the objectives of the project relate to the purposes of the Correction Education Demonstration Program; (2½ points) and

(5) The way the applicant plans to use its resources and staff to achieve each objective. (2½ points) (Total: 25 points)

(20 U.S.C. 3032)

§ 161j.32 Selection criterion: Quality of staff.

(a) The Commissioner reviews an application for information that shows the quality of the staff the applicant plans to use on the project.

(b) The Commissioner looks for information that shows—

(1) The Qualifications of the project director; (10 points)

(2) The qualifications of each of the following: (7 points)

(i) The professional staff;

(ii) Consultants; and

(3) The time that each person referred to in paragraphs (b) (1) and (2) of this section plans to commit to the proposed project.

(c) To determine the qualifications of the proposed staff the Commissioner considers the individual's professional training, experience, and competency in the field of correction education.

(d) The Commissioner also looks at proposed staff members and consultants in terms of their understanding of a sensitivity to the needs of the target population. (Total: 17 points)

(20 U.S.C. 3032)

§ 161j.33 Selection criterion: Budget and cost effectiveness.

(a) The Commissioner reviews an application for information that shows that the project has an adequate budget and is cost effective.

(b) The Commissioner looks for information that shows—

(1) An effective plan of financial management;

(2) An itemized statement of cost that justifies each line in the proposed budget and indicates that costs are reasonable in relation to the objectives of the project. (Total: 8 points)

(20 U.S.C. 3032)

§ 161j.34 Selection criterion: Evaluation plan.

(a) The Commissioner reviews an application for information that shows the quality of the evaluation plan for the project.

(b) The Commissioner looks for information that shows a quantifiable method to determine if the project achieves each of its objectives. (Total: 5 points)

(20 U.S.C. 3032)

§ 161j.35 Selection criterion: Adequacy of resources.

(a) The Commissioner reviews an application for information that shows that the applicant plans to devote adequate resources to the project.

(b) The Commissioner looks for information that shows that—

(1) The facilities the applicant plans to use to conduct the project are adequate;

(2) The equipment the applicant plans to use is adequate; and

(3) The support staff the applicant plans to use is adequate. (Total: 5 points)

(20 U.S.C. 3032)

§ 161j.36 Selection criterion: Likelihood of achieving results.

(a) The Commissioner reviews an application for information that shows the applicant is likely to achieve results and that these results further the purposes of the program.

(b) The Commissioner looks for information that shows that—

(1) The applicant has both the capability and commitment to achieve the objectives of the project; and

(2) The project, if successfully completed, furthers the purposes of the program. (Total: 10 points)

(20 U.S.C. 3032)

§ 161j.37 Selection criterion: Quality of dissemination.

The Commissioner reviews an application for information that shows the quality of the plan to disseminate information related to the project.

(b) The Commissioner looks for information that shows that—

(1) The applicant has a high quality plan to make information about the project available to the general public; and

(2) The applicant has a high quality plan to make the results of the project available to interested agencies and institutions. (Total: 3 points)

(20 U.S.C. 3032)

§ 161j.38 Selection criterion: Coordination of resources.

The Commissioner reviews an application for information that shows that the applicant agency has the capability to coordinate with or to coordinate other resources to bring about a comprehensive correction education program. Evidence of capability are letters of commitment from other agencies; documentation that planning the proposed project has involved other agencies; and evidence of sharing staff and facilities. (Total: 12 points)

(20 U.S.C. 3032)

§ 161j.39 Selection criterion: Capability to continue project.

The Commissioner reviews an application for information that shows that the applicant has the ability to continue to the project with its own resources after termination of Federal funding. The Commissioner will review multi-year applications for information that shows the likelihood the applicant will introduce local support in the second and third continuation years. (Total: 15 points)

(20 U.S.C. 3032)

§ 161j.40 Geographic and offender population distribution.

In awarding grants, the Commissioner funds a variety of differenct projects and seeks equitable geographic distribution of the projects across the country in a variety of urban, suburban, and rural settings.

(20 U.S.C. 3032)

Subpart E—What Conditions Must be Met by a Grantee?

§ 161j.50 Participation of private school children.

If an SEA or LEA receives a grant for a project, the project must provide for the comparable participation of members of the target population enrolled in private elementary and secondary schools located in the area served by the SEA or LEA, in accordance with section 302(b) of the Special Projects Act.

(20 U.S.C. 2942(b))

§ 161j.51 Use of funds.

(a) Funds may be used for all reasonable costs associated with the conduct of a project.

(b) Funds may be used for training and staff development. The primary objectives of training are to provide staff with skills to work more effectively with offender populations. These skills include problem identification, resource identification, resource mobilization, action planning, and program implementation. Management skills for improved program delivery are also a goal of training.

(c) Funds may be used to support the efforts of a coordinator to identify and to coordinate multiple resources that will result in a comprehensive correction education project.

(d) Funds may be used for consultants, conferences, and workshops.

(20 U.S.C. 3032)

[FR Doc. 79-17088 Filed 6-6-79; 8:45 am]
BILLING CODE 4110-02-M

Federal Register

Thursday
June 7, 1979

Part VI

Department of Health, Education, and Welfare

Office of Education

Proposed Rules for Safe Schools Program

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 161n]

Proposed Rules for Safe Schools Program

AGENCY: Office of Education, HEW.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Commissioner proposes regulations for the Safe Schools Program enacted by the Education Amendments of 1978. These proposed regulations govern the awards of discretionary grants to assist 15 local educational agencies (LEAs) in developing and implementing projects designed—

(a) To prevent and reduce the incidence of crimes against school children, employees, and facilities; and

(b) To encourage the reporting of serious crimes to local law enforcement agencies.

DATES: All comments must be received on or before August 6, 1979. Public meetings will be held in each of the ten regions on July 11, 1979. The time for these meetings is —

9:00 a.m.–12:00 Noon.
1:00 p.m.–5:00 p.m.
7:00 p.m.–9:00 p.m.

ADDRESSES: Comments should be addressed to: Mr. Robert L. Thomas, U.S. Office of Education, 400 Maryland Avenue, S.W. (ROB–3, Room 3010), Washington, D.C. 20202.

The locations of the public meetings are—.

Region I—Boston—Bunker Hill Community College, Room C 202, Rutherford Avenue, Charlestown, Massachusetts.
Region II—New York—Norman Thomas High School, 111 East 33rd Street, New York City, New York.
Region III—Philadelphia—University City, Holiday Inn, 36th & Chestnut Streets, Philadelphia, Pennsylvania.
Region IV—Atlanta—Suite 2221, 101 Mariette Tower Bldg., Atlanta, Georgia.
Region V—Chicago—Center for Urban Education, 160 West Wendell Street (1050 North Wells), Chicago, Illinois.
Region VI—Dallas—North Lake Junior College, 2000 Walnut Hill Lane, Irving, Texas.
Region VII—Kansas City—Penn Valley Community Junior College, 3201 Southwest Trafficway, Room CC 503, Kansas City, Missouri.
Region VIII—Denver—George Washington High School, Lunch Room, 655 South Monaco Street, Denver, Colorado.
Region IX—San Francisco—Room 209, Federal Office Bldg., 50 United Nations Plaza, San Francisco, California.
Region X—Seattle—Room RC 1132 North Seattle Community College, 9600 College Way North, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Robert L. Thomas, Division of State Educational Assistance Programs, U.S. Office of Education, Telephone (202) 245–2605.

FOR INFORMATION ON REGIONAL HEARINGS CONTACT: The appropriate Regional Commissioner for Educational Programs listed below:

Region I, Boston, Dr. Thomas J. Burns, (617) 223–7500.
Region II, New York, Dr. William D. Green, (212) 264–4370.
Region III, Philadelphia, Dr. Albert C. Crambert, (215) 596–1001.
Region IV, Atlanta, Dr. William L. Lewis, (404) 221–2063.
Region V, Chicago, Ms. Juliette Noone Lester, (312) 353–5215.
Region VI, Dallas, Mr. Edward J. Baca, (214) 767–3626.
Region VII, Kansas City, Dr. Harold Blackburn, (816) 374–2276.
Region VIII, Denver, Dr. John Runkel, (303) 837–3544.
Region IX, San Francisco, Dr. Caroline Gillin, (415) 556–4920.
Region X, Seattle, Mr. Allen Apodaca, (206) 442–0460.

SUPPLEMENTARY INFORMATION: The Commissioner is required by law to publish regulations for programs authorized by Congress. Please note that the Congress has not appropriated funds to operate this program in Fiscal Year 1979, and the President's budget does not request funds for Fiscal Year 1980.

The program statute requires the Commissioner to select the 15 eligible applicants for these grants within 180 days of the enactment of the Education Amendments of 1978. The 15 LEAs have been selected and notified. The selected LEAs are not listed in this NPRM.

The proposed regulations define terms, application procedures, and clarify funding criteria and suspension provisions for the 15 selected LEAs. The program encourages selected LEAs to develop comprehensive plans to eliminate violent crime committed in their schools. LEAs are encouraged both to adopt measures to control incidences of violent crime and to identify and eliminate the causes of violent crime in their school. The program also requires LEAs to adopt guidelines for the reporting of serious crimes to local police.

In developing the proposed regulations, the Commissioner cooperated with representatives from the Office of Juvenile Justice and Delinquency Prevention (OJJDP), as required by statute. The 15 selected LEAs for the Safe School program are encouraged to use the available resources of the OJJDP regional centers in developing and implementing their own projects, in addition to the technical assistance they will receive from the Office of Education.

The proposed regulations for part 161n do not contain certain types of requirements. Those requirements are covered in EDGAR—the Education Division General Administrative Regulations—which replace the General Provisions for Office of Education Program Regulations and which were published as a notice of proposed rulemaking (NPRM) on May 4, 1979 (44 FR 26308).

Anyone wanting to comment on those requirements should do so in response to the EDGAR NPRM, rather than to this NPRM.

The following items applicable to this program are now covered generally in EDGAR:

How to apply for a grant.
How grants are made.
Certain conditions that must be met by a grantee.
The administrative responsibilities of a grantee.
The procedures the Office of Education uses to get compliance.

Reviewers should be aware that the last five funding criteria for this program, listed in part 161n.30(i), will become part of EDGAR as selection criteria.

Invitation to Comment

A public meeting on this Notice of Proposed Rulemaking will be held in each of the ten Federal regions. Since we expect to schedule public meetings for several regulations on the same day, at the same place, we need to get an idea of how many persons are interested in speaking about these regulations. If you are interested in commenting at a public meeting, we encourage you to call the appropriate Regional Commissioner of Education, who will schedule a time for your comments. Persons who do not notify the Regional Commissioner of their intention to comment will be given an opportunity to speak. Those persons making presentations will be called upon according to their prearranged schedule, or if not prearranged, in the order of registration.

We expect that comments on these proposed regulations will be first on the agenda of the public meeting.

In addition, interested persons are invited to submit comments and recommendations regarding the proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this document. All comments received on or before the 60th day after publication of this document will be

considered in the development of the final regulations.

All written comments submitted in response to this notice will be available for public inspection, both during and after the comment period, in Room 3010, ROB-3, 7th D Street SW., Washington, D.C. between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

Citation of Legal Authority

As required by sec. 431(a) of the General Education Provisions Act (20 U.S.C. 1232(a)), a citation of statutory or other legal authority for each section of the regulations has been placed in parentheses on the line following the text of that section.

(Catalog of Federal Domestic Assistance No. not yet assigned)

Dated: April 20, 1979.

Ernest L. Boyer,

U.S. Commissioner of Education.

Approved: May 17, 1979.

Joseph A. Califano, Jr.,

Secretary of Health, Education, and Welfare.

Title 45 CFR is proposed to be amended by adding a new Part 161n to read as follows:

PART 161n—SAFE SCHOOLS PROGRAM

Subpart A—General

Sec.

161n.1 Description of Safe Schools Program.
161n.2 Eligible parties.
161n.3 Regulations that apply to the Safe Schools Program
161n.4 Program definitions.
161n.5–161n.9 [Reserved]

Subpart B—What Kinds of Projects Does the Office of Education Assist Under This Program?

161n.10 Types of projects assisted.
161n.11–161n.19 [Reserved]

Subpart C—How Does an LEA Apply for a Grant?

161n.20 Program requirements.
161n.21 Project and budget period.
161n.22–161n.29 [Reserved]

Subpart D—How is the Amount of a Grant Determined?

161n.30 Funding criteria.
161n.31 Funding procedure.
161n.32–161n.39 [Reserved]

Subpart E—What Conditions Must be Met by a Grantee?

161n.40 Supplement but not supplant with Federal funds.
161n.41 Limitation on use of funds for alterations of school facilities.
161n.42–161n.49 [Reserved]

Subpart F—What Compliance Procedures are Used by the Office of Education?

161n.50 Suspension of funding.
161n.51–161n.59 [Reserved]

Authority: Sec. 941–944, Title IX, Part D of the Elementary and Secondary Education Act of 1965, as amended by sec. 802 of Pub. L. 95-561, 92 Stat. 2301–2302 (20 U.S.C. 3351–3354), unless otherwise noted.

Subpart A—General

§ 161n.1 Description of safe schools program.

The Safe Schools Program:

(a) Provides funds to assist up to 15 local educational agencies (LEAs) in developing and implementing projects designed to prevent and to reduce the incidence of crimes committed against elementary and secondary school children, employees, and facilities; and

(b) Requires participating LEAs to develop administrative guidelines to encourage school staff to report to local police serious crimes committed against students, employees, and facilities.

(20 U.S.C. 3351, 3353(a))

§ 161n.2 Eligible parties

Only the 15 LEAs previously selected by the Commissioner under procedures published separately in the Federal Register are eligible to apply for a grant under this part.

(20 U.S.C. 3353(a))

§ 161n.3 Regulations that apply to the safe schools program.

(a) *Regulations.* The following regulations apply to the Safe Schools Program:

(1) The Education Division General Administrative Regulations (EDGAR) in Part 100a (Direct Grant Programs) and Part 100c (Definitions).

(2) The regulations in this Part 161n.

(b) *How to use regulations; how to apply for funds.* The "Introduction to Education Division Programs" at the beginning of EDGAR includes general information to assist in:

(1) Using regulations that apply to Education Division programs; and

(2) Applying for assistance under an Education Division program.

(c) *Index to EDGAR.* The EDGAR include an index of the subjects they cover (Appendix A to Part 100c).

(d) *Definitions in EDGAR.* The following terms used in this part are defined in Part 100c:

Acquisition.
Applicant.
Application.
Budget period.
Commissioner.
Equipment.
Facilities.
Minor remodeling.
Personal property.
Project.
Project period.
Real property.

(e) *Definitions in ESEA.* The following terms used in this part are defined in Sec. 1001 (General Provisions) of the Elementary and Secondary Education Act of 1965:

Local educational agency.
State educational agency.
State.

(f) *Definitions in Part 74.* The following terms used in this part are defined in Part 74:

Grant.
Grantee.
(20 U.S.C. 1221e–3)

§ 161n.4 Program definitions.

As used in this part:

"Act" means Title IX, Part D (Special Grants for Safe Schools) of the Elementary and Secondary Education Act of 1965, as amended by the Education Amendments of 1978.

"Crime" means an act of physical intrusion upon a non-consenting person or the destruction of real or personal property that, if committed by an adult, would carry a potential penalty or imprisonment under State or local law—for example, arson, assault, battery, homicide, larceny, rape, robbery, trespassing, or vandalism.

"Minor alteration" means minor remodeling as defined in Part 100c.

"School and school building" means any property, facility, vehicle, or area that an LEA designates to be used by school-related purposes; for example, athletic facilities, cafeterias, classroom buildings, playgrounds, school buses, and school parking lots.

"Serious crime" means crime as defined for the purposes of this part, that, if committed by an adult, would carry a potential penalty of imprisonment for six months or longer under State or local law.

(20 U.S.C. 3351–3354)

§§ 161n.5–161n.9 [Reserved]

Subpart B—What Kinds of Projects Does the Office of Education Assist Under This Program?

§ 161n.10 Types of projects assisted.

The Commissioner assists up to 15 LEAs to develop and implement projects designed to reduce crime in schools and to increase the safety and security of students, employees, schools, and school buildings. A project may include but is not restricted to components designed—

(a) To strengthen the leadership role of school principals in developing fair and consistent procedures that lead to a school climate conducive to learning;

(b) To increase the skills and effectiveness of classroom teachers through training in classroom management;

(c) To provide students an opportunity to participate in school governance;

(d) To involve students, parents, and the community in the solution of problems related to school crime;

(e) To hire, train, or retrain staff to prevent and reduce the incidence of crimes in schools through an awareness and understanding of the problems and potential solutions to crime;

(f) To identify and seek to eliminate those factors which may cause crime in the LEA.

(20 U.S.C. 3354)

§§ 161n.11–161n.19 [Reserved]

Subpart C—How Does an LEA Apply for a Grant?

§ 161n.20 Program requirements.

Each LEA must submit an application which:

(a) Includes a plan of up to five years to prevent and reduce the incidence of crimes in its schools;

(b) Meets the requirements of EDGAR §§ 100a.150–100a.154 (SEA approval);

(c) Includes a project component to develop and implement administrative guidelines to encourage school officials and staff to report serious crimes committed in schools or school buildings to local law enforcement agencies.

(20 U.S.C. 3354)

§ 161n.21 Project and budget period.

The project period for an approved application is up to five years. Each budget period, however, will be 12 months. Continuation awards will be made according to the procedures in EDGAR §§ 100a.251–100a.253.

(20 U.S.C. 3352, 3354)

§§ 161n.22–161n.29 [Reserved]

Subpart D—How Is the Amount of a Grant Determined?

§ 161n.30 Funding criteria.

The Commissioner reviews applications for grants on the basis of the criteria in this section and may award up to 100 points for the listed criteria. The number of points an applicant receives depends upon the extent to which its application demonstrates that:

(a) A high rate of school crime exists in the LEA as evidenced by public records of school crime maintained by local law enforcement or other agencies (11 points).

(b) The LEA has an effective ongoing program to reduce crime (10 points).

(c) The LEA has financial need as evidenced by factors such as loss of tax base, rising expenses, or unforeseen fiscal problems (9 points).

(d) The proposed plan to reduce crime extends beyond the financial and staff resources of the LEA (8 points).

(e) The quality of education available to students in the applicant LEA is deficient relative to that in other LEAs throughout the State, as evidenced by factors such as achievement scores, deficient physical plants, staff/student ratios, or the percentage of pupils in the applicant LEA below minimum performance standards in relation to State or national norms (7 points).

(f) The proposed project will be effective in reducing crime, as evidenced by factors such as previous research or successful pilot projects (6 points).

(g) The LEA has developed quality administrative guidelines to encourage the reporting of serious crimes to law enforcement agencies (5 points).

(h) School personnel are reporting serious crimes comitted in schools and school buildings to local law enforcement agencies, as evidenced by school and law enforcement crime data (4 points).

(i) The proposed plan satisfies the criteria in EDGAR §§ 100a.202–100a.206, with each criterion having the following weight:

(1) Plan of operation—15 points.

(2) Quality of key personnel—10 points.

(3) Budget and cost effectiveness—5 points.

(4) Evaluation plan—5 points.

(5) Adequacy of resources—5 points.

(20 U.S.C. 1221e–3(a)(1), 3353(b))

§ 161n.31 Funding procedures.

(a) In determining the amount of funds awarded to each applicant, the Commissioner gives priority consideration to each applicant according to the total number of points scorded on the funding criteria.

(b) An eligible LEA may apply for funds for projects in subsequent budget periods even though it did not apply for or receive funds for the prior budget period.

(20 U.S.C. 3353(b), 3354(a))

§§ 161n.32—161n.39 [Reserved]

Subpart E—What Conditions Must be Met by a Grantee?

§ 161n.40 Supplement but not supplant with Federal funds.

A grantee shall not substitute funds awarded under this program for local funds it would otherwise have expended for project-related activities.

(20 U.S.C. 3353(b)(2))

§ 161n.41 Limitation on the use of funds for alternations of school facilities.

A grantee may use no more than 10 percent of the funds awarded under this program for minor alternation of schools and school buildings, including the acquistion, installation, modernization, or replacement of equipment.

(20 U.S.C. 3354(b))

§§ 161n.42–161n.49 [Reserved]

Subpart F—What Compliance Procedures Are Used by the Office of Education?

§ 161n.50 Suspension of funding.

(a) The Commissioner suspends the funding of any grantee that fails to adopt the administrative guidelines for reporting serious crimes referred to in § 161n.10.

(b) Suspension procedures are outlined in EDGAR §§ 100a.901–100a.903.

(20 U.S.C. 3354(c))

§§ 161n.51–161n.59 [Reserved]

Department of Commerce

National Telecommunications and Information Administration

Public Telecommunications Facilities Program; Policy Statement

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

Public Telecommunications Facilities Program Policy Statement

AGENCY: National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Policy Statement.

SUMMARY: The National Telecommunications and Information Administration (NTIA), U.S. Department of Commerce, is announcing the policies which will goven its implementation of Section 392(f) of the Public Telecommunications Financing Act of 1978 (Pub. L. 95–567, 92 Stat. 2405). Section 392(f) requires that "special consideration" be given to grant applications which would foster the role of women and minorities in public telecommunications entities.

EFFECTIVE DATE: This policy Statement shall be effective June 7, 1979.

FOR FURTHER INFORMATION CONTACT: Dr. John Cameron, Chief, Public Telecommunications Facilities Division, NTIA, (202) 724–3307, or Kenneth Salomon, Assistant Chief Counsel, NTIA, (202) 395–5616, Room 703, 1800 G Street, N.W., Washington, D.C. 20504.

Policy Statement

Approved: June 4, 1979.

In the matter of Public Telecommunications Facilities Program, Docket No. 78–1.

1. The National Telecommunications and Information Administration (NTIA), U.S. Department of Commerce, takes this opportunity to state the policies which will govern its implementation of Section 392(f)[1] of the Public Telecommunications Financing Act of 1978 (Pub. L. 95–567, 92 Stat. 2405) (Act). These policies follow the proposals outlined in paragraphs 17–22 of the *Notice of Proposed Rulemeking*, 44 FR 13262, published March 9, 1979, in this proceeding. A *Report and Order* adopting final regulations for the Public Telecommunications Facilities Program was published on May 29, 1979. 44 FR 30696–921. This policy Statement should be read in conjunction with that document and the *Notice*.

2. Before turning to the details of our implementation of Section 392(f), it is first necessary to state our conclusions on several preliminary matters. First, we have chosen to adopt the definition of "minority" contained in the Senate Report accompanying the legislation. Under this program, the following groups of citizens will be considered to be minorities: "American Indians or Alaska Native; Asian or Pacific Islander; Hispanic; and Blacks, not of Hispanic Origin." Sen Rep. No. 95–858, 95th Cong., 2nd Sess. 11 (1978).[2] (*Senate Report*). Second, Section 392(f) speaks in terms of fostering "ownership" of public telecommunications entities by minorities and women. During the course of our rulemaking proceeding, it was pointed out to us that the concept of "ownership" appeared to be inappropriate when dealing with public telecommunication entities. These organizations are public broadcast or noncommercial telecommunciations entities which disseminate public telecommunications service to the public. Section 397(12) of the Act. Since they are either governmental groups of one type or another or nonprofit private groups (Section 397(7)(A)), the concept of ownership in the commercial sense of the word is not fully appropriate. Accordingly, for the purposes of the PTFP, we interpret the words "ownership" (Section 392(f)) and "owned" (Section 390(2)) to mean "control" of an entity through the possession or exercise of the normal incidents of ownership, participation on the governing board, holding of corporate offices, etc.

3. A third and related matter concerns the phrase in Section 392(f) "participation in public telecommunications entities" by minorities and women. We interpret "participation" to include the holding of management and other positions in the entity, especially those concerned with programming decisions and day-to-day operation and management.[3] These categories of positions are not exclusive. They are designed to reflect our intent that all applications which will truly foster meaningful involvement of women and minorities in public telecommunications entities, and programming directed towards the needs and interests of those groups be given special consideration.

4. The major issue remaining is what level of control will trigger special consideration under Section 392(f). As indicated above, we must be assured that applicants requesting Section 392(f) status actually merit it and that women and minorities are not being used as fronts for applications which do not, in fact, merit special consideration. To this end, many urged us to adopt a strict numerical approach: Special consideration would be given only where 51 or more percent of the governing board of an entity consisted of women and/or minorities. We reject this approach since it would prohibit giving special consideration to a meritorious application which furthers the aims of Section 392(f) even though the majority of the applicant's governing body is not composed of minorities and women. Instead, we adopt a policy of giving special consideration where women and/or minorities are in either legal (*i.e.*, more than 50 percent) *or* actual control of the entity. We will consider the applicant's reported composition of its governing body and the individuals who hold management-level and policymaking positions in the organization. This approach will assure that entities receiving special consideration will legitimately merit that consideration and will, most importantly, provide an increase in educational, cultural and related programming responsive to the needs of these groups.[4]

---

[1] Section 392(f) provides:

In establishing criteria for grants pursuant to section 393 and in establishing procedures relating to the order of priority established in subsection (e) in approving applications for grants, the Secretary shall give special consideration to applications which would increase minority and women's ownership of, operation of, and participation in public telecommunications entities. The Secretary shall take affirmative steps to inform minorities and women of the availability of funds under this subpart, and the localities where new public telecommunications facilities are needed, and to provide such other assistance and information as may be appropriate.

[2] Several groups urged that the definition of "minority" be expanded to include the handicapped and elderly. Our reading of the Act and its surrounding legislative history requires the conclusion that Congress intended to confer special consideration only on those groups identified in the *Senate Report*. *See generally*, the comments of Senators Hollings and Cranston during Senate debate on the Act. 140 *Cong. Rec.* S. 15432, S. 15454–455 (daily ed. Sept. 19, 1978). We are without authority to broaden that definition.

[3] The FCC and the courts have held, and we agree, that minority ownership and managerial participation are likely to result in programming directed towards minority audiences. *Garrett Broadcasting Service* v. *FCC*, 315 F. 2nd 1058, 1063 (D.C. Cir. 1975); *TV–9 Inc.*, v. *FCC*, 495 F. 2nd 929 (D.C. Cir. 1973); *cert denied*, 419 U.S. 986 (1974). *See also Statement of Policy on Minority Ownership of Broadcasting Facilities*, 68 FCC 2nd 979 (1978); and NTIA Petition for Issuance of Policy Statement or Notice of Inquiry, filed January 31, 1978 with the FCC.

[4] We emphasize, however, that the goal of the Act is to provide public telecommunications services to the public as a whole. Thus, while the Act does not prevent an applicant from proposing to "target a specific segment of the public for its programming" (*i.e.*, the New York City Black community) this does not mean that the funding priorities of the Act and the goals of public broadcasting are not relevant.

Only after the [Section 393(b)] priorities have been addressed * * * [should] the Secretary of Commerce give serious consideration to extending support to entities proposing to serve specific interests within the public at large. Even then these specific interests must closely fit with the general purposes and objectives of public broadcasting. *Senate Report* at 8–9.

5. Applications proposing substantial but less than controlling minority and women governing body memberships will also be granted favorable consideration. We will look with favor on applicants with substantial (20 percent or more) representation of women and minorities on their governing bodies, and with women and minorities in full-time managerial positions. The greater the percentages and number of decision-making program related positions, the stronger the applicant's advantage. *NTIA Petition for Issuance of Policy Statement or Notice of Inquiry*, filed January 31, 1978 with the FCC at 15–16.

6. It should be clear that we view Section 392(f) as a modifier of the statutory priorities listed in Section 393(b) of the Act and the list of funding priorities set forth in Appendix B of the *Report and Order*, 44 Fed. Reg. at 30920–921. Thus, if all other relevant factors were equal (for example, priority listing, cost efficiency, etc.) and we were able to award only one grant, we would fund the application that best fosters the role of minorities and women. It must be stressed, however, that applicants seeking the benefit of Section 392(f) must meet the eligibility requirements of the Act and Regulations. In other words, Section 392(f) does not relieve applicants of the basic background, planning and detail work required to create a public telecommunications entity and prepare a feasible, comprehensive and meaningful application.

7. Section 392(f) also imposes on the Department of Commerce an obligation to take "affirmative steps" to advise minorities and women of PTFP funds and localities where new facilities are needed. We have undertaken to advise relevant groups of the existence of Section 392(f) in a variety of ways. We have assembled a specialized mailing list of womens' and minority groups and have sent those on the list a notice outlining Section 392(f); all applicants on deferred status have also been advised of the provision and encouraged to determine their eligibility under it; a fact sheet on the Act in general and Section 392(f) in particular was prepared and sent to various communications and education trade journals and to publications which address the needs and interests of minorities and women. Moreover, a Special Concerns Branch has been created in NTIA's Public Telecommunications Facilities Division which has been specifically assigned responsibility under Section 392(f). The Chief of the Branch has attended and will continue to attend national and regional meetings of organizations representing these groups of citizens.

8. Additionally, Section 392(f) directs the Department to provide "such other assistance and information as may be appropriate" to minorities and women. Equal assistance and access to the program will be assured for all potential applicants. The PTFP staff will, therefore, be available to all applicants to explain regulations and application requirements, and to advise applicants on the completion of necessary forms. This assistance will not include an evaluation of the merits or comparative position of applications.

Henry Geller,

Administrator, National Telecommunications and Information Administration.

Part VIII

Department of Health, Education, and Welfare

Office of Education

Preschool Partnership Program; Proposed Rule

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 161d]

Preschool Partnership Program

AGENCY: Office of Education, HEW.

ACTION: Proposed regulations.

SUMMARY: The Commissioner of Education proposes to amend Title 45 of the Code of Federal Regulations by adding a new Part 161d for the Preschool Partnership Program enacted by the Education Amendments of 1978. The proposed regulations—which were developed in consultation with the Assistant Secretary for Human Development—will govern the awarding of direct discretionary grants designed to establish programs of educational services for preschool children and their parents or other care-givers.

DATES: All comments on the proposed regulations must be received on or before August 6, 1979. Public meetings will be held in each of the ten regions on July 9, 1979. The time for these meetings is from 9 a.m.–12 Noon.

ADDRESSES: Comments should be addressed to Dr. Frances Yvonne Hicks, U.S. Office of Education, 400 Maryland Avenue, SW., (FOB–6) Room 2083, Washington, D.C. 20202. All written comments submitted will be available for public inspection at this address between 8:30 a.m. and 4 p.m., Mondays through Fridays, except for Federal holidays. The locations for the public meetings are:

Region I—Boston—Boston School Department, Administration Building, Boston Committee Hearing Room, 26 Court Street, Boston, Massachusetts.
Region II—New York—Public School 142, 100 Attorney Street, New York City, New York.
Region III—Philadelphia—University City, 36th & Chestnut Streets (Holiday Inn), Philadelphia, Pennsylvania.
Region IV—Atlanta—Suite 2221, 101 Mariette Tower Bldg., Atlanta, Georgia.
Region V—Chicago—Center for Urban Education, 180 West Wendell Street (1050 North Wells), Chicago, Illinois.
Region VI—Dallas—William Travis Elementary School, 3001 McKinney Avenue, Dallas, Texas.
Region VII—Kansas City—Board of Education Building Auditorium, 1211 McGee Street, Kansas City, Missouri.
Region VIII—Denver—George Washington High School, Lunch Room, 655 South Monaco Street, Denver, Colorado.
Region IX—San Francisco—Room 209, Federal Office Bldg., 50 United Nations Plaza, San Francisco, California.
Region X—Seattle—Auditorium Administrative & Service Center, Seattle School District, 815 Fourth Avenue North, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Dr. Frances Yvonne Hicks, (202) 245–8118.

FOR INFORMATION ON REGIONAL HEARINGS CONTACT: The appropriate Regional Commissioner for Educational Programs listed below:

Region I, Boston, Dr. Thomas J. Burns, (617) 223–7500.
Region II, New York, Dr. William D. Green, (212) 264–4370.
Region III, Philadelphia, Dr. Albert C. Cramberi, (215) 596–1001.
Region IV, Atlanta, Dr. William L. Lewis, (404) 221–2063.
Region V, Chicago, Ms. Juliette Noone Lester, (312) 353–5215.
Region VI, Dallas, Mr. Edward J. Baca, (214) 767–3626.
Region VII, Kansas City, Dr. Harold Blackburn, (816) 374–2276.
Region VIII, Denver, Dr. John Runkel, (303) 837–3544.
Region IX, San Francisco, Dr. Carolina Gillin, (415) 556–4920.
Region X, Seattle, Mr. Allen Apodaca, (206) 442–0460.

SUPPLEMENTARY INFORMATION:

A. No Funds

The Commissioner is required by law to publish regulations for programs authorized by Congress. Please note that the Congress has not appropriated funds to operate this program in Fiscal Year 1979, and the President's budget does not request funds for Fiscal Year 1980.

A–1. Background

The Preschool Partnership Program reflects a growing awareness that a child's initial learning experiences at home, and subsequent experiences in preschool group settings, contribute to future academic success. It recognizes the importance of parents as the child's first teachers. It emphasizes the role of schools and other community agencies in enabling parents, prospective parents, and child care-givers to develop the competencies with which to discharge their childrearing responsibilities in an effective manner.

The program will benefit from the long experience of Project Head Start in providing educational services for preschool children and their families. Because children from birth to three years of age are eligible for this program there is an opportunity to demonstrate the impact of these services to children younger than those participating at present, and to children not served under existing Head Start projects.

The partnership that is addressed by this program applies to several types of relationships that will be developed through the various projects. Home and school will be involved in instructional services and their evaluation. Community agencies will provide coordinated services to children and their families.

A working partnership will be established among the generations involved—not only between parents and children but also involving teachers and community members at various levels in the projects. This will be true of those projects enabling adolescents to learn about child growth and development and the responsibilities of child care through special courses linking secondary and early childhood education in a practicum experience.

University faculty members or researchers may also participate in the development of new curriculum materials for use in the home or in secondary school classes.

B. Overview of Major Provisions

The proposed regulations state the purpose of the Preschool Partnership Program, describe the nature of projects that the Commissioner funds, set forth the criteria for judging the quality of project applications, and stipulate the essential requirements for projects.

Nature of Projects

A variety of pilot projects to provide for an easier and more successful transition to formal schooling for certain preschool children are eligible for funding under this program. Two major categories of projects are (1) projects to encourage the transition of children from primarily low-income families to regular school projects, and (2) developmental projects in parent/early childhood and family education:

(a) *Transition projects for three- and four-year old children and their parents, families or guardians, primarily from low-income families.* These projects shall involve the cooperation of LEAs and local Head Start projects. During the first year they provide, to participating children and adults, educational services that include instruction, counseling, and testing primarily in their home. During the following year(s) and prior to formal schooling the project shall involve primarily school-based instruction, testing and evaluation. In those areas in which kindergarten is not available, a total three-year preschool program of educational services may be necessary. During the first two years of formal schooling the projects concentrate on assessing the achievement of children.

As provided in § 161d.7 of the proposed regulations, the applicant is eligible to apply for initial and continued funding for any subsequent fiscal year

only if the grantee begins a new participant group for that year and maintains educational services for all groups until each group has experienced the full program, including testing and assessment of achievement at the end of each of the first two years of formal schooling. The applicant agrees to these conditions in order to receive funding for the initial activity year. Funding for the subsequent year(s) will be at the initial level, if sufficient funds are available. Note that first year funding includes start-up costs which are not repeated in subsequent years of the project; therefore, it is anticipated that continued Federal funding of a project at the first year level will partially cover the costs of incorporating new participant groups. The remaining costs are assumed by the applicant. The Commissioner especially invites public comment on this provision.

(b) *Developmental projects in parent/early childhood and family education.* A broad variety of projects are eligible under this category. There are no income limitations for these projects. All must include a program of educational services for children and their parents, families, or guardians. These services may be developed and offered at various levels and types of institutions; for example—

(1) Home-based or center-based instruction, counseling, and testing for the parents, families or guardians of infants or toddlers;

(2) Secondary school courses for school-age parents, or courses in child development and parenthood education to acquaint students with child-care related careers or to prepare them for their own potential parenthood through programs involving instruction and practical experience;

(3) University-based projects to develop training courses or instructional materials for the parents of young children or for the staff of child-care centers, perhaps as part of an existing demonstration program in early childhood education; and

(4) Research studies and demonstration projects concerning early childhood, parenting practices, or techniques for the early identification and treatment of barriers to learning.

The Commissioner awards quality points to applicants who, in recognition of the need for services to exceptional children, include these children in their projects at least in proportion to their number in the community—as evidenced by valid surveys or other appropriate sources of data.

Participation of Non-Low-Income Children

The Commissioner seeks to improve the transition to formal schooling for children from low-income families by encouraging the inclusion of a limited number of non-low-income participants in Preschool Partnership Program projects. Because the statutory requirement directs the program to low-income children this participation is limited to 25 percent except when unusual circumstance may lead the Commissioner to approve an exemption. These circumstances include: (1) Evidence that a greater percentage of non-low-income participants further assist low-income children in making the transition to formal schooling, (2) evidence that a higher percentage of non-low-income participants does not reduce the quality and quantity of services provided to low-income children, and (3) the inability of the applicant or grantee to obtain 75 percent low-income participation. In no case does participation by non-low-income participants exceed 50 percent.

This approach is designed to enhance the flexibility of the program in meeting the needs of a variety of communities while meeting Congressional intent that this portion of the program focus primarily upon low-income students. The approach is also designed to allow the percentage of non-low-income participation to be at a higher level than Project Head Start (10 percent) for children of less than school year age and at a lower level than Follow Through (33 percent). The purpose is to provide flexibility though the Preschool Partnership Program for further interrelating Head Start and Follow Through activities. The Office of Education especially seeks comment on this provision.

Participation of Exceptional Children

The proposed regulation awards points for the participation of exceptional children. "Exceptional children" is defined broadly to include not only gifted, talented, and handicapped children but also "any other children needing a program of educational services substantially different from that required for the majority of preschool children." Examples of the latter might be slow learners, bilingual children or culturally deprived children, depending on the population of the area the project would serve. The Commissioner especially seeks comments on this broad definition.

Criteria for Reviewing Applications

The program encourages the development of projects that provide linkage among the various preschool programs in a community. Thus, the Commissioner's criteria for review of applications include special consideration for projects that involve cooperation with existing preschool programs within the project's service community.

This criterion also allows additional points for the extent to which each preschool partnership project is developed and operated in cooperation with appropriate SEAs and LEAs, as well as with other public and private organizations. National studies such as a Rand report (*Federal Programs Supporting Education Change*, Vol. IV; *The Findings in Review*) have shown that the involvement of SEAs and LEAs in the development and expansion of innovative projects substantially increases the likelihood that their findings and practices will be incorporated into continuing school programs.

Additional Requirements for Projects

The proposed regulations do not contain certain types of requirements. Those requirements will be covered in the Education Division's General Administrative Regulations (EDGAR), which will replace the General Provisions for Office of Education Program Regulations and which were published as a notice of proposed rulemaking (NPRM) on May 4, 1979 (44 FR 26308).

Anyone wanting to comment on these requirements should do so in response to the EDGAR NPRM, rather than to this NPRM.

The following items applicable to this program will now be among those covered generally in EDGAR:

How to apply for a grant.

How grants are made.

Certain conditions that must be met by a grantee.

The administrative responsibilities of a grantee.

The Office of Education's procedures to assure compliance.

Invitation To Comment

A public meeting on this Notice of Proposed Rulemaking will be held in each of the ten Federal regions. Since we expect to schedule public meetings for several regulations on the same day, at the same place, we need to get an idea of how many persons are interested in speaking about these regulations. If you are interested in commenting at a

public meeting, we encourage you to call the appropriate Regional Commissioner of Education, who will schedule a time for your comments. Persons who do not notify the Regional Commissioner of their intention to comment will be given an opportunity to speak. Those persons making presentations will be called upon according to their prearranged schedule, or if not prearranged, in the order of registration.

We expect that comments on these proposed regulations will be first on the agenda of the public meeting.

In addition, interested persons are invited to submit comments and recommendations regarding the proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this document. All comments received on or before the 60th day after publication of this document will be considered in the development of the final regulations.

All written comments submitted in response to this notice will be available for public inspection, both during and after the comment period, in Room 2063, FOB-6, 400 Maryland Avenue, S.W., Washington, D.C. between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

As required by Section 431(a) of the General Education Provisions Act (20 U.S.C. 1232(a)), a citation of statutory authority for each section of the proposed regulations has been placed in parentheses on the line following the text of the section. Reference in these citations of authority relate to sections of the Elementary and Secondary Education Act of 1965, as enacted by Pub. L. 95-561.

(Catalog of Federal Domestic Assistance No. has not yet been assigned to the Preschool Partnership Program)

Dated: May 3, 1979.

Ernest L. Boyer,

U.S. Commissioner of Education.

Approved: May 18, 1979.

Joseph A. Califano, Jr.,

Secretary of Health, Education, and Welfare.

It is proposed that Title 45 of the Code of Federal Regulations be amended by adding a new Part 161d, to read as follows:

PART 161D—PRESCHOOL PARTNERSHIP PROGRAM

Subpart A—General

Sec.
161d.1 Preschool Partnership Program.
161d.2 Eligible parties.
161d.3 Regulations that apply to the Preschool Partnership Program.
161d.4 Definitions.

Subpart B—Projects Assisted Under this Program

161d.5 Nature of projects.
161d.6 Participation of non-low-income children.
161d.7 Nature of cooperations.
161d.8. Project duration.
161d.9 Transition projects—conditions for initial funding and for continued funding at first-year-level.

Subpart C—How To Apply for a Grant

161d.10 Application requirements.

Subpart D—How a Grant is Made

161d.11 Criteria for review of applications.

Subpart E—Conditions To Be Met by a Grantee

161d.12 Allowable cost limitations.
161d.13 Participation by private school children.

Appendix D—The Legislation

Authority: Title III, Part D, Sec. 325, Elementary and Secondary Education Act of 1965, as enacted by Pub. L. 95-561.

Subpart A—General

§ 161d.1 Preschool partnership program.

The Preschool Partnership Program provides Federal Assistance for the establishment of pilot projects that will offer special educational services to the families of preschool children to help in the children's successful transition to formal schooling and thereby improve their long-term achievement.

(20 U.S.C. 2971)

§ 161d.2 Eligible parties.

The Commissioner may make grants to State and local educational agencies (SEAs and LEAs) and other public agencies and nonprofit private organizations or institutions, including Project Head Start grantees.

(20 U.S.C. 2942(a))

§ 161d.3 Regulations that apply to the preschool partnership program.

The following regulations are applicable to this program:

(a) *General regulations.* (1) The education Division General Administrative Regulations (EDGAR), Part 100a (Direct Grant Programs) and Part 100c (Definitions; Freedom of Information Act) apply to this program.

(2) The HEW grant regulations in Part 74 of this title.

(b) *Specific regulations.* The regulations in this part (45 CFR Part 161d).

(20 U.S.C. 1221e-3(a)(1))

§ 161d.4 Definitions.

(a) *General.* The following terms used in this part are defined in EDGAR, Part 100c:

Applicant
Application
Commissioner
Department
Elementary School
Local Educational Agency
Materials
Minor Remodeling
Nonprofit
Private
Project
Project Period
Public
Secondary School
State
State Educational Agency

(b) *Specific.* Terms used in this part are defined as follows:

"Acitivity year" means the year of involvement by a project participant.

"Exceptional children" means gifted and talented children, handicapped children, and any other children needing a program of educational services substantially different from that required for the majority and other preschool children.

"First two years of formal schooling" means the initial two-year period of general education for which a State commonly provides public support; either kindergarten and first grade, or first and second grade.

"Guardian" means a person, other than a parent or family member, who has substantial responsibility for a participating child.

"Parent" means a father, mother, foster parent, or adoptive parent.

"Preschool" means educational programs organized for children younger than those usually served by the first two years of formal schooling.

"Participant group" means eligible children and their parents or guardians and family members.

"Project Head Start" means local Project Head Start grantees and delegate agencies.

"Low-income families" means those families—

(a) Whose annual income falls at or below the State income poverty guidelines for determining eligibility for free meals or free milk under the National School Lunch Act;

(b) Who are receiving public assistance, or

(c) Who are eligible for participation in Project Head Start.

"Program of educational services" means instruction, counseling, testing, assessment of health status and needs, and referral for followup. It does not

include the provision of any needed medical, dental, nutritional, or social services. Instruction addresses the knowledge, language, physical, social and emotional development of children participating in the project, and enhancing child-care competencies of parents and other caregivers.

"Testing and assessment" means the collection, analysis, and reporting of information and other data relating to the accomplishment of project objectives.

(20 U.S.C. 2971; 20 U.S.C. 1221e-3(a)(1))

Subpart B—Projects Assisted Under This Program

§ 161d.5 Nature of projects.

(a) The Commissioner awards grants for the following types of pilot projects:

(1) *Transition projects for preschool children of low-income families.* Each of these projects, which shall be administered in cooperation with LEAs and Project Head Start and may involve cooperation with other preschool programs, must provide a continuous program including—

(i) In the initial activity year, a program of educational services to children of ages three or four, from primarily low-income families, and their parents, guardians, or family members. These services must be provided primarily in the home;

(ii) In subsequent activity year(s), an appropriate program of educational services to the adults and children who participated in the first year, to be conducted primarily on the premises of an elementary school and to continue until the first year of formal schooling; and

Note.—In those areas in which kindergarten is not available, a total three-year preschool program of educational services may be necessary.

(iii) At the end of each of the first two years of formal schooling the project activity concentrates on testing and assessment of the achievement of project children.

(2) *Development projects in parent/early childhood and family education.* These projects must provide a program of educational services to selected groups of children under kindergarten age and to parents, secondary school students in education for parenthood programs, family members, or guardians. The projects must develop model approaches to early childhood and family education and may involve research, materials development, staff training, or other related program development activities.

(b) Project components conducted primarily in a child's home, but not directed toward the child, concentrate on enhancing those competencies which will enable parents, family members, or guardians to foster the child's learning and development.

(20 U.S.C. 2971(a), (b) and (c))

§ 161d.6 Participation of non-low-income children.

(a) The Commissioner permits non-low-income children and their parents, guardians, or families to enroll in projects described in § 161d.5(a)(1) in numbers constituting up to 25 percent of any single participant group.

(b) The Commissioner may give prior approval for applicants or grantees to include more than 25 percent non-low-income participation only if the applicant or grantee demonstrates that—

(1) The presence of a higher percentage of non-low-income participants further assists low-income children in making the transition to formal schooling;

(2) It made a good faith effort to obtain 75 percent low-income participation but could not do so; and

(3) The inclusion of a higher percentage of non-low-income children does not reduce the quality and quantity of services provided to low-income children.

(c) In no case does non-low-income participation exceed 50 percent.

(20 U.S.C. 2971)

§ 161d.7 Nature of cooperation.

Any project designed under § 161d.5(a)(1) must include the cooperation of LEAs and Project Head Start and may include that of other preschools and community organizations. Cooperation includes the following activities:

(a) Planning a project with organizations and individuals having similar objectives and concerns, including appropriate private preschools and elementary schools.

(b) Sharing information, facilities, staff, services, or other resources.

(c) Developing a plan for referral to cooperating agencies for health care or other services required but not funded from the project grant.

(d) Obtaining agreement from other related programs on responsibility for specific activities that will increase the impact of funds available during and after the project period.

(20 U.S.C. 2971(a), (b), and (c))

§ 161d.8 Project duration.

(a) The Commissioner determines the duration of Federal assistance on a case-by-case basis. Under § 161d.5(a)(1) the Commissioner may approve funds for up to five years. Under § 161d.5(a)(2) the Commissioner generally awards funds for no more than three years, and in no case for more than five years.

(b) The Commissioner reviews an application for a multi-year project in accordance with EDGAR, §§ 100a.219 and 100a.220.

(20 U.S.C. 1221e-3(a)(1))

§ 161d.9 Transition projects—Condition for initial funding and for continued funding at first-year-level.

(a) This section applies to projects described in § 161d.5(a)(1). For these projects the grantee must enroll a new and comparable participant group for each year of Federal project support. Funding for each year of the grant will be at the first-year-level—if sufficient funds are available.

(b) The Commissioner approves funding an application only if the following conditions are met:

(1) The applicant develops a feasible plan and demonstrates the capacity to begin a new and comparable participant group for each year of Federal project support anticipated.

(2) The applicant demonstrates the capacity and intent to continue the proposed project activities through the first two years of formal schooling for each participant group it begins.

(c) The Commissioner approves continued funding only if the grantee—

(1) Enrolls a new participant group for each year of Federal project support; and

(2) Demonstrates that it is conducting the approved project activities through the first two years of formal schooling for each participant group previously enrolled during the period of Federal project support.

(d) The grantee must use whatever financial resources, in addition to the grant award, which are necessary for it to begin new participant groups after the first grant year and to complete the approved project activities for each participant group enrolled during the period of Federal project support.

(20 U.S.C. 2971(b))

Subpart C—How To Apply for a Grant

§ 161d.10 Application requirements.

The Commissioner considers making a grant to an eligible applicant only if the applicant prepares and submits an application according to—

(a) Regulations governing the Preschool Partnership Program (45 CFR Part 161d) in this part and the general provisions regulations in EDGAR.

(b) The procedures contained in the Notice of Closing Date for Receipt of Applications.

(c) The instructions and forms included in the application package.

(20 U.S.C. 1221e-3(a)(1); 1221e-3(b))

Subpart D—How a Grant is Made

§ 161d.11 Criteria for review of applications.

The Commissioner reviews applications for initial project grants on the basis of the criteria in this section. The maximum possible score for all criteria is 100 points. The maximum possible score for each criterion reflects the degree of importance assigned to that criterion by the Commissioner.

(a) *General criteria.* See EDGAR §§ 100a.201–206, for general criteria applicable to direct project grants under this part. However—

The Commissioner assigns to the quality of the proposed plan of operation a maximum of 20 points rather than the 10 assigned in EDGAR; and to the quality of the evaluation plan on project effectiveness, 10 points rather than the 5 points in EDGAR. The general criteria in EDGAR are therefore assigned a total of 50 possible points.

(b) *Specific criteria.* The Commissioner awards up to 50 points to the following criteria for the Preschool Partnership Program:

(1) The extent to which a project design indicates an effective rationale and set of procedures toward establishing one or more models that will contribute to the successful transition of eligible preschool children to formal schooling. This includes the likelihood that the results of the project will be of potential use to a variety of groups throughout the Nation. (20 points)

(2) The extent to which the applicant demonstrates the ability and develops a feasible plan to incorporate the results of the project into its continuing activities, or those of cooperating agencies, institutions, and organizations, after Federal funding ends. (10 points)

(3) The extent to which the project includes exceptional children—at least in proportion to their existence, as evidenced by valid surveys or other appropriate data sources, within the defined project service community—in project activities appropriate to their unique needs. (10 points)

(4) The extent to which the project is developed and operated in cooperation with—(10 points)

(i) Parents representing the program participants;

(ii) Appropriate SEAs and LEAs;

(iii) Other public and private organizations, including health and social service agencies, and existing preschool and private elementary school programs within the defined project service community; and

(iv) Project Head Start.

(20 U.S.C. 2971 (a), (b) and (c))

Subpart E—Conditions To Be Met by a Grantee

§ 161d.12 Allowable cost limitations.

(a) Cost for stipends, released time, or the employment of substitutes to enable educational personnel to participate in the project activities, and costs for minor remodeling are allowable in exceptional cases only with the approval of the Commissioner.

(b) The Commissioner approves these costs only—

(1) If the proposed project receives fifteen points in its plan for easing the transition of preschool children to formal school (§ 161d.9(b)(1));

(2) If the proposed project receives 4 points in its plan for budget and cost effectiveness (EDGAR § 100a.204) including consideration of the costs proposed for these purposes; and

(3) If not allowing these costs would tend to defeat the purposes of the Act.

(20 U.S.C. 2971; 20 U.S.C. 1221e-3(a)(1))

§ 161d.13 Participation by private school children.

Any grant is subject to the requirements in Section 302(b) of the Elementary and Secondary Education Act of 1965 concerning consultation with private school officials and participation by private school children.

(20 U.S.C. 2942(b))

Appendix—The Legislation

"Part D—Preschool Partnership Programs

"Establishment of Program

"Sec. 325. (a) The Commissioner is directed to establish, in cooperation with the Assistant Secretary for Human Development of the Department of Health, Education, and Welfare, a program of cooperative pilot projects between local educational agencies and Project Head Start, as authorized by the headstart-Follow Through Act, which will provide a smoother and more successful transition to formal schooling for certain preschool-aged children, and thereby improve their long-term achievement in elementary school.

"(b) Projects established under this program will be designed to achieve the purposes of subsection (a) by—

"(1) providing to a limited number of children aged three to four, inclusive, of low-income families and to their parents, families, or guardians a program of educational services including instruction, counseling, and testing, to be conducted primarily in the child's home;

"(2) providing to children and adults who have participated in the services described above, during the following year appropriate educational services, testing, and counseling, to be primarily conducted on the premises of an elementary school; and

"(3) providing a coordinated program of testing and assessment, along with such other evaluation procedures as the Commissioner and the Assistant Secretary shall deem appropriate, designed to assess the achievement of children during their participation in the program and subsequently at the end of each of the first two years of formal schooling.

"(c) Funds provided under this part may also be used to fund early childhood and family education programs for children below kindergarten age. Such programs may include—

"(1) the identification of potential barriers to learning;

"(2) education of parents in child development, including education of parenthood programs for secondary school students; and

"(3) home-based programs of early childhood and family education.

"(d) Not less than 10 percent of the funds made available for purposes of section 303 for each fiscal year shall be made available for purposes of this part.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

This is a voluntary program. (See OFR NOTICE FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
CSA	MSPB*/OPM*		CSA	MSPB*/OPM*
	LABOR			LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

*NOTE: As of January 1, 1979, the Merit Systems Protection Board (MSPB) and the Office of Personnel Management (OPM) will publish on the Tuesday/Friday schedule. (MSPB and OPM are successor agencies to the Civil Service Commission.)

REMINDERS

The items in this list were editorially compiled as an aid to Federal Register users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.

Rules Going into Effect Today

ENERGY DEPARTMENT

Federal Energy Regulatory Commission—

28855 5-8-79 / Natural gas curtailment; essential agricultural users and high-priority users

NUCLEAR REGULATORY COMMISSION

28860 5-8-79 / General license requirements for any person possessing formula quantities of strategic special nuclear material in transit subject to certain requirements

List of Public Laws

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (telephone 202-275-3030).

Last Listing May 31, 1979

H.R. 1787 / Pub. L. 96-16 To authorize a supplemental appropriation to the National Aeronautics and Space Administration for research and development. (Jun. 4, 1979; 93 Stat. 33) Price $.60.

H.R. 2529 / Pub. L. 96-17 To amend the National Ocean Pollution Research and Development and Monitoring Planning Act of 1978 to authorize appropriations to carry out the provisions of such Act for fiscal year 1980. (Jun. 4, 1979; 93 Stat. 34) Price $.60.

The authentic text behind the news . . .

The Weekly Compilation of PRESIDENTIAL DOCUMENTS

Administration of Jimmy Carter

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published quarterly, semiannually, and annually. Other features include lists of acts approved by the President and of nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by Office of the Federal Register, National Archives and Records Service, General Services Administration

33052 **Crude Oil Price Ceilings** DOE/ERA issues Price Schedule No. 15 which provides for monthly increases for lower and upper tier oil; effective 6-1-79

33114 **Chlorofluorocarbon Propellants** HEW/FDA proposes essential uses; comments by 7-9-79

CONTINUED INSIDE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies of 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Area Code 202-523-5240

Highlights

33194 **Specialty Steel Quotas** Special Representative for Trade Negotiations Office reallocates shortfalls of certain quota categories; reductions effective 6-8-79, increases effective 6-11-79

33099 **Natural Gas Policy** DOE/FERC proposes rules and holds hearing on implementing the incremental pricing provisions; comments by 7-9-79, hearing 6-27-79, requests to speak 6-22-79

33332 **Improving Government Regulations** EPA publishes Semi-Annual Agenda of Significant Regulations, (Part V of this issue)

33238 **Foods For Human Use** HEW/FDA proposes current good manufacturing practices; comments by 12-31-79, (Part II of this issue)

33316 **Federal and Federally Assisted Construction** Labor/ESA publishes general wage determinations, (Part IV of this issue)

33076 **Telephone System Construction** USDA/REA proposes outside plant construction contract revision; comments by 8-7-79

Rules and Regulations

Federal Register
Vol. 44, No. 112
Friday, June 8, 1979

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 294

Availability; Official Information

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: Part 294 is revised in its entirety to conform with applicable provisions of the Civil Service Reform Act of 1978 (Pub. L. 95–454), Reorganization Plan No. 1 of 1978 (43 FR 19807) and Reorganization Plan No. 2 of 1978 (943 FR 36037); to reflect the new organizational structure of the Office of Personnel Management; and to update the Part and make editorial changes where needed.

EFFECTIVE DATE: June 8, 1979.

FOR FURTHER INFORMATION CONTACT: Stuart D. Rick, Office of Management, Office of Personnel Management, 1900 E Street, NW, Washington, D.C. 20415, 202/632–4431.

SUPPLEMENTARY INFORMATION: The Office of Personnel Management is expunging from its regulations implementing the Freedom of Information Act, 5 U.S.C. 552, matters which are now the responsibility of the Merit Systems Protection Board, the Special Counsel of the Merit Systems Protection Board, and the Equal Employment Opportunity Commission. Under Title II of the Civil Service Reform Act of 1978 (Pub. L. 95–454), which became effective January 11, 1979, and Section 202 of Reorganization Plan No. 2 of 1978 (43 FR 36037), the Merit Systems Protection Board handles most of the employee appeals which were handled by the Civil Service Commission. Among the responsibilities of the Special Counsel of the Merit Systems Protection Board, as set forth in Section 204(b) of Reorganization Plan No. 2 of 1978 and 5 U.S.C. 1206(e)(1)(c), is the investigation and prosecution of persons responsible for arbitrary and capricious withholding of information requested under the Freedom of Information Act, 5 U.S.C. 552(a)(4)(F). Under Reorganization Plan No. 1 of 1978 (43 FR 19807), Executive Order 12067 of June 30, 1978 (43 FR 28967), and Executive Order 12106 of December 28, 1978 (44 FR 1053), the Equal Employment Opportunity Commission and the Merit Systems Protection Board have authority for deciding Federal employee discrimination complaint appeals.

Subpart H of Part 294 has been modified, and Subpart L of Part 294 has been eliminated to conform with these changes. The Special Counsel of the Merit Systems Protection Board has published regulations (44 FR 6060) which deal with the investigation and prosecution of persons responsible for arbitrary and capricious withholding of information under the Freedom of Information Act.

In addition to these revisions, § 294.702(f) of Part 294 has been eliminated because the authority for disclosure discussed therein, Office of Management and Budget Circular No. A–28 revised, has been rescinded (40 FR 45484); § 294.703(a) of Part 294 has been eliminated because access by a person to his or her own Official Personnel folder is now controlled by Part 297 of Chapter I of this title; and § 294.1001 of Part 294 has been changed to show that Executive Order 11652 of March 8, 1972, as amended, and the National Security Council Directive of May 17, 1972, were revoked by Executive Order 12065 of June 28, 1978 (43 FR 28949).

Accordingly, 5 CFR Part 294 is amended to read as follows:

PART 294—AVAILABILITY OF OFFICIAL INFORMATION

Subpart A—General Provisions

Sec.
294.101 Purpose.
294.102 Definitions.

Subpart K—Leave Records

294.1101 Leave records

Authority: 5 U.S.C. 552, Freedom of Information Act, Pub. L. 93–502.

Subpart A—General Provisions

§ 294.101 Purpose.

The purpose of this part is to set forth the basic policies of the Office in regard to the availability or disclosure of information in the possession of or controlled by the Office.

§ 294.102 Definitions.

In this part: (a) "Information" means books, papers, manuals, records, photographs, and other documentary materials, regardless of physical forms or characteristics, made in or received by or under the control of the Office in pursuance of law or in connection with the discharge of official business;

(b) "Information available to the public" means information, including reasonably segregable nonexempt portions of information that may lawfully be withheld, which, on request, may be examined and copied, or of which copies may be obtained in accordance with this part by the public

regardless of interest and without specific justification; and

(c) "Disclose or disclosure" means making information available, on request, for examination and copying, or furnishing a copy of the information.

§ 294.103 General policy.

(a) When the Office receives requests for information under section 552 of title 5, United States Code, it will provide or disclose the requested information promptly, subject to the following conditions:

(1) The request reasonably describes the information sought.

(2) The request is filed according to the procedures specified in § 294.106.

(3) Any applicable fees for records search, copying, printed matter, or computer services have been paid or waived as specified in § 294.107.

(4) The requested material is not subject to one of the exemptions in section 552(b) of title 5, United States Code.

(b) If the requested information is subject to one of the exemptions, the Office may disclose it or may not, depending on the nature of the information. The Office shall not ordinarily disclose the following exempt materials:

(1) Material specifically authorized by an Executive Order to be kept secret in the interest of national defense or foreign policy and properly classified pursuant to criteria in such an Executive Order;

(2) Material related solely to the internal personnel rules and practices of the Office or another agency;

(3) Material specifically exempted from disclosure by statute;

(4) Commercial or financial information obtained from a person and privileged or confidential;

(5) Interagency or intra-agency memoranda or letters which would not be available by law to a party in litigation with an agency;

(6) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy (except that such files will be disclosed to the individuals to whom they pertain as specified in §§ 294.703 and 831.106(a) of this chapter); and

(7) Investigatory records (except that such records will be disclosed to the individuals to whom they pertain under the conditions specified in § 294.601).

(c) If part of the requested information is exempt from disclosure and part is not, the Office will disclose reasonable segregable portions of the material after deleting exempt portions.

§ 294.104 Information available—indexes; of certain records.

(a) Indexes of materials published and offered for sale or available for public inspection and copying shall be maintained and revised at least quarterly.

(b) A copy of this index is available at no cost from:

Mail, Files, and Distribution Section, Office Services Division, Office of Management, Office of Personnel Management, 1900 E Street, N.W., Washington, D.C. 20415.

Indexing of these materials is for the convenience of the public and does not constitute a determination that all of the materials listed are within the category of those required to be indexed by 5 U.S.C. 552(a)(2).

Group of office	Subject matter
Associate Director for Executive Personnel and Management Development.	Senior Executive Service Administrative Law Judge Program, selection, development, and training of Federal executives.
Associate Director for Staffing Services	Nationwide recruiting and job information, examining services for entry and promotion, selection methods, position classification standards, qualification standards, examination rating reviews, test scoring services, reduction in force, background investigations of Federal employees and applicants for Federal employment, student employment programs.
Associate Director for Compensation	Employee compensation: Pay, leave, retirement, insurance, and benefits; incentive and performance pay guidelines.
Associate Director for Workforce Effectiveness and Development.	Productivity and quality of work life; development of Governmentwide occupational health programs; employee relations, discipline, and performance evaluation; incentive awards; job related training, training information, and training available to Government employees.
Assistant Director for Agency Compliance and Evaluation, Agency Relations.	Evaluation of personnel management in agencies, delegation agreements, classification and job grading reviews, Governmentwide statistical personnel information.
Assistant Director for Intergovernmental Personnel Programs.	Grants to State and local governments, intergovernmental assignments, and other improvements to State and local government personnel systems.
Assistant Director for Affirmative Employment Programs.	Selection and advancement within the Federal service without regard to race, religion, color, national origin, sex, age, or handicapping condition.
Assistant Director for Labor-Management Relations.	Technical information and policy guidance concerning management and employee unions in the Federal service.
Director, Office of Government Ethics	Executive Branch policy relating to ethics and conflict of interest.

§ 294.105 Places where information may be obtained.

(a) A request for information which the requester believes is located in the Office headquarters in Washington, D.C., should be addressed to the Associate Director, Assistant Director, or other head of the office indicated in the list in paragraph (b) of this section. The address for all such requests is:

Office of Personnel Management, 1900 E Street, N.W., Washington, D.C. 20415.

(b) The following lists the groups and offices of the Office in Washington, D.C., and their principal areas of responsibility:

(c) A request for information which the requester believes is located in a regional office, area office, or post of duty of the Office should be addressed to the Director, Office of Personnel Management, Regional Office, at the appropriate address indicated in the following list:

Richard B. Russell Federal Building, 75 Spring Street SW, Atlanta, Georgia 30303.
John W. McCormack Post Office and Courthouse, Boston, Massachusetts 02109.
Federal Office Building, 29th Floor, 230 South Dearborn Street, Chicago, Illinois 60604.
1100 Commerce Street, Dallas, Texas 75242.
Denver Federal Center, Building 20, Denver, Colorado 80225.
New Federal Building, 26 Federal Plaza, New York, New York 10007.
William J. Green Jr., Federal Building, 600 Arch Street, Philadelphia, Pennsylvania 19106.
1256 Federal Building 1520 Market Street, St. Louis, Missouri 63103.
525 Market Street, 23rd Floor, San Francisco, Califonia 94105.
Federal Office Building, 28th Floor 915 Second Avenue, Seattle, Washington 98174.

(d) if a request for information is made to an Office group or office that does not have possession of the information, that group or office will promptly forward the request to the appropriate group or office and will notify the requester that it has done so. However, for purposes of applying the time limits in section 552 of title 5, United States Code, the request will not be considered received until it arrives in the group or office having possession of the requested information.

(e) Information, and the office to be contacted for such information, published and offered for sale, or available to the public or examining and copying, for the convenience of the public or pursuant to section 552, title 5, United States Code, subsection (a), paragraph (2) is found in the Office's index required by that paragraph.

(f) A request for information on a subject matter not specifically referred to in this paragraph or in the index, should be directed to:

Management Support Division, Office of Management, Office of Personnel Management, 1900 E Street, N.W., Washington, D.C. 20415.

§ 294.106 Procedures for obtaining information.

(a) A request for information under section 552 of title 5, United States Code, may be made personally or in writing. Requests may be made by letter directed to the groups and offices of the office in § 294.105 or in person at the addresses listed in that section during business hours on a regular business day.

(b) Each request for information under section 552 of title 5, United States Code, should be clearly and prominently identified by means of a legend on the first page, such as "Freedom of Information Request." In addition, if sent by mail or otherwise submitted in an envelope or other cover, the outside should be clearly and prominently marked "FOI" or "Freedom of Information."

(c) A request under this part should reasonably describe the information being requested by including relevant data such as name, number, date, subject, title of publication or other identifying particulars sufficient to enable the information to be identified and located. Requests for information contained in personnel records from persons other than the individual to whom the record pertains will be processed subject to §§ 294.103(b)(6) and 831.108(a).

(1) Requests for information from Official Personnel Folders and similar files should contain such information as: name, date of birth, Social Security Account Number, agency where employed, and, if not presently employed, approximate dates of the most recent Federal employment. If presently employed, requests should be directed to the employing agency.

(2) Requests for information from investigatory files should contain: name, date and place of birth, and Social Security Account Number.

(3) Requests for information concerning the results of examinations should include name, date of birth, Social Security Account Number, and identification number together with date, place, and time of examination.

(d) If a request is for materials that have been published and are offered for sale, e.g., by the Superintendent of Documents, the requester will be advised of the appropriate group or office in the office where the materials may be reviewed and the location where the materials may be purchased.

(e) The Office will, except in unusual circumstances, make a determination to disclose or deny the requested information within ten working days after receipt of the request (excluding Saturdays, Sundays, and holidays) and shall notify the requester immediately of its determination and the fees required, if any, prescribed by § 294.107.

§ 294.107 Service charges for information.

(a) Reasonable quantities of information that have been printed or otherwise reproduced by the Office for the purpose of making it available to the public without charge, shall be furnished to a member of the public free of charge.

(b) Information made available to the public, other than that described in paragraph (a) of this section, may be furnished subject to exaction of a fair fee. The fee shall be paid by check or money order made payable to the Office of Personnel Management.

(c) Schedule of Fees—When a request is made for information under section 552 of title 5, United States Code, the Office will charge fees for searching and duplicating the information at the rates shown in the following schedule:

Photocopies, per page	$0.10
Printed material, per 25 pages or fraction thereof	.25
Manual records search, per hour	5.00
Automated records search:	
Programming, per hour	14.00
Keypunching, per hour	8.75
Computer time, per hour	65.00
Duplication, per hour	47.00

(d) Unless the request specifically states that whatever cost is involved will be acceptable, or acceptable up to a specified amount which is sufficient to cover anticipated costs, a request that can reasonably be expected to involve assessed fees in excess of $5 will be deemed not received until the requester, after prompt notification of the anticipated cost of the request, agrees to bear it.

(e) When the anticipated fees exceed $50, a deposit of 20 percent of the amount anticipated must be made within 30 days after the requester is advised of that fact. Requested information will not be released until the deposit is received.

(f) Charges will be assessed in cases of unproductive or unsuccessful searches unless waived by the appropriate Office official. Services performed that are not required under the Freedom of Information Act, such as formal certification of records as true copies, may be subject to charges under the Federal User Charge Statute (31 U.S.C. 483a) or other applicable statutes, depending upon the services performed.

§ 294.108 Appeal of a denial of information.

(a) In the event of a disagreement concerning the availability or disclosure of information between a member of the public and an employee of the Office or an employee of another agency having custody of information controlled by the Office and authority to deny disclosure of such information, the requester may ask for reconsideration of the denial. The request shall be addressed to the General Counsel, Office of Personnel Management, 1900 E Street, N.W., Washington, D.C. 20415, within ten working days after the requester receives notification of the denial. The General Counsel shall, except in unusual circumstances, notify the requester of the decision within 20 working days (excluding Saturdays, Sundays, and holidays) after receipt of the request for reconsideration. The request to the General Counsel is the only administrative appeal within the Office and the decision on appeal exhausts the administrative remedies within the Office. If the General Counsel upholds in whole or in part the denial of the request for records, the written notice shall inform the person making the request of the provisions for judicial review of that determination.

§ 294.109 Custody of information; subpenas.

(a) The Chief, Management Support Division, Office of Management, has official custody of the official records of the Office. A subpena or other judicial order for an official record from the Office should be served on the:

Chief, Management Support Division, Office of Management, Office of Personnel Management, 1900 E Street, N.W., Washington, D.C. 20415.

(b) If a subpena or other judicial order for an official record is served on an employee of the Office other than the Chief, Management Support Division, Office of Management, the employee shall immediately inform the General Counsel of the Office who shall advise the employee accordingly.

(c)(1) If a subpena or other judicial order for information contained in an Official Personnel Folder in the physical custody of a Government agency other than the Office is served on a Government employee responsible for the Folder, the employee shall disclose such information as is allowed under this part. After producing the original documents for inspection by the court or counsel, the employee must not leave

them with the court, but must retain them, and obtain permission of the court to substitute certified or facsimile copies for the court record.

(2) In an unusual situation or a situation in which information not available under this part is sought, the Government employee who receives the subpena shall immediately forward it and the Official Personnel Folder containing the information sought to the:

General Counsel, Office of Personnel Management, Washington, D.C. 20415.

The Government employee shall inform the person who applied for the subpena that the subpena and the information sought have been sent to the Office pursuant to this subparagraph and, if necessary, request a postponement of the scheduled appearance.

§ 294.110 Deceased employees.

A right under this part to the disclosure of, and to control the disclosure of information personal to an employee, former employee, annuitant, or applicant passes after his death to the executor or administrator of his estate, or in the absence of an executor or administrator, to his next of kin.

Subpart B—The Public Information Function

§ 294.201 Public information policy.

(a) In addition to the basic policies of the Office relative to the disclosure of information when requested by a member of the public, the Office has an independent public information policy for bringing to the attention of the public through news releases, publications of the Office, or other methods, information concerning the functions of the Office as a Federal agency, and the programs administered by the Office.

(b) The Director, Office of Public Affairs, is responsible for the furtherance of the public information policy of the Office. In addition, each employee of the Office shall cooperate in carrying out this policy in accordance with the Administrative Manual.

Subpart C—Office Operations

§ 294.301 Policy and interpretations.

(a) Statements of Office policy and interpretations of the laws and regulations administered by the Office which have been adopted by the Office, whether or not published in the Federal Personnel Manual or the Federal Register, are information available to the public.

(b) Memoranda, correspondence, opinions, data, staff studies, information received in confidence, and similar documentary material, when prepared for the purpose of internal communication within the Office or between the Office and other agencies, organizations, or persons generally are not information available to the public.

Subpart D—Medical Information

§ 294.401 Medical information.

(a) Medical information about an applicant, employee, or annuitant is not made available to the public by the Office or other Government agency.

(b) Medical information about an applicant, employee, or annuitant may be disclosed by the Office or other Government agency to the applicant, employee, or annuitant, or a representative designated in writing, except that medical information concerning a mental or other condition of such a nature that a prudent physician would hesitate to inform a person suffering from it of its exact nature and probable outcome may be disclosed only to a licensed physician designated in writing for that purpose by the individual or his designated representative.

Subpart E—Examinations and Related Subjects

§ 294.501 Examinations.

(a) The Office makes information available to the public that will assist members of the public in understanding the purpose of, and in preparing for, civil service examinations. It makes information available to the public relative to the types of questions and the categories of knowledge or skill pertinent to a particular examination. The following materials are not available to the public: (1) Testing and examination materials used solely to determine individual qualifications; (2) test material, including test plans, item analysis data, criterion instruments, and other material the disclosure of which would compromise the objectivity of the testing process.

(b) Each employee entrusted with test material has a positive duty to protect the confidentiality of that material and to assure that it is released only as required to conduct an examination authorized by the Office.

(c) The applicant's answers in a written test may be reviewed by the applicant only in the presence of an employee of the Office in an appropriate office. The test booklet is not made available in connection with such review.

(d) Information concerning the results of examinations will be released only to the individual concerned, and to those parties explicitly designated by the individual.

(e) The names of applicants for civil service positions or eligibles on civil service registers, certificates, employment lists, or other lists of eligibles, or their ratings or relative standings are not information available to the public.

Subpart F—Investigations

§ 294.601 Investigative reports.

(a) The disclosure requirements of the Freedom of Information Act do not apply to matters that are specifically authorized under criteria established by an Executive Order to be kept secret in the interest of national defense or foreign policy, and are in fact properly classified pursuant to such Executive Order.

(b) Investigatory records compiled for law enforcement purposes are exempt, but only to the extent that the production of such records would (1) interfere with enforcement proceedings, (2) deprive a person of a right to a fair trial or impartial adjudication, (3) constitute an unwarranted invasion of personal privacy, (4) disclose the identity of a confidential source, and in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (5) disclose investigative techniques and procedures, or (6) endanger the life and physical safety of law enforcement personnel.

(c) All requests for investigative reports of investigations conducted by the Office of Personnel Management will be forwarded to the Deputy Associate Director for Personnel Investigations, Staffing Services, for processing. If the investigative file on the subject of investigation maintained by the Deputy Associate Director for Personnel Investigations contains investigatory information that originated in another agency, the Deputy Associate Director for Personnel Investigations will refer a copy of the subject's request to that agency for its decision concerning release of the investigatory information that originated in that agency. Copies of reports of investigation conducted by the Office of Personnel Management on the subject of investigation will be furnished upon request to the subject of investigation or to his or her representative designated in writing, with the exception of any

material that is exempt from disclosure under paragraphs (a) and (b) of this section.

(d) The Office or other Government agency will disclose to the parties concerned any report of investigation under its control, or an extract of the report, to the extent the report is involved in a proceeding under Part 771 of this chapter except when the disclosure would violate the proscription against the disclosure of medical information in § 294.401. For the purposes of this paragraph, the parties concerned means the Government employee involved in the proceeding, his or her representative designated in writing, and the representative of the agency involved in the proceeding.

(e) The Office in suitability rating actions under Part 731 of this chapter will disclose to an applicant, eligible, or appointee, or a representative designated in writing, such information from reports of investigation as the Office determines is sufficient to enable him or her to respond to an interrogatory or other question without revealing the source of information obtained under an expressed or implied pledge of confidence. The Office will furnish a report of investigation to the Government agency concerned.

(f) The Office or other Government agency does not make a report of investigation or information from a report under its control available to the public, to witnesses, or, except as provided in paragraphs (a), (b), (c), and (d) of this section, to the parties concerned in the investigation.

Subpart G—Official Personnel Folder

§ 294.701 Coverage.

This subpart applies to the disclosure of information contained in the Official Personnel Folder (or an automated equivalent) established under Subpart B of Part 293 of this chapter. Information disclosed under this subpart may be made available by the Office or a Federal agency having custody of the folder.

§ 294.702 Availability of information.

(a) The following information about most present and former government employees is available to the public:

(1) Name;

(2) Present and past position titles;

(3) Present and past grades;

(4) Present and past salaries;

(5) Present and past duty stations (which include room numbers, shop designations, or other identifying information regarding buildings or places of employment).

(b) Disclosure of this information will not be made where the information requested is a list of present or past position titles, grades, salaries, and/or duty stations of Government employees which as determined by the agency official responsible for custody of that information, is:

(1) Selected in such a way as to constitute a clearly unwarranted invasion of personal privacy because the nature of the request calls for a response that would reveal more about the employees on whom information is sought than the five enumerated items; or

(2) Would otherwise be protected from mandatory disclosure under an exemption of the Freedom of Information Act.

(c) In addition to the information that may be made available under paragraph (a) of this section, the following information may be made available to a prospective employer of a Government employee or former Government employee:

(1) Tenure of employment;

(2) Civil service status;

(3) Length of service in the agency and the Government; and

(4) When separated, the date and reason for separation shown on the Notification of Personnel Action, Standard Form 50.

(d) In addition to the information to be made available under paragraphs (a) and (b) of this section, the home address of an employee shall be made available to a police or court official on receipt of a proper request stating that an indictment has been returned against the employee or that complaint, information, accusation, or other writ involving nonsupport or a criminal offense has been filed against the employee and the employee's address is needed for service of a summons, warrant, subpena, or other legal process.

(e) The General Services Administration, National Archives and Records Service, may make information from the Official Personnel Folder of an employee separated from the service available to a person engaged in research for historical or educational purposes or for similar purposes when the person has written permission from the Office to receive such information. This permission may be requested in writing from:

Assistant Director for Agency Compliance and Evaluation, Agency Relations, Office of Personnel Management, 1900 E Street, N.W., Washington, D.C. 20415.

Requests for this type of information should include identifying information as described in § 294.108(c)(1) of this part, and verification from a publisher, educational research, or other similarly recognized institution that the information is being sought for historical, educational, or other similar purposes. Except as provided in § 294.703(a) of this part, information made available under this paragraph shall be in the form of an abstract of the former employee's service in the Government and, when he has been separated at least five years, an abstract of his educational experience background as reflected in his application for employment with the Government. Information that is derogatory to the former employee shall not be made available under this paragraph.

(f) Except as provided in paragraphs (a) through (e) of this section, information required to be included in an Official Personnel Folder by the instructions of the Office is not available to the public.

§ 294.703 Access to folder.

(a) On official request, an Official Personnel Folder may be disclosed to a representative of a Congressional committee or subcommittee, or an official of the legislative or judicial branch, or of the Government of the District of Columbia. However, before disclosure, all material that relates to loyalty or security under Executive Order 9835 or 10450 or any other authority, and all information covered under paragraph (a) (1) through (3) of this section, shall be removed from the folder. If a specific request for loyalty or security information is made by a Congressional committee or subcommittee, or any source outside the executive branch, the request shall be forwarded to the General Counsel, Office of Personnel Management, 1900 E Street, N.W., Washington, D.C. 20415, for consultation with the Department of Justice pursuant to the President's Memorandum of March 24, 1969.

(b) An Official Personnel Folder shall be disclosed to an official of the executive branch who has a need for the information in the performance of his official duties.

Subpart H—Appeals

§ 294.801 Appeals.

(a) The Office, upon a request which identifies the individual from whose file the information is sought, shall disclose the following information from an appeal file to a member of the public, except when the disclosure would

constitute a clearly unwarranted invasion of personal privacy:

(1) Confirmation of the name of the individual from whose file the information is sought and the names of the other parties concerned;

(2) The status of the case;

(3) The decision on the case;

(4) The nature of the action appealed; and

(5) With the consent of the parties concerned, other reasonably identified information from the file.

(b) The Office will disclose to the parties concerned the information contained in an appeal file in proceedings under Part 511 of this chapter, except when the disclosure would violate the proscription against the disclosure of medical information in § 294.401. For the purpose of this section, "the parties concerned" means the Applicant for Government Employment, Government employee, or former Government employee involved in the proceedings, his representative designated in writing, and the representative of the agency or the Office involved in the proceeding.

Subpart I—Retirement

§ 294.901 Retirement.

The Office will disclose information from retirement files and records in accordance with § 831.106 of this chapter.

Subpart J—Classified Information

§ 294.1001 Classified information.

The Office will not disclose information classified under Executive Order 12065 of June 28, 1978, or other Executive Order, except to individuals authorized access to it under terms of that authority.

Subpart K—Leave Records

§ 294.1101 Leave records.

The annual and sick leave record of an employee, or information from these records, is not made available to the public by the Office or other Government agency. However, the leave record, or information from it, shall be disclosed to the employee concerned or, with his written consent, to a representative of the employee or any other person that he authorizes to have the record.

Office of Personnel Management.

Beverly M. Jones,

Issuance System Manager.

BILLING CODE 6325-01-M

5 CFR Part 720

Affirmative Employment Programs

AGENCY: Office of Personnel Management.

ACTION: Final regulations.

SUMMARY: This regulation changes the date by which Federal Equal Opportunity Recruitment Program Plans must be developed for the headquarters level of each Executive agency from July 1, 1979, to October 1, 1979. It also corrects the title of Subpart B as it appears in the table of contents for Part 720.

EFFECTIVE DATE: June 8, 1979.

FOR FURTHER INFORMATION CONTACT: Tom Dausch, Office of Affirmative Employment Programs, Office of Personnel Management, 1900 E Street NW., Washington, D.C. 20515, (202) 254-9470.

SUPPLEMENTARY INFORMATION: On April 13, 1979, the Office of Personnel Management issued final regulations to implement a Federal Equal Opportunity Recruitment Program (44 FR 22029 et seq.) pursuant to section 310 of the Civil Service Reform Act of 1978 and program guidelines established by the Equal Employment Opportunity Commission. Included in those regulations was a requirement for the headquarters level of each Executive agency to establish recruitment plans provided for in the regulations not later than July 1, 1979. That date was based on the Office of Personnel Management's plan to issue program guidance to agencies at the same time final regulations were published. Since there have been delays in obtaining needed data to include in the guidance material, the Office considers it unrealistic for most agencies to develop plans by July 1, 1979. Consequently, this amendment changes the deadline for development of headquarters level plans to October 1, 1979. There is no change with respect to component level plans which must still be developed no later October 1, 1979. Because this amendment constitutes a procedural rather than a substantive change, the Office deems it unnecessary to provide for a public comment period.

The amendment also changes the table of contents which had incorrectly carried over the title of Subpart B as it had appeared in proposed rules for the program, but which had been modified in the final regulations.

Accordingly, the Office of Personnel Management is amending 5 CFR Part 720 as set forth below:

Office of Personnel Management.

Beverly M. Jones,

Issuance System Manager.

The table of contents for Part 720 is amended to read as follows:

PART 720—FEDERAL EQUAL OPPORTUNITY RECRUITMENT PROGRAM

Subpart A—Principal Statutory Requirements

Sec.
720.101 Principal statutory requirements.

Subpart B—Federal Equal Opportunity Recruitment Program

720.201 Regulatory requirements.
720.202 Definitions.
720.203 Responsibilities of the Office of Personnel Management.
720.204 Agency programs.
720.205 Agency plans.
720.206 Selection guidelines.
720.207 Reports.

Appendix—Guidelines for the development of a Federal Recruitment Program to Implement 5 U.S.C. Section 7201, as amended.

Authority: 5 U.S.C. 7201; 42 U.S.C. 2000e.

Part 720, § 720.205, paragraph (g) is amended to read as follows:

§ 720.205 Agency plans.

* * * * *

(g) All plans required under this subpart must be developed not later than October 1, 1979.

[FR Doc. 79-17966 Filed 6-7-79; 8:45 am]

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 215

[Amendment 17]

Special Milk Program for Children; Free Milk Option in the Special Milk Program

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes guidelines under which School Food Authorities and child care institutions participating in the Special Milk Program shall implement their option to provide free milk to children meeting local eligibility criteria. It also makes a prototype free milk policy statement by a State for child care institutions an explicit regulatory requirement for States.

EFFECTIVE DATE: July 1, 1979.

FOR FURTHER INFORMATION CONTACT: Margaret O'K. Glavin, Director, School Programs Division, USDA–FNS, Washington, D.C. 20250, (202) 447–8130.

SUPPLEMENTARY INFORMATION: Section 5(a) of Public Law 95–627 amends section 3 of the Child Nutrition Act, authorizing the Special Milk Program, to provide the option to the School Food Authority to make free milk available to children eligible under local eligibility criteria. Since the Special Milk Program is also available to nonresidential child care institutions, it seems clear that it was the intent of Congress that this provision also be extended to them.

Previously, under the provisions of Public Law 95–166 and Amendment 16 to this part, schools and child care institutions were required to provide free milk to eligible children when the Special Milk Program operated at times other than meal services reimbursed by the Department or during such meal service periods to any child who elected not to take the free meal for which he or she was qualified.

This rule removes the requirements to serve free milk under these two circumstances and also removes time restrictions on service of free milk where the School Food Authority or institution has elected to provide this service.

The rule requires that, upon Program application and renewal, each School Food Authority and child care institution shall inform the State agency or FNSRO where applicable, of its decision whether or not to provide free milk. If electing to provide free milk, a School Food Authority or sponsoring institution must list the names of all schools and institutions participating in the Program who choose to serve free milk in their agreement with the State agency or FNSRO where applicable, and must submit an acceptable free milk policy statement. In such schools and institutions, free milk shall be made available to needy children at any time that milk under the Special Milk Program is made available to nonneedy children in the participating school or institution.

This rule also reflects a change made by section 5(a) of Pub. L. 95–627 in the price index used to calculate adjustments to milk reimbursement rates. Previously, these adjustments were based on the "series of food away from home" of the Consumer Price Index. This rule references the new index imposed by Pub. L. 95–627: the Producer Price Index for Fresh Processed Milk published by the Bureau of Labor Statistics of the Department of Labor. This legislatively mandated change was believed to be a more fair indicator to be used for annual reimbursement adjustments.

This rule also brings this part of the regulations into conformance with Part 245, Determining Eligibility for Free and Reduced Price Meals and Milk in Schools, by requiring States to issue a prototype free milk policy statement for participating child care institutions. This amendment is merely a technical change and imposes no new requirements on States.

The Department is issuing this amendment as a final rule because it is mandated by Pub. L. 95–627 and is nondiscretionary in that there are no alternatives to its implementation. This decision was made by Robert Greenstein, Acting Administrator, FNS.

Accordingly, Part 215 is amended as follows:

1. Section 215.1, the fifth and sixth sentences of section 3 of the Child Nutrition Act of 1966, as amended, are amended to read as follows:

§ 215.1 General purpose and scope.

* * * * *

Sec. 3 * * * Children who qualify for free lunches under the guidelines established by the Secretary shall, at the option of the school involved (or the local educational agency involved in the case of a public school) also be eligible for free milk upon their request. For the fiscal year ending June 30, 1975, and for subsequent school years, the minimum rate of reimbursement for a half-pint of milk served in schools and other eligible institutions shall not be less than 5 cents per half-pint served to eligible children, and such minimum rate of reimbursement shall be adjusted on an annual basis each school year thereafter to reflect changes in the Producer Price Index for Fresh Processed Milk published by the Bureau of Labor Statistics of the Department of Labor. * * *

2. In § 215.7, Requirements for participation, paragraphs (b) and (d–2) are amended to read as follows:

§ 215.7 Requirements for participation.

* * * * *

(b) Any School Food Authority or child care institution participating in the Program may elect to serve free milk to children eligible for free meals. Upon application for the Program and thereafter at least annually, each School Food Authority or child care institution (i) shall be required by the State agency, or FNSRO where applicable, to state whether or not it wishes to provide free milk in the schools or institutions participating under its jurisdiction and (ii) if it so wishes to provide free milk, shall also submit for approval a free milk policy statement which, if for a school, shall be in accordance with Part 245 of this Chapter or, if for a child care institution, shall be in accordance with §215.13a of this part.

(d) * * *

(1) * * *

(2) If electing to provide free milk (i) serve milk free to all eligible children, at times that milk is made available to nonneedy children under the Program; and (ii) make no discrimination against any needy child because of his inability to pay for the milk.

* * * * *

3. Section 215.8, paragraph (b), is amended to read as follows:

§ 215.8 Reimbursement payments.

* * * * *

(b)(1) The rate of reimbursement per half-pint of milk purchased and (i) served in nonpricing programs to all children; (ii) served to all children in pricing programs by institutions and School Food Authorities not electing to provide free milk; and (iii) served to children other than needy children in pricing programs by institutions and School Food Authorities electing to provide free milk shall be the rate announced by the Secretary for the applicable school year. However, in no event shall the reimbursement for each half-pint (236 ml.) of milk served to children exceed the cost of milk to the school or child care institution. (2) The rate of reimbursement for milk purchased and served free to needy children in pricing programs by institutions and School Food Authorities electing to provide free milk shall be the average cost of milk, i.e., the total cost of all milk purchased during the claim period, divided by the total number of purchased half-pints.

4. Section 215.13a, paragraphs (a), (b), (c), and (e) are amended to read as follows:

§ 215.13a Determining eligibility for free milk in child care institutions.

(a) *General.* Child care institutions which operate pricing programs may elect to make free milk available, as set forth in § 215.7(d)(2), to children who meet the approved eligibility criteria. Such child care institutions shall determine the children who are eligible for free milk and assure that there is no physical segregation of, or other discrimination against, or overt identification of, children unable to pay the full price for milk.

(b) *Action by State agencies and FNSROs.* Each State agency, or FNSRO where applicable, upon application for the program by a child care institution operating a pricing program, and

annually thereafter, shall require the institution to state whether or not it wishes to serve free milk to eligible children at times that milk is provided under the Program. It shall annually require each child care institution electing to provide free milk to submit a free milk policy statement and shall provide such institutions with a prototype free milk policy statement and a copy of the State's family-size income standards for determining eligibility for free meals and milk under the National School Lunch and School Breakfast Programs to assist the institutions in meeting its responsibilities.

(c) *Action by institutions.* Each child care institution which operates a pricing program shall inform the State agency, or FNSRO where applicable, at the time it applies for Program participation and at least annually thereafter, whether or not it wishes to provide free milk. Institutions electing to provide free milk shall annually submit a written free milk policy statement for determining free milk eligibility of children under their jurisdiction, which shall contain the items specified in (d) of this section. Such institutions shall not be approved for Program participation of their agreements renewed unless the free milk policy has been reviewed and approved. Pending approval or a revision of a policy statement, the existing policy shall remain in effect.

* * * * *

(e) *Public announcement of eligibility criteria.* Each child care institution which elects to make free milk available under the Program shall annually make a public announcement of the availability of free milk to children who meet the approved eligibility criteria to the information media serving the area from which its attendance is drawn. The public announcement must also state that milk is available to all children in attendance without regard to race, color, or national origin.

* * * * *

(Catalog of Federal Domestic Assistance No. 10.556)

A copy of the detailed impact statement for this final rule may be viewed at the office of the person identified in the "address" portion of the preamble during regular business hours (8:30 am to 5:00 pm, Monday through Friday), and a copy may be obtained from that person.

7 CFR Part 245

[Amdt. 13]

Determining Eligibility for Free and Reduced Price Meals and Milk in Schools

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation amends the language of Part 245 referring to the responsibilities of schools in the Special Milk Program in order to conform to Section 5 of Pub. L. 95-627 which gives School Food Authorities participating in the program the option of providing free milk to eligible children at the child's request. Part 215 of Chapter II, governing the Special Milk Program, requires that eligibility for free milk in schools be based upon the provisions of this part.

This final rule also amends Part 245 to implement section 8(2) of Pub. L. 95-627. This amendment requires each State agency, or FNSRO where applicable, to prescribe family-size income standards for free meals and milk at 125% of the Secretary's Income Poverty Guidelines. Previously, State agencies, or FNSROs where applicable, had flexibility to vary free eligibility between 100% and 125% of the Secretary's Income Poverty Guidelines.

This rule also amends Part 245 to remove obsolete provisions relating to nonprofit private schools in § 245.9.

EFFECTIVE DATE: This final rule will become effective on July 1, 1979.

FOR FURTHER INFORMATION CONTACT: Margaret O'K. Glavin, Director, School Programs Division, USDA-FNS, Washington, D.C. 20250, (202)447-8930.

SUPPLEMENTARY INFORMATION:

Free Milk Option

Under previous law and regulations, School Food Authorities participating in the Special Milk Program and operating a pricing program were required, under certain circumstances, to provide free milk to children eligible for free meals. Section 5 of Pub. L. 95-627 makes service of free milk under the program optional. Part 215, Special Milk Program regulations, will be amended to reflect this option and will require School Food Authorities offering free milk to develop a free milk policy statement which shall be in accordance with Part 245 of this chapter. This regulation, therefore, amends Part 245 to conform to the changes in Part 215 required by Pub. L. 95-627.

Standardized Eligibility Criteria

Each State agency is required to prescribe income standards for both free and reduced price meals and free milk by family size, for use by School Food Authorities and institutions in the State in determining eligibility for such benefits. Prior to the enactment of Pub. L. 95-627, the State standards for free meals and for free milk could not be less than the applicable family size income level prescribed by the Secretary's Guidelines nor exceed these Guidelines by more than 25 percent. Section 8 of Pub. L. 95-627 removes this flexibility of States to vary free eligibility standards by requiring States to set free standards at 125 percent of the Secretary's Guidelines, that is, at 25 percent above the Guidelines.

This nondiscretionary provision of Pub. L. 95-627 is designed to standardize eligibility criteria for all States for free meals at the maximum level; that is, at 125 percent of the Secretary's Income Poverty Guidelines.

Pub. L. 94-105 standardized reduced price meal eligibility at the maximum level; that is, at 195 percent of the Secretary's Income Poverty Guidelines.

Section 245.9 provides that certain nonprofit private schools are exempt from serving reduced price meals. This provision is in conflict with Pub. L. 94-105 which mandates service of reduced price meals in all schools participating in the National School Lunch or School Breakfast Programs. The wording in this section is therefore revoked to remove obsolete provisions, and § 245.9 is reserved.

The Department is issuing this amendment as a final rule because it is mandated by Pub. L. 95-627 and is nondiscretionary in that there are no alternatives to its implementation. This decision was made by Robert Greenstein, Acting Administrator, FNS.

Accordingly, Part 245 is amended as follows: (1) The first three sentences of § 245.1(a) are deleted and amended to read as follows:

§ 245.1 General purpose and scope.

(a) Section 8 of the National School Lunch Act, as amended, and Section 4 of the Child Nutrition Act of 1966, as amended, requires that schools participating in the National School Lunch Program (7 CFR Part 210) and the School Breakfast Program (7 CFR Part 220) and other schools utilizing

commodities donated by the Department shall serve free meals to any child who is a member of a household which has an annual income not above the applicable family-size income level set forth in income poverty guidelines prescribed by the Secretary. Each State agency is required to prescribe family-size income standards, which will be 25 percent above the Secretary's income poverty guidelines, to be used by schools in the State during each fiscal year in determining which children in the State are eligible for free meals. Section 3 of the Child Nutrition Act of 1966, as amended, provides that schools participating in the Special Milk Program may, at the option of the School Food Authority, make free milk available to children eligible for free meals. * * *

(2) The third and fourth sentences of § 245.3(a) are deleted. The second sentence of paragraph (b) and paragraph (c) are amended to read as follows:

§ 245.3 Eligibility standards and criteria.

* * * * *

(b) * * * Such criteria shall:

(1) For all schools under the jurisdiction of the School Food Authority, specify the uniform family-size income criteria to be used for determining eligibility for free and reduced price meals in schools participating in the National School Lunch or School Breakfast Programs and in commodity-only schools, and for determining eligibility for free milk when the School Food Authority has chosen to serve free milk in its schools participating in the Special Milk Program; * * *

(c) Each School Food Authority shall serve free and reduced price meals and, if so electing, free milk in the respective programs to children eligible under its eligibility criteria. Family income used by a School Food Authority in determining eligibility of an applicant shall be income as defined in the Secretary's Income Poverty Guidelines including the adjustments for special hardship conditions. When a child is not a member of a family as defined in § 245.2(b), the child shall be considered a family of one. In any school which participates in more than one child nutrition program (National School Lunch Program, School Breakfast Program, or Special Milk Program) or is a commodity-only school which also participates in the School Breakfast Program or Special Milk Program (in which the School Food Authority has elected to provide free milk), the eligibility shall be applied uniformly so that eligible children receive the same benefits in each program. If a child transfers from one school to another school under the jurisdiction of the same School Food Authority, his eligibility for free or reduced price meals or for free milk, if previously established, shall be transferred to, and honored by, the receiving school if it participates in the National School Lunch Program, School Breakfast Program, Special Milk Program and the School Food Authority has elected to provide free milk, or is a commodity-only school.

* * * * *

§ 245.9 [Reserved]

3. Section 245.9 is revoked and reserved.

4. Section 245.10, paragraph (a), the first sentence is amended to read as follows:

§ 245.10 Action by School Food Authorities.

(a) Each School Food Authority of a school desiring to participate in the National School Lunch Program, School Breakfast Program, or to provide free milk under the Special Milk Program, or to become a commodity-only school shall submit for approval to the State agency a free and reduced price policy statement. * * *

BILLING CODE 3410-30-M

Agricultural Marketing Service

7 CFR Part 910

[Lemon Regulation 282]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period June 10-16, 1979. Such action is needed to provide for orderly marketing of fresh lemons for this period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: June 10, 1979.

FOR FURTHER INFORMATION CONTACT: Malvin E. McGaha, 202-447-5975.

SUPPLEMENTARY INFORMATION: *Findings.* This regulation is issued under the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee, and upon other information. It is hereby found that this action will tend to effectuate the declared policy of the act. This regulation has not been determined significant under the USDA criteria for implementing Executive Order 12044.

The committee met on June 5, 1979, to consider supply and market conditions and other factors affecting the need for regulation and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons continues good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information become available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

§ 910.502 Lemon Regulation 282.

Order. (a) The quantity of lemons grown in California and Arizona which may be handled during the period June 10, 1979, through June 16, 1979, is established at 300,000 cartons.

(b) As used in this section, "handled" and "carton(s)" mean the same as defined in the marketing order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: June 7, 1979.

D. S. Kuryloski,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Farmers Home Administration

7 CFR Part 1980

Business and Industrial Loan Programs; Processing of Clearances

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations pertaining to the Business and Industrial loan program. The intended effect of this action is to expedite the processing of clearances required in the program. This action results from internal administrative processing changes.

EFFECTIVE DATE: June 8, 1979.

FOR FURTHER INFORMATION CONTACT: Darryl H. Evans, Acting Director, Business Management and Development Division, telephone 202–447–4150.

SUPPLEMENTARY INFORMATION: Section 1980.451 Administrative B 3(c) of Subpart E of Part 1980, Chapter XVIII, Title 7, Code of Federal Regulations is amended to require submission of Form FmHA 449–4, "Statement of Personal History," by the State Director to the National Office for only those loans which the State Director believes a character evaluation check is advisable to protect the Government's interest. This action is necessitated by the fact that the Inspector General of U.S. Department of Agriculture does not have the staff to process all Forms FmHA 449–4 received and because increasing staff to process all of these statements is not cost effective. The State Director may process Form FmHA 449–4 for any project when he or she believes is in the best interest of the Government. Form FmHA 449–4 is still required to be completed by the applicant on all loans as part of the overall application package. The lender is responsible for assuring that Form FmHA 449–4 is completed accurately. This change will substantially reduce the processing workload and will reduce overall loan processing time.

It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 533 with respect to such rules. This amendment, however, is not published for proposed rulemaking since it deals with the agency's management of loan procedures. Therefore, public participation is unnecessary. The official responsible for this determination is Darryl H. Evans.

Accordingly, Section 1980.451 Administrative B 3(c) of Subpart E of Part 1980 is amended to read as follows:

§ 1980.451 Filing and processing applications.

* * * * *

Administrative

* * * * *

B. *The State Director:*

* * * * *

3. * * *

* * * * *

(c) Form FmHA 449–4 (5 copies) only for those loans which the State Director believes a character evaluation check is advisable. Applicants should be advised that these clearances will take approximately 60 days to process and that the National Office will take no action to expedite such processing.

* * * * *

(Authority: 7 U.S.C. 1989; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistant Secretary of Agriculture for Rural Development, 7 CFR 2.70)

Note.—This document has been reviewed in accordance with FmHA Instruction 1901–G, "Environmental Impact Statement." It is the determination of FmHA that the proposed action does not constitute a major Federal action significantly affecting the quality of the human environment and, in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required."

This regulation has not been determined significant under the USDA criteria implementing Executive Order 12044.

A copy of the Impact Analysis Statement is available at the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S.D.A., Room 6348, South Agriculture Building, Washington, D.C. 20250.

Dated: May 23, 1979.

Gordon Cavanaugh,
Administrator, Farmers Home Administration.

BILLING CODE 3410-07-M

Animal and Plant Health Inspection Service

9 CFR Part 82

Exotic Newcastle Disease; and Psittacosis or Ornithosis in Poultry; Areas Released From Quarantine

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to release a portion of Starr County in Texas, from the areas quarantined because of exotic Newcastle disease. Surveillance activity indicates that exotic Newcastle disease no longer exists in the area released from quarantine. No areas in the State of Texas remain under quarantine.

EFFECTIVE DATE: June 1, 1979.

FOR FURTHER INFORMATION CONTACT: Dr. M. A. Mixson, USDA, APHIS, VS, Federal Building, Room 748, Hyattsville, MD 20782, 301–436–8073.

SUPPLEMENTARY INFORMATION: This amendment releases a portion of Starr County in Texas, from the areas quarantined because of exotic Newcastle disease under the regulations in 9 CFR Part 82, as amended. Therefore, the restrictions pertaining to the interstate movement of poultry, mynah and psittacine birds, and birds of all other species under any form of confinement, and their carcasses and parts thereof, and certain other articles from quarantined areas, as contained in 9 CFR Part 82, as amended, will no longer apply to the area released.

PART 82—PSITTACOSIS OR ORNITHOSIS IN POULTRY

Accordingly, Part 82, Title 9, Code of Federal Regulations, is hereby amended in the following respect:

§ 82.3 [Amended]

In § 82.3(a), paragraph (6) relating to the State of Texas is deleted.

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132; (21 U.S.C. 111–113, 115, 117, 120, 123–126, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141.)

The amendment relieves certain restrictions no longer deemed necessary to prevent the spread of exotic Newcastle disease. It should be made effective immediately in order to permit affected persons to move poultry, mynah, psittacine birds, and birds of all other species under any form of confinement, and their carcasses and

parts thereof, and certain other articles, interstate from such area without unnecessary restrictions. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this final rule are impracticable and contrary to the public interest and good cause is found for making this final rule effective on or before July 9, 1979.

Further, this final rule has not been designated as "significant," and is being published in accordance with the emergency procedures in Executive Order 12044 and Secretary's Memorandum 1955. It has been determined by J. K. Atwell, Assistant Deputy Administrator, Animal Health Programs, APHIS, VS, USDA, that the emergency nature of this final rule warrants publication without opportunity for public comment or preparation of an impact analysis statement at this time.

This final rule implements the regulations in Part 82. It will be scheduled for review in conjunction with the periodic review of the regulations in that Part required under the provisions of Executive Order 12044 and Secretary's Memorandum 1955.

Done at Washington, D.C., this 1st day of June 1979.

Pierre A. Chaloux,

Deputy Administrator, Veterinary Services.

9 CFR Part 113

Standard Requirements; Avian Pox Vaccine Safety Test; Revision

AGENCY: Animal and Plant Health Inspection Service (USDA).

ACTION: Final rule.

SUMMARY: This amendment revises the standard requirement for avian pox vaccines by adding a new safety test for vaccines that are recommended for use in birds 10 days of age or younger. Since issuance of the present standard requirement, new products have been developed that are recommended for use in birds as young as 1 day of age. This amendment updates the present standard by adding a safety test to evaluate these new products.

EFFECTIVE DATE: This amendment becomes effective July 9, 1979.

FOR FURTHER INFORMATION CONTACT: Dr. R. J. Price, Biologics Licensing and Standards Staff, USDA, APHIS, VS, Room 827, Federal Building, Hyattsville, MD 20782, 301-436-8245.

SUPPLEMENTARY INFORMATION: The safety test provided in the present standard requirement for avian pox vaccines in § 113.161 was designed for the testing of vaccine that is recommended for use in birds 6 to 8 weeks of age. Since the issuance of this standard, new avian pox vaccines have been developed that are recommended for use in birds as young as 1 day of age. The safety test in the present standard has been found to be unsatisfactory for use in the evaluation of these new products, since it does not make provision for occasional deaths that are not attributable to the product that occur when conducting tests in birds less than 5 days of age. As a result, retests are frequently required.

This amendment provides a new two-stage safety test for these new products that is designed to be conducted in birds less than 5 days of age. This test provides a valid evaluation of safety and will result in less retesting of product than is required by the present standard.

Some editing changes are also being made for clarity and consistency in the safety test for products recommended for use in older birds.

On October 20, 1978, a notice of the proposed amendment to Part 113 was published in the Federal Register at 43 FR 49013.

Comments on this proposal were solicited and two responses were received. One response was favorable to the proposal as written. The other response contained suggestions that were considered appropriate and constructive. These suggestions have been incorporated in this final rule and are explained in the discussion of changes below.

After due consideration of all relevant matters, including the proposal set forth in the aforesaid notice, and pursuant to the authority contained in the Virus-Serum-Toxin Act of March 4, 1913 (21 U.S.C. 151-158), the amendment of Part 113, Subchapter E, Chapter I, Title 9 of the Code of Federal Regulations, as contained in the aforesaid notice is hereby adopted with the following exceptions:

In paragraph (d)(1)(i), "Twenty-five susceptible birds" has been changed to "Each of 25 susceptible birds." This editorial change has been made to clarify that the intent of this amendment is that each bird be inoculated with 10 doses of vaccine.

Editorial changes have also been made in paragraph (d)(1) (iii and (iv) by changing "vaccinated as recommended on the label with the equivalent of 10 doses" to "vaccinated with the equivalent of 10 doses of vaccine by each of all routes recommended on the label." This change reflects the language used in the present standard requirement and will clarify the intended method of administering the product for the test.

In the table for interpretation of results in paragraph (d)(1)(ii), "6 or less" has been changed to "5 or less." This change corrects an error in the proposed table, which would have resulted in the product being judged both satisfactory and unsatisfactory if six birds demonstrated severe clinical signs or death during the test period.

A printing error has been corrected in the heading for § 113.161 by capitalizing the first letter of each word.

1. The first letter in each word of the heading for § 113.161 is to be capitalized.

2. Section 113.161 is amended by revising paragraph (d)(1) to read:

§ 113.161 Avian Pox Vaccine.

* * * * *

(d) * * *

(1) *Safety test.* Final container samples of completed product from each serial shall be tested. Vaccines recommended for use in birds 10 days of age or younger shall be tested in accordance with paragraphs (d)(1) (i), (ii), and (iii) of this section.

(i) Each of 25 susceptible birds 5 days of age or younger, properly identified and obtained from the same source and hatch, shall be vaccinated with the equivalent of 10 doses of vaccine by each of all routes recommended on the label and observed each day for 14 days. Severe clinical signs or death shall be counted as failures. Two-stage sequential testing may be conducted if the first test (which then becomes stage one) has three failures.

(ii) The results shall be evaluated according to the following table:

Cumulative Totals

Stage	Number of birds	Failures for satisfactory serials	Failures for unsatisfactory serials
1	25	2 or less	4 or more.
2	50	5 or less	6 or more.

(iii) If unfavorable reactions occur which are not attributable to the product, the test shall be declared inconclusive and may be repeated or, in lieu thereof, the serial declared unsatisfactory.

(iv) Vaccines not recommended for use in birds 10 days of age or younger shall be tested for safety as follows:

Each of twenty-five 2- to 5-week-old, fowl-pox susceptible birds shall be vaccinated with the equivalent of 10 doses of vaccine by each of all routes recommended on the label and observed each day for 14 days. If any of the birds show severe clinical signs of disease or death during the observation period due to causes attributable to the product, the serial is unsatisfactory. If unfavorable reactions occur which are not attributable to the product, the test shall be declared inconclusive and may be repeated or, in lieu thereof, the serial declared unsatisfactory.

* * * * *

(21 U.S.C. 151 and 154, 37 FR 28477, 28646; 38 FR 19141.)

Done at Washington, D.C., this 4th day of June 1979.

Note.—This rule has been reviewed under the USDA criteria established to implement E.O. 12044, "Improving Government Regulations." Under those criteria, this action has been designated for Agency oversight. A Final Impact Analysis Statement has been prepared and is available from USDA, APHIS, VS, Room 827, Federal Building, Hyattsville, MD 20782.

Pierre A. Chaloux,

Deputy Administrator, Veterinary Services.

BILLING CODE 3410-34-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

10 CFR Part 212

[ERA-R-77-16]

Mandatory Petroleum Price Regulations; Adjustments to Lower and Upper Tier Crude Oil Price Ceilings to Reflect Impact of Inflation

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Final rule.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby issues Crude Oil Price Schedule No. 15 which provides for monthly increases in the ceiling prices for lower tier and upper tier crude oil. These increases will result in estimated first sale prices for the months of June, July, and August 1979 of $5.90, $5.94, and $5.98 per barrel (lower tier) and $13.15, $13.24, and $13.33 per barrel (upper tier), respectively. This action is intended to permit price increases that take into account the impact of inflation.

EFFECTIVE DATE: June 1, 1979.

FOR FURTHER INFORMATION CONTACT:

William L. Webb (Office of Public Information), Economic Regulatory Administration, 2000 M Street, N.W., Room B110, Washington, D.C., 20461, 202-634-2170.

Charles P. Little (Crude Oil Pricing Branch), Economic Regulatory Administration, 2000 M Street, N.W., Room 6128, Washington, D.C. 20461, 202-254-6296.

Ben McRae (Office of General Counsel), Department of Energy, 1000 Independence Avenue, SW., Room 6A-127; Washington, D.C. 20585, 202-252-6739.

SUPPLEMENTARY INFORMATION:

A. *Introduction.*
B. *Crude Oil Price Schedule No. 15.*

A. Introduction.

On February 27, 1979, we issued Crude Oil Price Schedule No. 14 (44 FR 12399, March 1, 1979). That schedule set forth the last in a series of price increases designed to implement part of the crude oil pricing policy as proposed in the National Energy Plan (NEP) issued by the President on April 20, 1977. That policy was to permit the prices for lower tier and upper tier crude oil to increase at no more than the rate of inflation through May 1979. We have not decided at this time to depart from that policy. Therefore, we are today issuing Crude Oil Price Schedule No. 15 which establishes ceiling prices for lower tier and upper tier crude oil for the months of June, July and August 1979 on the basis of the current rate of inflation.

B. Crude Oil Price Schedule No. 15.

Under Crude Oil Price Schedule No. 15 the May 1979 lower tier ceiling price (the May 15, 1973 posted price plus $2.17 per barrel, resulting in an average first sale price of approximately $5.86 per barrel), and the May 1979 upper tier price (the September 30, 1975 posted price plus $.39, resulting in an average first sale price of approximately $13.06 per barrel), are adjusted for inflation for June, July, and August 1979, based on the first revision of the GNP deflator published on May 21, 1979, which reflects an annual rate of inflation of 8.8 percent.

1. *Lower Tier Ceiling Prices*

Adjustments to ceiling prices for lower tier crude oil and the approximate average first sale prices pursuant to those ceiling prices in June, July, and August 1979 are determined pursuant to the following methodology:

A. ERA has computed a monthly adjustment factor of .00705 which when applied over a twelve-month period yields an effective annual rate of adjustment of 8.8 percent.
B. June 1979 adjustment = ($5.86) (.00705) per barrel = $.041 per barrel rounded to $.04 per barrel
C. July 1979 adjustment = ($5.86 + .04) (.00705) per barrel = $.042 per barrel rounded to $.04 per barrel
D. August 1979 adjustment = ($5.86 + .04 + .04) (.00705) per barrel = $.042 per barrel rounded to $.04 per barrel

Based upon the monthly adjustments computed above, estimated average lower tier ceiling prices for the months of June, July, and August 1979 are computed as follows:

June 1979 = $5.86 + .04 = $5.90
July 1979 = $5.90 + .04 = $5.94
August 1979 = $5.94 + .04 = $5.98

Using an average highest posted field price on May 15, 1973 of $3.69 per barrel and the monthly adjustments as computed above, lower tier prices for the next 3 months have been determined as follows:

Month	Ceiling price	Price[1]
June 1979	May 15, 1973 highest posted field price plus $2.21.	$5.90
July 1979	May 15, 1973 highest posted field price plus $2.25.	5.94
August 1979	May 15, 1973 highest posted field price plus $2.29.	5.98

[1] Estimated average first sale price.

2. *Upper Tier Ceiling Prices*

Adjustments to ceiling prices for upper tier crude oil and the approximate average first sale prices pursuant to those ceiling prices in June, July, and August 1979 are determined pursuant to the following methodology:

A. Adjustment factor (explained above) = .00705
B. June 1979 adjustment = ($13.06) (.00705) per barrel = $.092 per barrel rounded to $.09 per barrel
C. July 1979 adjustment = ($13.06 + .09) (.00705) per barrel = $.093 per barrel rounded to $.09 per barrel
D. August 1979 adjustment = ($13.06 + .09 + .09) (.00705) per barrel = $.093 per barrel rounded to $.09 per barrel

Based upon monthly adjustments computed above, estimated average upper tier ceiling prices for the months of June, July, and August 1979 are computed as follows:

June 1979 = $13.06 + $.09 = $13.15
July 1979 = $13.15 + $.09 = $13.24
August 1979 = $13.24 + $.09 = $13.33

Using an average highest posted field price on September 30, 1975 of $12.67 per barrel and the monthly adjustments as computed above, upper tier prices for the next 3 months have been determined as follows:

Month	Ceiling price	Price [1]
June 1979	September 30, 1975 highest posted field price plus $0.48.	$13.15
July 1979	September 30, 1975 highest posted field price plus $0.57.	13.24
August 1979	September 30, 1975 highest posted field price plus $0.66.	13.33

[1] Estimated average first sale price.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93–159, as amended, Pub. L. 93–511, Pub. L. 94–99, Pub. L. 94–133, Pub. L. 94–163, and Pub. L. 94–385; Federal Energy Administration Act of 1974, Pub. L. 93–275, as amended, Pub. L. 94–385; Energy Policy and Conservation Act, Pub. L. 94–163, as amended, Pub. L. 94–385; E.O. 11790, 39 FR 23185; Department of Energy Organization Act, Pub. L. 95–91; E.O. 12009, 42 FR 46267.)

In consideration of the foregoing, Part 212 of Chapter II of Title 10 of the Code of Federal Regulations is amended as set forth below, effective June 1, 1979.

Issued in Washington, D.C., June 1, 1979.

Richard B. Hersog,

Acting Administrator, Economic Regulatory Administration.

Section 212.77 is amended in the Appendix to add Schedule No. 15 of Monthly Price Adjustments, as follows:

§ 212.77 Adjustments to Ceiling Prices.

* * * * *

Appendix

* * * * *

Schedule No. 15 of Monthly Price Adjustments

[Effective June 1, 1979]

Month	Lower tier, May 15, 1973, posted price [1] (plus)	Upper tier, Sept. 30, 1975, posted price [2] (plus)
1976:		
February	1.35	−1.32
March	1.38	−1.25
April	1.41	−1.18
May	1.45	−1.11
June	1.48	−1.05
July	1.48	−1.05
August	1.48	−1.05
September	1.48	−1.05
October	1.48	−1.05
November	1.48	−1.05
December	1.48	−1.05
1977:		
January	1.48	−1.25
February	1.48	−1.25
March	1.48	−1.70
April	1.48	−1.70
May	1.48	−1.70
June	1.48	−1.70
July	1.48	−1.70
August	1.48	−1.70
September	1.51	−1.44
October	1.54	−1.18
November	1.57	−.92
December	1.59	−.67

Schedule No. 15 of Monthly Price Adjustments—Continued

[Effective June 1, 1979]

Month	Lower tier, May 15, 1973, posted price [1] (plus)	Upper tier, Sept. 30, 1975, posted price [2] (plus)
1978:		
January	1.81	−.62
February	1.83	−.77
March	1.86	−.71
April	1.89	−.65
May	1.72	−.59
June	1.75	−.52
July	1.78	−.45
August	1.81	−.39
September	1.86	−.26
October	1.91	−.17
November	1.96	−.09
December	1.99	.01
1979:		
January	2.02	.06
February	2.05	.15
March	2.09	.23
April	2.13	.31
May	2.17	.39
June	2.21	.48
July	2.25	.57
August	2.29	.66

[1] The price referred to in 10 CFR 212.73(c)(1) or in 212.73(c)(1), 212.73(c)(3), and 212.73(c)(4).
[2] The price referred to in 10 CFR 212.74(b)(1).

This schedule of monthly price adjustments was issued by the Economic Regulatory Administration on June 1, 1979, pursuant to 10 CFR 212.77. It restates without change the lower and upper tier price ceilings applicable to crude oil produced and sold in the months of February 1976 through May 1979, as determined under 10 CFR 212.73, 212.74, and 212.77. Both lower tier and upper tier ceiling prices, which were increased under Schedule No. 14 effective March 1, 1979, are further indicated in this schedule, effective June 1, 1979.

This schedule is effective only through August 31, 1979.

[FR Doc. 79-17844 Filed 6-5-79; 2:22 pm]

BILLING CODE 6450-01-M

CIVIL AERONAUTICS BOARD

14 CFR Part 207

[Regulation ER-1126, Amdt. 18; Docket 30654]

Charter Trips and Special Services; Elimination of Charter Tariffs

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., May 31, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The CAB is eliminating charter tariff filing requirements. This is a conforming amendment to that rule, governing charter flights by U.S. airlines that have scheduled route authority.

DATES: Adopted: May 31, 1979. Effective: May 31, 1979.

Charter tariffs now on file with the Board may remain in effect until September 6, 1979.

FOR FURTHER INFORMATION CONTACT: Mark S. Kahan, Office of the General Counsel, Pricing and Entry Division, C.A.B., 1825 Connecticut Ave., N.W., Washington, D.C. 20428; 202–673–5205.

SUPPLEMENTARY INFORMATION: In ER–1125, also issued today, the Board is eliminating charter tariff filing requirements. Supplementary information is set out in that rule. Since this conforming amendment relieves a restriction and creates no additional burden, the Board finds that it may be effective immediately.

Accordingly, the Civil Aeronautics Board amends 14 CFR Part 207, *Charter Trips and Special Services*, as follows:

1. The Table of Contents is amended by redesignating § 207.4, adding new §§ 207.18 and 207.19 and deleting and reserving § 207.51, *Terms of service*, to read:

Part 207—CHARTER TRIPS AND SPECIAL SERVICES

Subpart A—General Provisions

Sec.

* * * * *

207.4 Payments to persons receiving commissions.

* * * * *

207.18 Baggage liability.

207.19 Transportation of persons who may need help during aircraft evacuation.

* * * * *

Subpart C—Provisions Relating to Single Entity Charters

* * * * *

207.51 [Reserved]

* * * * *

2. Section 207.4 is amended to read:

§ 207.4 Payments to persons receiving commissions.

Payments for a U.S.-originating charter flight made to any person to whom the carrier, directly or indirectly, has paid a commission or has agreed to pay a commission for that flight shall be considered payments to the carrier.

§ 207.4a [Amended]

3. In § 207.4a, *Written contracts with charterers*, paragraph (b) is revoked and paragraphs (a) (1) through (a) (7) are redesignated as paragraphs (a) through (g).

§ 207.13 [Amended]

4. In § 207.13, *Terms of Service*, paragraph (a) is revoked and reserved.

5. A new § 207.18 is added, to read:

§ 207.18 Baggage liability.

Air carriers shall not limit their baggage liability for interstate and overseas charter flights except as set forth in the following Board orders and any subsequent amendments of them: Order 77–2–9, dated February 2, 1977; Order 77–4–94, dated April 20, 1977; and Order 77–9–80, dated September 20, 1977. The tariff-filing requirements of those orders shall not apply. The orders are obtainable on request from the Publications Services Division, Civil Aeronautics Board, Washington, D.C. 20428.

6. A new § 207.19 is added, to read:

§ 207.19 Transportation of persons who may need help during aircraft evacuation.

Except as set forth in Part 121 of the Federal Aviation Regulations (14 CFR Part 121), air carriers shall not limit the availability, upon reasonable request, of air transportation and related services to a person who may require help from another person in expeditiously moving to an emergency exit for evacuation of an aircraft.

7. In § 207.23 "as set forth in the carrier's charter tariff on file with the Board" is deleted, so that the section reads:

§ 207.23 Agent's commission.

The carrier shall not pay its agent a commission or any other benefits, directly or indirectly, in excess of 5 percent of the total charter price, or more than the commission related to charter flights paid to an agent by a carrier certificated to render regular service on the same route, whichever is greater. The carrier shall not pay any commission whatsoever to an agent if the agent receives a commission from the charterer for the same service.

§ 207.51 [Revoked and Reserved]

8. In Subpart C, § 207.51 is revoked and reserved.

9. In the Statement of Supporting Information appended to Part 207, item #5 of Part I is amended to read:

PART I—TO BE COMPLETED BY AIR CARRIER * * *

* * * * *

5. Total charter price————.

* * * * *

14 CFR Part 208

[Regulation ER-1127; Amdt. 17, Docket 30664]

Terms, Conditions, and Limitations of Certificates To Engage in Charter Air Transportation; Elimination of Charter Tariffs

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. May 31, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The CAB is eliminating charter tariff filing requirements. This is a conforming amendment to that rule, governing charter flights by U.S. charter air carriers.

DATES: Adopted: May 31, 1979. Effective: May 31, 1979. Charter tariffs now on file with the Board may remain in effect until September 6, 1979.

FOR FURTHER INFORMATION CONTACT: Mark S. Kahan, Office of the General Counsel, Pricing and Entry Division, C.A.B., 1825 Connecticut Ave., N.W., Washington, D.C. 20428; 202–673–5205.

SUPPLEMENTARY INFORMATION: In ER–1125, also issued today, the Board is eliminating charter tariff filing requirements. Supplementary information is set out in that rule. Since this conforming amendment relieves a restriction and creates no additional burden, the Board finds that it may be effective immediately.

Accordingly, the Civil Aeronautics Board amends 14 CFR Part 208, *Terms, Conditions, and Limitations of Certificates to Engage in Supplemental Air Transportation*, as follows:

1. The Title and Table of Contents are amended by changing "Supplemental" to "Charter", by deleting "and Tariffs" from the third subheading of Subpart A, by adding new §§ 208.30 and 208.31, and by revising §§ 208.103 and 208.301, to read:

PART 208—TERMS, CONDITIONS, AND LIMITATIONS OF CERTIFICATES TO ENGAGE IN CHARTER AIR TRANSPORTATION

Subpart A—General Provisions

Sec.

* * * * *

Operations

208.30 Baggage liability.

208.31 Transportation of persons who may need help during aircraft evacuation.

* * * * *

Subpart B—Provisions Relating to Military Charters

* * * * *

208.103 Terms of service.

* * * * *

Subpart D—Provisions Relating to Single Entity Charters

* * * * *

208.301 Terms of service.

* * * * *

2. A new § 208.30 is added, to read:

§ 208.30 Baggage liability.

Air carriers shall not limit their baggage liability for interstate and overseas charter flights except as set forth in the following Board orders and any subsequent amendments of them: Order 77–2–9, dated February 2, 1977; Order 77–4–94, dated April 20, 1977; and Order 77–9–80, dated September 20, 1977. The tariff-filing requirements of those orders shall not apply. The orders are obtainable on request from the Publications Services Division, Civil Aeronautics Board, Washington, D.C. 20428.

3. A new § 208.31 is added, to read:

§ 208.31 Transportation of persons who may need help during aircraft evacuation.

Except as set forth in Part 121 of the Federal Aviation Regulations (14 CFR Part 121), air carriers shall not limit the availability, upon reasonable request, of air transportation and related services to a person who may require help from another person in expeditiously moving to an emergency exit for evacuation of an aircraft.

§ 208.31b [Amended]

4. In § 208.31b, *Written contract with charterers*, paragraph (b) is revoked and the designation "(a)" is removed from paragraph (a) so that that paragraph becomes the entire section.

5. In § 208.32, the title is amended, paragraphs (a) and (b) are revoked and reserved, and paragraph (c) is amended, to read:

§ 208.32 Terms of service.

(a) [Reserved]

(b) [Reserved]

(c) Payments for a U.S.-originating charter flight made to any person to whom the carrier, directly or indirectly, has paid a commission or has agreed to pay a commission for that flight shall be considered payments to the carrier.

* * * * *

6. In § 208.32a, the first sentence is replaced by two new sentences, to read:

§ 208.32a Flight delays and substitute air transportation (foreign).

Charter air carriers shall comply with the following requirements for passenger service in foreign air transportation. These requirements shall be without prejudice and in addition to any other rights or remedies of passengers under applicable law:

* * * * *

7. In § 208.33, the first sentence is replaced by two new sentences and paragraph (d) is amended to read:

§ 208.33 Flight delays and substitute air transportation (interstate and overseas).

Charter air carriers shall comply with the following requirements for passenger service in interstate and overseas transportation. These requirements shall be without prejudice and in addition to any other rights or remedies of passengers under applicable law:

* * * * *

(d) The requirements in paragraphs (a), (b), and (c) of this section for immediate refunds or alternative transportation shall not apply to the extent that there is an unavoidable delay due solely to weather.

8. In Subpart B, *Provisions Relating to Military Charters*, § 208.103 is amended to read:

§ 208.103 Terms of service.

The provisions of § 208.32(d) shall apply to charters under this subpart.

9. In § 208.202, "as set forth in the carrier's charter tariff on file with the Board" is deleted, so that the section reads:

§ 208.202 Agent's commission.

The carrier shall not pay its agent a commission or any other benefits, directly or indirectly, in excess of 5 percent of the total charter price, or more than the commission related to charter flights paid to an agent by a carrier certificated to render regular service on the same route, whichever is greater. The carrier shall not pay any commission whatsoever to an agent if the agent receives a commission from the charterer for the same service.

10. In Subpart D, *Provisions Relating to Single Entity Charters*, § 208.301 is amended to read:

§ 208.301 Terms of service.

The provisions of §§ 208.32(c) and (d) shall apply to charters under this subpart.

11. In the Statement of Supporting Information appended to Part 208, item #5 of Part I is amended to read:

Statement of Supporting Information

PART I—TO BE COMPLETED BY AIR CARRIER * * *

* * * * *

5. Total charter price ————.

14 CFR Part 212

[Regulation ER-1128; Amdt. 27; Docket 20054]

Charter Trips by Foreign Air Carriers; Elimination of Charter Tariffs

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. May 31, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The C.A.B. is eliminating charter tariff filing requirements. This is a conforming amendment to that rule, governing charter flights by foreign air carriers with route authority.

DATES: Adopted: May 31, 1979. Effective: May 31, 1979. Charter tariffs now on file with the Board may remain in effect until September 6, 1979.

FOR FURTHER INFORMATION CONTACT: Mark S. Kahan, Office of the General Counsel, Pricing and Entry Division, C.A.B., 1825 Connecticut Ave., N.W., Washington, D.C. 20428; 202-673-5205.

SUPPLEMENTARY INFORMATION: In ER-1125, also issued today, the Board is eliminating charter tariff filing requirements. Supplementary information is set out in that rule. Since this conforming amendment relieves a restriction and creates no additional burden, the Board finds that it may be effective immediately.

Accordingly, the Civil Aeronautics Board amends 14 CFR Part 212, *Charter Trips by Foreign Air Carriers*, as follows:

1. The Table of Contents is amended by redesignating § 212.3 and deleting and reserving § 212.51, *Terms of service*, to read:

PART 212—CHARTER TRIPS BY FOREIGN AIR CARRIERS

Subpart A—General Provisions

Sec.

* * * * *

§ 212.3 Payments to persons receiving commissions.

* * * * *

Subpart C—Provisions Relating To Single Entity Charters

* * * * *

212.51 [Reserved]

* * * * *

2. Section 212.3 is amended to read:

§ 212.3 Payments to persons receiving commissions.

Payments for a U.S.-originating charter flight made to any person to whom the carrier, directly or indirectly, has paid a commission or has agreed to pay a commission for that flight shall be considered payments to the carrier.

§ 212.3a [Amended]

3. In § 212.3a, *Written contracts with charterers*, paragraph (b) is revoked and paragraphs (a)(1) through (a)(7) are redesignated as paragraphs (a) through (g).

§ 212.10 [Amended]

4. In § 212.10, *Terms of service*, paragraph (a) is revoked and reserved.

5. In § 212.23, "as set forth in the carrier's charter tariff on file with the Board" is deleted, so that the section reads:

§ 212.23 Agent's commission.

The carrier shall not pay its agent a commission or any other benefits directly or indirectly, in excess of 5 percent of the total charter price, or more than the commission related to charter flights paid to an agent by a carrier certificated to render regular service on the same route, whichever is greater. The carrier shall not pay any commission whatsoever to an agent if the agent receives a commission from the charterer for the same service.

§ 212.51 [Reserved]

6. In Subpart C, § 212.51, *Terms of service*, is revoked and reserved.

7. In the Statement of Supporting Information appended to Part 212, item #5 of Part I is amended to read:

Statement of Supporting Information

PART I—TO BE COMPLETED BY AIR CARRIER * * *

* * * * *

5. Total charter price ————.

* * * * *

(Sections 102, 204, 403, and 416 of the Federal Aviation Act of 1958, as amended by Pub. L. 95-504, 72 Stat. 740, 743, 758, and 771, 92 Stat. 1731, 1732; 49 U.S.C. 1302, 1324, 1373, and 1386)

14 CFR Part 214

[Regulation ER-1129; Amdt. 25; Docket 30654]

Terms, Conditions, and Limitations of Foreign Air Carrier Permits Authorizing Charter Transportation Only; Elimination of Charter Tariffs

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., May 31, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The C.A.B. is eliminating charter tariff filing requirements. This is a conforming amendment to that rule, governing charter flights by foreign charter-only carriers.

DATES: Adopted: May 31, 1979. Effective: May 31, 1979. Charter tariffs now on file with the Board may remain in effect until September 6, 1979.

FOR FURTHER INFORMATION CONTACT: Mark S. Kahan, Office of the General Counsel, Pricing and Entry Division, C.A.B., 1825 Connecticut Ave., N.W., Washington, D.C. 20428; 202-673-5205.

SUPPLEMENTARY INFORMATION: In ER-1125, also issued today, the Board is eliminating charter tariff filing requirements. Supplementary information is set out in that rule. Since this conforming amendment relieves a restriction and creates no additional burden, the Board finds that it may be effective immediately.

Accordingly, the Civil Aeronautics Board amends 14 CFR Part 214, *Terms, Conditions, and Limitations of Foreign Air Carrier Permits Authorizing Charter Transportation Only*, as follows:

1. The Table of Contents is amended by revising § 214.13 and deleting and reserving § 214.41, *Terms of service*, to read:

PART 214—TERMS, CONDITIONS, AND LIMITATIONS OF FOREIGN AIR CARRIER PERMITS AUTHORIZING CHARTER TRANSPORTATION ONLY

Subpart A—General Provisions.

Sec.

* * * * *

214.13 Payments to persons receiving commissions.

* * * * *

Subpart B—Provisions Relating to Single Entity Charters

* * * * *

214.41 [Reserved]

* * * * *

§ 214.6 [Amended]

2. In § 214.6, *Record retention*, paragraph (b) is revoked and reserved.

3. Section 214.13 is amended to read:

§ 214.13 Payments to persons receiving commissions.

Payments for a U.S.-originating charter flight made to any person to whom the carrier, directly or indirectly, has paid a commission or has agreed to pay a commission for that flight shall be considered payments to the carrier.

§ 214.13a [Amended]

4. In § 214.13a, *Written contracts with charterers*, paragraph (b) is revoked and paragraphs (a)(1) through (a)(7) are redesignated as paragraphs (a) through (g).

§ 214.14 [Amended]

5. In § 214.14, *Terms of service*, paragraph (a) is revoked and reserved.

6. In § 214.15, "as set forth in the carrier's charter tariff on file with the Board" is deleted, so that the section reads:

§ 214.15 Agent's commission.

The carrier shall not pay its agent a commission or any other benefits, directly or indirectly, in excess of 5 percent of the total charter price, or more than the commission related to charter flights paid to an agent by a carrier certificated to render regular service on the same route, whichever is greater. The carrier shall not pay any commission whatsoever to an agent if the agent receives a commission from the charterer for the same service.

§ 214.41 [Reserved]

7. In Subpart B, § 214.41, *Terms of service*, is revoked and reserved.

8. In the Statement of Supporting Information appended to Part 214, item #5 of Part I is amended to read:

Statement of Supporting Information

PART I—TO BE COMPLETED BY AIR CARRIER * * *

* * * * *

5. Total charter price ————————.

* * * * *

(Sections 102, 204, 403, and 416 of the Federal Aviation Act of 1958, as amended by Pub. L. 95-504, 72 Stat. 740, 743, 758, and 771, 92 Stat. 1731, 1732; 49 U.S.C. 1302, 1324, 1373 and 1386)

14 CFR Part 221

[Regulation ER-1125; Amendment No. 50; Docket 30654]

Construction, Publication, Filing and Posting of Tariffs of Air Carriers and Foreign Air Carriers; Elimination of Charter Tariffs

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., May 31, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: Air carriers and foreign air carriers must generally file tariffs with the CAB showing their rates, fares and charges (as well as practices affecting their rates, fares and charges). This rule exempts air carriers and foreign air carriers from having to file tariffs for their charter flights. It is in response to a petition for institution of a rulemaking filed by the National Air Carrier Association. The CAB is also keeping this docket open for answers on the question of eliminating the tariff filing requirement for operators or Overseas Military Personnel Charters.

DATES: Adopted: May 31, 1979. Effective: May 31, 1979. Charter tariffs now on file with the Board may remain in effect until September 6, 1979.

FOR FURTHER INFORMATION CONTACT: Mark S. Kahan, Office of the General Counsel, Pricing and Entry Division, C.A.B., 1825 Connecticut Ave., N.W., Washington, D.C. 20428; 202-673-5205.

SUPPLEMENTARY INFORMATION: In response to a petition by the National Air Carrier Association (NACA), the Board instituted this rulemaking to consider relieving air carriers from filing rates tariffs for their domestic and overseas charter flights, both passenger and cargo.[1] Concluding that it did not have legal authority to exempt foreign air carriers, the Board rejected NACA's request that the rule cover foreign charters as well.[2] The notice called for

---

[1] EDR-502/SPDR-68, 42 FR 43169, August 26, 1977. NACA is acting as attorney-in-fact for: Evergreen International Airlines, Inc.; McCulloch International Airlines, Inc.; Overseas National Airways, Inc.; Trans International Airlines, Inc.; and World Airways, Inc.

[2] The Board feared that exempting air carriers from filing tariffs for their foreign charters would give them an unfair advantage over their foreign competitors.

comments on the nature of the charter market and the need for tariffs. In addition, it specifically invited comment on the need for filing charter rules tariffs.[3] Comments were received from NACA, the Board's former Office of the Consumer Advocate (OCA) and various scheduled air carrier's [4] and tour operators.[5]

The scheduled carriers, ALSG and Maritz, Inc., all opposed the rule. The principal legal argument raised by these parties is that elimination of the tariff filing requirement would make it impossible for the Board to enforce the prohibition in Section 404 of the Federal Aviation Act against unjust and discriminatory rates.[6] They also essentially agreed on the economics of the charter market. They argued that charterers and air carriers have grossly disparate bargaining power; and that the tariff filing requirement is the only tool that helps redress that imbalance. In the absence of tariffs, only the large charterers, offering the inducement of volume, would be able to negotiate favorable contracts. The industry would become concentrated in the hands of the large carriers and tour operators, with no benefits being passed on to the consumer. The claim made by proponents of the proposed rule—that barriers to entry are significantly lower in the charter, as compared to the scheduled market—simply is not true; a free competitive market is not the reality for either one. Southern claimed that the large carriers will offer below-cost contracts on their small craft, thereby driving the small carriers out of business, and make up the profit on their large planes. The carrier feared that an impending charter capacity shortage will permit the large carriers to take advantage of the situation to squeeze profits. Frontier contended that, without tariffs, the scheluled carriers will not be able to respond quickly to low charter rates offered over their routes; the consumer will thus lose the benefit of certain deep discount fares.

Proponents of the proposed rule rejected the above characterization of the charter market. They claimed that tariffs do virtually nothing to redress the economic imbalance between charterer and carrier; that the tariff merely memorializes the terms of a previously negotiated contract; and that the carrier in nearly all cases retains the right unilaterally to increase the contract price when it files the tariff. At the same time, the tariff impedes negotiating flexibility and prevents the parties from responding to a change in circumstances within thirty days of the scheduled date of departure. While producing an almost exclusively negative effect on the market, tariffs impose large financial and time burdens on both the carriers and the Board.

Not all those who supported the proposed rule agreed that rules tariffs should also be eliminated. OCA believed that the rules portion of the tariff is an important consumer protection device. Since the passenger has no part in the negotiations, charter contracts might fail to make provision for such individual concerns as carrier liability for baggage damage. Suntours also favored retention of tariff rules. Like the tour operators who opposed the rule in its entirety, Suntours' principal concern was that, absent regulation, carriers will use their superior bargaining position to negotiate "Draconian" cancellation penalties.

As a final matter, Davis Agency asked that we also exempt indirect air carriers from filing tariffs for overseas military personnel charters (OMPC'S). This is the only type of charter for which the operator must still file a tariff. Davis argued that this is an anomalous situation and that no one has demonstrated a sound basis for the difference in treatment.

Supplemental Notice

In response to a comment by NACA that the Board does have legal authority to exempt foreign air carriers, we issued a Supplemental Notice of Proposed Rulemaking.[7] We called for comments on our authority over foreign carriers and we proposed to eliminate rules tariffs. We asked for suggestions on how to maintain minimum levels of consumer protection in the absence of tariffs. We further stated: "Along this line, if we adopt this rule, we specifically propose to adopt a rule requiring charter carriers to comply with the baggage liability rules set forth in Docket 27589, the *Domestic Baggage Liability Rules Investigation.*" Comments on the supplemental notice were received from NACA; American; United; Maritz, Inc.; Davis Agency; Pan American World Airways; British Airways; International Aviation Services d/b/a IAS Cargo Airlines (IAS); and Japan Air Lines Company (JAL).[8]

American, United, Maritz, Inc. and Davis basically repeated their earlier positions, with Davis claiming that the expanded scope of the revised rule argues even more strongly for elimination of the OMPC tariff filing requirement. Pan Am, British Airways, JAL and IAS addressed themselves both to the legal issue of the Board's authority to exempt foreign carriers [9] and to the broader economic and policy questions involving the nature of the charter market. JAL argued that the proposed rule would help erase the distinction between charter and scheduled services; the result would be a price war which would hurt the consumer. British Airways agreed that the charter carriers are being given an unfair advantage—especially in the cargo market, where charter and scheduled carriers compete directly for business. IAS claimed that it is in the cargo area that the rule is most needed; the average cargo charterer is a sophisticated shipper, aware of the going rates in his market, who does not need the so-called protection of tariffs.

Pan Am stated that elimination of rules tariffs would lead to gross discrimination in the terms and liabilities incorporated in the various charter contracts. NACA reversed its earlier position and came to support retention of the rules portion of tariffs. It claimed that any alternative consumer protection device would impose as great a burden on the carriers. It asked the Board to make clear that cancellation penalties are rates-related and, therefore, would not be subject to tariff filing.

After considering the legal and policy arguments contained in the pleadings, we have decided to adopt the rule as set forth in our Supplemental Notice of Proposed Rulemaking. We will exempt carriers from any tariff filing requirements for all charter operations.

Legal Authority for Exemption

Our earlier concerns about the legal predicate for the proposed rule have been mooted by enactment of the Airline Deregulation Act of 1978.[10] Specifically, Section 416(b) of the Federal Aviation Act has been amended: (1) to eliminate the requirement of finding an undue burden

---

[3] Rules tariffs describe the terms and conditions of transportation. They include such things as baggage liability, conditions for cancellation, and service of food and alcoholic beverages.

[4] Southern Airways; United Air Lines; Frontier Airlines; Northwest Airlines; and American Airlines.

[5] Suntours Limited; American Express Company; Davis Agency; Air Charter Tour Operators of America; Del E. Webb World Travel Company; United Buying Service Travel; The American Leadership Study Groups (ALSG); and Maritz, Inc.

[6] These parties made a second legal argument—*i.e.*, that there is no undue burden associated with filing tariffs such as would justify the use of the Board's exemption power. As will be discussed below, this argument is now moot.

[7] EDR-388A/SPDR-69A, 43 FR 20932, May 12, 1978.

[8] Of all these commenters, only NACA, Davis and IAS supported any part of the proposed rule.

[9] See *infra*, at p. 6.

[10] P.L. 95-504, October 24, 1978.

on an air carrier to justify the exemption; and (2) to extend the Board's exemption authority to all persons.[11] The new Section 416(b) reads as follows:

> Except as provided in paragraph (2) of this subsection, the Board, from time to time and to the extent necessary, may exempt from the requirements of this title or any provision thereof, . . . any person or class of persons if it finds that the exemption is consistent with the public interest.[12]

This new language makes clear that—once we have found the proposed exemption to be in the public interest—we may extend it to any class of carriers which fits our public interest analysis.

We have also considered the position that we cannot legally exempt carriers from their filing requirements under Section 403 of the Act without also abrogating our duty to enforce the Section 404 requirement that carriers charge just and reasonable rates. We do not find that argument persuasive. In *FPC* v. *Texaco*,[13] the Supreme Court stated that a regulatory agency is free to use indirect means of regulation, so long as statutory objectives are preserved. Tariff filing is not a legally indispensable element of rate regulation.

As we discussed in considering our new general rules for all-cargo carriers,[14] tariffs are not a very effective means of ferreting out unreasonable and discriminatory rates. In that context we stated:

> . . . as a practical matter, most investigations of discriminatory rates begin not as a result of our monitoring of the carriers' tariffs, but in response to complaints from disadvantaged shippers, or competing carriers, who have learned of the rates they wish to complain against by word-of-mouth, not be reviewing our tariff files.[15]

We also find that we will be able to maintain surveillance over rates through the mechanism of the charter prospectus. The Public Charter rule[16] requires the filing of a prospectus which includes the charter price. Similarly, all carriers performing charters must file quarterly reports showing revenues received for each flight.[17] By these means, we will be able continually to monitor the rates being charged for charter flights, and will be able to take whatever steps might be necessary to redress unreasonable or discriminatory charges.

It must be emphasized, as we pointed out in EDR–332, that the board has in the past intervened to suspend charter prices most infrequently, even during periods in which general fare regulation was at its most intrusive. This situation reflects a long-held perception, not seriously challenged by the comments, that the competitive posture of charter carriers, and particularly the need to keep their rates well below those of scheduled carriers which we do regulate pervasively, precludes excessive charges. Rates-of-return earned by charter operations in the past have not been excessive, nor are they now. Our surveillance over their financial results and condition will remain without change. These considerations suggest that our regulatory scheme for charters, even with the exemption requested here, is more protective of consumers' interests than the indirect regulation approved, in principle, in *FPC* v. *Texaco*, supra. It is, moreover, entirely consistent with our clear statutory mandate[18] to rely first and foremost on actual and potential competition to foster optimum price and service options.

Economic Need for Tariffs

After considering all the comments filed in response to our notices of proposed rulemaking, we have concluded that it is in the public interest to exempt carriers from filing charter tariffs. The exemption covers all passenger and cargo charter flights of both foreign and domestic carriers.

Our conclusion does not indicate a lack of concern for the alleged instability and concentration of the charter market which some have claimed will result from the proposed rule. It is, rather, that the opponents have not produced persuasive evidence that those threatened evils will materialize. There are hundreds of tour operators in the United States. No commenter has marshalled any data to show that the elimination of tariffs will concentrate the industry in the hands of a few powerful giants. The comments submitted disagree radically on the nature of the charter market; these disagreements exist not only between scheduled and charter carriers, but even among the various tour operators. On the other hand, the burden that tariffs impose on the carriers is clear. Absent convincing evidence that harm will result, we find it in the public interest to eliminate that burden.

We have, in numerous other contexts, discussed and rejected the position that deregulation will open the airline industry to destructive, predatory competition.[19] If anything, we find less merit in this argument when applied to the charter industry where barriers to entry are lower.[20] Even should we prove wrong, however, we still retain ample authority to deal with predation and other methods of unfair competition if and when they materialize.[21]

The recent passage of the Deregulation Act contributes to this conclusion. Under the terms of the Act, domestic tariffs will be abolished by 1983. We believe that the charter industry is a good place to begin the gradual deregulation that Congress has mandated. There is widespread sentiment that charter tariffs are unnecessary; the charter market is more competitive than its scheduled counterpart; and the direct consumers are not individuals, but knowledgeable businesses with the economic strength to engage in arm's-length bargaining with the carrier.[22]

Rules Tariffs

We have reached the same conclusion regarding the rules portion of charter tariffs. The same considerations of increasing flexibility and giving greater range to the negotiations of the parties involved have led us to this decision. Also, as the comments indicate, there is great disagreement about where the line between rates and rules tariffs actually exists. Elimination of all charter tariff filing requirements will give the charterers the flexibility they seek, without opening the door to future litigation over whether a particular provision is a rate or a rule.

We remain concerned about protecting the rights of the passenger-consumer. The comments which we received on this specific issue indicate that the principal area for concern is over liability for baggage damage. As no one has taken exception to the course of action proposed in EDR–332A,[23] we will make final our plan to require charter carriers to comply with the rules set

---

[11] The predecessor section authorized the Board to exempt only domestic air carriers.

[12] 49 U.S.C. § 1386(b)(1). Paragraph (2) contains exceptions to the exemption power in the case of certain labor legislation.

[16] 14 CFR Part 380.

[17] 14 CFR Part 217 applies to foreign air carriers. Domestic air carriers are governed by 14 CFR 241 (Section 25, Schedule T–6).

[18] See Sections 102(a)(3) and (4) and 1002(e)(5) of the Act.

[19] *See, e.g., Transcontinental Low-Fare Route Proceeding*, Order 78–1–76; *Oakland Service Investigation*, Order 78–4–121, pp. 30–32; *Chicago-Midway Low-Fare Route Proceeding*, Order 78–7–40; Improved *Authority to Wichita Case*, Order 78–12–108; *Las Vegas-Dallas/Fort Worth Case*, Order 78–7–116; and *Philadelphia-Bermuda Nonstop Proceeding*, Order 78–12–122.

[20] See *Oakland Service Case*, supra, at p. 31.

[21] See, *e.g.*, Section 411 of the Federal Aviation Act and Section II of the Sherman Act. Order 78–1–101; Order 78–12–108; Order 78–7–116.

[22] See General Rules for All-Cargo Carrier, ER–1060, 43 FR 53929, November 18, 1978.

[23] See supra, at p. 1.

forth in the *Domestic Baggage Liability Rules Investigation*, Docket 27588.

Similarly, we do not intend the elimination of charter tariffs to affect carriers' duty to carry handicapped persons. Relevant aspects of Section 221.36(a)(8), which requires the filing of rules tariffs governing carriage of persons who may need assistance in moving to an emergency exit during an aircraft evacuation, are therefore also preserved in new sections that are being added to Parts 207 and 208. Section 221.36(a)(8) is not itself being deleted, however, because it continues to apply to tariffs for scheduled service.

Overseas Military Personnel Charters

We will not act on the Davis Agency's request to exempt charter operators from filing tariffs for OMPC's. Since its request was contained in a comment to which responses were not contemplated, there would be severe problems with notice and fairness in promulgating a final rule at this time. We have in the past found important distinctions between military and other charters; we would have to allow public comment before changing current regulations. We will, however, treat Davis's comment as a petition to institute a rulemaking and will keep this docket open for 30 days for the filing of answers in accordance with 14 CFR Section 302.38(a).

The Rule

This rule amends 14 CFR Part 221, the basic tariff regulation. Conforming amendments of Parts 207, 208, 212, 214, 372, and 380 are set out in ER–1125 through ER–1129 and SPR–159 through SPR–160. Those amendments are also adopted today.

Since this amendment relieves a restriction and creates no additional burden, the Board finds that it may be effective immediately. To ease the transition to a system without tariffs, however, carriers having charter tariffs on file with the Board will be allowed to maintain them in force until 90 days after publication of this rule. After that date, those charter rates and rules on file with the Board will not be effective as tariffs. During this transition period carriers may phase out their charter tariffs gradually.[24] Tariffs on file, however, must not mislead charterers or the public about their applicability or validity. Any carrier, therefore, intending to provide charter air transportation not in accordance with filed tariffs shall amend its tariff on file with the Board to indicate the extent to which that tariff is no longer in force, or to describe the exception that it wishes to make to that tariff.

Accordingly, the Civil Aeronautics Board amends 14 CFR Part 221, *Construction, Publication, Filing and Posting of Tariffs of Air Carriers and Foreign Air Carriers*, as follows:

Part 221 [Amended]

1. The Table of Contents is amended by deleting § 221.64, *Charter rates and charges*, and deleting and reserving § 221.178, *Service of charter tariff publications on charterers*.

2. In § 221.3, paragraph (a) is amended by inserting "Except as set forth in paragraph (d) of this section" at the beginning of the first sentence, and a new paragraph (d) is added, to read:

§ 221.3 Carrier's duty.

(a) *Must file tariffs.* Except as set forth in paragraph (d) of this section, every air carrier and every foreign air carrier shall file with the Board, and print, and keep open to public inspection, tariffs showing all rates, fares, and charges for air transportation between points served by it, and between points served by it and points served by any other air carrier or foreign air carrier, when through service and through rates shall have been established, and showing to the extent required by regulations of the Board, all classifications, rules, regulations, practices, and services in connection with such air transportation. Tariffs shall be filed, posted, and published in such form and manner, and shall contain such information as the Board shall by regulation prescribe. Any tariff so filed which is not consistent with section 403 of the act and such regulations may be rejected. Any tariff so rejected shall be void.

* * * * *

(d) *Exemption for charter operations.* Air carriers and foreign air carriers are exempted from the requirement of section 403 of the Act and any requirement of this chapter to file tariffs for their charter operations.

3. In § 221.4, the definition of "rates" is amended by removing the reference to charters, so that it reads:

§ 221.4 Definitions.

* * * * *

"Rates" means the amount per unit stated in the applicable tariff for the transportation of property, and includes "charge" unless the context otherwise requires.

* * * * *

§ 221.21 [Amended]

4. In § 221.21, *Specifications applicable to all tariff publications*, paragraph (i)(1) is revoked and reserved.

5. In § 221.38, paragraph (a)(4) is amended to read:

§ 221.38 Rules and regulations.

(a) *Contents.* * * *

(4) All other provisions and charges which in any way increase or decrease the amount to be paid on any shipment or by any passenger, or which in any way increase or decrease the value of the services rendered to the shipper or passenger.

* * * * *

6. Also in § 221.38, paragraph (a)(10) is revoked and the third sentence of paragraph (e) is amended by deleting "or charterer".

7. § 221.55 is amended by deleting the proviso so that it reads:

§ 221.55 Time fares, rates, or charges.

Fares, rates, or charges for air transportation shall not be stated to apply per hour or any other unit of time.

§ 221.64 [Revoked]

8. Section 221.64, *Charter rates and charges*, is revoked.

§ 221.70 [Amended]

9. In § 221.70, *Definite unit of rate*, paragraph (a)(1) is revoked and reserved.

§ 221.178 [Reserved]

10. Section 221.178, *Service of tariff publications on charterers*, is revoked and reserved.

In § 221.179, paragraph (a) is amended to read:

§ 221.179 Transmission of tariff filings to subscribers.

(a) Each carrier required to file tariffs in accordance with this part shall make available to any person so requesting a subscription service as described in paragraph (b) of this section separately for its passenger tariffs and its freight

---

[24] We recognize that some carriers, particularly those that have entered into contracts whose pricing provisions refer to filed tariffs, may wish to file new tariffs during the transition period to reflect changed costs of operation. In practice, such instances should be rare. Several carriers and charterers have already discontinued using such pricing terms in anticipation of our action today. Moreover, any such new tariffs would generally be filed on 60 days' notice and would therefore cover only a small portion of the transitional period. We would expect that the parties, in accordance with normal contractual principles, would re-negotiate such contracts as necessary. In order to expedite this shift to private contractual arrangements, and to avoid unnecessarily continuing the expiring tariff system during the 1979 summer season, we have decided that as of this date new charter tariff filings generally will not be accepted. If this approach threatens to work undue hardships on any parties, we will be prepared to deal with them on a case-by-case basis.

tariffs issued by it or by a publishing agent on its behalf.

[Regulation SPR-159; Amendment No. 8; Docket 30654]

Overseas Military Personnel Charters; Elimination of Charter Tariffs

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. May 31, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The C.A.B. is eliminating charter tariff filing requirements. This is a conforming amendment to that rule, governing charter flights by foreign charter-only carriers.

DATES: Adopted: May 31, 1979. Effective: May 31, 1979. Charter tariffs now on file with the Board may remain in effect until September 6, 1979.

FOR FURTHER INFORMATION CONTACT: Mark S. Kahan, Office of the General Counsel, Pricing and Entry Division, C.A.B., 1825 Connecticut Ave., N.W., Washington, D.C. 20428; 202-673-05205.

SUPPLEMENTAY INFORMATION: In ER-1125, also issued today, the Board is eliminating charter tariff filing requirements. Supplementary information is set out in that rule. Since the conforming amendment relieves a restriction and creates no additional burden, the Board finds that it may be effective immediately.

Accordingly, the Civil Aeronautics Board amends 14 CFR Part 372, *Overseas Military Personnel Charters*, as follows:

§ 372.26 [Reserved]

1. The Table of Contents is amended by deleting and reserving § 372.26.

2. Section 372.26, *Prohibition on operations unless tariffs are observed*, is revoked and reserved.

(Sections 102, 204, 403, and 416 of the Federal Aviation Act of 1958, as amended by Pub. L. 95-504, 72 Stat. 740, 743, 758, and 771, 92 Stat. 1731, 1732; 49 U.S.C. 1302, 1324, 1373, and 1386.)

BILLING CODE 6320-01-M

14 CFR Part 380

[Regulation SPR-160; Amendment No. 4; Docket 30654]

Public Charters; Elimination of Charter Tariffs

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., May 31, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The C.A.B. is eliminating charter tariff filing requirements. This is a conforming amendment to the Public Charter Rule.

DATES: Adopted: May 31, 1979; Effective: May 31, 1979. Charter tariffs now on file with the Board may remain in effect until September 6, 1979.

FOR FURTHER INFORMATION CONTACT: Mark S. Kahan, Office of the General Counsel, Pricing and Entry Division, C.A.B., 1825 Connecticut Ave., N.W., Washington, D.C. 20428; 202-673-5205.

SUPPLEMENTARY INFORMATION: In ER-1125, also issued today, the Board is eliminating charter tariff filing requirements. Supplementary information is set out in that rule. Since this conforming amendment relieves a restriction and creates no additional burden, the Board finds that it may be effective immediately.

Accordingly, the Civil Aeronautics Board amends 14 CFR Part 380, *Public Charters*, as follows:

1. The Table of Contents is amended by adding a new § 380.19 to Subpart B and by deleting and reserving § 380.41 of Subpart D, to read:

PART 380—PUBLIC CHARTERS

Sec.

* * * * *

Subpart B—General Conditions and Limitations

* * * * *

380.19 Old-rule charters.

* * * * *

Subpart D—Requirements Applicable to Direct Air Carriers

* * * * *

380.41 [Reserved]

* * * * *

2. A sentence is added at the end of § 380.1 so that the section reads:

§ 380.1 Applicability.

This part establishes the terms and conditions governing the furnishing of Public Charters in air transportation by direct air carriers and foreign air carriers and by Public Charter operators. This part also relieves such charter operators (other than foreign charter operators) from various provisions of title IV of the Federal Aviation Act of 1958, as amended, for the purpose of enabling them to provide Public Charters utilizing aircraft chartered from such direct carriers. It also contains a limited declination of exercise of jurisdiction over foreign charter operators. The provisions of this regulation shall not be construed as limiting any other authority to engage in air transportation issued by the Board. Nothing contained in this part shall be construed as repealing or amending any provisions of any of the Board's regulations, unless the context so requires. This part also applies to old-rule charters as set forth in § 380.19.

3. A new § 380.19 is added, to read:

§ 380.19 Old-rule charters.

(a) As used in this section, "old-rule charter" means a charter that is covered by a prospectus filed under Part 371, 378, or 378a of this title.

Note.—Those parts were revoked, effective January 1, 1979. The revocation specified that charters covered by prospectuses filed before that date could be performed on or after that date. 43 FR 36903-4, August 18, 1978.

(b) Direct air carriers performing old-rule charters are not required to have tariffs governing those charters on file with the Board.

4. In § 380.32, paragraph (b) is amended by deleting "as set forth in its tariffs" so that it reads:

§ 380.32 Specific requirements for operator-participant contracts.

Contracts between charter operators and charter participants shall state:

* * * * *

(b) The name of the direct air carrier, the dollar amounts of that carrier's liability limitations for participants' baggage, the type and capacity of the aircraft to be used for the flight, and the conditions governing aircraft-equipment substitutions.

§ 380.41 [Reserved]

5. Section 380.41, *Tariffs to be on file for charter trips*, is revoked and reserved.

(Secs. 101(3), 102, 204, 403, and 416 of the Federal Aviation Act of 1958, as amended by Pub. L. 95-504; 72 Stat. 737, 740, 743, 758, and 771; 92 Stat. 1731, 1732; 49 U.S.C. 1301, 1302, 1324, 1373, and 1386.)

FEDERAL TRADE COMMISSION

16 CFR Part 456

Advertising of Ophthalmic Goods and Services; Interpretation of Trade Regulation Rule

AGENCY: Federal Trade Commission.

ACTION: Interpretation of Trade Regulation Rule.

SUMMARY: In response to a request by the Illinois Attorney General, the Federal Trade Commission has issued an interpretation of its trade regulation rule concerning the Advertising of Ophthalmic Goods and Services (16 CFR Part 456). The interpretation says that a state may impose on ophthalmic advertising the affirmative disclosures permitted by § 456.5(a) of the rule by any legislative, administrative or judicial means it chooses. The interpretation also says that states may enforce laws of general applicability against ophthalmic advertising as long as the laws are not enforced in a discriminatory manner.

EFFECTIVE DATE: May 18, 1979.

FOR FURTHER INFORMATION CONTACT: Scott P. Klurfeld, Federal Trade Commission, 6th and Pennsylvania Avenue, N.W., Room 281, Washington, D.C. 20580. 202-523-3420.

Federal Trade Commission

Interpretation of 16 CFR Part 456

An interpretation of § 456.5 of the Commission's rule on Advertising of Ophthalmic Goods and Services (16 CFR Part 456) was requested by the Attorney General of the State of Illinois on April 17, 1979. The Commission's interpretation is contained in a letter, reprinted below.

William J. Scott, Esq.,
Attorney General of Illinois, 160 North LaSalle Street, Room 850, Chicago, Illinois 60601.

Attention: Robert Orman, Esq.

Dear Mr. Scott: This letter is in response to your request of April 17, 1979, for an interpretation of the Commission's Trade Regulation Rule on the Advertising of Ophthalmic Goods and Services (16 CFR Part 456).

In your letter you inquire as to whether the Commission believes that the Illinois Consumer Fraud and Deceptive Business Practices Act, or the Uniform Deceptive Trade Practices Act is preempted by the Commission's trade regulation rule referenced above.

Section 456.5(a) of the Commission's rule provides that a state may require by "law, rule or regulation" that certain affirmative disclosures appear in any dissemination of information concerning ophthalmic goods and services. Among the disclosures which may be required are whether an advertised price for ophthalmic goods includes an eye examination (§ 456.5(a)(3)) and all dispensing fees (§ 456.5(a)(4)). It is the position of the Federal Trade Commission that the use of the terms "law, rule or regulation" were not intended to define or limit the kinds of procedures through which state or local governmental entities may impose the disclosures permitted in § 456.5(a) of the Commission's rule. In other words, the State of Illinois may impose such limitations on ophthalmic advertising by any legislative, administrative, or judicial means without violating the Commission's rule. This would include case determinations under statutes such as little FTC Acts. In the Statement of Basis and Purpose which accompanied the rule, the Commission clearly evidenced its intention that states remain free to employ their general fraud and deception laws, including little FTC Acts, to control instances of deceptive advertising of ophthalmic goods, services and eye examinations. *See* 43 FR 23997 (June 2, 1978).

It is important that the distinction between the requirements of §§ 456.5(a) and 456.5(b) be made clear. In promulgating its rule, it was not the purpose of the Commission to police *deceptive* ophthalmic advertising. It was, instead, the Commission's purpose simply to remove restraints upon nondeceptive ophthalmic advertising. In permitting state or local governments to impose, at their discretion, the specific affirmative disclosure requirements itemized in § 456.5(a), the Commission concluded that such specific affirmative disclosure requirements might reasonably be imposed as a means of limiting deception. The Commission rule itself does not speak one way or the other to the question of whether a given advertisement would be deceptive if it omits the disclosures that the rule permits states to impose. The rule rather defers to the judgment of a state or locality that the specified disclosures are necessary, by providing that where such disclosures are imposed they shall not be deemed an impermissible burden upon ophthalmic advertising.

In § 456.5(b) of the Commission's rule, the Commission explicity exempted from preemption by the Commission's rule, any state law which applies to all advertising of consumer goods and services. In adopting this provision, the Commission intended to place ophthalmic advertising on the same footing as other advertising in your jurisdiction. It was not the Commission's intention to exempt ophthalmic advertising from laws of general applicability governing advertising in the State of Illinois or any other state.

Thus, laws such as the Illinois Consumer Fraud and Deceptive Business Practices Act and the Uniform Deceptive Trade Practices Act may be enforced by the state against ophthalmic advertising, and suits by the state under such acts against ophthalmic advertisements are not prohibited by the Commission's rule. However, should such a law of general applicability be employed (other than in those areas set forth in § 456.5(a) of the rule) in a discriminatory manner with the intent to or the effect of stifling or limiting ophthalmic advertising (e.g., by bringing such suits only against ophthalmic advertisers or a disparate number against ophthalmic advertisers) the Commission might consider such activity to be a violation of the trade regulation rule.

As per your request, we have enclosed a copy of the letter from Aaron Cohen and William Voelker to the Commission's staff requesting an opinion regarding Weisser Optical's advertisements. We have also enclosed a copy of the response of the Commission's staff to that letter. In that response the Commission's staff indicated that an advertisement, absent one of the permissive disclosures set forth in § 456.5(a) of the rule, was not deceptive. This staff opinion is not inconsistent with the Commission's rule, because, as noted above, the rule does not speak one way or the other to the question of whether a given advertisement would be deceptive if it omits the disclosures that the rule permits states to impose. While the Commission's rule does not preclude states or localities from imposing the affirmative disclosures set forth in § 456.5(a) on an across the board basis, where a specific determination of "deception" is to be made it must necessarily depend upon an assessment of all the circumstances surrounding the advertisement in question. The Commission itself has made no determination with respect to the merits of the staff opinion.

By direction of the Commission.
Carol M. Thomas,
Secretary.

BILLING CODE 6750-01-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 211

[Release No. SAB 30]

Interpretative Releases Relating to Accounting Matters; Staff Accounting Bulletin No. 30

AGENCY: Securities and Exchange Commission.

ACTION: Publication of Staff Accounting Bulletin.

SUMMARY: This bulletin contains a description of the circumstances which, in the staff's view, indicate that a divestiture has not taken place for accounting purposes in connection with a sale of a subsidiary or other business operation. It also discusses the

accounting and reporting consequences of such a transaction.

DATE: June 5, 1979.

FOR FURTHER INFORMATION CONTACT: Howard P. Hodges, Jr., (202) 755–1744, Division of Corporation Finance, or Ernest L. Ten Eyck, (202) 472–3782, Office of the Chief Accountant, Securities and Exchange Commission, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The statements in Staff Accounting Bulletins are not rules or interpretations of the Commission nor are they published as bearing the Commission's official approval; they represent interpretations and practices followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of the Federal securities laws.

George A. Fitzsimmons,

Secretary.

June 5, 1979.

Staff Accounting Bulletin No. 30

The circumstances described below involve a situation in which, in the view of the staff, it is inappropriate to account for a "sale" of a business operation as divestiture.

In Accounting Series Release No. 95 (ASR 95) the Commission discussed the issue of recognition of profit for real estate transactions where circumstances indicated that profits were not earned at the time the transactions were recorded. In the case of real estate, the question of whether a "sale" has taken place for accounting purposes is normally part of the consideration of the propriety of profit recognition on the transaction. In the case of a disposal of an ongoing business, or a related group of business activities, the question of whether a disvestiture has taken place for accounting purposes has independent significance because elimination of the operating results of the business from the financial statements of the seller may be misleading if the risks of ownership have not, in substance, been transferred to the buyer.

Economic substance rather than legal form should determine the accounting and reporting for a transaction. Where the economic substance indicates that the seller has not been divorced from the usual risks of ownership, the transaction should not be recorded as a divestiture for accounting purposes.

Even when it can be reasonably determined that recording such a transaction as a divestiture is appropriate, gain should be recognized only if it is also reasonable to conclude that such gain will be realized.

Topic 5: Miscellaneous Accounting

* * * * *

M. Accounting for divestiture of subsidiary or other business operation.

Facts: Company X transferred certain operations (including several subsidiaries) to a group of former employees who had been responsible for managing those operations. Assets and liabilities with a net book value of approximately $8 million were transferred to a newly formed entity—Company Y—wholly owned by the former employees. The consideration received consisted of $1,000 in cash and interest bearing promissory notes for $10 million, payable in equal annual installments of $1 million each, plus interest, beginning two years from the date of the transaction. The former employees possessed insufficient assets to pay the notes and Company X expected the funds for payments to come exclusively from future operations of the transferred business.

Company X remained contingently liable for performance on existing contracts transferred and agreed to guarantee, at its discretion, performance on future contracts entered into the newly formed entity. Company X also acted as guarantor under a line of credit established by Company Y.

The nature of Company Y's business was such that Company X's guarantees were considered a necessary predicate to obtaining future contracts until such time as Company Y achieved profitable operations and substantial financial independence from Company X.

Question: Company X proposes to account for the transaction as a divestiture, but to defer recognition of gain until the owners of Company Y begin making payments on the promissory notes. Does this proposed accounting treatment reflect the economic substance of the transaction?

Answer: No. The circumstances are such that the risks of the business have not, in substance, been transferred to Company Y or its owners.

In assessing whether the legal transfer of ownership of one or more business operations has resulted in a divestiture for accounting purposes, the principal consideration must be an assessment of whether the risks and other incidents of ownership have been transferred to the buyer with sufficient certainty.

When the facts and circumstances are such that there is a continuing involvment by the seller in the business, recognition of the transaction as a divestiture for accounting purposes is called into serious question. Such continuing involvement may take the form of effective veto power over major contracts or customers, significant voting power on the board of directors, or other involvement in the continuing operations of the business entailing risks or managerial authority similar to that of ownership.

Other circumstances may also raise questions concerning whether the incidents of ownership have, in substance, been transferred to the buyer. These include:

Absence of significant financial investment in the business by the buyer, as evidenced, for instance, by a token payment.

Repayment of debt which constitutes the principal consideration in the transaction is dependent on future successful operations of the business.

The continued necessity for debt or contract performance guarantees on behalf of the business by the seller.

In the above transaction, the seller's continuing involvement in the business and the presence of certain of the other factors cited evidence the fact that the seller has not been divorced from the risks of ownership. Accounting for this proposed transaction as a divestiture—even with deferral of the "gain"—does not reflect its economic substance and therefore is not appropriate.

Question: If the transaction is not to be treated as a divestiture for accounting purposes, what is the proper accounting treatment?

Answer: If, in the circumstances surrounding a particular transaction, a determination is made that a legal transfer of business ownership should not be recognized as a divestiture for accounting purposes, an accounting treatment consistent with that determination is required. In this instance, the assets and liabilities of the business which were the subject of the transaction should be segregated in the balance sheet of the selling entity under captions such as: "Assets of business transferred under contractual arrangements (notes receivable)," and "Liabilities of business transferred" or similar captions which appropriately convey the distinction between the legal form of the transaction and its accounting treatment.

A note to the financial statements, referenced to this caption, should describe the nature of the legal arrangements, relevant financing and other details and the accounting treatment.

Where, as in this instance, realization of the sale price is wholly or principally dependent on the operating results of the business operations which were the subject of the transaction, the

uncertainty associated with such realization should be reflected in the financial statements of the seller. Thus, absent a deterioration in the business, any operating losses of the divested business should be considered the best evidence of a change in valuation of the business in a manner somewhat analogous to equity accounting for an investment in common stock.[1] If the business suffered a loss during its initial period of operations after the transaction, that loss should be reflected in the financial statements of the seller by recording a valuation allowance and a corresponding charge to income. The amount of the valuation allowance (absent unusual circumstances) would be at least the amount of the loss attributable to the business, unless such loss has been previously provided for in accordance with Accounting Principles Board Opinion No. 30. Other evidence, however, (such as a question as to the ability of the business to continue as a going concern) might require that a higher valuation allowance be established.

This accounting treatment should be continued for each reporting period until either:

1. The net assets of the business have been written down to zero (or a net liability recognized in accordance with generally accepted accounting principles); or

2. Circumstances have changed sufficiently that it has become appropriate to recognize the transaction as a divestiture.

In the latter instance, it would normally also be appropriate to recaption any asset balance remaining on the balance sheet of the seller in keeping with the changed circumstances, e.g., "Notes receivable."

In the case where the business reports net income, such net income should not be recorded by the former owner, because the rewards of ownership (but not the risks) have been passed to Company Y. Any payments received on obligations of the buyer arising out of the transaction should be treated as a reduction of the carrying value of the segregated assets of the business.

Question: Should Company X recognize interim (quarterly) losses of the business even if it is projected that it will have a profit for the full year?

Answer: Yes. However, for quarters for which the business has net income, such net income may be recognized by Company X to the extent of any cumulative quarterly losses within the same fiscal year. Similarly, quarterly losses of the business need not be recognized by Company X except to the extent that they exceed any cumulative quarterly net income within the same fiscal year. Disclosure of this accounting treatment should be made in the notes to Company X's interim financial statements.

Question: If the accounting treatment described above is applied to the transaction, when should a gain or loss on the transaction be recognized?

Answer: Whether or not the transaction is treated as a divestiture for accounting purposes, generally accepted accounting principles require that losses on such transactions be recognized.

When it is determined that no divestiture should be recognized for accounting purposes, it follows that gain should not be recognized until:

1. The circumstances precluding treatment of the transaction as a divestiture have changed sufficiently to permit such recognition; and,

2. Any major uncertainties as to ultimate realization of profit have been removed, that is, the consideration received in the transaction can be reasonably evaluated.

As the Commission indicated in ASR 96 (quoting from the authoritative accounting literature): Profit is deemed to be realized when a sale in the ordinary course of business is effected, unless the circumstances are such that the collection of the sale price is not reasonably assured.[2]

The considerations discussed above regarding recognition of a divestiture for accounting purposes are also of importance in reaching a determination as to whether or not collection of the sale price is reasonably assured and profit recognition is therefore appropriate. In addition, circumstances such as the following tend to raise questions as to the propriety of profit recognition at any given time subsequent to the transaction:

1. Evidence of financial weakness of the buyer.

2. Substantial uncertainty as to the amount of future costs and expenses to be incurred by the seller.

3. Substantial uncertainty as to the amount of proceeds to be realized because of the form of consideration received; e.g., non-recourse debt, notes with optional settlement provisions, purchaser's stock, or other non-monetary consideration which may be of indeterminable value.

(Where satisfaction of the buyer's obligations to the seller remains dependent on earnings of the business divested, it will frequently be appropriate for the seller to continue to measure the uncertainty of ultimate collection by the operating losses of the business.)

The degree of uncertainty surrounding ultimate realization of the consideration is a matter which must be evaluated in the light of the attendant circumstances each time realization is evaluated. The degree of uncertainty is enhanced, however, by the presence of any of the factors referred to above, and such factors must be considered in reaching a determination with respect to recognition of gain.

BILLING CODE 8010-01-M

---

[1] The staff recognizes that Accounting Principles Board Opinion No. 18 is specifically applicable only to the use of the equity method of accounting for investments in common stock. The principles enunciated in that Opinion are also relevant in these particular circumstances, however, notably paragraph 12, which states, in pertinent part:

The equity method tends to be most appropriate if an investment enables the investor to influence the operating or financial decisions of the investee. The investor then has a degree of responsibility for the return on its investment, and it is appropriate to include in the results of operations of the investor its share of the earnings or losses of the investee.

[2] Accounting Research Bulletin No. 43, Chapter 1, Section A. (American Institute of Certified Public Accountants, 1953).

This passage is also quoted in paragraph 12 of Accounting Principles Board Opinion No. 10 (American Institute of Certified Public Accountants, 1966), footnote 8, which states, in pertinent part:

The Board recognizes that there are exceptional cases where receivables are collectible over an extended period of time and, because of the terms of the transactions or other conditions, there is no reasonable basis for estimating the degree of collectibility. When such circumstances exist, and as long as they exist, either the installment method or the cost recovery method of accounting may be used.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 159

[T.D. 79-163]

Amendment of Waiver of Countervailing Duties—Certain Textiles and Textile Products from Brazil

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Amendment of Waiver of Countervailing Duties.

SUMMARY: This notice is to inform the public that the waiver of countervailing duties issued regarding imports of certain textiles and textile products from Brazil is being amended. This amendment affects only imports of certain leather wearing apparel which, until recently, were duty-free.

EFFECTIVE DATE: March 1, 1979.

FOR FURTHER INFORMATION CONTACT: Charles F. Goldsmith, Economist, Office of Tariff Affairs, Department of the Treasury, 15th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20220, telephone (202) 566–2323.

SUPPLEMETARY INFORMATION: On November 16, 1978, a notice of "Final Countervailing Duty Determination" (T.D. 78–446) regarding certain textiles and textile mill products from Brazil was published in the **Federal Register** (43 FR 53422). That notice advised the public that an investigation had determined that the Governement of Brazil pays or bestows bounties or grants under the countervailing duty law on the manufacture, production, or exportation of certain textiles and textile products. Concurrent with that determination, a "Waiver of Countervailing Duties" (T.D. 78–447, 43 FR 53425) was granted based on actions taken by the Government of Brazil to reduce substantially the adverse effects of the bounties or grants paid or bestowed and on satisfaction of the other criteria of section 303(d) of the Tariff Act of 1930, as amended by the Trade Act of 1974 (Pub. L. 93–618, January 3, 1975 (19 U.S.C. 1303(d)) (referred to as the "Act").

The Final Determination included leather wearing apparel imported under item number 791.76 of the Tariff Schedules of the United States Annotated (TSUSA). In accordance with section 303(a) (2) of the Act (19 U.S.C. 1303(a) (2)), because this merchandise was entered duty-free pursuant to the U.S. Generalized System of Preferences ("GSP") (authorized by Title V of the Trade Act of 1974, 19 U.S.C. 2461–2465), countervailing duties could be imposed only if the U.S. International Trade Commission (ITC) rendered an affirmative injury determination. Liquidation of the leather wearing apparel under consideration was suspended pending the determination of the ITC. At that time Treasury indicated that should the determination of the ITC be affirmative, it would then be appropriate to waive countervailing duties under section 303(d) of the Act.

On March 5, 1979, the ITC published its determination in the **Federal Register** that no injury resulted from the importation of the duty-free leather wearing apparel from Brazil ("Certain Leather Wearing Apparel from Colombia and Brazil," 44 FR 12113). Accordingly, the suspension of liquidation was to terminate and the liquidation of all entries of leather wearing apparel classified under TSUSA item number 791.76 entered on or after November 16, 1978, would have proceeded without regard to countervailing duties, but for the action taken by the President which removed leather wearing apparel classified under TSUSA item number 791.76 from the GSP. By Executive Order 12124, published in the **Federal Register** of March 2, 1979 (44 FR 11729), the duty-free status of leather wearing apparel classified under TSUSA item number 791.76 was thus terminated effective March 1, 1979.

As a result, imposition of countervailing duties on such leather wearing apparel from Brazil is no longer controlled by section 303(a)(2) of the Act. In the Final Determination of November 16, 1978 (cited above), the Department stated that if the ITC's determination of injury regarding such leather wearing apparel were affirmative, the collection of countervailing duties would be waived. Further, the reasons supporting the granting of the concurrent waiver (cited above) for then-dutiable textiles and textile products apply equally to the then-duty free leather wearing apparel classified under TSUSA item number 791.76. Indeed, had such leather wearing apparel been dutiable in November of 1978, it would have been included within the scope of the waiver then issued. Accordingly, I hereby amend the waiver with respect to Certain Textiles and Textile Products from Brazil to include the formerly duty-free leather wearing apparel classified under TSUSA item number 791.76.

§ 159.47 [Amended]

The table in § 159.47(f) of the Customs Regulations (19 CFR 159.47(f)), is amended by inserting after the entry from Brazil under "textiles", the number of this Treasury Decision in the column so headed and the words "amendment of waiver" in the column headed "action."

(R.S. 251, secs. 303, as amended, 624; 46 Stat. 687, 759, 88 Stat. 2051, 2052 (19 U.S.C. 66, 1303), as amended, 1624).

Robert H. Mundheim,

General Counsel of the Treasury.

BILLING CODE 4810–22–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Chapter X

[Docket No. R–79–674]

Transfer of Federal Insurance Administration Regulations

AGENCY: U.S. Department of Housing and Urban Development.

ACTION: Final rule.

SUMMARY: Reorganization Plan No. 3 of 1978 established the Federal Emergency Management Agency (FEMA). The plan was activated effective April 1, 1979, by Executive Order 12127 of March 31, 1979, "Federal Emergency Management Agency." The plan transfers to FEMA the functions of the Federal Insurance Administration which was a part of the U.S. Department of Housing and Urban Development. The existing regulations of the Federal Insurance Administration have been transferred to Title 44, Chapter I, Subchapter B of the Code of Federal Regulations. Therefore, Chapter X of Title 24 is hereby vacated.

EFFECTIVE DATE: June 28, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Burton Bloomberg, Director, Office of Regulations, Room 5218, U.S. Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410. Phone (202) 755–6207.

SUPPLEMENTARY INFORMATION: Establishment of the organization of FEMA, including delegation of authority to the position of Associate Director for Insurance and Hazard Mitigation, which also carries the Title of Federal Insurance Administrator, was published on April 6, 1979 (44 FR 20982).

Establishment of Title 44, Chapter I, Subchapter B, for the redesignated regulations, was published on Wednesday, May 2, 1979 (44 FR 25797).

The Federal Insurance Administration regulations were previously published under Title 24, Chapter X, Subchapters A, B, and C of Code of Federal Regulations, and have been redesignated as Title 44, Chapter I, Subchapter B of the Code of Federal Regulations. This redesignation was published in the May 31, 1979 edition of the **Federal Register** at 44 FR 31170.

Because this rule effects a change which is editorial in nature, it has been determined that a period for notice and comment is not necessary.

Transfer of Regulations

CHAPTER X [Vacated]

Regulations formerly appearing in 24 CFR Chapter X are transferred to 44 CFR Chapter I. Accordingly, Chapter X of Title 24 is hereby vacated.

Authority: Reorganization Plan No. 3 of 1978 (43 FR 41943) and Executive Order 12127, dated March 31, 1979 (44 FR 19367).

Issued at Washington, D.C., June 1, 1979.

Jay Janis,

Acting Secretary, Department of Housing and Urban Development.

[FR Doc. 79-17912 Filed 6-7-79; 8:45 am]

BILLING CODE 4210-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

24 CFR Part 1917

[Docket No. FI-4744]

Final Flood Elevation Determinations for the City of the Town of Los Altos Hills, Santa Clara County, Calif., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of the Town of Los Altos Hills, Santa Clara County, California.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the City of the Town of Los Altos Hills, California.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of the Town of Los Altos Hills, Santa Clara County, California, are available for review at Town Hall, 26379 Fremont Road, Los Altos Hills, California.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755-5581 or Toll Free Line (800) 424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of flood elevations for the City of the Town of Los Altos Hills, California.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administration has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Adobe Creek	Edith Road	174
	Burke Road	192
	O'Keefe Lane	264
	Foothill College Road	307
	El Monte Avenue	288
	Rhus Ridge Drive	370
	Fremont Drive	421
Barron Creek	Fremont Road (downstream crossing)	146
	Ortega Drive	172
	Fremont Road (upstream crossing)	220
	La Paloma Road	245
	Todd Lane—20 feet upstream from centerline	
Purissima Creek	Purissima Road (downstream crossing)	252
	Vineyard Road	309
	Purissima Road (upstream crossing)	332
Matadero Creek	Old Page Mill Road	188
	Interstate 280	212
	Page Mill Road	244
	Moore Lane	270
	Lupine Road—20 feet upstream from centerline	296
Arastradero Creek	Page Mill Road	254
Hale Creek	Magdalena Avenue	321
	Dawnridge Drive	270
Concepcion Drainage	Fremont Road	297
	Alto Verde Lane	225
	Pablo Verano Lane	247

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963).

Issued: April 24, 1979.

Gloria M. Jimenez,

Federal Insurance Administrator.

BILLING CODE 4210-23-M

DEPARTMENT OF LABOR

Office of Labor-Management Standards Enforcement

29 CFR Part 451

Labor Organizations as Defined in the Labor-Management Reporting and Disclosure Act of 1959

AGENCY: Office of the Assistant Secretary for Labor-Management Relations.

ACTION: Final rule.

SUMMARY: A change in the language of 29 CFR 451.3(a)(4) is necessary to reflect the fact that labor organizations in the federal sector are now subject to the Civil Service Reform Act of 1978, which supersedes Executive Order 11491.

DATE: This change is effective on June 8, 1979.

FOR FURTHER INFORMATION CONTACT: Herb Raskin (202) 523–7373.

SUPPLEMENTARY INFORMATION: The standards of conduct provisions in Section 18 of E.O. 11491, as amended, have been replaced by the standards of conduct provisions in Section 7120 of the Civil Service Reform Act.

The standards of conduct provisions in the Civil Service Reform Act which prescribe procedures and principles required of labor organizations composed of federal government employees, are substantially the same as in E.O. 11491, as amended.

Since this amendment is necessary in order that 29 CFR 451.3(a)(4) be consistent with the change made by the passage of the Civil Service Reform Act, I find that it is unnecessary to issue a proposal and that there is good cause to make the amendment final and effective immediately. Section 451.3 is amended by deleting the fourth sentence in paragraph (a)(4) and adding the following:

§ 451.3 Requirements of Section 3(i).

(a) * * *

(4) * * * (A labor organization is subject to Title VII of the Civil Service Reform Act if it is composed entirely of employees of the agencies which are set forth in section 7103 of that Act. Those agencies include, with certain exceptions, all agencies of the Executive Branch as well as the Government Printing Office, the Library of Congress, and certain nonappropriated fund instrumentalities.) * * *

* * * * *

Signed in Washington, D.C., this 4th day of June 1979.

R. C. DeMarco,

Acting Assistant Secretary.

[FR Doc. 79-17944 Filed 6-7-79; 8:45 am]

BILLING CODE 4510-29-M

Occupational Safety and Health Administration

29 CFR Part 1952

Approved State Plans for Enforcement of State Standards; Approval of Supplements to Utah Plan

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Final rule.

SUMMARY: This document brings Utah Occupational Safety and Health Regulations, Chapter A, Part 04, "Recordkeeping and Reporting Occupational Injuries and Illnesses", and Part 05, "Rules of Practice for Temporary and Permanent Variance . . ." into accord with OSHA regulations § 1904.3–9, 11–13, 20 and 21; § 1952.4(a), and § 1905.1, 2 and 10. The regulations in Part 04 implement Sections 35–9–6(3) and 35–9–17 of the Utah Code Annotated. The Rules of Practice in Part 05 set forth administrative procedures to grant variances and other relief under section 35–9–6 of the Act. General information pertaining to employer-employee rights, obligations and procedures are included.

EFFECTIVE DATE: June 8, 1979.

FOR FURTHER INFORMATION CONTACT: Charles Boyd, Project Officer, Office of State Programs, 2100 M Street N.W., Washington, D.C. 20210, (202) 653–5377.

SUPPLEMENTARY INFORMATION:

Background

Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) for review of changes and progress in the development and implementation of State plans which have been approved under section 18(c) of the Act and 29 CFR Part 1902. On January 10, 1973, a notice was published in the Federal Register of the approval of the Utah plan and of the adoption of Subpart E of Part 1952 containing the decision (38 FR 1178). On April 7, 1978, the State of Utah submitted a supplement to the plan involving Federal Program changes to the plan (see subpart C of 29 CFR Part 1953).

Description of Supplements

Part 04 establishes regulations requiring that employers maintain a log of all occupational injuries and illnesses within its establishment, and post an annual summary of such injuries and illnesses. Part 04 also provides penalties for falsification of or failure to keep records, and directs the Administrator for the Utah Occupational Safety and Health Act to develop and maintain a statistical program consisting of periodic surveys of occupational injuries and illnesses.

Part 05 prescribes procedures governing the granting of variances. It sets forth rules for submission of applications, hearings, inspections, public notices, and revocation.

Location of Plan Supplements for Inspection and Copying

A copy of the plan and its supplements may be inspected and copied at the Technical Data Center, Occupational Safety and Health Administration, Department of Labor Building, 3rd St. and Constitution Ave., Washington, D.C. 20210; Occupational Safety and Health Administration, Room 15010, Federal Building, 1916 Stout Street, Denver, Colorado 80202; or, Utah Industrial Commission, 350 East Fifth South, Salt Lake City, Utah 54111.

Public Participation

Under 29 CFR 1953.2(c), the Assistant Secretary of Labor for Occupational Safety and Health may prescribe alternative procedures to expedite the review process of any other good cause which may be consistent with applicable law. The Assistant Secretary finds that good cause exists for not publishing Utah's revisions to the plan for public comments because the changes are generally identical to the Federal regulations.

Decision

After careful consideration, the Utah Plan supplements described above are hereby approved under Part 1953 of this chapter. This decision incorporates the requirements of the Act and the implementing regulations applicable to State plans generally.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at Washington, D.C. this 30th day of May 1979.

Eula Bingham,

Assistant Secretary of Labor.

[FR Doc. 79-16035 Filed 6-7-79; 8:45 am]

BILLING CODE 4510-26-M

Mine Safety and Health Administration

30 CFR Part 11

Respiratory Protective Apparatus; Tests for Permissibility; Fees

AGENCY: Mine Safety and Health Administration (MSHA), Department of Labor, and National Institute for Occupational Safety and Health (NIOSH), Center for Disease Control, Public Health Service, Department of Health, Education, and Welfare.

ACTION: Final rule.

SUMMARY: This document extends the cut-off dates for use of certain self-contained breathing apparatus approved under the former Bureau of Mines approval program. This equipment has not been proven to be unsafe for continued use and many users have indicated that it would create an economic hardship for them to have to replace a major portion of their equipment by the current cut-off date.

EFFECTIVE DATE: June 8, 1979.

FOR FURTHER INFORMATION CONTACT: Dr. Alan D. Stevens, Chief, Testing and Certification Branch, Division of Safety Research, NIOSH, 944 Chestnut Ridge Road, Morgantown, WV, 26505. Phone: 304-599-7331 or FTS 923-7331.

SUPPLEMENTARY INFORMATION: Part 11 of Title 30, Code of Federal Regulations, provides for the testing of occupational respirators and the issuance of joint approvals for those meeting certain requirements for performance and respiratory protection. The joint approval program is conducted by the National Institute for Occupational Safety and Health (NIOSH), Center for Disease Control, Public Health Service, HEW, and the Mine Safety and Health Administration (MSHA), Department of Labor.

Prior to the promulgation of Part 11 in 1972, respirator approvals were issued by the Bureau of Mines (BOM), Department of the Interior. Under Part 11, dates were established which were designed to eliminate the older BOM-approved respirators from workplaces in an orderly and reasonable manner, to be replaced with respirators approved under Part 11. Self-contained breathing apparatus (SCBA) approved under BOM Approval Schedules 13 through 13E, inclusive, and purchased before June 30, 1975, were approved for use until March 31, 1978.

On October 13, 1978, a notice of proposed rulemaking was published in the Federal Register (43 FR 47212) to amend 30 CFR Part 11 by extending the approved use dates for certain BOM-approved SCBA, as follows:

(1) Schedules 13D and 13E devices equipped with a remaining service life indicator (low pressure warning) that does not require preadjustment by the wearer would be extended to March 31, 1982, and (2) certain listed Schedule 13 devices would be approved for use in mine rescue operations until further notice.

Discussion of Comments

A period of 30 days was given for the public to submit comments concerning the proposal. The majority of the comments were from fire service organizations and were in favor of the proposed extension. Many public fire and rescue organizations have been placed under severe budgetary restraints as a result of the current trend in tax reduction. They cited these restraints as the basis for continued use of existing equipment which has not been proven to be unsafe. A number of requests for a longer extension period also cited these budgetary restraints.

While most of the comments supported the extension, several criticized the proposal from the standpoint that there was insufficient justification for limiting the use of certain devices to mine rescue efforts only. Some comments claimed extensive experience (up to 30 years) with particular devices, in uses other than mine rescue, without indication of adverse effects on users.

The prospect of technological advances in occupational respirators in the near future, and the consequent obsolescence of newly acquired replacement equipment appeared in several comments favoring an extension.

Many comments asserted the impossibility of obtaining replacement equipment before April 1979. One comment urged an extension of only 1 year based on equipment availability.

The proposed extension requirement of an end-of-service-life indicator that does not require preadjustment by the wearer was intended to promote user safety and to eliminate SCBA which warn the user of low air supply by restricting the user's breathing. Such restriction may not be noticed under stress conditions. Comments indicated that there are devices in use in large numbers which effectively warn the wearer of the end of service life by means of an audible alarm, without restricting the wearer's breathing. NIOSH and MSHA do not have sufficient data to prove that SCBA equipped with audible end-of-service-life indicators are unsafe for use.

Based on the comments concerning the long life and safe use of BOM-approved SCBA, and because improved Part 11 performance requirements for respirators are under development, NIOSH and MSHA have decided to alter the proposed rule. Until further notice, those devices approved under BOM Approval Schedules 13 through 13E which are equipped with audible end-of-service-life indicators are approved for uses other than mine rescue. BOM Schedules 13 through 13E SCBA that are approved for continued use in mine rescue operations are listed by approval number (see table) and are the same as proposed. Meanwhile, NIOSH and MSHA will continue to review and evaluate BOM-approved equipment and institute revocation of the approval of

any equipment that does not protect the worker.

PART 11—RESPIRATORY PROTECTIVE APPARATUS; TESTS FOR PERMISSIBILITY; FEES

Accordingly, Part 11 of Title 30, Code of Federal Regulations, is amended as set forth below:

Dated: April 30, 1979.

Robert B. Lagather,

Assistant Secretary for Mine Safety and Health.

Dated: May 24, 1979.

Joseph A. Califano, Jr.,

Secretary of Health, Education, and Welfare.

1. Section 11.2 is revised to read as follows:

§ 11.2 Approved respirators and gas masks.

(a) Respirators, combinations of respirators, and gas masks shall be approved for use in hazardous atmospheres where they are maintained in an approved condition and are the same in all respects as those devices for which a certificate of approval has been issued under this part.

(b) Self-contained breathing apparatus, supplied-air respirators and gas masks approved under the former Bureau of Mines approved program shall continue to be accepted for use in hazardous atmospheres according to the schedule set forth below: *Provided* they (1) were fabricated, assembled or built under an approval or any modification thereof issued by the U.S. Bureau of Mines, Department of the Interior; and (2) were purchased on or before the date specified therein; and (3) are maintained in an approved condition according to this part.

Type of device	Use	Bureau of Mines approved devices	Purchased on or before	Approved for use until
Self-contained breathing apparatus	Mine rescue efforts only	Approval Nos. 1303, 1303S, 1307, 13D-14, 13D-15, 13D-16, 13E-25, and 13E-26.	June 30, 1975	Further notice.
	Other than mine rescue as permitted or required by regulation.	Schedule 13 through 13-E devices that are equipped with an audible end of service life indicator.	June 30, 1975	Further notice.
Supplied air respirators	As permitted or required by regulation.	Schedule 19B (dated April 19, 1955).	June 30, 1975	March 31, 1980.
Gas Masks	As permitted or required by regulation.	Schedule 14F (dated April 23, 1955).	At any time	Further notice.

§ 11.2-1 [Deleted]
§ 11.2-2 [Redesignated]

2. Section 11.2-1 is deleted from the Code of Federal Regulations and § 11.2-2 is redesignated as § 11.2-1.

BILLING CODE 4510-43-M

POSTAL SERVICE

39 CFR Part 111

Express Mail Metro Service—Additional Metropolitan Areas

AGENCY: Postal Service.

ACTION: Notice and Partial Revision of interim regulations with comments invited for consideration in final rule making.

SUMMARY: Pursuant to prior notice in the Federal Register on April 19, 1979 (44 FR 23396), the Postal Service hereby gives notice that temporary implementation of Express Mail Metro Service will be expanded to include the metropolitan areas of Baltimore, Maryland, St. Louis, Missouri, San Francisco, and Los Angeles, California, and Washington, District of Columbia, on June 18, 1979. Minor changes to the interim regulations published in the Federal Register on April 27, 1979 (44 FR 24844), will be made to accommodate the additional metropolitan areas.

EFFECTIVE DATE: June 18, 1979, and until final regulations are issued. Comment Date: The "Comment Date" and procedures for comment cited in the Federal Register on April 27, 1979 (44 FR 24844), for interim regulations is extended through July 18, 1979. Written comments should be received on or before July 18, 1979.

ADDRESS: Written comments should be directed to the General Manager, Expedited Mail Services Division, Customer Services Department, Room 5986, 475 L'Enfant Plaza, SW., Washington, D.C. 20260. copies of all written comments received will be available for public inspection and photocopying between 9:00 a.m. and 4:00 p.m. Monday through Friday at the above location.

FOR FURTHER INFORMATION CONTACT: Walter (Cap) Neilson, 202/245-5624.

SUPPLEMENTARY INFORMATION: The revision to the interim regulations takes effect when the temporary implementation is expanded to the new metropolitan areas on June 18, 1979. Although exempt from the notice and comment requirement of the Administrative Procedure Act (5 U.S.C. 553(b), (c)) regarding proposed rule making by 39 U.S.C. 410(a), the Postal Service ordinarily invites comments from the public whenever it proposes a new or amended regulation such as this, which might eventually have a substantial effect on the public. In this case, however, publishing these rules as proposals, with a comment delay of 30 days would delay the very limited revision of these interim regulations.

Accordingly, the Postal Service finds it unnecessary and contrary to the public interest to follow its customary practice of publishing this change as a proposed rule for comment before it becomes effective. See 5 U.S.C. 553(d). However, we reiterate that comments are welcomed on the published rules, and that any proposed changes will be considered and acted upon as appropriate.

In view of the considerations discussed above, the Postal Service adopts the following revision to the interim regulations published on April 27, 1979 (44 FR 24844):

Part 182—Classification

Change 182.51 of the Postal Service Manual to read as follows:

182.5 Express Mail Metro Service.

.51 Availability of Service.

Express Mail Metro Service is available at designated retail postal facilities for same day and next day delivery within designated metropolitan areas. A metropolitan area consists of the city delivery area of one or more post offices. Names and locations of these designated facilities and post offices are in Notice 77, *Express Mail Metro Service Directory*, available at participating post offices. Service to or from post offices not listed is prohibited.

An appropriate amendment to 39 CFR 111.3 to reflect this change will be published if the Postal Service proposal

on Express Mail Metro Service is approved.

(39 U.S.C. 401, 403, 404, 3621, 3622, 3641)

W. Allen Sanders,

Acting Deputy General Counsel.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

41 CFR Part 3-50

Incremental Funding of Cost-Reimbursement Type Contracts

AGENCY: Department of Health, Education, and Welfare

ACTION: Final rule.

SUMMARY: The Office of the Secretary, Department of Health, Education, and Welfare is amending the Departmental procurement regulations to incorporate a revised Subpart 3-50.6, Incremental Funding of Cost-Reimbursement Type Contracts.

The amendments are being made to expand the use of the incremental funding concept to cover other types of nonpersonal services such as studies, surveys, and socio-economic demonstration projects. The regulation is presently applicable only to research and development services.

Since the subpart was being revised to incorporate the amendments, the Department also reviewed it for simplicity and clarity. This resulted in the elimination of some portions of the subpart and a rewrite of other portions to present a more concise and comprehensive regulation.

EFFECTIVE DATE: June 8, 1979.

FOR FURTHER INFORMATION CONTACT: E. S. Lanham, Division of Procurement Policy and Regulations Development, Office of Grants and Procurement, OASMB-OS, HEW, Washington, D.C. 20201 (202-245-6347).

SUPPLEMENTARY INFORMATION: It is the general policy of the Department to allow time for interested parties to participate in the rulemaking process. However, since the amendments concern internal administrative procedures and, to the extent that portions pertain to the public, the simplification and clarification of existing regulations, the public rulemaking process was deemed unnecessary in this instance.

The provisions of these amendments are issued under 5 U.S.C. 301; 40 U.S.C. 486(c).

Therefore, 41 CFR Chapter 3 is amended as set forth below.

Dated: June 1, 1979.

E. T. Rhodes,

Deputy Assistant Secretary for Grants and Procurement.

Under Part 3-50, Administrative Matters, Subpart 3-50.6, Incremental Funding of Cost-Reimbursement, Research and Development Contracts, is cancelled in its entirety. In its place, the following Subpart 3-50.6, Incremental Funding of Cost-Reimbursement Type Contracts, is added. In addition, the table of contents for Part 3-50 is amended to add the following:

PART 3-50—ADMINISTRATIVE MATTERS

Subpart 3-50.6—Incremental Funding of Cost-Reimbursement Type Contracts

Sec.

3-50.600 Scope of subpart.
3-50.601 Applicability.
3-50.602 Definition.
3-50.603 Policy.
3-50.604 General.
3-50.605 Solicitation notification.
3-50.606 Contract clauses.

Authority: 5 U.S.C. 301; 40 U.S.C. 486(c).

Subpart 3-50.6—Incremental Funding of Cost-Reimbursement Type Contracts

§ 3-50.600 Scope of subpart.

This subpart provides policies and procedures for the use of incremental funding in cost-reimbursement type contracts.

§ 3-50.601 Applicability.

This subpart is applicable to cost-reimbursement type contracts for the procurement of research and development services and other types of nonpersonal services such as studies, surveys, and socio-economic demonstration projects. This subpart does not apply to construction services, architect-engineer services, or services subject to the Service Contract Act of 1965, as amended.

§ 3-50.602 Definition.

An incrementally funded cost-reimbursement contract is a contract in which the total work effort is to be performed over a multiple year period and funds are allotted, as they become available, to cover discernible phases or increments of performance. The incremental funding technique allows for contracts to be awarded for periods in excess of one year even though the total estimated amount of funds expected to be obligated for the contract are not available at the time of the contract award.

§ 3-50.603 Policy.

It is Departmental policy that contracts for projects of multiple year duration be fully funded, whenever possible, to cover the entire project. However, incrementally funded contracts may be used when:

(a) A project, which is part of an approved program, is anticipated to be of multiple year duration, but funds are not currently available to cover the entire project;

(b) The project represents a valid need of the fiscal year in which the contract is awarded and of the succeeding fiscal years of the project's duration, during which additional funds may be obligated by increasing the allotment to the contract;

(c) The project is so significant to the approved program that there is reasonable assurance that it will command a high priority for proposed appropriations to cover the entire multiple year duration; and

(d) The statement of work is specific and is defined by separate phases or increments so that, at the completion of each, progress can be effectively measured.

§ 3-50.604 General.

The following are general guidelines applicable to incrementally funded contracts:

(a) The estimated total cost of the project (all planned phases or increments) is to be taken into consideration when determining the

requirements which must be met before entering into the contract; i.e., justification for noncompetitive procurement, approval of award, etc. (See § 1–1.403).

(b) The RFP and resultant contract are to include a statement of work which describes the total project covering the proposed multiple year period of performance and indicating timetables consistent with planned phases or increments and corresponding allotments of funds.

(c) Offerors will be expected to respond to RFPs with technical and cost proposals for the entire project indicating distinct break-outs of the planned phases or increments.

(d) Negotiations will be conducted based upon the total project, including all planned phases or increments, and the multiple year period of performance.

(e) Sufficient funds must be obligated under the basic contract to cover no less than the first year of performance, unless the contracting officer determines it is advantageous to the Government to fund the contract for a lesser period. In that event, the contracting officer shall ensure that the obligated funds are sufficient to cover a complete phase or increment of performance representing a material and measurable part of the total project, and the contract period shall be reduced accordingly.

(f) Because of the magnitude of the scope of work and multiple year period of performance under an incrementally funded contract, there is a critical need for careful program planning. Program planning must provide for appropriate surveillance of the contractor's performance and adequate controls to ensure that projected funding will not impinge on program's ability to support, within anticipated appropriations, other equally important contract or grant programs.

(g) An incrementally funded contract must contain precise requirements for progress reports to enable the project officer to effectively monitor the contract. The project officer should be required to prepare periodic performance evaluation reports to facilitate program's ultimate decision to allot additional funds under the contract.

§ 3–50.605 Solicitation notification.

The request for proposals must inform prospective offerors of the Department's intention to enter into an incrementally funded contract. Therefore, the contracting officer shall include the following provision in the request for proposals whenever the use of incremental funding is contemplated:

Incremental Funding

(a) Sufficient funds are not presently available to cover the total cost of the complete multiple year project described in this solicitation. However, it is the Government's intention to negotiate and award a contract using the incremental funding concepts described in the clause entitled "Limitation of Funds." Under that clause, which will be included in the resultant contract, initial funds will be obligated under the contract to cover the first year of performance. Additional funds are intended to be allotted to the contract by contract modification, up to and including the full estimated cost of the contract, to accomplish the entire project. While it is the Government's intention to progressively fund this contract over the entire period of performance up to and including the full estimated cost, the Government will not be obligated to reimburse the Contractor for costs incurred in excess of the periodic allotments, nor will the Contractor be obligated to perform in excess of the amount allotted.

(b) The "Limitation of Funds" clause to be included in the resultant contract shall supersede the "Limitation of Cost" clause found in the General Provisions.

§ 3–50.606 Contract clauses.

(a) The contracting officer shall include the "Limitation of Funds" clause in § 1–7.202–3(b) in all solicitations and resultant contracts which will be, or are proposed to be, incrementally funded. (See §§ 1–7.202–3(c) and 1–7.402–2(c).) When using the "Limitation of Funds" clause in the solicitation and resultant contract, the contracting officer shall insert the following legend between the clause title and the clause text:

(This clause supersedes the "Limitation of Cost" clause found in the General Provisions of this contract.)

(b) The contracting officer shall include a clause reading substantially as follows in the Special Provisions of the resultant contract:

Consideration

Estimated Cost and Fixed Fee. (1) It is estimated that the total cost to the Government for full performance of this contract will be $———, of which the sum of $——— represents the estimated reimbursable costs and $——— represents the fixed fee.

(2) Total funds currently available for payment and allotted to this contract are $———, of which $——— represents the estimated reimbursable costs and $——— represents the fixed fee. For further provisions on funding, see the "Limitation of Funds" clause.

(3) It is estimated that the amount currently allotted will cover performance of Phase I which is scheduled to be completed by———(date).

(4) The Contracting Officer may allot additional funds to the contract without the concurrence of the Contractor.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[FCC 79–328]

Radio Broadcast Services; Deletion of Rules Requiring Retention of Audio Recordings of Certain Public Affairs Programs

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: In accordance with a Court order, the Commission deletes the rules requiring retention of audio recordings of public affairs programs in which issues of public importance are discussed.

EFFECTIVE DATE: June 15, 1979.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Philip Cross, Steve Crane, John Reiser, Broadcast Bureau (202) 632–6660.

SUPPLEMENTARY INFORMATION:

Order

Adopted: May 29, 1979.
Released: June 1, 1979.

In the matter of amendment of Part 73 of the Commission's rules and regulations to delete §§ 73.127, 73.591 and 73.622.

1. Sections 73.127 (AM), 73.591 (NCE–FM) asnd 73.622 (TV) require the licensee of each such station which, after August 6, 1973, received assistance pursuant to Part IV of the Communications Act of 1934, as amended (Section 399(b)), to retain for 60 days an audio recording of each of its broadcasts of any public affairs program in which any issue of public importance is discussed.

2. Section 399(b) was held unconstitutional, and Commission rules promulgated thereunder were ordered vacated, in *Community Service Broadcasting of Mid-America, Inc., et al. v. F.C.C.*, D.C. Circuit No. 76–1081, opinion on rehearing *en banc*, issued August 25, 1978.

3. Therefore, it is ordered, That, pursuant to Sections 4 and 303 of the Communications Act of 1934, as amended, Part 73 of the Commission's rules and regulations is amended to

delete §§ 73.127, 73.591 and 73.622 in their entirety, effective June 15, 1979.

4. For further information on this *Order*, contact Philip Cross, Steve Crane or John Reiser, Broadcast Bureau, (202) 632–9660.

Federal Communications Commission.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; (47 U.S.C. 154, 303).).

47 CFR Part 81

Station Identification of Alaska-Public Fixed Stations

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: The Commission is editorially amending Part 81 of its rules to insert a provision governing station identification of Alaska-public fixed stations. This rule section was inadvertently overlooked in a previous consolidation of the rules. The Field Operations Bureau requires this amendment to aid in its enforcement efforts.

EFFECTIVE DATE: June 15, 1979.

ADDRES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Penny Wells, Private Radio Bureau (202) 632–7175.

SUPPLEMENTARY INFORMATION:

Order

Adopted: May 30, 1979.

Released: June 5, 1979.

In the matter of editorial amendment of Subpart Q of Part 81 of the rules to provide for station identification of Alaska-Public Fixed Stations.

1. Part 81 of the Commission's rules is entitled "Stations on Land in the Maritime Services and Alaska-Public Fixed Stations," and is divided into subparts. Some subparts are devoted to delineation of the functions of different types of stations. One important provision of each of these subparts which is mandated by Article 19 of the International Radio Regulations concerns the authorized means of station identification. However, when the rules relating to Alaska-public fixed stations were transferred from Part 85 to Subpart Q of Part 81,[1] the section on station identification was inadvertently overlooked. The Field Operations Bureau, which relies upon accurate station identification to carry out its enforcement functions, recently noticed the deletion and suggested that a corrective rulemaking procedure be instituted.

2. The language to be added to Subpart Q closely parallels that of Section 81.310, Identification of Station, in the subpart relating to public coast stations operating by telephony.

3. Accordingly, the Commission's rules are being amended to insert a provision governing station identification of Alaska-public fixed stations. Authority for this amendment is contained in Sections 4(i) and 303(b) and (r) of the Communications Act of 1934, as amended. Since the amendment is essentially editorial in nature, the public notice, procedure and effective date provisions of 5 U.S.C. 553 do not apply.

4. In view of the above, it is ordered, that the rule addition set forth in the attached Appendix is adopted effective June 15, 1979.

Federal Communications Commission.

(Secs. 4, 303, 48 Stat., as amended, 6, 1082; (47 U.S.C. 154, 303).)

R. D. Lichtwardt,

Executive Director.

Appendix

Part 81 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

Section 81.706, formerly Reserved, is added to read as follows:

§ 81.706 Station identification.

(a) All emissions from an Alaska-public fixed station shall be clearly identified:

(1) By voice transmission of the official call sign; or

(2) By voice transmission of the approximate geographic location of the station as approved by the Commission. The Commission will not approve duplicative geographic station identifiers.

(b) Station identification shall be made on completion of each communication with any other station and at the beginning and end of each transmission made for any other purpose.

[FR Doc. 79-17808 Filed 6-7-79; 8:45 am]

BILLING CODE 6712-01-M

[1] Parts 2 and 85 were also amended. See Docket No. 18612, released October 26, 1971, 32 FCC 2d 237 (1971).

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1307, 1310

[Ex Parte NO. MC-98 (Sub-No. 2)]

Detention of Motor Vehicles—Shipments of Uncrated New Furniture, Fixtures, and Appliances

AGENCY: Interstate Commerce Commission.

ACTION: Modification of final rule.

SUMMARY: Exemption from Existing Uniform Detention Rules granted for: shipments of uncrated or uncartoned new furniture, fixtures or applicances (whether or not moving in mixed trailerloads with cartoned or crated furniture, fixtures, or appliances) which require inside strapping, wrapping, bracing and other loading devices similar to those needed for household goods; provided that rates for uncartoned or uncrated lading are applicable to any mixed trailerload.

DATES: Exemption shall be effective on or before July 9, 1979.

FOR FURTHER INFORMATION CONTACT: Janice Rosenak or Harvey Gobetz, (202) 275–7693 or (202) 275–7656.

SUPPLEMENTARY INFORMATION: In our decision 126 M.C.C. 603 (1977) as modified in a decision served September 15, 1977 at 42 FR 51586, we adopted regulations providing for nationwide detention charges. Exemption from these regulations was made for shipments of household goods, among others. By order served August 31, 1977, we stayed the effect of these regulations with respect to shipments of uncrated, uncartoned new furniture, fixtures, and appliances requiring inside strapping, wrapping, bracing, and other loading devices similar to the household goods moving industry.

Evidence received indicates that transportation conditions of these shipments are similar to those for household goods. In addition, when the higher uncartoned rate for mixed trailerload of uncartoned and cartoned lading is applied the carrier is compensated for the required special handling and resulting delay. Accordingly, the regulations published at sections 1307.35(e) and 1310.15(f) are modified as follows:

1. In § 1307.5 the introductory portion of paragraph (e) is redesignated as paragraph (e)(1) and (e)(2) and revised. Present paragraphs (e)(1) and (e)(2) are redesignated as paragraphs (e)(3) and (e)(4) respectively.

§ 1307.35 Terminal and special services.

* * * * *

(e) *Detention of vehicles.* (1) The following rules apply to all shipments except:

(i) Shipments of household goods;

(ii) *Whole or mixed shipments of uncartoned or uncrated new furniture, fixtures, or applicances which require inside strapping, wrapping, bracing and other loading devices similar to those needed for household goods; provided that the uncrated trailerload rate applies;*

(iii) Commodities transported in bulk in tank truck, dump trucks, vehicles pneumatically unloaded and other self-unloading mechanized vehicles;

(iv) Heavy and specialized commodities or articles requiring special equipment or handling outside the scope of the certificates of general-commodities motor common carriers;

(v) Livestock other than ordinary;

(vi) Articles picked up or delivered to railroad care in railroad owned or leased equipment having prior subsequent transportation by rail;

(vii) Shipments to consignor and consignees of waterborne commerce at marine terminal facilities to the extent that the marine operator would be liable to the motor common for truck detention under any applicable detention rule promulgated pursuant to the authority of the Federal Maritime Commission.

(2) All common carriers of property by motor vehicle subject to Interstate Commerce Act excepting those specifically excluded, supra, shall publish the below rule entitled "Detention-Vehicles With Power Units" and all such carriers engaging in the practice of spotting shall also publish the below rule entitled "Detention-Vehicles Without Power Units." The wording of the following rules may not be varied except where clearly warranted by exceptional circumstances, and where appropriate, the word "rule" may be substituted for the word "item".

* * * * *

2. In § 1310.15, the introductory portion of paragraph (f) is redesignated as paragraph (f)(1) and (f)(2) and revised. Present paragraphs (f)(1) and (f)(2) are redesignated and new paragraphs (f)(3) and (f)(4) respectively.

§ 1310.15 Terminal and other services—changes and allowances (rule 15).

* * * * *

(f) The following rules apply to all shipments except: *Detention of vehicles.* (1) The following rules apply to all shipments except:

(i) Shipments of household goods;

(ii) *Whole or mixed shipments of uncartoned or uncrated new furniture, fixtures, or applicances which require inside strapping, wrapping, bracing and other loading devices similar to those needed for household goods; provided that the uncrated trailerload rate applies;*

(iii) Commodities transported in bulk in tank truck, dump trucks, vehicles pneumatically unloaded and other self-unloading mechanized vehicles;

(iv) Heavy and specialized commodities or articles requiring special equipment or handling outside the scope of the certificates of general-commodities motor common carriers;

BILLING CODE 7035-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 32

Opening of Waubay National Wildlife Refuge, South Dakota, To Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Waubay National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Gun: November 24, 1979, through December 2, 1979.

Archery: December 3, 1979, through December 31, 1979.

FOR FURTHER INFORMATION CONTACT: Robert R. Johnson, Waubay National Wildlife Refuge, Waubay, South Dakota 57273, Phone Number (605) 947-4995.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Hunting is permitted on the Waubay National Wildlife Refuge, South Dakota, only on the areas designated by signs as being open to hunting. This area, comprising 4,591 acres, is delineated on maps available at the refuge headquarters. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. No hunting within the 60-acre safety zone surrounding refuge headquarters.

2. All refuge roads and trails within the open hunting area, other than public roads, will be closed to vehicles. All gates and trails, however, will be open to foot traffic.

3. Campfires are prohibited.

4. All deer taken on the area must be checked in at refuge checking station located at the old CCC camp site.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

Note.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

The Refuge Recreation Act of 1962 (16 U.S.C. 460K) authorizes the Secretary of the Interior to administer such areas for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objectives for which the area was established. In addition, the Refuge Recreation Act requires (1) that any recreational use permitted will not interfere with the

primary purpose for which the area was established; and (2) that funds are available for the development, operation, and maintenance of the permitted forms of recreation.

The recreational use authorized by these regulations will not interfere with the primary purposes for which the Waubay National Wildlife Refuge was established. This determination is based upon consideration of, among other things, the Service's Final Environmental Statement on the Operation of the National Wildlife Refuge System published in November 1976. Funds are available for the administration of the recreational activities permitted by these regulations.

Dated: May 31, 1979.

Robert R. Johnson,

Refuge Manager.

50 CFR Part 34

Participation of Local Governments in Revenue From Areas Administered by the United States Fish and Wildlife Service

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking provides the basis for making revenue sharing payments to counties for lands administered by the U.S. Fish and Wildlife Service under provisions of Pub. L. 95-469, approved October 17, 1978. This rule makes revenue sharing applicable to all Service administered lands; makes payments available for any governmental purpose; and provides for the computation for payments to county and local governments.

EFFECTIVE DATE: July 9, 1979.

FOR FURTHER INFORMATION CONTACT: Bernard J. Schaefer, Assistant Chief, Division of Realty, Telephone 202-343-4028.

SUPPLEMENTARY INFORMATION: Proposed rulemaking was published in the Federal Register on January 19, 1979, and provided for a 30-day comment period. Six comments were received from counties, three from townships and/or township associations, and one from a city. Three commentors asked for clarification as to which unit of local government is to receive the payment. Two commentors asked for clarification of the passthrough requirement in § 34.5(c), and one commentor asked for more latitude in making the passthrough determination and suggested that payments of $5,000 or less be exempt from the passthrough requirement. One commentor objected to "reserve area" payments being exempt from passthrough, based on the wording of the statute.

As to which unit of local government is eligible to receive the payment, the definition in § 34.3(c) provides the basis and has been expanded for clarity. The criteria is that entity of local government, which is the primary taxing authority, that levies and collects general purpose real property taxes in which areas administered by the Fish and Wildlife Service are located. This may be a county, parish, organized or unorganized borough, township, municipality, or other unit of local government depending on the circumstances in a particular State.

Section 34.5(c) relating to the passthrough requirement has been expanded so as to give counties more latitude and to provide examples as to how the passthrough payments may be determined. The statute does not specify that minimum amounts may be exempt from passthrough, therefore, the regulation is not changed in this regard. The Service agrees that reserve area payments should not be exempt from passthrough and this provision has, accordingly, been removed from the regulation. Editorial changes and corrections have been made as necessary.

The principal author of this final rulemaking is Richard E. Corthell, Division of Realty, Fish and Wildlife Service.

It is determined that the publication of this final rulemaking is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement is required pursuant to Section 102(2)(c) of the National Environmental Protection Act of 1969 (42 U.S.C. 4332(2)(c)).

The Department of the Interior has determined that this document is not a significant regulatory action requiring the preparation of a regulatory analysis under Executive Order 12044 and 43 CFR 14.

Accordingly, Part 34, Title 50, Code of Federal Regulations is revised as follows:

Sec.

34.1 Purpose.
34.2 Authority.
34.3 Definitions.
34.4 Eligibility of areas.
34.5 Distribution of revenues.
34.6 Schedule of appraisals.
34.7 Fair market value appraisals.
34.8 Appropriations authorized.
34.9 Protests.

Authority: 16 U.S.C. 715s, as amended.

§ 34.1 Purpose.

The purpose of the regulations contained in this part is to prescribe the procedures for making payments in lieu of taxes to counties for areas administered by the Secretary through the United States Fish and Wildlife Service in accordance with the Revenue Sharing Act.

§ 34.2 Authority.

(a) The Act of October 17, 1978, Public Law 95-469, amended the Act of June 15, 1935, as amended by the Act of August 30, 1964 (78 Stat. 701; 16 U.S.C. 715s), by revising the formula and extending the revenue sharing provisions to all fee and reserve areas that are administered solely or primarily by the Secretary through the United States Fish and Wildlife Service. Payments under this Act may be used for any governmental purpose.

(b) Pursuant to Title VI of the Civil Rights Act of 1964 (78 Stat. 252; 42 U.S.C. 2000d), and the regulations issued pursuant thereto, which are contained in 43 CFR Part 17, counties must file an assurance with the Department, comply with the terms of the assurances, and comply with regulations contained in 43 CFR Part 17 in order to continue to receive this Federal financial assistance.

§ 34.3 Definitions.

(a) The term "fee area" means any area which was acquired in fee by the United States and is administered, either solely or primarily, by the Secretary through the Service.

(b) The term "reserve area" means any area of land withdrawn from the public domain and administered, either solely or primarily, by the Secretary through the Service. For the purpose of these regulations, reserve areas also include lands in Hawaii, the Commonwealth of Puerto Rico, Guam, and the Virgin Islands, which were initially administered by the United States through Act of Congress, Executive Order, Public Land Order or Proclamation of the President and administered, either solely or primarily, by the Secretary through the Service.

(c) The term "county" means any county, parish, organized or unorganized borough, township or municipality, or other unit of local government that is the primary collector for general purpose real property taxes where fee areas and/or reserve areas are located. For the purpose of sharing revenues, the Commonwealth of Puerto Rico, Guam,

and the Virgin Islands shall each be treated as a county.

(d) The term "fund" means the revenues received by the Service from (1) the sale or disposition of animals, salmonoid carcasses and eggs, products of the soil (including, but not limited to, timber, hay, and grass), minerals, shells, sand, and gravel; (2) leases for public accommodations or facilities incidental to, but not in conflict with, the basic purpose of such areas; and (3) other privileges, including industrial leases at Crab Orchard National Wildlife Refuge, Illinois, as authorized by Section 8 of Pub. L. 95-616, approved October 27, 1978. The Service may pay from such fund any necessary expenses incurred in connection with the revenue producing and revenue sharing activity. The fund shall also include any appropriations authorized by the Act to make up any difference between the total amount of receipts after payments of expenses and the total amount of payments due the counties.

(e) The term "net receipts" means the amount of revenue collected by the Service from an area (including fee land and/or reserve land) after the deduction of necessary expenses incurred in producing the particular revenues.

(f) The term "fair market value" means the amount in terms of money for which in all probability a property would be sold if exposed for sale in the open market by a seller who is willing but not obligated to sell, allowing a reasonable time to find a buyer who is willing but not obligated to buy, both parties having full knowledge of all the uses to which the property is adapted, and for which it is capable of being used.

§ 34.4 Eligibility of areas.

In order to receive payments under the Act, a county must qualify under the definition in § 34.3(c) above and there must be located within the county, areas of land owned in fee title by the United States and administered by the Secretary of the Interior through the Fish and Wildlife Service, including wildlife refuges, waterfowl production areas, wildlife ranges, wildlife management areas, fish hatcheries, research centers or stations, and administrative sites, and these areas must be solely or primarily administered by the Service. In addition to this Act, reserve areas administered solely or primarily by the Service are entitlement lands under section 6(a) of the Act of October 29, 1976 (Pub. L. 94-565, 31 U.S.C. 1601-1607), for which regulations are published in Title 43, Part 1880, Code of Federal Regulations.

§ 34.5 Distribution of revenues.

The Act provides that the Secretary, at the end of each fiscal year, shall pay to each county out of the fund:

(a) For reserve areas, an amount equal to 25 per centum of the net receipts, collected by the Secretary in connection with the operation and management of such area, provided that when any such area is situated in more than one county, the distributive share to each from the aforesaid receipts shall be proportional to its acreage of such reserve area.

(b) For fee areas, whichever of the following is greater:

(1) An amount equal to 75¢ per acre for the total acreage of the fee area located within such county.

(2) An amount equal to three-fourths of one per centum of the fair market value, as determined by the Secretary, of that portion of the fee area (excluding any improvements thereto made after the date of Federal acquisition) which is located within such county. For those areas of fee land within the National Wildlife Refuge System as of September 30, 1977, the amount of payment based on fair market value will not be less than the amount paid on the adjusted cost basis as in effect at that time. Actual cost, or appraised value in case of donation, will be used for lands acquired during fiscal year 1978. For those areas of fee lands added to lands administered by the Service after September 30, 1978, by purchase, donation, or otherwise, fair market value shall be determined by appraisal as of the date said areas are administered by the Service.

(3) An amount equal to 25 per centum of the net receipts collected by the Secretary in connection with the operation and management of such fee area during such fiscal year; but if a fee area is located in two or more counties, the amount each such county is entitled to shall be the amount which bears to such 25 per centum, the same ratio as that portion of the fee area acreage which is within such county bears to the total acreage of such fee area.

(c) In accordance with section 5(A) of the act, each county which receives a payment under (a) and (b) above, with respect to any fee area or reserve area, shall distribute that payment to those units of local government which have incurred the loss or reduction of real property tax revenues because of the existence of such area in accordance with the following guidelines.

The local units of government entitled to this distribution will be those such as, but not limited to, cities, towns, townships, school districts, and the county itself in appropriate cases, which levy and collect real property taxes separately from the county or other primary taxing authority or those for which a tax is separately stated on a consolidated tax bill of the primary taxing authority in areas wherein eligible lands are located. The amount of distribution or passthrough to which each unit of local government shall be entitled shall be in the same proportion as its current tax loss bears to the current whole tax loss.

This proportion may be determined from representative tax bills for the area; by construction by using assessments and millage rates; or by other suitable methods to achieve an equitable result. An example using the representative tax bill method is:

Typical Tax Bill for the Area

County	$80 or	80%
School District	20 or	20%
Total	100 or	100%

The county would receive the total payment, keep 80 percent and pass through 20 percent to the school district. An example using the construction method is:

For a typical acre

Assessed value—		
$100 × 80 mills County	$8	80%
$100 × 20 mills School District	$2	20%
Total	$10	100%

Here again, the county would receive the total payment, keep 80 percent and pass through 20 percent to the school district.

Counties shall distribute the payment to eligible local units of government within 90 days from receipt of the payment. In the event a county cannot make the required distribution for reasons of State or local law, or otherwise, the Service will make the payments directly to local units of government upon return of the check and information upon which to make the payments.

(d) Each county which receives a payment under these regulations shall maintain a record for a period of three years as to how the payment was distributed to units of local government under (c) above. The record shall be available for inspection by the regional director, should a dispute arise as to the distribution of payments. See § 29.21-2(c) for a listing of the regional directors of the Service.

§ 34.6 Schedule of appraisals.

The Secretary shall make fair market value appraisals of areas administered by the Service within five years after October 17, 1978, beginning with areas established earliest. All areas for which payments were not authorized prior to fiscal year 1979 (i.e., fish hatcheries, administrative sites, and research

stations) shall be included in the areas appraised during the first fiscal year. Once appraised, areas shall be reappraised on a schedule of at least once every five years. Until areas are appraised, the fair market value for the purposes of this regulation shall be the adjusted cost as of September 30, 1978, except that fee lands added to such areas after that date shall be on the basis of fair market value.

§ 34.7 Fair market value appraisals.

Fee areas administered by the Service will be appraised in accordance with standard appraisal procedures in order to estimate the fair market value of each area as a whole. The evaluation will be premised on an appropriate determination of highest and best use in accordance with existing or potential zoning, the present condition of the land and the general economic situation in the vicinity. Standard appraisal techniques will involve a market data comparison of these areas with similar properties which have sold recently in the local market. These techniques may also include consideration of potential income and development of the cost approach for special use properties having limited marketability. An appropriate evaluation of these areas will also take into consideration a discount for size as recognized by the market for large properties where applicable. The appraisals will be accomplished by the regional director, using Service staff appraisers or private appraisers contracted by the Service.

The Act requires that improvements placed upon the land after the date of Federal Acquisition be excluded from the fair market value. The only structures that will be included in the appraisal are those that were present at the time of Federal acquisition and have not been the subject of substantial renovation or modification with Federal funds. Evaluation of improvements will be based on their contributory value to the area as determined by the highest and best use study. Lands occupied by improvements not subject to appraisal will be valued as though unimproved.

The appraisals will be reviewed by the Serivce's review appraisers and the determination of the regional director as to fair market value shall be final and conclusive and shall be the basis for computation of revenue sharing payments.

§ 34.8 Appropriations authorized.

The Act authorizes appropriations to the fund for any fiscal year when the aggregate amount of payments required to be made exceeds the net receipts in the fund.

§ 34.9 Protests.

(a) Computation of payments shall be based on Federal records concerning land, real property improvements, and accounting of net receipts from areas administered solely or primarily by the Service.

(b) Any affected county may protest the results of the computations of its payments to the regional director in charge of the State and county affected. See § 29.21–2(c) for a listing of the regional directors of the Service.

(c) Any protesting county shall submit sufficient evidence to show error in the computation or the data from which the computations are made.

(d) All protests to the regional director shall be filed within 90 days from the date of receipt of the payment.

(e) The regional director shall consult with the affected county to resolve conflicts in the computations and/or data. The regional director shall make a determination as to the correct payment, which determination shall be final and conclusive.

Dated: June 4, 1979.

Lynn A. Greenwalt,

Director, Fish and Wildlife Service.

BILLING CODE 4310-55-M

Proposed Rules

Federal Register
Vol. 44, No. 112
Friday, June 8, 1979

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

[7 CFR Part 1701]

Telephone Outside Plant Construction Contract; Revision of Existing Contract and Specifications

AGENCY: Rural Electrification Administration.

ACTION: Proposed rule.

SUMMARY: REA proposes to revise REA Bulletin 381–2 to announce (1) A general revision of the Telephone System Construction Contract, Labor and Materials, REA Form 511, (2) changes in the contract's associated specifications, REA Forms 511a, 511d, 511f and 511g, and (3) the renumbering of the 511 forms to 515, 515a, 515c, 515d, 515f and 515g. The last revision of the contract and specifications was October 1973. Since that date, significant changes have been made in the telephone industry, in construction materials, engineering designs and procedures, testing requirements and construction methods. There is a need to revise the 511 forms to incorporate these changes into the REA outside plant construction contract and specifications. This action will make it possible for REA telephone borrowers to continue to provide their subscribers with the most modern and efficient telephone service.

DATE: Public comments must be received by REA no later than August 7, 1979.

ADDRESS: Submit written data, views or comments to the Director, Telephone Operations and Standards Division, rural Electrification Administration, Room 1355–S, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Peters, Chairman, Engineering Review Committee, telephone number 202–447–2525.

SUPPLEMENTARY INFORMATION: Pursuant to the Rural Electrification Act, as amended (7 USC 901 et seq.), REA proposes to issue a revision of REA Bulletin 381–2. Copies of the proposed revisions of Bulletin 381–2 and REA Forms 515, 515a, 515c, 515d, 515f and 515g may be secured in person or by written request from the Director, Telephone Operations and Standards Division, at the address above.

All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Director, Telephone Operations and Standards Division, during regular business hours, at the address above.

An impact analysis for this proposed action has been prepared and is available upon request.

The principal changes in the contract and specifications are:

A. REA Form 515, Telephone System Construction Contract (Labor and Materials):

1. Notice and Instructions to Bidders has been divided into two parts. The first part, Notice to Bidders, gives a general outline of the scope of the construction project, requires attendance at a Pre-bid Conference and requires the submission of Bidder qualifications. The second part, Instructions to Bidders, has been reworded to clearly outline the scope of the construction project and restates the requirement for attendance at the Pre-bid Conference.

2. Section 13 of the Contractor's Proposal has been reworded to exclude Saturdays and legal holidays as well as Sundays from the determination of the construction time limit.

3. Article II. Section 1, Paragraph (b) has been reworded to allow the sequence of construction to be designated by work sector numbers.

4. Article II, Section 2, Paragraph (a), has been reworded to require a construction superintendent to be present at the project during working hours when construction is being performed.

5. Article III, Section 1, Paragraph (a) has been changed to (1) allow for the payment of 95 percent of submitted invoices for completed Assembly units including cleanup, (2) pay 80 percent or $500,000, whichever is lesser, for cable and wire delivered to the project once cable placement begins and (3) pay up to 80 percent of the cable and wire material costs over $500,000 after $100,000 or more of cable and wire materials have been incorporated in the project.

6. Article III, Section 1, paragraph (d) and (e), changed to allow interest charges for late payment to be based on the prime rate at the Chase Manhattan Bank in New York.

7. Article V, *Engineering, Construction and Inspection Details*, has been added to include information in the contract that was formerly included in an attactment to the contract.

8. Article VII, Section 1, *Definitions*, has been expanded to include definitions of (1) Cleanup, (2) Work Sector, (3) Construction Corridor, (4) Reduced Construction Corridor, (5) Restricted Construction Corridor, (6) Unobtained Construction Corridor, and (7) Construction Sheets.

9. Table 3.2, *Schedule of Acceptance Tests and Measurements*, has been expanded to include a new test, Shield Ground for Single Jacketed Cables.

B. REA Form 515a, Specifications and Drawings for Construction of Direct Buried Plant.

1. Metric and English units are used.

2. New assembly units BC, BFC, BFCT, BM–76 and BM–90 have been added.

3. Assembly units BJ, BJF, BM–32, BM–40, BM–65, BM–70, BWF, BWL, HB and T have been deleted.

4. Section BA has been expanded to include sawn wood posts.

5. Sections BD and BDF have been combined into a new unit BD.

6. Sections BG and BGF have been combined into a new unit BG.

7. Part III, Section 4:

a. Paragraph 4.103 has been changed to require plows with removable gates.

b. Paragraph 4.107 defines when a ripping unit (BM–76) will be specified.

c. Paragraph 4.108 defines when a rock unit (BM–71) will be specified.

d. Paragraph 4.2 has been rewritten to clarify the handling of buried cable and wire.

e. Paragraph 4.3 has been expanded to permit alternate methods of achieving the minimum depth in rock.

f. Paragraph 4.4 has been expanded to require the electrical testing of all splices and terminations of cable and wire pairs in buried splice cases.

8. Under the *List of Construction Drawings and Plans* these changes were made:

a. Assembly units BM85–1 and BM85–3, and guide drawings 940, 942, 958 and 970 were deleted.

b. Guide drawings 1001, 1003, 1004, 1005, 1009, 1010, 1011 and 1012 were added.

C. REA Form 515c, Specifications and Drawings for Conduit and Manhole Construction:

1. There was no change made in this specification other than the renumbering of the form.

D. REA Form 515d, Specifications and Drawings for Underground Cable Installation:

1. Sections HC and HFC have been combined into a new Section HC.

2. Sections UG and UGF have been combined into a new Section UG.

E. REA Form 515f, Specifications and Drawings for Construction of Pole Lines, Aerial Cables and Wires:

1. New Assembly units CF, PC and PM–60 have been added.

2. The Bridged Tap Isolator, Building-Out Capacitor, and Junction Impedance Compensator Assembly Units have been deleted.

F. REA Form 515g:

1. Title changed to *Specifications and Drawings for Service Entrance and Station Protector Installations.*

2. Sections BKB, BKBF and K have been combined into a new Section SE.

3. The following Assembly Units Drawings and Plans have been deleted:

BM65–1, BM70, P1–1F, P1–1F2, P1–1F8, P1–7F, P1–7F2, and PM–30.

4. Section S has been deleted.

5. The following Drawings and Plans have been added:

816, 963–1, and 963–2.

The new REA Form 515 is to be used on all outside plant projects bid after January 1, 1980.

On issuance of revised REA Bulletin 381–2, Appendix A to Part 1701 will be modified accordingly.

Dated: May 30, 1979.

John H. Arnesen,

Acting Assistant Administrator—Telephone.

BILLING CODE 3410-15-M

DEPARTMENT OF ENERGY

[10 CFR Part 436]

Federal Photovoltaic Utilization Program

AGENCY: Department of Energy.

ACTION: Notice of proposed rulemaking; cancellation of a public hearing.

SUMMARY: The Department of Energy (DOE) hereby cancels the public hearing scheduled for Thursday, June 14, 1979, in Washington, D.C., concerning DOE's proposed monitoring and assessment rules for the Federal Photovoltaic Utilization Program. This hearing is cancelled due to lack of any public interest in making oral presentations at the hearing. As stated in the notice of proposed rulemaking issued on May 2, 1979 (44 FR 27194, May 9, 1979), written comments on the proposed rules must be received by 4:30 p.m. on July 9, 1979.

FOR FURTHER INFORMATION CONTACT: Elaine Smith, Federal Photovoltaic Utilization Program Manager, Office of Conservation and Solar Applications, Department of Energy, Room 1210, 20 Massachusetts Avenue, N.W., Washington, D.C. 20545 (202) 376–5931.

Issued in Washington, D.C., June 6, 1979.

Kelly C. Sandy III,

Executive Director, Conservation & Solar Applications.

[FR Doc. 79-18091 Filed 6-7-79; 10:29 am]

BILLING CODE 6450-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

[12 CFR Part 335]

Securities of Insured Nonmember State Banks; Advance Notice of Proposed Rulemaking

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Proposed rule.

SUMMARY: The proposal would amend the Federal Deposit Insurance Corporation's ("FDIC") securities disclosure regulations issued under the Securities Exchange Act of 1934 (15 U.S.C. 78l(i)) ("Act") in order to bring them into substantial similarity with those of the Securities and Exchange Commission ("SEC"). Section 12(i) of the Act requires that the FDIC issue substantially similar regulations to those of the SEC or publish its reasons for not doing so. This proposal is intended to comply with Section 12(i), to update the regulation, and to make the regulation more understandable. It covers the following: (1) Acquisition statements; (2) shareholder proposals; (3) stock appreciation rights; (4) form S–K simplification; (5) corporate governance; (6) management remuneration; (7) management indebtedness; (8) changes in independent accountants; and (9) auditor fees.

DATES: Comments must be received on or before August 7, 1979.

ADDRESS: Interested persons are invited to submit written data, views or arguments regarding the proposed regulations to the Office of the Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, N.W., Washington, D.C. 20429. All written comments will be made available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT: Gerald J. Gervino, Attorney, or Louis E. Wright, Financial Analyst, Federal Deposit Insurance Corporation, 550 17th Street, N.W., Washington, D.C. 20429 (202) 389–4422 or 389–4651.

SUPPLEMENTARY INFORMATION: The FDIC would make the following changes:

A. Filing and Disclosure Requirements Relating to Beneficial Ownership

1. *Filings by previously exempt persons.*—The Domestic and Foreign Investment Disclosure Act of 1977, Pub. L. No. 95–213, Title II, 91 Stat. 1494 (1977), authorized the SEC to "close the gaps which exist in the present scheme for requiring disclosure of persons whose beneficial ownership exceeds 5 percent of a class of certain equity securities." SEC Rel. No. 34–15348, 43 FR 55751 (November 28, 1978). The SEC has adopted a new paragraph (c) to its Rule 13d–1 which requires filings by: (1) Those persons who acquired beneficial ownership of their securities prior to December 22, 1970, (2) those persons who acquired not more than 2 percent of a class of securities within a 12-month period, who are exempt from Rule 13d–1(a) by Section 13(d)(6)(B) of the Act, and (3) those persons who acquired securities through a stock-for-stock exchange registered under the Securities Act of 1933, 15 U.S.C. 77(a) *et seq.* (1970), who are exempt from Rule 13d–1(a) by Section 13(d)(6)(A) of the Act.

Rule 13d–1(c) also would require any person "otherwise" not required to report pursuant to Rule 13d–1(a) but who is a beneficial owner of more than 5 percent of a specified class of equity securities to report on Schedule 13G. A person could fall under this category if, for example, he acquired beneficial ownership of more than 5 percent of a class of securities which at the time of acquisition was not registered pursuant to Section 12(g) of the Act but which subsequently became registered. However, an exemption has been added to Rule 13d–1(c) to indicate that the "or otherwise" language does not cover issuers who acquire their own securities. This filing is to be made on a modified version of the SEC's "short form"

Schedule 13G previously available only to institutional shareholders.

The SEC was also required to tabulate and make available the information received concerning share ownership to the public. The SEC has added cover pages to its forms in order to obtain data in a form suitable for its computer system.

The FDIC feels that cover sheets are unnecessary for its purposes, since its staff can enter such information while reviewing the filings. The FDIC intends to make a tabulation of share ownership available to the public in the future.

The FDIC proposes to adopt this SEC change as an amendment to § 335.4(h)(2) of its regulations by revising paragraphs (i) and (ii) and by adding new paragraphs (iii), (iv) and (v). A new Form F-11A discussed below would include SEC modifications designed to fit this purpose.

2. *Short form acquisition notices and pledges.*—On April 21, 1978, the SEC adopted a new Schedule 13G to provide a new replacement short form schedule which sets forth disclosure requirements for reporting beneficial ownership and related information on certain equity securities by certain institutional investors. SEC Rel. No. 34-14692, 43 Fed. Reg. 18484 (April 28, 1978). Under the amended SEC rules, it is available as a short form for institutional investors, such as certain brokers, dealers, banks, investment companies, investment advisors, employee benefit plans, pension funds, parent holding companies, groups and insurance companies. As noted above, this schedule has subsequently been revised for use by other persons.

On June 30, 1978, the SEC amended the short form rules with respect to holding companies and revised the definition of "beneficial ownership" for Williams Act purposes with respect to pledges that are investment advisors. SEC. Rel. No. 34-14910, 43 FR 29767 (July 11, 1978).

The FDIC proposes to adopt these changes by appropriate amendments to § 335.4(h) of its regulations as set forth below.

B. Shareholder Proposals

On December 6, 1978, the SEC adopted an amendment to its shareholder proposal rule (17 CFR 240.14a-8) which would allow a shareholder proponent an opportunity to bring alleged false and misleading statements to the attention of management and the SEC where they are contained in a management statement opposing the shareholder's proposal. SEC Rel. No. 34-15384, 43 FR 58522 (December 14, 1978). The FDIC would adopt the amendment substantially in the form adopted by the SEC by amending § 335.5(k)(5) as set forth below.

C. Stock Appreciation Rights

On December 27, 1976, the SEC amended its Rule 16b-3 to provide an exemption from Sections 16(a) and 16(b) of the Act for certain transactions in stock appreciation rights. SEC Rel. No. 34-13097, 42 FR 758 (January 4, 1977). The SEC amended its rules on June 22, 1977. SEC Rel. No. 34-13659, 42 FR 33285 (June 30, 1977). The FDIC would adopt the rule substantially as last amended by the SEC by revising § 335.6(r) as set forth below.

D. Form S-K Simplification

On December 23, 1977, the SEC amended its new Regulation S-K which is designed to integrate the common requirements of its various forms into one source to which all the various forms were cross-referenced. Thus, a filing person would only need to be familiar with requirements for one type of item regardless of which form he is filing. SEC Rel. No. 5893, 42 Feg. Reg. 65554 (December 30, 1977). The regulation was amended on July 28, 1978, SEC Rel. No. 34-15006, 43 FR 34402 (August 3, 1978) and on December 4 and 19, 1978. SEC Rel. Nos. 34-15380 and 34-15418, 43 FR 58181, 60418 (December 13 and 27, 1978).

Rather than adopt a new separate form for the presentation of common disclosure items, the FDIC proposes that common items be contained in its Form F-5 and cross-referenced thereto from the other forms. Thus, the benefits of a common form may be obtained without the addition of another form.

In connecton with the adoption of Regulation S-K, the SEC made a number of modifications to its disclosure items. Those modifications which were found consistent with the banking industry are contained in this proposal. The FDIC would adopt the substance of Regulation S-K which appears applicable to the banking industry by amending §§ 335.41, 335.42, 335.43 and 335.51 of its regulations as set forth below.

E. Acquisition Statements

In connection with the SEC rulemaking set out in Section A above, the SEC amended its Schedule 13D and adopted a new Schedule 13G. The FDIC would amend its Form F-11 and adopt a new Form F-11A to conform its regulations with the SEC changes. Accordingly, § 335.47 would be amended and § 335.48 would be added as set out below.

F. Corporate Governance

On December 6, 1978, the SEC amended its regulations in order to provide shareholders with information to assist their more informed assessment of the structure, composition and functioning of issuers' boards of directors. It also required management to provide information about the terms of settlement of proxy contests. Specific improvements in information available to shareholders was sought concerning (1) the structure, composition and functioning of issuers' boards of directors; (2) resignation of directors; and (3) attendance at board and committee meetings. SEC Rel. No. 34-15384, 43 FR 58522 (December 14, 1978).

The SEC amendments are based upon a broad study which began in April of 1977 which included public hearings. SEC Rel. No. 14970 (July 18, 1978), 43 FR 31945 (July 24, 1978). The amendments require disclosure of certain significant economic and personal relationships which exist between a director, an issuer, and its officers including family relationships and business transactions. An issuer must disclose (1) whether it has a standing audit, compensation or nominating committee, (2) the functions its committees actually performed, (3) the number of committee meetings held during the issuer's last fiscal year, (4) the fact that a director attends fewer than 75 percent of the aggregate number of meetings of the board and of the committees on which he sits, and (5) disagreements with resigning or retiring directors, when requested by the director.

The FDIC would substantially adopt the above SEC amendments by amending §§ 335.51 and 335.43 and by reference §§ 335.41 and 335.42 as set forth below.

G. Management Remuneration

1. *The SEC Rule.*—On December 4, 1978, the SEC amended its rules with respect to management remuneration. SEC Rel. No. 34-15380, 43 FR 58181 (December 13, 1978).

Disclosure is now required for the five highest paid officers (rather than three highest paid officers). However, the disclosure floor has been raised by 25 percent from $40,000 to $50,000 in recognition of inflationary effects on remuneration. Thus, larger issuers will be required to disclose more information while smaller issuers will enjoy more privacy.

The SEC has expanded the tabular format to include all cash, cash-

equivalent and contingent forms of remuneration. Cash-equivalent remuneration includes the spread of below market price of securities acquired upon the exercise of an option or its equivalent, the cost of premiums for special officers of director insurance or the cost of special health benefits.

Also included are certain personal benefits which are not directly related to job performance including indirect benefits. These include, among others, issuer payments for: (1) Home repairs and improvements; (2) housing and other living expenses (including domestic service) provided at principal and/or vacation residences of management personnel; (3) personal use of company property, such as automobiles, planes, yachts, apartments, hunting lodges or company vacation houses; (4) personal travel expenses; (5) personal entertainment and related expenses; and (6) legal, accounting and other professional fees for matters unrelated to the business of the issuer. Other personal benefits which may be forms of remuneration are the following: the ability of management to obtain benefits from third parties, such as favorable bank loans and benefits from suppliers, because the corporation compensates, directly or indirectly, the bank or supplier for providing the loan or services to management; and the use of the corporate staff for personal purposes.

The SEC has adopted a conditional exclusion for certain personal benefits if an issuer cannot determine without unreasonable effort or expense the specific amount of personal benefits or the extent to which benefits are personal rather than business. If the issuer concludes such benefits do not exceed $10,000 and its board of directors concludes that their omission does not render the table materially misleading, they may be omitted. Footnote disclosure is required where personal benefits exceed 10 percent of an officer or director's remuneration or $25,000, whichever is less. Contingent remuneration is separated from cash and cash-equivalent remuneration in a separate column. This includes retirement and deferred compensation, incentive plans, stock purchase plans, profit sharing and thrift plans, and similar contingent plans.

2. *The FDIC Simplification.*—The FDIC's staff, along with the staff of the Comptroller of the Currency and the Board of Governors of the Federal Reserve System, has simplified the instructions to the remuneration table in order to take into account the less complex remuneration provisions generally found in the banking industry and the relatively smaller staffs of publicly held issuer banks.

Thus, the more highly technical instructions have been shortened and put into more commonly used English. Seldom incurred provisions have been deleted or shortened.

The most important change relates to the inclusion of a $5,000 exemption for personal benefits in lieu of the SEC's $10,000 conditional exclusion. It is felt that a small clear exemption will promote more uniform disclosure among similar issuers. In addition, if a bank cannot determine the actual cost of personal benefits without unreasonable effort or expense, it must include a reasonable estimate of the cost to the bank. Where an allocation of the personal portion of a benefit cannot be made, the aggregate cost and an estimate of the percentage that is personal must be made. A statement of the bank's policies and practices regarding personal benefits must be provided.

In other respects not noted above, the FDIC proposal is substantially similar to the SEC requirements.

While the FDIC favors the approach described above, it is specifically inviting comments as to the advisability of adopting the SEC rule in substantially the form adopted by the SEC. Thus, references should be made to the above SEC release.

3. *Proposed Amendments.*—The FDIC would adopt the above changes by amending Items 7 (a) and (b) of § 335.51 of its regulations, as set forth below.

H. Indebtedness of Management

The FDIC proposes to amend its regulations concerning indebtedness of management to require that the percentage of equity capital accounts an officer or director's disclosed indebtedness represents be stated and also the percentage of all directors and officers. The FDIC feels this information represents a valuable addition to the absolute dollar amount in allowing shareholder evaluation of management indebtedness.

The list of enumerated conditions which must be met in order to determine whether an insider extension of credit is made on substantially the same terms as those prevailing for non-insiders has been expanded to include repayment terms. The FDIC feels that favorable repayment terms are a sufficiently important basis for preference to an insider that they should be included in the list. The collectability standard has been expanded to provide as examples, the fact of a delinquency or of a restructuring. The upper dollar exclusion has been lowered from $10 million to $5 million. The former exclusion is considered to be too high to allow meaningful disclosure.

The FDIC would amend Item 7(d) of § 335.51 to implement this proposal.

I. Changes in Independent Accountants

On May 26, 1978, the SEC amended its rules regarding the filing of current reports and proxy statements to require disclosure of whether a decision to change the independent accountant of the registrant was recommended or approved by the audit or similar committee of the board of directors. SEC Rel. No. 34-14808, 43 FR 24208 (June 5, 1978).

Currently, Item 10 of Form F-3, 12 CFR 335.43, requires an insured state nonmember bank to report changes in its independent accountant, including the date of change, reports of disagreements with the former accountant, descriptions of adverse opinions by the former accountant, and a letter from the former accountant commenting on the information submitted by the bank in response to Item 10. Item 8 of Form F-5, 12 CFR 335.51, requires the reporting bank to identify the accountant selected for the current year and, if different, for the fiscal year most recently completed, and to describe changes in accountants and disagreements with accountants that have occurred since the most recent annual meeting, including views of the accountant that conflict with the bank's view of the disagreement. In light of the Commission's action requiring disclosure of whether a change of independent accountant was recommended or approved by the audit or other committee of the Board of Directors, the FDIC has determined that similar amendments to §§ 335.43 and 335.51 of its regulations are appropriate and, accordingly, is proposing such amendments as set forth below.

J. Services and Fees of Independent Auditors

The SEC has adopted amendments to its rules requiring disclosure in proxy statements of (1) services provided during the last fiscal year by a principal independent accountant, the percentage relationship which the aggregate fees for all non-audit services bear to the audit fee and the percentage relationship that the fees for each non-audit service bear to the audit fees; and (2) whether the board of directors or its audit or similar committee has approved each such service. SEC Rel. No. 34-14994, 43 FR 29110 (July 6, 1978).

Currently, Item 8 of Form F–5, 12 CFR 335.51, does not specifically require the disclosure of information regarding the provision of and fees concerning non-financial services performed for an insured state nonmember bank by its independant accountants or the approval of such services by the bank's board of directors. In light of the SEC action requiring such disclosure by its registrants, the FDIC has determined that similar disclosures would be appropriate and that such information would be useful to investors in the stock of insured state nonmember banks.

In order to accomplish this, it is proposed that § 335.51 be amended by adding a new paragraph (f) to Item 8, as set forth below.

K. Other SEC Amendments

On March 3, 1978, the SEC adopted a proposal relating to industry segment reporting. SEC Rel. No. 34–14524, 43 FR 9599 (March 9, 1978). Since banking is a single industry and banks are generally not allowed to engage in non-banking activities, the FDIC finds this proposal unnecessary with respect to insured State nonmember banks.

The SEC periodically publishes a large number of changes througout its regulations. Many of these changes apply only to specific non-banking institutions such as insurance or extractive industries. Some relate to companies subject to other securities laws under which banks are exempted. Others impose requirements which obviously are not intended to apply to banking. The FDIC is not formally considering such amendments since they obviously should not be applicable to insured State nonmember bank issuers.

L. Competition and Costs

The FDIC requests comments concerning the inpact these amendments may have upon competition. It also requests comments upon any increase in cost or additional burden the amemdments may impose, which would not be outweighed by the benefits provided the bank, its shareholders and the public. The FDIC is specifically requesting information from banks concerning projected start-up costs and continuing costs. To the extent feasible, these estimates should be allocated among the various new areas of regulation.

Dated: June 4, 1979.
Federal Deposit Insurance Corporation
Hoyle L. Robinson,
Executive Secretary.

It is proposed to amend 12 CFR Part 335, as follows:

1. Section 335.4(h) would be amended by revising paragraphs (h)(2), (h)(3), (h)(5), (h)(6), (h)(7) and (h)(8) as follows:

§ 335.4 Registration statements and reports.

* * * * *

(h) * * *

(2)(i) Any person who, after acquiring directly or indirectly the beneficial ownership of any equity security of a bank of a class which is registered pursuant to Section 12 of the Act (except non-voting securities) is directly or indirectly the beneficial owner of more than five (5) percent of such class shall, within 10 days after such acquisition, send to the bank at its principal office, by registered or certified mail, and to each exchange where the security is traded, and file with the Corporation, a statement containing the information required by Form F–11. Six copies of the statement, including all exhibits, shall be filed with the Corporation.

(ii)(A) A person who would otherwise be obligated under paragraph (i) of this § 335.4(h)(2) to file a statement on Form F–11 may, in lieu thereof, file with the Corporation, within 45 days after the end of the calendar year in which such person became so obligated, six copies, including all exhibits, of a short form ownership statement on Form F–11A and send one copy each of such form to the bank at its principal office, by registered or certified mail, and to the principal national securities exchange where the security is traded: *Provided,* That it shall not be necessary to file a Form F–11A unless the percentage of the class of equity security beneficially owned as of the end of the calendar year is more than five (5) percent: *And provided further,* That

(*1*) Such person has acquired such securities in the ordinary course of his business and not with the purpose nor with the effect of changing or influencing the control of the bank, nor in conection with or as a participant in any transaction having such purpose or effect, including any transaction subject to § 335.4(h)(5)(ii); and

(*2*) Such person is

(*i*) A broker or dealer registered under Section 15 of the Act;

(*ii*) A bank as defined in Section 3(a)(6) of the Act;

(*iii*) An insurance company as defined in Section 3(a) (19) of the Act;

(*iv*) An investment company registered under Section 8 of the Investment Company Act of 1940;

(*v*) An investment adviser registered under Section 203 of the Investment Advisers Act of 1940;

(*vi*) An employee benefit plan, or pension fund which is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA") or an endowment fund;

(*vii*) A parent holding company: *Provided,* The aggregate amount held directly by the parent, and directly and indirectly by its subsidiaries which are not persons specified in paragraph (ii)(A)(*2*)(*i*) through (*vi*) of this § 335.4(h)(2), does not exceed one percent of the securities of the subject class;

(*viii*) A group, provided that all the members are persons specified in paragraph (ii)(A)(*2*)(*i*) through (*vii*) of this § 335.4(h)(2); and

(*3*) Such person has promptly notified any other person (or group within the meaning of Section 13(d)(3) of the Act) on whose behalf it holds, on a discretionary basis, securities exceeding five percent of the class, of any acquisition or transaction on behalf of such other person which might be reportable by the person under Section 13(d) of the Act. This paragraph only requires notice to the account owner of information which the filing person reasonably should be expected to know and which would advise the account owner of an obligation he may have to file a statement pursuant to Section 13(d) of the Act or an amendment thereto.

(B) Any person relying on § 335.4(h)(2)(ii)(A) and § 335.4(h)(3)(ii) shall, in addition to filing any statement required thereunder, file a statement on Form F–11A within ten days after the end of the first month in which such person's direct or indirect beneficial ownership exceeds ten percent of a class of equity securities specified in § 335.4(h)(2)(i) computed as of the last day of the month, and thereafter within ten days after the end of any month in which such person's beneficial ownership of securities of such class, computed as of the last day of the month, increased or decreased by more than five percent of such class of equity securities. Six copies of such statement, including all exhibits, shall be filed with the Corporation and one each sent, by registered or certified mail, to the bank at its principal office and to the principal national securities exchange where the security is traded. Once an amendment has been filed reflecting beneficial ownership of five percent or

less of the class of securities, no additional filings are required by this paragraph (ii)(B) unless the person thereafter becomes the beneficial owner of more than ten percent of the class and is required to file pursuant to this provision.

(C)(*1*) Notwithstanding paragraphs (ii)(A) to (ii)(B) of this § 335.4(h)(2) and § 335.4(h)(3)(ii), a person shall immediately become subject to § 335.3(h)(2)(i) and § 335.4(h)(3)(i) and shall promptly, but not more than 10 days later, file a statement on Form F–11 if such person:

(*i*) Has a reported that the person is the beneficial owner of more than five percent of a class of equity securities in a statement on Form F–11A pursuant to paragraph (ii)(A) or (ii)(B) of this § 335.4(h)(2), or is required to report such acquisition but has not yet filed the form;

(*ii*) Determines that the person no longer has required or holds such securities in the ordinary course of business or not with the purpose nor with the effect of changing or influencing the control of the bank, nor in connection with or as a participant in any transaction having such purpose or effect, including any transaction subject to § 335.4(h)(5)(ii); and (*iii*) Is at that time the beneficial owner of more than five percent of a class of equity securities described in § 335.4(h)(2)(i).

(*2*) For the ten-day period immediately following the date of the filing of a Form F–11 pursuant to this pursuant to this paragraph (ii)(C), such person shall not (*i*) Vote or direct the voting of the securities described in § 335.4(h)(2)(ii)(C)(*1*)(*i*); nor, (*ii*) Acquire an additional beneficial ownership interest in any equity securities of the bank, nor of any person controlling the bank.

(D) Any person who has reported an acquisition of securities in a statement of Form F–11A pursuant to paragraph (ii)(A) or (ii)(B) of this § 335.4(h)(2) and thereafter ceases to be a person specified in paragraph (ii)(A)(*2*) of this § 335.4(h)(2) shall immediately become subject to § 335.4(h)(2)(i) and § 335.4(h)(3)(i) and shall file, within ten days thereafter, a statement on Form F–11 in the event such person is a beneficial owner at that time of more than five percent of the class of equity securities.

(iii) Any person who, as of December 31, 1979, or as of the end of any calendar year thereafter, is directly or indirectly the beneficial owner of more than five percent of any equity security of a class specified in paragraph (h)(2)(iv) and who is not required to file a statement under paragraph (h)(2)(i) by virtue of the exemption provided by Section 13(d)(6)(A) or (B) of the Act, or because such beneficial ownership was acquired prior to December 20, 1970, or because such person otherwise (except for the exception provided by Section 13(d)(6)(C) of the Act) is not required to file such statement, shall, within 45 days after the end of the calendar year in which such person became obligated to report under this paragraph, send to the bank at its principal office, by registered or certified mail, and file with the Corporation, a statement containing the information required by Form F–11A. Six copies of the statement, including all exhibits, shall be filed with the Corporation.

(iv) For the purposes of Section 13(d) and 13(g), any person, in determining the amount of outstanding securities of a class of equity securities, may rely upon information set forth in the bank's most recent quarterly or annual report, and any current report subsequent thereto, filed with the Corporation pursuant to the Act, unless the person knows or has reason to believe that the information contained therein is inaccurate.

(v)(A) Whenever two or more persons are required to file a statement containing the information required by Form F–11 or Form F–11A with respect to the same securities, only one statement need be filed; *Provided*, That (*1*) Each person on whose behalf the statement is filed is individually eligible to use the form on which the information is filed;

(*2*) Each person on whose behalf the statement is filed is responsible for the timely filing of such statement and any amendments thereto, and for the completeness and accuracy of the information concerning such person contained therein; such person is not responsible for the completeness or accuracy of the information concerning the other persons making the filing, unless such person knows or has reason to believe that such information is inaccurate; and

(*3*) Such statement identifies all such persons, contains the required information with regard to each such person, indicates that such statement is filed on behalf of all such persons, and includes, as an exhibit, their agreement in writing that such statement is filed on behalf of each of them.

(B) A group's filing obligation may be satisfied either by a single joint filing or by each of the group's members making an individual filing. If the group's members elect to make their own filings, each filing should identify all members of the group but the information provided concerning the other persons making the filing need only reflect information which the filing person knows or has reason to know.

(3)(i) Form F–11.—If any material change occurs in the facts set forth in the statement required by § 335.4(h)(2)(i) including, but not limited to, any material increase or decrease in the percentage of the class beneficially owned, the person or persons who were required to file such statement shall promptly file or cause to be filed with the Corporation and send or cause to be sent to the bank at its principal office, by registered or certified mail, and to each exchange on which the security is traded, an amendment disclosing such change. An acquisition or disposition of beneficial ownership of securities in an amount equal to one percent or more of the class of securities shall be deemed "material" for purposes of this § 335.4(h)(3); acquisitions or dispositions of less than such amounts may be material, depending upon the facts and circumstances. The requirement that an amendment be filed with respect to an acquisition which materially increases the percentage of the class beneficially owned shall not apply if the acquisition is exempted by Section 13(d)(6)(B) of the Act. Six copies of such amendment shall be filed with the Corporation.

(ii) Form F–11A.—Notwithstanding paragraph (i) of this § 335.4(h)(3), and provided that the person or persons filing a statement pursuant to § 335.4(h)(2)(ii) continue to meet the requirements set forth therein, any person who has filed a short form statement on Form F–11A shall amend such statement within 45 days after the end of each calendar year to reflect, as of the end of the calendar year, any changes in the information reported in the previous filing on that form, or if there are no changes from the previous filing, a signed statement to that effect under cover of Form F–11A. Six copies of the amendment, including all exhibits, shall be filed with the Corporation and one each sent, by registered or certified mail, to the bank at its principal office and to the principal national securities exchange where the security is traded. Once an amendment has been filed reflecting beneficial ownership of five percent or less of the class of securities, no additional filings are required unless the person thereafter becomes the beneficial owner of more than five percent of the class and is required to file pursuant to § 335.4(h)(2).

Note.— For persons filing a short form statement pursuant to §335.4(h)(2)(ii), see also §§335.4(h)(2)(ii)(B), (C) and (D).

* * * * *

(5) * * *

(iv) * * *

(C) * * *

(1) * * *

(2) The pledgee is a person specified in § 335.4(h)(2)(ii)(A)*(2)*, including persons meeting the conditions set forth in paragraph *(vii)* thereof; and

* * * * *

(6)(i) A person who becomes a beneficial owner of securities shall be deemed to have acquired such securities for purposes of Section 13(d)(1) of the Act, whether such acquisition was through pruchase or otherwise. However, executors or administrators of a decedent's estate generally will be presumed not to have acquired beneficial ownership of the securities in the decedent's estate until such time as the executors or administrators are qualified under local law to perform their duties.

(ii)(A) When two or more persons agree to act together for the prupose of acquiring, holding, voting or disposing of equity securities of a bank, the group formed thereby shall be deemed to have acquired beneficial ownership, for purposes of Sections 13(d) and 13(g) of the Act, as of the date of such agreement, of all equity securities of that bank beneficially owned by any such person.

(B) Notwithstanding the previous paragraph, a group shall be deemed not to have acquired any equity securities beneficially owned by the other members of the group solely by virture of their concerted actions relating to the purchase of equity securities directly from a bank in a transaction not involving a public offering; *Provided,* That *(1)* All the members of the group are persons specified in § 335.4(h)(2)(ii)(A)*(2)*;

(2) The pruchase is in the ordinary course of each member's business and not with the prupose nor with the effect of changing or influencing control of the bank, nor in connection with or as a participant in any transaction having such purpose or effect, including any transaction subject to § 335.4(h)(5)(ii);

(3) There is no agreement among, or between any members of the group to act together with respect to the bank or its securities except for the purpose of facilitating the specific purpose involved; and

(4) The only actions among or between any members of the group with respect to the bank or its securities subsequent to the closing date of the non-public offering are those which are necessary to conclude ministerial matters directly related to the completion of the offer or sale of the securities.

(7) The acquisition of securities of a bank by a person who, prior to such acquisition, was a beneficial owner of more than five percent of the outstanding securities of the same class as those acquired shall be exempt from Section 13(d) of the Act: *Provided,* That (i) The acquisition is made pursuant to preemptive subscription rights in an offering made to all holders of securities of the class to which the preemptive subscription rights pertain;

(ii) Such person does not acquire additional securities except through the exercise of the person's pro rata share of the preemptive subscription rights; and

(iii) The acquisition is duly reported, if required, pursuant to Section 16(a) of the Act and the rules and regulations thereunder.

(8) Each bank having securities registered pursuant to section 12(g) of the Act, upon being notified by a national securities association registered pursuant to section 15A of the Act that a class of the bank's securities is to be quoted on an interdealer quotation system, which is sponsored and governed by the rules of such association, shall thereafter notify such association promptly of (i) any increase or decrease in the amount of securities of such class outstanding which exceeds five percent of the amount of such class last reported to the association and (ii) any change in the name of the bank. The obligation to report pursuant to this paragraph (h)(8) of this section shall continue until notification is received from the association that all classes of securities are no longer quoted on such interdealer quotation system.

* * * * *

2. In § 335.5, paragraph (c)(1), Note 2 would be amended by deleting the term "§335.7(d)." and inserting in its place the term "§ 335.7(f).".

3. In § 335.5, paragraph (k) would be amended by adding a new Subparagraph (5) as follows:

§ 335. Proxy statements and other solicitations under section 14 of the Act.

* * * * *

(k) * * *

(5) If the management intends to include in the proxy statement a statement in opposition to a proposal received from a proponent, it shall—not later than ten calendar days prior to the date the preliminary copies of the proxy statement and form of proxy are filed pursuant to § 335.5(f), or, in the event that the proposal must be revised to be includable, not later than five calendar days after receipt by the bank of the revised proposal—promptly forward to the proponent a copy of the statement in opposition to the proposal. In the event the proponent believes that the statement in opposition contains materially false or misleading statements within the meaning of § 335.5(h) and the proponent wishes to bring this matter to the attention of the Corporation, the proponent should promptly provide the staff with a letter setting forth the reasons for this view and at the same time promptly provide management with a copy of such letter.

4. Section 335.6 would be amended by revising paragraph (r) as follows:

§ 335.6 Reports of directors, officers, and principal stockholders.

* * * * * *

(r) *Exemption from Section 16(b) of the acquisitions of shares of stock and stock options and stock appreciation rights under certain stock incentive, stock option of similar plans.* Any acquisition of shares of stock (other than stock acquired upon the exercise of an option, warrant or right) pursuant to a plan as defined in Subparagraph (4)(i) hereof, or any acquisition, expiration, cancellation of surrender to the bank of a stock option or stock appreciation right pursuant to such a plan by a director or officer of the bank shall be exempt from the operation of Section 16(b) of the Act if the plan meets the following conditions:

(1) *Approval by security holders.* The plan has been approved, directly or indirectly

(i) By the affirmative votes of the holders of a majority of the securities of the bank present, or represented, and entitled to vote at a meeting duly held in accordance with the applicable laws of the State or other jurisdiction in which the bank was incorporated or

(ii) By the written consent of the holders of a majority of the securities of the bank entitled to vote: *Privided, however,* That if such vote or written consent was not solicited substantially in accordance with the rules and regulations, if any, in effect under section 14(a) of the Act at the time of such vote or written consent, the issuer shall furnish in writing to the holders of record of the securities entitled to vote for the plan substantially the same information concerning the plan which would be required by the rules and regulations in effect under Section 14(a) of the Act at the time such informaiton is furnished, if proxies to be voted with respect to the approval or disapproval of

the plan were then being solicited, on or prior to the date of the first annual meeting of security holders held subsequent to the later of

(A) The first registration of an equity security under Section 12 of the Act or

(B) The acquisition of an equity security for which exemption is claimed.

Such written information may be furnished by mail to the last known address of the security holders of record within 30 days prior to the date of the mailing. Six copies of such written information shall be filed with, or mailed for filing to, the Corporation not later than the date on which it is first sent or given to security holders of the bank. For the purposes of this paragraph, the term "bank" includes a predecessor corporation if the plan or obligations to participate thereunder were assumed by the bank in connection with the succession. In addition, any amendment to the plan shall be similarly approved if the amendment would

(*1*) Materially increase the benefits accruing to participants under the plan;

(*2*) Materially increase the number of securities which may be issued under the plan; or

(*3*) Materially modify the requirements as to eligibility for participation in the plan.

(2) *Disinterested administrators.* If the selection of any director or officer of the bank to whom stock may be allocated or to whom stock options or stock appreciation rights may be granted pursuant to the plan, or the determination of the number or maximum number of shares of stock which may be allocated to any such director or officer or which may be covered by stock option or stock appreciation rights granted to any such director or officer pursuant to the plan is subject to the discretion of any person, then such discretion shall be exercised only as follows:

(i) With respect to the participation of directors—

(A) By the board of directors of the bank, a majority of which board and a majority of the directors acting in the matter are disinterested persons;

(B) By, or only in accordance with the recommendation of, a committee of three or more persons having full authority to act in the matter, all of the members of which committee are disinterested persons; or

(C) Otherwise in accordance with the plan, if the plan

(*1*) Specifies the number or maximum number of shares of stock which directors may acquire or which may be subject to stock options or stock appreciation rights granted to directors pursuant to the plan and the terms upon which and the times at which, or the periods within which, such stock may be acquired or such options or rights may be acquired and exercised; or

(*2*) Sets forth, by formula or otherwise, effective and determinable limitations with respect to the foregoing based upon earnings of the bank, dividends paid, compensation received by participants, option prices, market value of shares, outstanding shares or percentages thereof outstanding from time to time or similar factors.

(ii) With respect to the participation of officers who are not directors:

(A) By the board of directors of the bank or a committee of three or more directors—

(B) By, or only in accordance with the recommendations of, a committee of three or more persons having full authority to act in the matter, all of the members of which committee are disinterested persons; or

(C) Otherwise in accordance with the plan, if the plan

(*1*) Specifies the number or maximum number of shares of stock which officers may acquire or which may be subject to stock options or stock appreciation rights granted to the officers pursuant to the plan and the terms upon which, and the times at which, or the period within which, such stock may be acquired or such options or rights may be acquired and exercised; or

(*2*) Sets forth, by formula or otherwise, effective and determinable limitations with respect to the foregoing based upon earnings of the bank, dividends paid, compensation received by participants, option prices, market value of shares, outstanding shares or percentages thereof outstanding from time to time or similar factors.

(iii) The provisions of this paragraph shall not apply with respect to any option or right granted, or other equity security acquired, prior to the date of the first registration of an equity security under Section 12 of the Act.

(3) *Plan limitations.* The plan effectively limits as to each participant or as to all participants the aggregate dollar amount of stock or the aggregate number of shares of stock which may be allocated, or which may be subject to stock options or stock appreciation rights issued pursuant to the plan. The limitations may be established on an annual basis or for the duration of the plan—whether or not the plan has a fixed termination date—and may be determined either by fixed or maximum dollar amounts; fixed or maximum number of shares; or by formulas based upon earnings of the bank, dividends paid, compensation received by participants, option prices, market value of shares, outstanding shares or percentages thereof outstanding from time to time, or similar factors which will result in an effective and determinable limitation. Such limitations may be subject to any provision for adjustment of the plan, of stock allocable, or options outstanding thereunder to prevent dilution or enlargement of rights.

(4) *Definitions.* Unless the context otherwise requires, all terms used in this § 335.6(r) shall have the same meaning as in the Act or elsewhere in this Part 335. In addition the following definitions apply:

(i) The term "plan" shall mean an option, bonus, appreciation, profit sharing, retirement, incentive, thrift, savings, or similar plan which meets the following conditions:

(A) The plan must be set forth in a written document describing the means or basis for determining the eligibility of individuals to participate and either the price at which the securities may be offered or the method by which the price or the amount of the award is to be determined; and

(B) The plan must provide with respect to any option or similar right (including a stock appreciation right) offered pursuant to the plan that such option or right is not transferable other than by will or the laws of descent and distribution and that it is exercisable during the employee's lifetime only by the person or by the person's guardian or legal representative.

(ii) The term "exercise of an option, warrant or right" contained in the parenthetical clause of the first paragraph of this § 335.6(r) shall not include

(A) The making of an election to receive under any plan, compensation in the form of stock or credits therefor, provided that such election is made either prior to the making of the award or prior to the fulfillment of all conditions to the receipt of the compensation and provided further, that such election is irrevocable until at least six months after termination of employment;

(B) The subsequent crediting of such stock;

(C) The making of any election as to the time for delivery of such stock after termination of employment, provided that such election is made at least six months prior to any such delivery;

(D) The fulfillment of any condition to the absolute right to receive such stock; or

(E) The acceptance of certificates for shares of such stock.

(iii) The term "disinterested person" used in paragraphs (2) and (5) of this § 335.6(r) shall mean an administrator of a plan who is not at the time he exercises discretion in administering the plan eligible and has not at any time within one year prior thereto been eligible for selection as a person to whom stock may be allocated or to whom stock options or stock appreciation rights may be granted pursuant to the plan or any other plan of the bank or any of its affiliates entitling the participants therein to acquire stock, stock options or stock appreciation rights of the bank or any of its affiliates.

(5) *Cash settlements of stock appreciation rights.* Any transaction involving the exercise and cancellation of a stock appreciation right issued pursuant to a plan (whether or not the transaction also involves the related surrender and cancellation of a stock option), and the receipt of cash in complete or partial settlement of that right, shall be exempt from the operation of Section 16(b) of the Act, as not comprehended within the purpose of that section, if all the following conditions are met:

(i) *Information about the bank.* (A) The issuer of the stock appreciation right has been subject to the reporting requirements of Section 13 of the Act for at least a year prior to the transaction and has filed all reports and statements required to be filed pursuant to that section during that year;

(B) The issuer of the stock appreciation right on a regular basis releases for publication quarterly and annual summary statements of operations. This condition shall be deemed satisfied if the specified financial data appears (*1*) on a wire service, (*2*) in a financial news service, (*3*) in a newspaper of general circulation, or (*4*) is otherwise made publicly available.

(ii) *Limitation on the right and any related option.* Neither the stock appreciation right nor any related stock option shall have been exercised during the first six months of their respective terms, except that this limitation shall not apply in the event death or disability of the grantee occurs prior to the expiration of the six-month period.

(iii) *Administration of the plan.* (A) the plan shall be administered by either the board of directors, a majority of which are disinterested persons and a majority of the directors acting on plan matters are disinterested persons, or by a committee of three or more persons, all of whom are disinterested persons;

(B) the board or committee shall have sole discretion either:

(*1*) To determine the form in which payment of the right will be made (i.e., cash, securities, or any combination thereof), or

(*2*) To consent to or disapprove the election of the participant to receive cash in full or partial settlement of the right. Such consent or disapproval may be given at any time after the election to which it relates;

(C) Any election by the participant to receive cash in full or partial settlement of the stock appreciation right, as well as any exercise by the participant of a stock appreciation right for such cash, shall be made during the period beginning on the third business day following the date of release of the financial data specified in paragraph (5)(i)(B) of this § 335.6(r) and ending on the twelfth business day following such date. This paragraph (5)(iii)(C), however, shall not apply to any execise by the participant of a stock appreciation right for cash where the date of exercise:

(*1*) Is automatic or fixed in advance under the plan;

(*2*) Is at least six months beyond the date of grant of the stock appreciation right; and

(*3*) Is outside the control of the participant.

(iv) *Compliance with other conditions of § 335.6(r).* The plan under which the stock appreciation rights and any related options are granted shall meet the conditions specified above in §§ 335.6(r) (1), (2), (3), and (4).

(v) *Limit of the exemption.* Nothing in this paragraph (5) provides an exemption from Section 16(b) for the acquisition of stock upon the exercise of a stock appreciation right or a stock option.

5. In § 335.6 paragraphs (r), (s), (t), and (u) would be redesignated as paragraphs (s), (t), (u), and (v).

6. In § 335.41, Items 5, 6, 7, 8, 9, and 10 would be amended by revising to read as follows:

§ 335.41. Form for registration of securities of a bank pursuant to section 12(b) or section 12(g) of the Securities Exchange Act of 1934 (form F–1).

* * * * *

Item 5—Security Ownership of Certain Beneficial Owners and Management. Set forth the same information as is required to be furnished by Items 5 (d), (e) and (g) of Form F–5 at § 335.51.

Note.—The information required by Item 5(e) of Form F–5 need not be included for any nominee for election as a director.

Item 6—Directors and Principal Officers. Set forth the same information as is required to be furnished by Items 6 (a), (b), (c), (d), (e) and (f) of Form F–5 at § 335.51.

Note.—The information required by Items 6 (a), (d), (e) and (f) of Form F–5 need not be included for any nominee for election of a director.

Item 7—Remuneration of Directors and Officers. Set forth the same information as is required to be furnished by Items 7 (a) and (b) of Form F–5 at § 335.51.

Item 8—Management Options To Purchase Securities. Set forth the same information as is required to be furnished by Item 7(c) of Form F–5 at § 335.51.

Item 9—Interest of Management and Others in Certain Transactions. (a) Set forth the same information, for the past three years, as is required to be furnished by Items 7 (d), (e) and (f) of Form F–5 at § 335.51.

Note.—The information required by Items 7 (d), (e) and (f) of Form F–5 need not be included for any nominee for election as a director.

(b) If the bank was organized within the past five years, furnish the following information:

(1) State the names of the promoters, the nature and amount of anything of value (including money, property, contracts, options or rights of any kind) received or to be received by each promoter directly or indirectly from the bank, and the nature and amount of any assets, services or other consideration therefor received or to be received by the bank.

(2) As to any assets acquired or to be acquired by the bank from a promoter, state the amount at which acquired or to be acquired and the principle followed, or to be followed in determining the amount. Identify the persons making the determination and state their relationship, if any, with the bank or any promoter. If the assets were acquired by the promoter within two years prior to their transfer to the bank, state the cost thereof to the promoter.

Item 10—Legal Proceedings. Briefly describe any material pending legal proceedings, other than ordinary routine litigation incidental to the business, to which the bank or any of its subsidiaries is a party or of which any of their property is the subject. Include the name of the court or agency in which the proceedings are pending, the date instituted, the principal parties thereto, a description of the factual basis alleged to underlie the proceeding and the relief sought. Include similar information as to any such proceedings known to be contemplated by governmental authorities.

Instructions. 1. Notwithstanding Instruction 2 to this item, administrative or judicial proceedings arising under Section 8 of the Federal Deposit Insurance Act shall be deemed material and shall be described.

2. No information need be given with respect to any proceeding which involves primarily a claim for damages if the amount involved, exclusive of interest and costs, does not exceed 10 percent of the equity capital accounts of the bank and its subsidiaries on a consolidated basis. However, if any proceeding presents in large degree the same

issues as other proceedings pending or known to be contemplated, the amount involved in such other proceedings shall be included in computing such percentage.

3. Any material proceedings to which any director, officer or affiliate of the bank, any owner of record or beneficially of more than 5 percent of any class of voting securities of the bank, or any associate of any such director, officer or security holder is a party adverse to the bank or any of its subsidiaries or has a material interest adverse to the bank or any of its subsidiaries, also shall be described.

4. Notwithstanding the foregoing, if a receiver, fiscal agent or similar officer has been appointed for the bank or its parent, in a proceeding under the Bankruptcy Act or in any other proceeding under State or Federal law in which a court or governmental agency has assumed jurisdiction over substantially all of the assets or business of the bank or its parent, or if such jurisdiction has been assumed by leaving the existing directors and officers in possession but subject to the supervision and orders of a court or governmental body, identify the proceeding, the court or governmental body, the date jurisdiction was assumed, the identity of the receiver, fiscal agency or similar officer and the date of the person's appointment.

5. Discuss the extent of insurance coverage if appropriate to the type of proceeding.

* * * * *

7. In § 335.42, Items 5, 8, 12, 13, 14, 15 and 16 would be amended by revising to read as follows:

§ 335.42 Form for annual report of bank (Form F-2).

* * * * *

Item 5—Legal Proceedings. Briefly describe any material pending legal proceedings, other than ordinary routine litigation incidental to the business, to which the bank or any of its subsidiaries is a party or of which any of their property is the subject. Include the name of the court or agency in which the proceedings are pending, the date instituted, the principal parties thereto, a description of the factual basis alleged to underlie the proceeedings and the relief sought. Include similar information as to any such proceedings known to be contemplated by governmental authorities.

Instructions. 1. Notwithstanding Instruction 2 to this item, administrative or judicial proceedings arising under Section 8 of the Federal Deposit Insurance Act shall be deemed material and shall be described.

2. No information need be given with respect to any proceeding which involves primarily a claim for damages if the amount involved, exclusive of interest and costs, does not exceed 10 percent of the equity capital accounts of the bank and its subsidiaries on a consolidated basis. However, if any proceedings presents in large degree the same issues as other proceedings pending or known to be contemplated, the amount involved in such other proceedings shall be included in computing such percentage.

3. Any material proceedings to which any director, officer or affiliate of the bank, any owner of record or beneficially of more than 5 percent of any class of voting securities of the bank, or any associate of any such director, officer or security holder is a party adverse to the bank or any of its subsidiaries or has a material interest adverse to the bank or any of its subsidiaries, also shall be described.

4. Notwithstanding the foregoing, if a receiver, fiscal agent or similar officer has been appointed for the bank or its parent, in a proceeding under the Bankruptcy Act or in any other proceeding under State or Federal law in which a court or governmental agency has assumed jurisdiction over substantially all of the assets or business of the bank or its parent, or if such jurisdiction has been assumed by leaving the existing directors and officers in possession but subject to the supervision and orders of a court or governmental body, identify the proceeding, the court or governmental body, the date jurisdiction was assumed, the identity of the receiver, fiscal agent or similar officer and the date of the person's appointment.

5. Discuss the extent of insurance coverage if appropriate to the type of proceeding.

* * * * *

Item 8—Principal Officers of the Bank. Set forth the same information as is required to be furnished by 6(b), (c), (d), (e) and (f) of Form F-5 at § 335.51.

Note.—The information required by Items 6(e) and (f) of Form F-5 need not be included for directors or persons nominated or chosen to become a director.

* * * * *

Item 12—Security Ownership of Certain Beneficial Owners and Management. Set forth the same information as is required to be furnished by Items 5(d), (e) and (g) of Form F-5 at § 335.51.

Note.—The information required by Item 5(e) of Form F-5 need not be included for any nominee for election as a director.

Item 13—Directors of the Bank. Set forth the same information as is required to be furnished by items 6(a), (d), (e) and (f) of Form F-5 at § 335.51.

Note.—The information required by Items 6(e) and (f) of Form F-5 need not be included for principal officers.

Item 14—Remuneration of Directors and Officers. Set forth the same information as is required to be furnished by Items 7(a) and (b) of Form F-5 at § 335.51.

Item 15—Management Options to Purchase Securities. Set forth the same information as is required to be furnished by Item 7(c) of Form F-5 at § 335.51.

Item 16—Interest of Management and Others in Certain Transactions. Set forth the same information as is required to be furnished by Items 7(d), (e) and (f) of Form F-5 at § 335.51.

Note.—The information required by Items 7(d), (e) and (f) of form F-5 need not be included for any nominee for election as a director.

* * * * *

8. In § 335.43, Instruction 6 of Item 2, Item 3, Item 9(d), Item 10(e), Item 11, Item 12, Item 13 and Exhibits 7, 8, 9, and 10 would be amended by revising or adding as follows:

§ 335.43 Form for current report of a bank (form F-3).

* * * * *

Item 2— * * *

Instructions. * * *

6. Attention is directed to the requirements at the end of this form with respect to the filing of financial statements for businesses acquired and to the filing of copies of the plans of acquisition or disposition as exhibits to the report.

Item 3—Legal Proceedings. Briefly describe any material pending legal proceedings, other than ordinary routine litigation incidental to the business, to which the bank or any of its subsidiaries is a part of which any of their property is the subject. Include the name of the court or agency in which the proceedings are pending, the date instituted, the principal parties thereto, a description of the factual basis alleged to underlie the proceedings and the relief sought. Include similar information as to any such proceedings known to be contemplated by governmental authorities.

Instructions. 1. Nothwithstanding Instruction 2 to this item, administrative or judicial proceedings arising under Section 8 of the Federal Deposit Insurance Act shall be deemed material and shall be described.

2. No information need be given with respect to any proceeding which involves primarily a claim for damages if the amount involved, exclusive of interest and costs, does not exceed 10 percent of the equity capital accounts of the bank and its subsidiaries on a consolidated basis. However, if any proceeding presents in large degree the same issues as other proceedings pending or known to be contemplated, the amount involved in such other proceedings shall be included in computing such percentage.

3. Any material proceedings to which any director, officer of affiliate of the bank, any owner of record or beneficially of more than 5 percent of any class of voting securities of the bank, or any associate of any such director, officer or security holder is a party adverse to the bank or any of its subsidiaries or has a material interest adverse to the bank or any of its subsidiaries, also shall be described.

4. Notwithstanding the foregoing, if a reciever, fiscal agent or similar officer has been appointed for the bank or its parent, in a proceeding under the Bankruptcy Act or in any other proceeding under State of Federal law in which a court or governmental agency has assumed jurisdiction over substantially all of the assets or business of the bank or its parent, or if such jurisdiction has been assumed by leaving the existing directors and officers in possession but subject to the supervision and orders of a court or governmental body, identify the proceeding, the court or governmental body, the date jurisdiction was assumed, the identity of the receiver, fiscal agent or similar officer and the date of the person's appointment.

5. Discuss the extent of insurance coverage if appropriate to the type of proceeding.

* * * * *

Item 9— * * *

Describe the terms of any settlement between the bank and any other participant (as defined in § 335.5(j)) terminating any solicitation subject to § 335.5(i), including the cost or anticipated cost to the bank.

Instructions. * * *

5. If the bank has furnished to its security holders proxy soliciting material containing the information called for by paragraph (d), the paragraph may be answered by reference to the information contained in such material.

6. If the bank has published a report containing all of the information called for by this item, the item may be answered by a reference to the information contained in such report, provided copies of such report are filed as an exhibit to the report on this form.

Item 10— * *

(e) State whether the decision to change accountants was recommended or approved by

(1) Any audit or similar committee of the board of directors, if the bank has such a committee; or

(2) The board of directors, if the bank has no such committee.

Item 11—Resignations of Bank's Directors. (a) If a director has resigned or declined to stand for re-election to the board of directors since the date of the last annual meeting of shareholders because of a disagreement with the bank on any matter relating to the bank's operations, policies or practices, and if the director has furnished the bank with a letter describing such disagreement and requesting that the matter be disclosed, the bank shall state the date of such resignation or declination to stand for re-election and summarize the director's description of the disagreement.

(b) If the bank believes that the description provided by the director is incorrect or incomplete, it may include a brief statement presenting its views of the disagreement.

(c) The bank shall file a copy of the director's letter as an exhibit with all copies of this Form F–9.

Item 12—Other Materially Important Events. The bank shall, at its option, report under this item any events that it deems of material importance to security holders, even though information as to such events is not otherwise called for by this form.

Item 13—Financial Statements and Exhibits. List below the financial statements and exhibits, if any, filed as a part of this report.

(a) Financial statements.

(b) Exhibits.

Signatures

* * * * *

Exhibits * * *

7. Copies of the text of any proposal described in answer to Item 9.

8. Copies of any published report furnished in response to Item 9. (See Item 9, Instruction 6.)

9. Letters from the bank and the independent accountants furnished pursuant to Item 10.

10. Letters from directors furnished pursuant to Item 11.

* * * * *

9. In § 335.44, paragraph H(e) would be amended as follows:

§ 335.44 Form for quarterly report of bank (form F–4) to be filed pursuant to section 335.4(i).

* * * * *

H. *Financial statements.* * * *

(e) The financial information to be included in this report should be prepared in conformity with the accounting principles and practices reflected in the financial statement included in the annual report filed with the Corporation for the preceding fiscal year, except for any subsequent regulatory revisions and changes required to be reported by § 335.7(e)(8).

11. Section 335.47 would be amended as follows:

§ 335.47 Form for acquisition statement to be filed pursuant to § 335.4(h)(2)(i) and amendments thereto filed pursuant to § 335.4(h)(3)(i) of Part 335 (form F–11).

Federal Deposit Insurance Corporation

Washington, D.C. 20429

Form F–11

Acquisition statement to be filed pursuant to § 335.4(h)(2)(i) and amendments thereto filed pursuant to § 335.4(h)(3)(i) of Part 335 (Amendment No. —)

_____

(Name and address of issuing bank

_____

(Title of class of securities)

_____

(CUSIP Number)

_____

(Name, address and telephone number of person authorized to receive notices and communications)

(Date of event which requires filing of this statement)

If the filing person has previously filed a statement on Form F–11A to report the acquisition which is the subject of this Form F–11, and is filing this form because of § 335.4(h)(2)(ii)(C) or (D), check the following box [ ].

(Continuing on following pages)

Page 1 of — pages

Note.—Six copies of this form including all exhibits, should be filed with the Corporation. See § 335.4(h)(2)(i) for other parties to whom copies are to be sent.

Special Instructions for Complying With Form F–11

Under Sections 13(d) and 23 of the Securities Exchange Act of 1934 and the rules and regulations thereunder, the Corporation is authorized to solicit the information required to be supplied by this form by certain security holders of certain banks.

Disclosure of the information specified in this form is mandatory, except for Social Security or I.R.S. identification numbers, disclosure of which is voluntary. The information will be used for the primary purpose of determining and disclosing the holdings of certain beneficial owners of certain equity securities. This statement will be made a matter of public record. Therefore, any information given will be available for inspection by any member of the public.

Because of the public nature of the information, the Corporation can utilize it for a variety of purposes, including referral to other governmental authorities or securities self-regulatory organizations for investigatory purposes or in connection with litigation involving the Federal securities laws or other civil, criminal or regulatory statements or provisions. Social Security or I.R.S. identificatin numbers, if furnished, will assist the Corporation in identifying security holders and, therefore, in promptly processing statements of beneficial ownership of securities.

Failure to disclose the information requested by this form, except for Social Security or I.R.S. identification numbers, may result in civil or criminal action against the persons involved for violation of the Federal securities laws and rules promulgated thereunder.

General Instructions

A. The item numbers and captions of the items shall be included but the text of the items is to be omitted. The answers to the items shall be so prepared as to indicate clearly the coverage of the items without referring to the text of the items. Answer every item. If an item is inapplicable or the answer is in the negative, so state.

B. Information contained in exhibits to the statement may be incorporated by reference in answer or partial answer to any item or subitem of the statement unless it would render such answer incomplete, unclear or confusing. Matter incorporated by reference shall be clearly identified in the reference by page, paragraph, caption or otherwise. An express statement that the specified matter is incorporated by reference shall be made at the particular place in the statement where the information is required.

C. If the statement is filed by a general or limited partnership, syndicate, or other group, the information called for by Items 2–6, inclusive, shall be given with respect to (i) each partner of such general partnership; (ii) each partner who is denominated as a general partner or who functions as a general partner of such limited partnership; (iii) each member of such syndicate or group; and (iv) each person controlling such partner or member. If the statement is filed by a corporation or if a person referred to in (i), (ii), (iii) or (iv) of this instruction is a corporation, the information called for by the above mentioned items shall be given with respect to (a) each executive officer and director of such corporation; (b) each person controlling such corporation; and (c) each executive officer and director of any corporation or other person ultimately in control of such corporation. Executive officer shall mean the president, secretary, treasurer, and any vice president in charge of a

principal business function (such as sales, administration or finance) and any other person who performs or has the power to perform similar policy making functions for the corporation.

Item 1—Security and Bank. State the title of the class of equity securities to which this statement relates and the name and address of the principal office of the bank.

Item 2—Identity and Background. If the person filing this statement or any person enumerated in Instruction C of this statment is a corporation, general partnership, limited partnership, syndicate or other group of persons, state its name, the state or other place of its organization, its principal business, the address of its principal business, the address of its principal office and the information required by (d) and (e) of this item. If the person filing this statement or any person enumerated in Instruction C is a natural person, provide the information specified in (a) through (f) of this Item with respect to such person(s).

(a) Name;

(b) Residence or business address;

(c) Present principal occupation or employment and the name, principal business and address of any corporation or other organization in which such employment is conducted;

(d) Whether or not, during the last five years, such person has been convicted in a criminal proceeding (excluding traffic violations or similar misdemeanors) and, if so, give the dates, nature of conviction, name and location of court, any penalty imposed, or other disposition of the case;

(e) Whether or not, during the last five years, such person was a party to a civil proceeding of a judicial or administrative body of competent jurisdiction and as a result of such proceeding was or is subject to a judgment, decree or final order enjoining future violations of, or prohibiting or mandating activities subject to, Federal or State securities laws or finding any violation with respect to such laws; and, if so, identify and describe such proceedings and summarize the terms of such judgment, decree or final order; and

(f) Citizenship.

Item 3—Source and Amount of Funds or Other Consideration. State the source and the amount of funds or other consideration used or to be used in making the purchases, and if any part of the purchase price is or will be represented by funds or other consideration borrowed or otherwise obtained for the purpose of acquiring, holding, trading or voting the securities, a description of the transaction and the names of the parties thereto. Where material, such information should also be provided with respect to prior acquisitions not previously reported pursuant to this regulation. If the source of all or any part of the funds is a loan made in the ordinary course of business by a bank, as defined in Section 3(a)(6) of the Act, the name of the bank shall not be made available to the public if the person at the time of filing the statement so requests in writing and files such request, naming such bank, with the Corporation. If the securities were acquired other than by purchase, describe the method of acquisition.

Item 4—Purpose of Transaction. State the purpose or purposes of the acquisition of securities of the bank. Describe any plans or proposals which the reporting persons may have which related or would result in:

(a) The acquisition by any person of additional securities of the bank, or the disposition of securities of the bank;

(b) An extraordinary corporate transaction, such as a merger, reorganization or liquidation, involving the bank or any of its subsidiaries;

(c) A sale or transfer of a material amount of assets of the bank or of any of its subsidiaries;

(d) Any change in the present board of directors or management of the bank, including any plans or proposals to change the number or term of directors or to fill any existing vacancies on the board;

(e) Any material change in the present capitalization or dividend policy of the bank;

(f) Any other material change in the bank's business or corporate structure;

(g) Changes in the bank's charter, bylaws or instruments corresponding thereto or other actions which may impede the acquisition of control of the bank by any person;

(h) Causing a class of securities of the bank to be delisted from a national securities exchange or to cease to be authorized to be quoted in an inter-dealer quotation system of a registered national securities association;

(i) A class of equity securities of the bank becoming eligible for termination of registration pursuant to Section 12(g)(4) of the Act; or

(j) Any action similar to any of those enumerated above.

Item 5—Interest in Securities of the Bank. (a) State the aggregate number and percentage of the class of securities identified pursuant to Item 1 (which may be based on the number of securities outstanding as contained in the most recently available filing with the Corporation by the bank unless the filing person has reason to believe such information is not current) beneficially owned (identifying those shares which there is a right to acquire) by each person named in Item 2. The above mentioned information should also be furnished with respect to persons who, together with any of the persons named in Item 2, comprise a group within the meaning of Section 13(d)(3) of the Act.

(b) For each person named in response to Paragraph (a), indicate the number of shares as to which there is sole power to vote or to direct the vote, shared power to vote or to direct the vote, sole power to dispose or to direct the disposition, or shared power to dispose or to direct the disposition. Provide the applicable information required by Item 2 with respect to each person with whom the power to vote or to direct the vote or to dispose or direct the disposition is shared.

(c) Describe any transactions in the class of securities reported on that were effected during the past sixty days or since the most recent filing on Form F–11, whichever is less, by the persons named in response to paragraph (a).

Instruction. The description of a transaction required by Item 5(c) shall include, but not necessarily be limited to (1) the identify of the person covered by Item 5(c) who effected the transaction, (2) the date of the transaction, (3) the amount of securities involved, (4) the price per share or unit, and (5) where and how the transaction was effected.

(d) If any other person is known to have the right to receive or the power to direct the receipt of dividends from, or the proceeds from the sale of, such securities, a statement to that effect should be included in response to this item and, if such interest relates to more than five percent of the class, such person should be identified. A listing of the shareholders of an investment company registered under the Investment Company Act of 1940 or the beneficiaries of an employee benefit plan, pension fund or endowment fund is not required.

(e) If applicable, state the date on which the reporting person ceased to be the beneficial owner of more than five percent of the class of securities.

Instruction. For computations regarding securities which represent a right to acquire an underlying security, see § 335.4(h)(5)(iv)(A)(*1*).

Item 6—Contracts, Arrangements, Understandings or Relationships with Respect to Securities of the Bank. Describe any contracts, arrangements, understandings or relationships (legal or otherwise) among the persons named in Item 2 and between such persons and any person with respect to any securities of the bank, including but not limited to transfer or voting of any of the securities, finder's fees, joint ventures, loan or option arrangements, puts or calls, guarantees of profits, division of profits or losses, or the giving or withholding of proxies, naming the persons with whom such contracts, arrangements, understandings or relationships have been entered into. Include such information for any of the securities that are pledged or otherwise subject to a contingency the occurrence of which would give another person voting power or investment power over such securities except that disclosure of standard default and similar provisions contained in loan agreements need not be included.

Item 7—Material to be Filed as Exhibits. The following shall be filed as exhibits: Copies of written agreements relating to the filing of joint acquisition statements as required by § 335.4(h)(2)(v) and copies of all written agreements, contracts, arrangements, understandings, plans, or proposals relating to (1) The borrowing of funds to finance the acquisition as disclosed in Item 3; (2) the acquisition of bank control, liquidation, sale of assets, merger, or change in business or corporate structure, or any other matter as disclosed in Item 4; and (3) the transfer or voting of the securities, finder's fees, joint ventures, options, puts, calls, guarantees of loans, guarantees against loss or of profit, or the giving or withholding of any proxy as disclosed in Item 6.

Signature. After reasonable inquiry and to the best of my knowledge and belief, I certify

that the information set forth in this statement is true, complete, and correct.

Date

Signature

Name/Title

The original statement shall be signed by each person on whose behalf the statement is filed or his authorized representative. If the statement is signed on behalf of a person by his authorized representative (other than an executive officer or general partner of the filing person), evidence of the representative's authority to sign on behalf of such person shall be filed with the statement, provided, however, that a power of attorney for this purpose which is already on file with the Corporation may be incorporated by reference. The name and any title of each person who signs the statement shall be typed or printed beneath the person's signature.

Attention: International misstatements or omissions of fact constitute Federal criminal violations (See 18 U.S.C. 1001).

12. A new § 335.4S would be added to read as follows:

§ 335.4S Short form ownership statement to be filed pursuant to § 335.4(h)(2)(ii) and amendments thereto filed pursuant to § 335.5(h)(3)(ii) of Part 335 (form F-11A).

Federal Deposit Insurance Corporation

Washington, D.C. 20429

Form F-11A

Short form ownership statement to be filed pursuant to § 335.4(h)(2)(ii) and amendments thereto filed pursuant to § 335.4(h)(3)(ii).

(Amendment No.)

(Name and address of issuing bank)

(Title of class of securites)

(CUSIP Number)

Special Instructions for Complying With Form F-11A

Under Sections 13(d), 13(g) and 23 of the Securities Exchange Act of 1934 and the rules and regulations thereunder, the Corporation is authorized to solicit the information required to be supplied by this schedule by certain security holders of certain banks.

Disclosure of the information specified in this schedule is mandatory, except for Social Security or I.R.S. identification numbers, disclosure of which is voluntary. The information will be used for the primary purpose of determining and disclosing the holdings of certain beneficial owners of certain equity securities. This statement will be made a matter of public record. Therefore, any information given will be available for inspection by any member of the public.

Because of the public nature of the information, the Corporation can utilize it for a variety of purposes, including referral to other governmental authorities or securities self-regulatory organizations for investigatory purposes or in connection with litigation involving the Federal securities laws or other civil, criminal or regulatory statutes or provisions. Social Security or I.R.S. identification numbers, if furnished, will assist the Corporation in identifying security holders and, therefore, is promptly processing statements of beneficial ownership of securities.

Failure to disclose the information requested by this schedule, except for Social Security or I.R.S. identification numbers, may result in civil or criminal action against the persons involved for violation of the Federal securities laws and rules promulgated thereunder.

General Instructions

A. Statements containing the information required by this form shall be filed not later than February 14 following the calendar year covered by the statement or within the time specified in § 335.4(h)(2)(ii)(B), if applicable.

B. Information contained in a form which is required to be filed by the Securities and Exchange Commission's rules under Section 13(f) of the Act [15 U.S.C. 78m(f)] for the same calendar year as that covered by a statement on this form may be incorporated by reference in response to any of the items of this form. If such information is incorporated by reference in this form, copies of the relevant pages of such form shall be filed as an exhibit to this form.

C. The item numbers and captions of the items shall be included but the text of the items is to be omitted. The answers to the items shall be so prepared as to indicate clearly the coverage of the items without referring to the text of the items. Answer every item. If an item is inapplicable or the answer is in the negative, so state.

Item 1(a)—Name of the bank issuer:

Item 1(b)—Address of Bank's Principal Executive Offices:

Item 2(a)—Name of Person Filing:

Item 2(b)—Address of Principal Business Office, or if None, Residence:

Item 2(c)—Citizenship:

Item 2(d)—Title of Class of Securities:

Item 2(e)—CUSIP Number:

Item 3—If this statement is filed pursuant to § 335.4(h)(2)(i), or § 335.4(h)(3)(ii), check whether the person filing is a:

(a) [ ] Broker or Dealer registered under Section 15 of the Act

(b) [ ] Bank as defined in Section 3(a)(6) of the Act

(c) [ ] Insurance Company as defined in Section 3(a)(19) of the Act

(d) [ ] Investment Company registered under Section 8 of the Investment Company Act

(e) [ ] Investment Adviser registered under Section 203 of the Investment Advisers Act of 1940

(f) [ ] Employee Benefit Plan, Pension Fund which is subject to the provisions of the Employee Retirement Income Security Act of 1974 or Endowment Fund; see § 335.4(h)(2)(ii)(A)(*2*)(*vi*)

(g) [ ] Parent Holding Company, in accordance with § 335.4(h)(2)(ii)(A)(*2*)(*vii*) (Note: See Item 7)

(h) [ ] Group, in accordance with § 335.4(h)(2)(ii)(A)(*2*)(*viii*)

Item 4—Ownership:

If the percent of the class owned, as of December 31 of the year covered by the statement, or as of the last day of any month described in § 335.4(h)(2)(ii)(B), if applicable, exceeds five percent, provide the following information as of that date and identify those shares which there is a right to acquire.

(a) Amount Beneficially Owned:

(b) Percent of Class:

(c) Number of shares as to which such person has:

(i) sole power to vote or to direct the vote———

(ii) shared power to vote or to direct the vote———

(iii) sole power to dispose or to direct the disposition of———

(iv) shared power to dispose or to direct the disposition of———

Instruction: For computations regarding securities which represent a right to acquire an underlying security see § 335.4(h)(5)(iv)(A).

Item 5—Ownership of Five Percent or Less of a Class.

If this statement is being filed to report the fact that as of the date hereof the reporting person has ceased to be the beneficial owner of more than five percent of the class of securities, check the following [ ].

Instruction: Dissolution of a group requires a response to this item.

Item 6—Ownership of More than Five Percent on Behalf of Another Person.

If any other person is known to have the right to receive or the power to direct the receipt of dividends from, or the proceeds from the sale of, such securities, a statement of that effect should be included in response to this item and, if such interest relates to more than five percent of the class, such person should be identified. A listing of the shareholders of an investment company registered under the Investment Company Act of 1940 or the beneficiaries of employee benefit plan, pension fund or endowment fund is not required.

Item 7—Identification and Classification of the Subsidiary Which Acquired the Security

Being Reported on By the Parent Holding Company.

If a parent holding company has filed this schedule, pursuant to § 335.4(h)(2)(ii)*(A)(2)(vii)* so indicate under Item 3(g) and attach an exhibit stating the identity and the Item 3 classification of the relevant subsidiary. If a parent holding company has filed this schedule pursuant to § 335.4(h)(2)(iii), attach an exhibit stating the identification of the relevant subsidiary.

Item 8—Identification and Classification of Members of the Group.

If a group has filed this schedule, pursuant to § 335.4(h)(2)(ii)*(A)(2)(viii)*, so indicate under Item 3(h) and attach an exhibit stating the identity and Item 3 classification of each member of the group. If a group has filed this schedule pursuant to § 335.5(h)(2)(iii), attach an exhibit stating the identity of each member of the group.

Item 9—Notice of Dissolution of Group.

Notice of dissolution of a group may be furnished as an exhibit stating the date of the dissolution and that all further filings with respect to transactions in the security reported on will be filed, if required, by members of the group, in their individual capacity. See Item 5.

Item 10—Certification.

The following certification shall be included if the statement is filed pursuant to § 335.4(h)(2)(ii):

By signing below I certify that, to the best of my knowledge and belief, the securities referred to above were acquired in the ordinary course of business and were not acquired for the purpose of and do not have the effect of changing or influencing the control of the issuer of such securities and were not acquired in connection with or as a participant in any transactions having such purpose or effect.

Signature. After reasonable inquiry and to the best of my knowledge and belief, I certify that the information set forth in this statement is true, complete, and correct.

Date

Signature

Name/Title

The original statement shall be signed by each person on whose behalf the statement is filed or the person's authorized representative. If the statement is signed on behalf of a person by the person's authorized representative (other than an executive officer or general partner of the filing person), evidence of the representative's authority to sign on behalf of such person shall be filed with the statement, provided, however, that a power of attorney for this purpose which is already on file with the Commission may be incorporated by reference. The name and any title of each person who signs the statement shall be typed or printed beneath the person's signature.

Note.—Six copies of this statement, including all exhibits, should be filed with the Commission.

Attention: Intentional misstatements or omissions of fact constitute Federal criminal violations (See 18 U.S.C. 1001).

* * * * *

10. In § 335.51, Items 3(b), 5(d), 5(e), 5(f), 5(g), 6, 7, 8(e) and 8(f) would be amended by revising and adding as follows:

§ 335.51. Form for proxy statement; statement where management does not solicit proxies (Form F–5).

* * * * *

Item 3 * * *

(b) * * *

(6) If any such solicitation is terminated pursuant to a settlement between the bank and any other participant in such solicitation, describe the terms of such settlement, including the cost or anticipated cost thereof to the bank.

Instructions: 1. With respect to solicitations subject to § 335.5(i), costs and expenditures within the meaning of this Item 3 shall include fees for attorneys, accountants, public relations or financial advisers, solicitors, advertising, printing, transportation, litigation and other costs incidental to the solicitation, except that the bank may exclude the amount of such costs represented by the amount normally expended for a solicitation for an election of directors in the absence of a contest, and costs represented by salaries and wages of regular employees and officers, provided a statement to the effect is included in the proxy statement.

2. The information required pursuant to Paragraph (6) of Item 3(b) should be included in any amended or revised proxy statement or other soliciting materials relating to the same meeting or subject matter furnished to security holders by the bank subsequent to the date of settlement.

* * * * *

Item 5 * * *

(d) Furnish the following information to the extent known by the persons on whose behalf the solicitation is made, as of the most recent practicable date, in substantially the tabular form indicated, with respect to any person (including any "group" as that term is used in Section 13(d)(3) of the Securities Exchange Act of 1934) who is known to the bank to be the beneficial owner of more than five percent of any class of the bank's voting securities. Show in Column (3) the total number of shares beneficially owned and in Column (4) the percent of class so owned. Of the number of shares shown in Column (3), indicate by footnote or otherwise, the amount known to be shares with respect to which such listed beneficial owner has the right to acquire beneficial ownership, as specified in § 335.4(h)(5)(iv)(A).

(1) Title of Class	(2) Name and Address of Beneficial Owner	(3) Amount and Nature of Beneficial Ownership	(4) Percent of Class

(e) Furnish the following information, as of the most recent practicable date, in substantially the tabular form indicated, as to each class of equity securities of the bank or any of its parents or subsidiaries other than directors qualifying shares, beneficially owned by all directors and nominees, naming them and directors and officers of the bank as a group, without naming them. Show in Column (2) the total number of shares beneficially owned and in Column (3) the percent of class so owned. Of the number of shares shown in Column (2), indicate, by footnote or otherwise, the amount of shares with respect to which such persons have the right to acquire beneficial ownership as specified in § 335.4(h)(5)(iv)(A).

(1) Title of Class	(2) Amount and nature of beneficial ownership	(3) Percent of class

(f) If, to the knowledge of the persons on whose behalf of solicitation is made, a change in control of the bank has occurred since the beginning of its last fiscal year, state the name of the person(s) who acquired such control, the amount and the source of the consideration used by such person or persons; the basis of the control, the date and a description of the transaction(s) which resulted in the change of control and the percentage of voting securities of the bank now beneficially owned directly or indirectly by the person(s) who acquired control; and the identity of the person(s) from whom control was assumed. If the source or any part of the consideration used is a loan made in the ordinary course of business by a bank as defined by Section 3(a)(6) of the Act, the identity of such bank shall be omitted provided a request for confidentiality has been made pursuant to Section 13(d)(1)(B) of the Act by the person(s) who acquired control. In lieu thereof, the material shall indicate that the identity of the bank has been so omitted and filed separately with the Corporation.

Instructions. 1. State the terms of any loans or pledges obtained by the new control group for the purpose of acquiring control, and the names of the lenders or pledgees.

2. Any arrangements or understandings among members of both the former and new control groups and their associates with respect to election of directors or other matters shall be described.

(g) Describe any arrangements, know to the bank including any pledge by any person of securities of the bank or any of its parents, the operation of which may at a subsequent date result in a change in control of the bank.

Instructions. 1. The percentages are to be calculated on the basis of the amount of outstanding securities, excluding securities held by or for the account of the bank or its subsidiaries, plus securities deemed outstanding pursuant to § 335.4(h)(5)(iv)(A).

2. For the purpose of this item, beneficial ownership shall be determined in accordance with § 335.4(h)(5). Include such additional subcolumns or other appropriate explanation of Column (3) necessary to reflect amounts as to which the beneficial owner has (1) sole voting power, (2) shared voting power, (3) sole investment power, (4) shared investment power.

3. The bank shall be deemed to know the contents of any statements filed with the Corporation pursuant to Section 13(d) of the Act. When applicable, a bank may rely upon information set forth in such statements unless the bank knows or has reason to believe that such information is not complete or accurate or that a statement or amendment should have been filed and was not.

4. For purposes of furnishing information pursuant to paragraph (a), the bank may indicate the source and date of such information.

5. Where more than one beneficial owner is known to be listed for the same securities, appropriate disclosure should be made to avoid confusion.

6. Paragraph (g) does not require a description of ordinary default provisions contained in the charter, trust indentures or other governing instruments relating to securities of the bank.

Item 6—Directors and Principal Officers. If action is to be taken with respect to election of directors, furnish the following information, in tabular form to the extent practicable, with respect to each person nominated for election as a director and each person whose term of office will continue after the meeting.

(a) *Identification of directors.* List the names and ages of all directors of the bank, and all persons nominated or chosen to become directors; indicate all positions and offices with the bank held by each such person; state the term of office as director and any period(s) during which the person has served as such; briefly describe any arrangement or understanding between the person and any other person or persons (naming such person(s)) pursuant to which the person was or is to be selected as a director or nominee.

Instructions. 1. Do not include arrangements or understandings with directors or officers of the bank acting solely in their capacities as such.

2. No nominee or person chosen to become a director or who has not consented to act as such should be named in response to this item. In this regard, see § 335.5(d).

3. No information need be given respecting any director whose term of office as a director will not continue after the meeting to which the statement relates.

4. In connection with action to be taken concerning the election of directors, if fewer nominees are named than the number fixed by or pursuant to the governing instruments, state the reasons for this procedure and that the proxies cannot be voted for a greater number of persons than the number of nominees named.

5. With regard to proxy statements in connection with action to be taken concerning the election of directors, if the solicitation is made by persons other than management, information should be given as to nominees of the persons making the solicitation. In all other instances, information should be given as to directors and persons nominated for election or chosen by management to become directors.

(b) *Identification of principal officers.* List the names and ages of all principal officers of the bank and all persons chosen to become principal officers; indicate all positions and offices with the bank held by each such person; state the person's term of office as officer and the period during which the person has served as such and briefly describe any arrangement or understanding between the person and any other person pursuant to which the person was selected as an officer.

Instructions. 1. Do not include arrangements or understandings with directors or officers of the bank acting solely in their capacities as such.

2. No person chosen to become a principal officer who has not consented to act as such should be named in response to this item.

(c) *Identification of certain significant employees.* Where the bank employs persons such as special consultants or attorneys who are not principal officers, but who make or are expected to make significant contributions to the business of the bank, such persons should be identified and their background disclosed to the same extent as in the case of principal officers.

(d) *Family relationships.* State the nature of any family relationship between any director, principal officer, or person nominated or chosen by the bank to become a director or principal officer.

Instruction. The term "family relationship" means any relationship by blood, marriage, or adoption, not more remote than first cousin.

(e) *Business experience.* (1) Give a brief account of the business experience during the past five years of each director, person nominated or chosen to become a director or principal officer, and each person named in answer to paragraph (c), including the person's principal occupations and employment during that period and the name and principal business of any corporation or other organization in which such occupations and employment were carried on. When a principal officer or person named in response to paragraph (c) has been employed by the bank or a subsidiary of the bank for less than five years, a brief explanation should be included as to the nature of the responsibilities undertaken by the individual in prior positions to provide adequate disclosure of his prior business experience. The requirement is information relating to the level of the person's professional competence which may include, depending upon the circumstances, such specific information as the size of the operation supervised.

(2) *Directorships.* Indicate any other directorships held by each director or person nominated or chosen to become a director in any company with a class of securities registered pursuant to Section 12 of the Exchange Act.

(f) *Involvement in certain legal proceedings.* Describe any of the following events which occurred during the past five years and which are material to an evaluation of the ability or integrity of any director, person nominated to become a director or principal officer of the bank:

(1) A petition under the Bankruptcy Act or any State insolvency law was filed by or against, or a receiver, fiscal agent or similar officer was appointed by a court for the business or property of such person, or any partnership in which the person was a general partner at or within two years before the time of such filing, or any corporation or business association of which the person was a principal officer at or within two years before the time of such filing;

(2) The person was convicted in a criminal proceeding or is a named subject of a pending criminal proceeding (excluding traffic violations and other minor offenses);

(3) The person was the subject of any order, judgment, or decree, not subsequently reversed, suspended or vacated, of any court of competent jurisdiction permanently or temporarily enjoining the person from, or otherwise limiting the following activities:

(i) Acting as an investment adviser, underwriter, broker or dealer in securities, or as an affiliated person, director or employee of any investment company, bank, savings and loan association or insurance company, or engaging in or continuing any conduct or practice in connection with such activity;

(ii) Engaging in any type of business practice; or

(iii) Engaging in any type of activity in connection with the purchase or sale of any security or in connection with any violation of Federal or State securities laws.

(4) Such person was the subject of any order, judgment or decree, not subsequently reversed, suspended or vacated, of any Federal or State authority barring, suspending or otherwise limiting for more than 60 days the right of such person to engage in any activity described in subparagraph (3), above, or to be associated with persons engaged in any such activity.

(5) Such person was found by a court of competent jurisdiction in a civil action or by a government authority to have violated any Federal or State securities law, and the judgment in such civil action or finding by the government authority has not been subsequently reversed, suspended, or vacated.

Instructions. 1. For purposes of computing the five year period referred to in this paragraph, the date of a reportable event shall be deemed the date on which the final order, judgment or decree was entered, or the date on which any rights of appeal from preliminary orders, judgments, or decrees have lapsed. With respect to bankruptcy petitions, the computation date shall be the date of filing for uncontested petitions or the date upon which approval of a contested petition became final.

2. If any event specified in this Subparagraph (f) has occurred and information in regard thereto is omitted on the ground that it is not material, the bank may furnish to the Corporation, at the time

preliminary materials are filed pursuant to § 335.5(f), as supplemental information and not as part of the proxy statement materials to which the omission relates, a description of the event and a statement of the reasons for the omission of information in regard thereto.

3. The bank is permitted to explain any mitigating circumstances associated with events reported pursuant to this paragraph.

4. No information need be given respecting any director whose term of office as a director will not continue after the meeting to which the statement relates.

(g) *Relationships with affiliates and others.* Describe any of the following relationships that exist:

(1) The nominee or director has during the past five years had a principal occupation or employment with any of the bank's parents, subsidiaries or other affiliates;

(2) The nominee or director is related to a principal officer of any of the bank's parents, subsidiaries or other affiliates by blood, marriage or adoption (except relationships more remote than first cousin);

(3) The nominee or director is, or has within the last two full fiscal years been, an officer, director or employee of, or owns, or has within the last two full fiscal year owned, directly or indirectly, in excess of one (1) percent equity interest in any firm, corporation or other business or professional entity;

(i) Which has made payments to the bank or its subsidiaries for property or services during the bank's last full fiscal year in excess of one (1) percent of the bank's consolidated gross revenues for its last full fiscal year;

(ii) Which proposes to make payments to the bank or its subsidiaries for property or services during the current fiscal year in excess of one (1) percent of the bank's consolidated gross revenues for its last full fiscal year;

(iii) To which the bank or its subsidiaries was indebted at any time during the bank's last fiscal year in an aggregate amount in excess of one (1) percent of the bank's total consolidated assets at the end of such fiscal year, or $5,000,000, whichever is less;

(iv) To which the bank or its subsidiaries has made payments for property or services during such entity's last fiscal year in excess of one (1) percent of such entity's gross revenues for its last full fiscal year;

(v) To which the bank or its subsidiaries proposes to make payments for property services during such entity's current fiscal year in excess of one (1) percent of such entity's consolidated gross revenues for its last full fiscal year;

(vi) In order to determine whether payments made or proposed to be made exceed one (1) percent of the consolidated gross revenues of any entity other than the bank for such entity's last full fiscal year, it is appropriate to rely on information provided by the nominee or director;

(vii) In calculating payments for property and services the following may be excluded:

(A) Payments where the rates or charges involved in the transaction are determined by competitive bids, or the transaction involves the rendering of services as a public utility at rates or charges fixed in conformity with law or governmental authority;

(B) Payments which arise solely from the ownership of securities of the issuer and no extra or special benefit not shared on a pro rata basis by all holders of the class of securities is received;

(viii) In calculating indebtedness for purposes of Subparagraph (iii) above, debt securities which have been publicly offered, admitted to trading on a national securities exchange, or quoted on the automated quotation system of a registered securities association may be excluded.

(4) That the nominee or director is a member or employee of, or is associated with, a law firm which the issuer has retained in the last two full fiscal years or proposes to retain in the current fiscal year;

(5) That the nominee or director is a director, partner, officer or employee of any investment banking firm that has performed services for the bank other than as a participating underwriter in a syndicate in the last two full fiscal years or which the bank proposes to have perform services in the current year; or

(6) That the nominee or director is a control person of the bank other than solely as a director of the bank.

(7) In addition, the bank should disclose any other relationships it is aware of between the director or nominee and the bank or its management which are substantially similar in nature and scope to those relationships listed above.

Note.—In the Corporation's view, where significant business or personal relationships exist between the director or nominee and the bank or its management, including, but not limited to, those as to which disclosure would be required pursuant to this Item 6(g), characterization of a director or nominee by any "label" connoting a lack of relationship to the bank and its management may be materially misleading.

(h) *Committees.* (1) State whether or not the bank has standing audit, nominating and compensation committees of the board of directors, or committees performing similar functions. If the bank has such committees, however designated, identify each committee member, state the number of committee meetings held by each such committee during the last fiscal year and describe briefly the functions performed by such committees.

If the bank has a nominating or similar committee, state whether the Committee will consider nominees recommended by shareholders and, if so, describe the procedures to be followed by shareholders in submitting such recommendations.

(i) *Director attendance.* State the total number of meetings of the board of directors (including regularly scheduled and special meetings) which were held during the last full fiscal year. Name each incumbent director who during the last full fiscal year attended fewer than 75 percent of the aggregate of (1) the total number of meetings of the board of directors (held during the period for which he has been a director) and (2) the total number of meetings held by all committees of the board on which he served (during the periods that he served).

(j) *Director resignations.* If a director has resigned or declined to stand for re-election to the board of directors since the date of the last annual meeting of shareholders because of a disagreement with the bank on any matter relating to the bank's operations, policies or practices, and if the director has furnished the bank with a letter describing such disagreement and requesting that the matter be disclosed, the bank shall state the date of resignation or declination to stand for re-election and summarize the director's description of the disagreement.

If the bank believes that the description provided by the director is incorrect or incomplete, it may include a brief statement presenting its views of the disagreement.

Item 7—Remuneration and Other Transaction With Management and Others. Furnish the information called for by this item if action is to be taken with respect to (i) the election of directors, (ii) any bonus, profit sharing or other remuneration plan, contract or arrangement in which any director, nominee for election as a director, or officer of the bank will participate, (iii) any pension or retirement plan in which any such person will participate, or (iv) the granting or extension to any such person of any options, warrants or rights to purchase any securities, other than warrants or rights issued to security holders, as such, on a pro rata basis. However, if the solicitation is made on behalf of persons other than the management, the information required need be furnished only as to nominees for election as directors and as to their associates.

(a) *Current remuneration.* Furnish the information required in the table below in substantially the tabular form specified, concerning all remuneration of the following persons and groups for services in all capacities to the bank during the bank's last fiscal year:

(1) *Five principal officers or directors.* Each of the five most highly compensated principal officers or directors of the bank as to whom the total remuneration required to be disclosed in Columns C1 and C2 below would exceed $50,000, naming each such person; and

(2) *All principal officers and directors.* All principal officers and directors of the bank as a group, stating the number of persons in the group without naming them.

(3) *Specified tabular format: Remuneration table:*

(A) Name of individual or number of persons in group	(B) Capacities in which served	(C) Cash and cash equivalent forms of remuneration		(D) Aggregate of contingent forms of remuneration
		(C1) Salaries, fees, directors' fees, commissions, and bonuses	(C2) Securities or property insurance benefits or reimbursement, personal benefits	

Instructions to Item 7(a). 1. Columns A and B. Persons subject to this item.

(a) This item applies to any person who was a principal officer, or director of the bank at any time during the fiscal year. However, information need not be given for any portion of the period during which such person was not a principal officer, or director of the bank, provided a statement to that effect is made.

(b) The terms "principal officer" and "officer" of a bank are defined in § 335.2(s).

(c) For the purposes of this Item 7, the term "bank" shall include the bank and all its subsidiaries.

2. *Column C* (a) Column C1 shall include all cash remuneration distributed or accrued in the form of salaries, fees, directors' fees, commissions and bonuses.

(b) Column C2 should include the following: (i) *Securities or property.* Where any of the specified persons or group (A) exercises any option, right or similar election in connection with any contract, agreement, plan or arrangement, or (B) becomes entitled without further contingencies to retain securities or property, state the spread between the acquisition price, if any, and the fair market price of all securities or property acquired under any contract, agreement, plan or arrangement. The fair market price of any such securities or property shall be determined as of the date during the fiscal year that either of the events in (A) or (B) of this paragraph occurs, or if both events are contemplated, the date of the latter event.

(ii) *Personal benefits.* (A) The value of personal benefits which are not directly related to job performance, which are furnished by the bank directly or through third parties to each of the specified persons and group, or benefits furnished by the bank to other persons which directly benefit the specified persons. Such personal benefits shall include the cost of any premiums or benefits paid by the bank for any life or health insurance policy or health plan of which the bank is not the sole beneficiary. Such benefits shall be valued on the basis of the aggregate actual cost to the bank. Information need not be furnished for any such benefit provided by the bank which does not discriminate in favor of officers or directors and which is available generally to all salaried employees.

(B) No disclosure need be included as to any person named in the remuneration table if the aggregate amount of all personal benefits to such persons did not exceed $5,000. If disclosure of such amounts is not made, a statement to that effect should be added in a footnote to the table.

(C) If the bank cannot determine the actual cost of personal benefits for a specified person without unreasonable effort or expense, include a reasonable estimate of the cost of the personal benefit to the bank. If the bank cannot reasonably allocate the extent to which the benefit is personal, include the aggregate cost to the bank and estimate the percentage of cost attributable to personal use. If an estimate is made, disclose the factors upon which the estimate is based.

(D) Please provide in a statement following the table a description of the bank's policies and practices with respect to providing personal benefits to officers, directors or principal shareholders. Describe the type of benefits provided and the basis for selection of the recipients.

3. *Column D.* Column D shall include remuneration of the specified persons and group in whole or in part for services rendered during the fiscal year (including the forms of remuneration described in paragraphs (a) through (c) below) if the distribution of such remuneration or the unconditional vesting or measurement of benefits thereunder is subject to future events.

(a) *Pension or retirement plans; annuities; employment contracts; deferred compensation plans.* (i) As to each of the specified persons and group, the amount expensed for financial reporting purposes by the bank for the year which represents the contribution, payment or accrual for the account of any such person or group under any existing pension or retirement plans, annuity contracts, deferred compensation plans or any other similar arrangements. Such amounts should be reflected as remuneration for the fiscal year under all such plans or arrangements, including plans qualified under the Internal Revenue Code, unless, in the case of a defined benefit or actuarial plan, the amount of the contribution, payment or accrual in respect of a specified person is not and cannot readily be separately or individually calculated by the regular actuaries for the plan.

(ii) If amounts are excluded from the table pursuant to the previous provision, include a footnote to the table (A) stating such fact; (B) disclosing the percentage which the aggregate contributions to the plan bears to the total remuneration of plan participants covered by such plan; and (C) briefly describing the remuneration covered by the plan.

(b) *Incentive and compensation plans and arrangements.* (i) With respect to stock options, stock appreciation rights plans, phantom stock plans and any other incentive or compensation plan or arrangement pursuant to which the measure of benefits is based on objective standards or on the value of securities of the bank or another person, granted, awarded or entered into at any time in connection with services to the bank, include as remuneration of each of the specified persons and group any attributable amount expensed by the bank for financial reporting purposes for the fiscal year as remuneration for any such specified person or group.

(ii) Where amounts are expensed and reported in the remuneration table, and amounts are credited in a subsequent year in connection with the same plan or arrangement for any proper reason, including a decline in the market price of the securities, such credit may be reflected as a reduction of the remuneration reported in Column D. If amounts credited are reflected in the table, include a footnote stating the amount of the credit and briefly describe such treatment.

(iii) The term "Options" as used in this Item 7 includes all options, warrants or rights, other than those issued to security holders as such on a pro rata basis.

(c) *Stock purchase plans; profit sharing and thrift plans.* Include the amount of any contribution, payment or accrual for the account of each of the specified persons and group under any stock purchase, profit sharing, thrift or similar plan, which has been expensed during the fiscal year by the bank for financial reporting purposes. Amounts reflecting contributions under plans qualified under the Internal Revenue Code may not be excluded on a pro rata basis.

4. *Other permitted disclosure.* The bank may provide additional disclosure through a footnote to the table, through additional columns, or otherwise, describing the components of aggregate remuneration in such greater detail as is appropriate.

5. *Definition of "plan".* The term "plan" as used in this Part 335 includes all plans, contracts, authorizations, or arrangements, whether or not set forth in any formal document.

[End of Instructions to Item 7(a)]

(b) *Proposed remuneration.* Briefly describe all remuneration payments proposed to be made in the future, pursuant to any existing plan or arrangement to the persons and group specified in Item 7(a). As to defined benefit or actuarial plans, with respect to which amounts are not included in the table pursuant to Instruction 3(a) to Item 7(a), include a separate table showing the estimated annual benefits payable upon retirement to persons in specified remuneration and years-of-service classifications.

Instruction. Information need not be furnished with respect to any group life, health, hospitalization, or medical reimbursement plans which do not discriminate in favor of officers or directors of the bank and which are available generally to all salaried employees.

(c) *Options, warrants or rights.* Furnish the following information as to all options to purchase any securities from the bank which were granted to or exercised by the following

persons since the beginning of the bank's last fiscal year, and as to all options held by such persons as of the latest practicable date (i) each director or officer named in answer to paragraph (a)(1), naming each such person; and (ii) all directors and officers of the bank as a group, without naming them:

(1) As to options granted during the period specified state (i) the title and aggregate amount of securities called for: (ii) The average option price per share; and (iii) if the option price was less than 100 percent of the market value of the security on the date of grant, such fact and the market price on such date shall be disclosed.

(2) As to the options exercised during the period specified, state (1) the title and aggregate amount of securities purchased;

(ii) the aggregate purchase price; and (iii) the aggregate market value of the securities purchase on the date of purchase.

(3) As to all unexercised options held as of the latest practicable date (state date), regardless of when such options were granted, state (i) the title and aggregate amount of securities called for; and (ii) the average option price per share.

Instructions. 1. The term "options" as used in this paragraph (c) includes all options, warrants or rights, other than those issued to security holders as such on a pro rata basis. Where the average option price per share is called for, the weighted average price per share shall be given.

2. The extension, regranting or material amendment of options shall be deemed the granting of options within the meaning of this paragraph.

3. (i) Where the total market value on the granting dates of the securities called for by all options granting during the period specified does not exceed $10,000 for any officer or director named in answer to paragraph (a)(1), or $40,000 for all officers and directors as a group, this item need not be answered with respect to options granted to such person or group.

(ii) Where the total market value on the dates of purchases of all securities purchased through the exercise of options during the period specified does not exceed $10,000 for any such person or $40,000 for such group, this item need not be answered with respect to options exercised by such person or group.

(iii) Where the total market value as of the latest practicable date of the securities called for by all options held at such time does not exceed $10,000 for any such person or $40,000 for such group, this item need not be answered with respect to options held as of the specified date by such person or group.

4. If the options relate to more than one class of securities the information shall be given separately for each such class.

5. The information called for by this Item 7(c) may be furnished in the form of the table set forth in the Option Disclosure Instruction at the end of § 335.51.

(d) *Indebtedness of management.* (1) State as to each of the following specified persons ("specified persons"), who was indebted to the bank at any time since the beginning of its last fiscal year: (i) The largest aggregate amount of indebtedness (in dollar amounts and as a percentage of total equity capital accounts at the time), including extensions of credit or overdrafts, endorsements and guarantees outstanding at any time during such period; (ii) the nature of the indebtedness and of the transaction in which it was incurred; (iii) the amount thereof outstanding as of the latest practicable date; and (iv) the rate of interest paid or charged thereon:

(A) Each director or principal officer of the bank;

(B) Each nominee for election as a director;

(C) Each security holder who is known to the bank to own of record or beneficially more than five percent of any class of the bank's voting securities ("principal security holder"); and

(D) Each associate of any such director, principal officer or nominee or principal security holder.

Instructions. 1. Include the name of such person whose indebtedness is described and the nature of the relationship by reason of which the information is required to be given.

2. Generally, no information need be given under this Item 7(d) unless any of the following are present:

(a) The extension(s) of credit were not made on substantially the same terms, including interest rates, collateral and repayment terms as those prevailing at the time for comparable transactions with other than the specified persons.

(b) The extension(s) of credit were not made in the ordinary course of business.

(c) The extension(s) of credit have involved or presently involve more than a normal risk of collectibility or other unfavorable features including the restructuring of an extension of credit, or a delinquency as to payment of interest or principal.

(d) The aggregate amount of extensions of credit outstanding at any time from the beginning of the last fiscal year to date to a specified person together with his associates, exceeded 10% of the equity capital accounts of the bank at that time or $5 million, whichever is less.

(2) If aggregate extensions of credit to the specified persons as a group, exceeded 20 percent of the equity capital accounts of the bank at any time since the beginning of the last fiscal year, (i) the aggregate amount of such extensions of credit shall be disclosed, and (ii) a statement shall be included, to the extent applicable, that the bank has had and expects to have in the future, banking transactions in the ordinary course of its business with directors, officers, principal stockholders, and their associates, on the same terms, including interest rates and collateral on loans, as those prevailing at the same time for comparable transactions with others and did not involve more than the normal risk of collectibility or present other unfavorable features. For the purpose of determining "aggregate extensions of credit" in this paragraph, transactions which are exempted from disclosure pursuant to this item may be excluded.

(3) If any indebtedness required to be described arose under Section 16(b) of the Act and has had not been discharged by payment, state the amount of any profit realized, that such profit will inure to the benefit of the bank and whether suit will be brought or other steps taken to recover such profit. If in the opinion of counsel a question reasonably exists as to the recoverability of such profit, it will suffice to state all facts necessary to describe the transaction, including the prices and number of shares involved.

(e) *Transactions with management.* Describe briefly any transactions since the beginning of the bank's last fiscal year or any presently proposed transactions, to which the bank was or is to be a party, in which any of the following persons had or is to have a direct or indirect material interest, naming such person and stating his relationship to the bank, the nature of his interest in the transaction and, where practicable, the amount of such interest:

(1) Any director or principal officer of the bank;

(2) Any nominee for election as a director;

(3) Any security holder who is known to the bank to own of record or beneficially more than five percent of any class of the bank's voting securities; and

(4) Any associate of any of the foregoing persons.

Instructions. No information need be given in response to this Item 7(e) as to any remuneration or other transaction reported in response to Item 7(a), (b), (c), or (d), or as to any transaction with respect to which information may be omitted pursuant to Instruction 3(a)(i) to Item 7(a), the instruction to Item 7(b), Instruction 3 to Item 7(c) or Instruction 2 to Item 7(d).

2. No information need be given in answer to this Item 7(e) as to any transaction where:

(a) The rates or charges involved in the transaction are determined by competitive bids, or the transaction involves the rendering of services as a common or contract carrier, or public utility, at rates or charges fixed in conformity with law or governmental authority;

(b) The transaction involves services as a bank depositary of funds, transfer agent, registrar, trustee under a trust indenture, or similar services;

(c) The amount involved in the transaction or series of similar transactions, including all periodic installments in the case of any lease or other agreement providing for periodic payments or installments, does not exceed $40,000; or

(d) The interest of the specified person arises solely from the ownership of securities of the bank and the specified person receives no extra or special benefit not shared on a pro rata basis by all holders of securities of the class.

(3) It should be noted that this item calls for disclosure of indirect, as well as direct, material interests in transaction. A person who has a position or relationship with a firm, corporation, or other entity, which engages in a transaction with the bank or its subsidiaries may have an indirect interest in such transaciton by reason of such position or relationship. However, a person shall be deemed not to have a material indirect interest in a transaction within the meaning of this Item 7(e) where:

(a) The interest arises only (i) from such person's position as a director of another corporation or organization (other than a partnership) which is a party to the transaction, or (ii) from the direct or indirect ownership by such person and all other persons specified in subparagraphs (1) through (4) above, in the aggregate, of less than a 10 percent equity interest in another person (other than a partnership) which is a party to the transaction, or (iii) from both such position and ownership;

(b) The interest arises only from such person's position as a limited partner in a partnership in which he and all other persons specified in (1) through (4) above had an interest of less than 10 percent; or

(c) The interest of such person arises solely from the holding of an equity interest (including a limited partnership interest, but excluding a general partnership interest), or a creditor interest in another person which is a party to the transaction with the bank or any of its subsidiaries and the transaction is not material to such other person.

4. The amount of the interest of any specified person shall be computed without regard to the amount of the profit or loss involved in the transaction. Where it is not practicable to state the approximate amount of the interest, the approximate amount involved in the transaction shall be indicated.

5. In describing any transaction involving the purchase or sale of assets by or to the bank or any of its subsidiaries, otherwise than in the ordinary course of business, state the cost of the assets to the purchaser and, if acquired by the seller within two years prior to the transaction the cost thereof to the seller. Indicate the principle followed in determining the banks purchase or sale price and the name of the persons making such determination.

6. Include the name of each person whose interest in any transaction is described and the nature of the relationship by reason of which such interest is required to be described. Where it is not practicable to state the approximate amount of the interest, the approximate amount involved in the transactions shall be indicated.

7. Information shall be furnished in answer to this item with respect to transactions not excluded above which involve remuneration from the bank or its subsidiaries, directly or indirectly, to any of the specified persons for services in any capacity unless the interest of such persons arises solely from the ownership individually and in the aggregate of less than 10 percent of any class of equity securities of another corporation furnishing the services to the bank.

8. The foregoing instructions specify certain transactions and interests as to which information may be omitted in answering this item. There may be situations where, although the foregoing instructions do not expressly authorize nondisclosure, the interest of a specified person in the particular transaction or series of transactions is not a material interest. In that case, information regarding such interest and transaction is not required to be disclosed in response to this item. The materiality of any interest or transaction, is to be determined on the basis of the significance of the information to investors in light of all of the circumstances of the particular case. The importance of the interest to the person having the interest, the relationship of the parties to the transaction to each other and the amount involved in the transaction are among the factors to be considered in determining the significance of the information to investors.

(f) *Transactions with pension or similar plans.* Describe briefly any transactions since the beginning of the bank's last fiscal year or presently proposed transactions, to which any pension, retirement, savings or similar plan provided by the bank, or any of its parents or subsidiaries was or is to be a party, in which any of the following persons had or is to have a direct or indirect material interest, naming such person and stating his relationship to the bank, the nature of his interest in the transaction and, where practicable, the amount of such interest:

(1) Any director or principal officer of the bank;

(2) Any nominee for election as a director;

(3) Any security holder who is known to the bank to own of record or beneficially more than five (5) percent of the outstanding voting securities of the bank;

(4) Any associate of any of the foregoing persons; and

(5) The bank or any of its subsidiaries.

Instructions. 1. Instructions 2, 3, 4 and 5 to Item 7(e) shall apply to this Item 7(f).

2. Without limiting the general meaning of the term "transaction" there shall be included in answer to this Item 7(f) any remuneration received or any loans received or outstanding during the period, or proposed to be received.

3. No information need be given in answer to paragraph (f) with respect to

(a) Payments to the plan, or payments to beneficiaries, pursuant to the terms of the plan;

(b) Payment of remuneration for services not in excess of five (5) percent of the aggregate remuneration received by the specified person during the bank's last fiscal year from the bank; or

(c) Any interest of the bank which arises solely from its general interest in the success of the plan.

(g) *Legal proceedings.* Briefly describe any material legal proceeding to which any director, any nominee for election as a director, principal officer of the bank, any owner of record or beneficially of more than five (5) percent of any class of voting securities of the bank, or any associate of any such director, nominee, officer or security holder is a party adverse to the bank.

Item 8. * * *

(e) If any change in accountants has taken place since the date of the proxy statement for the most recent annual meeting of shareholders, state whether such change was recommended or approved by

(1) Any audit or similar committee of the board of directors, if the bank has such a committee; or

(2) The board of directors, if the bank has no such committee.

(f) For the fiscal year most recently completed, describe each professional service provided by the principal accountant and state the percentage relationship which the aggregate of the fees for all non-audit services bear to the audit fees, and, except as provided below, state the percentage relationship which the fee for each non-audit service bears to the audit fees. Indicate whether, before each professional service provided by the principal accountant was rendered, it was approved by, and the possible effect on the independence of the accountant was considered by, (1) any audit or similar committee of the board of directors and (2) for any service not approved by an audit or similar committee, the board of directors.

Instructions. 1. For purposes of this subsection, all fees for services provided in connection with the audit function [e.g., reviews of quarterly reports, filings with the corporation, and annual reports] may be computed as part of the audit fees. Indicate which services are reflected in the audit fees computation.

2. If the fee for any non-audit service is less than three (3) percent of the audit fees, the percentage relationship need not be disclosed.

3. Each service should be specifically described. Broad general categories such as "tax matters" or "management advisory services" are not sufficiently specific.

4. Describe the circumstances and give details of any services provided by the bank's independent accountant during the latest fiscal year that were furnished at rates or terms that were not customary.

5. Describe any existing direct or indirect understanding or agreement that places a limit on current or future years' audit fees, including fee arrangements that provide fixed limits on fees that are not subject to reconsideration if unexpected issues involving accounting or auditing are encountered. Disclosure of fee estimates is not required.

BILLING CODE 6714-01-M

NATIONAL CREDIT UNION ADMINISTRATION

[12 CFR Part 742]

Liquidity Reserves of Insured Credit Unions

AGENCY: National Credit Union Administration.

ACTION: Proposed rule.

SUMMARY: The National Credit Union Administration proposes to simplify and broaden its liquidity reserve regulations because of significant declines in credit union liquidity. The National Credit Union Administration proposes to repeal the Share Draft Liquidity Reserve required under 12 CFR 701.34(c)(5)(xiv) and establish a general liquidity reserve requirement for federally insured credit unions. The proposed regulation would

require all federally insured credit unions to maintain liquid asset holdings in amounts not less than 5% of total member accounts and notes payable. The liquidity reserve could be held in interest earning forms and be depleted if share outflows necessitate. For almost all federally insured credit unions, the regulation would entail no significant asset adjustments and no special reporting or compliance requirements.

DATE: Comments must be received on or before July 25, 1979.

ADDRESS: Send comments to Robert S. Monheit, Senior Attorney, Office of General Counsel, National Credit Union Administration, 2025 M Street N.W., Washington, D.C. 20456.

FOR FURTHER INFORMATION CONTACT: Robert H. Dugger, Acting Director, Policy Analysis Office, 1375 K Street, NW., or Robert M. Fenner, Assistant General Counsel, Office of General Counsel, at the above address. Telephone: (202) 633–6775 (Mr. Dugger), (202) 632–4870 (Mr. Fenner).

SUPPLEMENTARY INFORMATION:

Introduction

The National Credit Union Administration (NCUA) proposes to repeal its regulation requiring Federal credit unions to maintain a specific liquidity reserve on share draft accounts. This action should not be interpreted as indicating that NCUA feels such reserves are not needed. On the contrary, NCUA encourages credit unions to continue to maintain such reserves to accommodate share draft outflows.

In the interest of flexibility and simplicity, and in view of a continuing decline in credit union liquidity, NCUA proposes a liquidity reserve regulation which would require all federally insured credit unions to maintain liquid asset holdings in amounts not less than 5% of total shares and notes payable. Reserve eligible assets would include any combination of: (a) cash, (b) shares or deposits with maturities of 6 months or less in corporate central credit unions or federally insured banks or savings and loan associations, (c) U.S. Government obligations with remaining maturities of one year or less, or (d) shares in the National Credit Union Administration Central Liquidity Facility. To enable credit unions to utilize these assets, the liquidity reserve could be depleted to meet share outflows. This Administration has concluded that the 5% reserving requirement is the minimum prudent level of liquidity in view of current economic conditions. However, the 5% requirement, if adopted, will be reviewed on a continuing basis and modified appropriately to reflect new economic circumstances.

The proposed regulation would involve no additional reporting burdens on credit unions. Compliance would be determined from current State and Federal reports and examinations.

The proposed regulation would be promulgated under sections 116(b) and 201(b)(6) of the Federal Credit Union Act (12 U.S.C. 1762(b), 1781(b)(6)). These provisions authorize the NCUA Administrator to require insured credit unions to maintain such reserves as may be necessary to protect the interests of their members.

Need for the Regulation

With the advent of Federal share insurance in 1970, the expansion of credit union powers in 1977, and the enactment of the Central Liquidity Facility in 1978, credit unions have probably experienced more change in the past nine years than any other type of financial institution. The turbulent economic events of the 1970's coupled with important changes in credit union operations have resulted in significant decreases in credit union liquidity and capitalization.

The need for adequate liquidity in credit unions is no different than in other financial institutions. Conceptually, liquidity represents an asset resource available to satisfy significant and, perhaps, unexpected outflows of funds. An analogous function is performed by loan loss and other equity capital accounts—they constitute a liability resource to accommodate reductions in asset values.

In a very important respect, capital and liquidity are tightly linked. To the extent that liquidity is available, outflows of share funds to meet member demands can be satisfied without liquidating valuable investment and loan assets. If it were not for liquidity, significant share outflows could force untimely sales of valuable assets possibly leading to insolvency and credit union failures. To the extent capital is available to absorb losses, member demands for funds can be satisfied by selling assets even after credit union liquidity has been exhausted.

Table 1 depicts the liquidity of federally insured credit unions expressed as a ratio of very liquid assets to total share accounts and to total liabilities since 1971. The same table also portrays the availability since 1971 of federally insured credit union capital, expressed as the ratio of loan loss reserves and retained earnings accounts to total assets. As the data show, liquidity and capital ratios were relatively steady until recent years when they began to decline markedly. These trends are likely to continue if current national economic patterns are maintained.

Considered alone, these trends and others discussed below should not be viewed with alarm. To a degree they represent acceptable adjustments to the changing nature of credit union operations and United States financial markets. Considered together, however, they suggest the need for action to assure an adequate degree of liquidity by preventing adjustment processes from going too far.

In Table 2 the borrowed funds/total assets ratio since 1971 is presented. This ratio depicts the amount of credit union assets supported by funds obtained from non-share account sources. In the same table, the volume of loans supported by share account funds is depicted. These ratios reflect somewhat different aspects of credit union dependence on outside funds. Rising trends in these ratios along with an average loan maturity increase from about 26 months at year-end 1976 to 33 months at year-end 1978 suggest declining credit union liquidity.

The public's increasing sensitivity to differences in interest rates paid on savings and transaction accounts is also of importance. This interest sensitivity, which used to be characteristic only of large share accounts, now pervades the accounts of moderate income households. For example, accounts with balances in excess of $5,000 were 28% of shares at the end of 1970. By yearend 1977, they had increased 558% and represented some 51% of total shares. This means that today the majority of savings in credit unions is interest sensitive. Such interest sensitivity has brought about Money Market Certificates for large account holders and several high yielding savings vehicles for small account holders and is the source of increasing share account volatility.

Growing interest sensitivity may lead to substantial erosion of Regulation Q constraints on the rates commercial banks and savings and loan associations can pay on savings and transaction accounts. To the extent this occurs, it will diminish a competitive advantage of credit unions—the freedom to pay more on regular share accounts than banks or savings and loan associations can pay on savings accounts. Such a trend could contribute significantly to further share account volatility.

Table 1.—*Liquid Asset and Capital to Asset Ratios at Federally-Insured Credit Unions, 1971–78*

Year	Narrow definitions [1]		Broad definitions [2]		Total capital [4] as a percent of total assets
	Liquid assets as a percent of—		Liquid assets as a percent of—		
	Total shares	Total liabilities [3]	Total shares	Total liabilities [3]	
1971	15.8	14.9	19.0	17.9	7.5
1972	15.6	14.7	20.7	19.6	7.2
1973	13.8	12.8	19.2	17.8	7.0
1974	14.5	13.4	19.0	17.5	7.0
1975	15.9	14.7	22.6	20.9	6.8
1976	14.1	13.0	22.0	20.3	6.3
1977	11.5	10.6	20.6	19.0	6.0
1978 [5]	8.3	7.5	15.1	13.8	5.7

[1] Under the Narrow Definition, liquid assets are defined as the sum of cash, shares, deposits and certificates in other credit unions and financial institutions, and common trust investments. This definition reflects the fact that a very high proportion of credit union government security holdings have long maturities and cannot be liquidated without significant losses.

[2] Under the Broad Definition, liquid assets includes the Narrow Definition plus total investments in U.S. Government and Federal Agency securities.

[3] Represents total shares plus notes payable and all other liabilities.

[4] Total capital represents the sum of total reserves and retained earnings.

[5] Preliminary.

Table 2.—*Loan-to-Share and Borrowed Funds Ratios of Federally-Insured Credit Unions, 1971–78*

Year	Loans outstanding as a percent of total shares	Borrowed funds as a percent of total assets
1971	86.1	2.8
1972	86.5	2.9
1973	89.1	3.7
1974	89.5	4.1
1975	86.0	3.9
1976	86.5	4.5
1977	90.9	5.5
1978 [1]	97.6	7.1

[1] Preliminary.

Explanation

The proposed liquidity reserve regulation would require each federally insured credit union to hold liquid assets totaling not less than five percent of the credit union's member accounts and notes payable. (Section 742.3) The five percent requirement is not intended to suggest that greater liquidity levels are excessive. On the contrary, five percent is regarded by NCUA as the minimum prudent level of liquidity.

The term "member account" as used in the regulation (§ 742.3) is defined in section 101(5) of the Federal Credit Union Act (12 U.S.C. 1752(5)) and encompasses share and share certificate accounts (including those of public units and other nonmembers) held by Federal credit unions, and such accounts or similar accounts held by federally insured state-chartered credit unions. Thus, the base for determining minimum liquidity requirements consists of the total of all share accounts and notes payable.

The term "liquid assets" includes cash, deposits in corporate central credit unions with remaining maturities of 6 months or less, deposits in federally insured banks and savings and loan associations with remaining maturities of 6 months or less, U.S. government obligations (of a type authorized for investment by Federal credit unions under 12 U.S.C. 1757(7)) with remaining maturities of 1 year or less and shares in the National Credit Union Administration Central Liquidity (§ 742.2(a)).

Shares in corporate central credit unions and the Central Liquidity Facility are included as reserve eligible assets because of the special roles these entities play in providing liquidity to the credit union system. The definition of a corporate central credit union, for this purpose, (Section 742.2(b)) is consistent with that contained in the recently proposed Central Liquidity Facility regulations (44 FR 28115).

Short term deposits in federally insured banks and savings and loan associations are included as reserve eligible assets because of their traditional function as liquidity sources. Excluding shares and deposits in insured credit unions (other than corporate centrals) may appear to be unfair. However, NCUA believes the exclusion is necessary, inasmuch as share holdings between insured credit unions do not contribute to the liquidity of the system as a whole.

The proposed maximum maturity limit of one year for U.S. Government obligations is based on NCUA's estimate of the maturity range of such securities which can be liquidated at any time without suffering losses due to market interest rate fluctuations.

The regulation would allow a credit union to deplete its liquidity reserve to satisfy share or deposit outflows. If its liquidity reserve falls below the 5% minimum, however, the credit union would be required to replenish its reserve within 60 days, unless an extension of time is granted by NCUA. (Section 742.4).

Reporting

The liquidity reserve regulation would impose no additional reporting burdens on credit unions. Credit union compliance with the regulation would be determined from current state and Federal reports and examinations.

Request for Comments

NCUA is providing a comment period of approximately 45 days for this proposal. Comments will be received until July 25, 1979. During that time, NCUA encourages written comment on all aspects of the proposal.

Regulatory Analysis

In accordance with NCUA's Report on Implementation of Executive Order 12044—Improving Government Regulations, a draft analysis of the liquidity reserve regulation is available upon request.

June 4, 1979.

(12 U.S.C. 1762(b), 12 U.S.C. 1766(a), 12 U.S.C. 1781(b)(6))

Lawrence Connell,
Administrator.

Accordingly, it is proposed that

§ 701.34 [Repealed]

1. 12 CFR 701.34(c)(5)(xiv) [Share Draft Liquidity Reserves) be repealed.

2. A new Part 742 (12 CFR Part 742) be added to read as follows:

PART 742—LIQUIDITY RESERVES OF INSURED CREDIT UNIONS

Sec.
742.1 Purpose.
742.2 Definitions.
742.3 Liquidity reserve.
742.4 Depletion and replenishment.

Authority: 12 U.S.C. 1762(b), 12 U.S.C. 1766(a), 12 U.S.C. 1781(b)(6).

PART 742—LIQUIDITY RESERVES OF INSURED CREDIT UNIONS

§ 742.1 Purpose.

The purpose of this part is to establish a liquidity reserve requirement that enhances the ability of insured credit unions to meet member demands for liquid funds and avoid asset losses.

§ 742.2 Definitions.

As used in this part:

(a) "Liquid assets" means the following unpledged assets:

(i) Cash on hand;

(ii) Share or deposit accounts with remaining maturities of 6 months or less maintained in corporate central credit unions or institutions insured by the Federal Deposit Insurance Corporation or Federal Savings and Loan Insurance Corporation;

(iii) Investments in obligations of the United States or an agency thereof which are authorized for Federal credit unions under 12 U.S.C. 1757(7) and which have a remaining maturity of 1 year or less;

(iv) Shares in the National Credit Union Administration Central Liquidity Facility.

(b) "Corporate central credit union" means a credit union operated primarily to serve other credit unions and in which the total dollar amount of shares and deposits received from other credit unions plus loans to other credit unions exceeds 50 percent of the total dollar amount of all shares and deposits plus loans to members.

§ 742.3 Liquidity reserve.

Each credit union insured by the National Credit Union Share Insurance Fund shall maintain a daily reserve of liquid assets equalling, at a minimum, 5% of the total dollar value of its member accounts (as defined at 12 U.S.C. 1752(5)) and notes payable.

§ 742.4 Depletion and replenishment.

The liquidity reserve may be depleted below the level required by this Part only to meet outflows of shares or deposits. In the event of such depletion, the insured credit union shall immediately notify the appropriate National Credit Union Administration Regional Office and shall replenish its liquidity reserve to the required level within 60 days, unless an extension is approved by the Administration.

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[File No. 782 3032]

Korvette's, Inc.; Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order, accepted subject to final Commission approval, would require a New York City department store chain, among other things, to cease failing to provide its stores with statutorily required warranty material; and to make the terms of written warranties on consumer products available to prospective purchasers prior to sale. The firm would be further required to develop and implement a program to instruct its sales personnel about the availability and location of warranty information; and maintain adequate business records for a period of two years.

DATE: Comments must be received on or before August 7, 1979.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Ave., NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: Leroy Richie, Director, 8R, New York Regional Office, Federal Trade Commission, 2243–EB Federal Bldg., 26 Federal Plaza, New York, N.Y. 10007. (212) 264–1207.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

[File No. 782 3032]

Korvette's, Inc.

Agreement Containing Consent Order To Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of Korvette's, Inc., a corporation, and it now appearing that Korvette's, Inc., a corporation, hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between Korvette's, Inc., by its duly authorized officer, and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent Korvette's, Inc., is a corporation organized, existing and doing business under and by virtue of the laws of the State of New York, with its office and principal place of business located at 450 West 33rd Street, in the City of New York, State of New York.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondent waives: (a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby and related material pursuant to Rule 2.34, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's rules, the Commission may, without further notice to the proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in

disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

The definitions of terms contained in Section 101 of the Magnuson-Moss Warranty Act, Pub. L. No. 93-637, 15 U.S.C. 2301 (Supp. 1975) and in Rule 702 (16 CFR 702.1) promulgated there under shall apply to the terms in this order.

I

It is ordered, That respondent Korvette's, Inc., a corporation, its successors and assigns, and its officers, representatives, agents and employees, directly or indirectly through any corporation, subsidiary, division or any other device in connection with its business as a seller and warrantor of consumer products distributed in commerce as "seller", "warrantor", and "consumer product" are defined in Rule 702 (16 CFR 702.1) of the Magnuson-Moss Warranty Act (15 U.S.C. 2301) do forthwith cease and desist from:

A. Failing, in the further course and conduct of its business as warrantor of consumer products actually costing more than $15.00, to provide its department stores with the warranty materials required by 16 CFR 702.3(b)(1) which are necessary for such stores to comply with requirements for sellers of consumer products, as set forth in 16 CFR 702.3(a).

B. Failing, in its course of business as a seller of consumer products, to make the terms of written warranties on consumer products actually costing more than $15.00 and manufactured on or after January 1, 1977, available to the consumer prior to sale through utilization of one or more means specified in 16 CFR 702.3(a)(1).

II

It is further ordered, That for those departments in which respondent chooses to use a binder system to comply with seller's duties under 16 CFR 702.3(a), respondent shall:

A. Maintain a permanently affixed binder system in each such department which provides the consumer with ready access; and either

B. Label and display such binders in a manner reasonably calculated to elicit the consumer's attention and accessible for consumer use without the assistance of store personnel; or

C. Place permanently affixed signs, not smaller than 6½ inches by 11 inches advising the consumer of the availability of the binders, in a prominent location in each such department. The content of these permanently affixed signs is included in this order as Appendix A.

III

It is further ordered, That respondent shall:

A. Deliver a copy of this order to cease and desist to all present regional and store managerial employees engaged in the sale of consumer products on behalf of respondent.

B. Instruct all present and future regional and store managerial employees engaged in the sale of consumer products on behalf of respondent as to their specific obligations and duties under the Magnuson-Moss Warranty Act (15 U.S.C. 2301) and under this order relating to the requirements about the availability and location of warranty information for customers.

C. Develop and implement a program to instruct its sales personnel about the availability and location of warranty information.

D. Maintain, for a period of not less than two (2) years from the effective date of the order, adequate business records to be furnished upon request to the staff of the Federal Trade Commission, relating to the manner and form of its continuing compliance with the terms and provisions of this order.

E. Notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

F. Within sixty (60) days after service upon it of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which it has complied with this order.

APPENDIX A— Compare Warranties Before You Buy!

There's a binder with warranties in this department. If you can't find the warranty binder, ask for it.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Korvette's, Inc.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Commission's complaint in this matter charges Korvette's with having engaged in unfair or deceptive practices in violation of the Magnuson-Moss Warranty Act, the Pre-Sale Availability Rule promulgated by the Commission thereunder, as well as the Federal Trade Commission Act, for failing to comply with this pre-sale availability rule regarding written warranty terms on consumer products.

It is alleged in the complaint that Korvette's as a "warrantor", which gives written warranties to consumers for products actually costing the consumer more than $15.00, failed to perform the requirements of the Pre-Sale Availability Rule. As a "warrantor" of warranted consumer products, Korvette's must provide its stores with warranty materials on all such products, in order that its stores may make such warranty terms available to prospective buyers for their review prior to sale.

It is further alleged that Korvette's as a "seller", which sells or offers for sale, for purposes other than resale or use in the ordinary course of the buyer's business consumer products actually costing the consumer more than $15.00, also failed to meet the requirements of Pre-Sale Availability Rule. As a "seller" of warranted consumer products, Korvette's must make such warranty materials available for prospective buyers' review prior to sale by one of more of the following methods:

(1) Clearly and conspicuously displaying the text of the written warranty in close conjunction with the product;

(2) Maintaining a binder system readily available to the consumer along with conspicuous signs noting the location of binders where the binders themselves are not in plain view;

(3) Displaying the warranty package in such a way that the text of the warranty is visible; and

(4) Placing a sign with the warranty terms in close proximity to the product.

The proposed order directs that Korvette's not only cease and desist from violations of these provisions but requires affirmative action on its part to foster and promote future compliance in this regard.

Carol M. Thomas,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[18 CFR Parts 154, 201, 204 and 282]

[Docket No. RM79-14]

Proposed Regulations Implementing the Incremental Pricing Provisions of the Natural Gas Policy Act of 1978

Issued June 5, 1979.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of Proposed Rulemaking and Opportunity for Written and Oral Presentations of Data, Views, and Arguments.

SUMMARY: The Federal Energy Regulatory Commission (FERC) hereby gives notice of a proposed rulemaking and public hearing for the purpose of implementing the incremental pricing provisions of the Natural Gas Policy Act of 1978. The regulations included in this proposal provide the regulatory framework for the calculation and billing of incremental pricing surcharges to non-exempt industrial boiler fuel facilities. The proposed regulations also set forth the procedures by which an industrial facility may obtain an exemption from the incremental pricing program.

DATES: Comments by July 9, 1979. Requests to speak by June 22, 1979. Hearing date: June 27, 1979, 10:00 a.m.

ADDRESSES: All comments and requests to speak to: Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 (Reference Docket No. RM79-14). *Hearing Location:* Federal Energy Regulatory Commission, Hearing Room A, 825 North Capitol Street, NE., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Norman A. Pedersen, Office of Commissioner George R. Hall, 825 North Capitol Street NE., Room 9006, Washington, D.C. 20426, (202) 275-4147.
Warren C. Edmunds, Office of Pipeline and Producer Regulations, 825 North Capitol Street NE., Room 7300, Washington, D.C. 20426, (202) 275-4415.
Nancy E. Williams, Office of General Counsel, 825 North Capitol Street NE., Room 8100 F, Washington, D.C. 20426, (202) 275-0422.

Notice of Proposed Rulemaking and Opportunity for Written and Oral Presentations of Data, Views, and Arguments—Background

Title II of the Natural Gas Policy Act of 1978 (NGPA) (Pub. L. 95-621) requires that interstate pipelines and local distribution companies pass through certain portions of their natural gas acquisition costs to industrial users in the form of surcharges. These surcharges may not, however, raise the ultimate cost of gas to the user above the cost of the fuel oil which could be used as an alternative to natural gas.

The incremental pricing program is to be implemented in two phases. The only facilities affected during the first phase will be those using natural gas as fuel for large industrial boilers. Title II requires that the regulations implementing this first phase be promulgated by November 9, 1979.

During the second phase of the program, incremental pricing may be extended to a broader class of industrial users than those affected by the first stage. The regulations implementing the second phase must be promulgated by May 8, 1980 and will be subject to Congressional review.

The Commission has determined that the regulations needed to implement the first phase of incremental pricing should be promulgated in two rulemaking dockets, Docket Nos. RM79-14 and RM79-21. Informal public conferences in these two dockets were held in February and April, 1979, to assist the Commission in the implementation of the incremental pricing program.

A Notice of Proposed Rulemaking and Opportunity for Written and Oral Presentations of Data, Views and Arguments was issued in Docket No. RM79-21 on May 11, 1979 (44 FR 29090, May 18, 1979). The Notice set forth proposed regulations for the determination of the alternative fuel price ceilings on incremental pricing surcharges. Public hearings on the proposal contained in the May 11th Notice will be held in several cities during the month of June.

The proposal contained in this Notice is intended to implement the provisions of Title II which were not addressed in the May 11th Notice in Docket No. RM79-21. Briefly, the regulations set forth below contain the regulatory provisions governing the actual calculation and billing of incremental pricing surcharges, as well as the accounting provisions necessary for the successful implementation of the program. Additionally, the proposed regulations establish procedures by which facilities can obtain exemptions from incremental pricing.

The regulatory set forth below are quite detailed. This preamble will highlight certain issues which received significant attention in the course of the informal conferences held in this docket in February and April.

The Commission has utilized a number of ideas from various proposals offered at the conferences. The Commission would again like to express its appreciation to all those who participated in the conferences. The discussions which took place were invaluable in the formulation of the proposals in this docket and in Docket No. RM79-21.

II. The Proposed Mechanism: The Reducing PGA Approach

The February, 1979 informal conference was called to discuss a proposal developed by Commission staff for the calculation and billing of the incremental pricing surcharges. That proposal was included in the January 12, 1979, Notice (44 FR 2833, January 31, 1979) convening the February conference.

The January proposal was criticized at the conference because, under it, incremental pricing surcharges would not be billed until 4 to 10 months after the actual incurrence of the costs which are to be passed through by way of surcharges. This would result in high carrying costs which would ultimately be borne by high-priority users as well as industrial users.

Several alternative proposals for the calculation and billing of incremental pricing surcharges were proposed at the February conference. The April conference in this docket was convened to discuss those proposals in more detail. The incremental pricing mechanism contained in the regulations set forth below is based on an approach suggested at the April conference by the United Distribution Companies (UDC), Northern Natural Gas Company (Northern) and Natural Gas Pipeline Company of America (Natural).

Under this approach, each interstate pipeline company which files purchased gas adjustment (PGA) rate changes would, prior to each PGA period, project its total gas acquisition costs for the period. That total would be reduced by the amount which the pipeline projects it will recover during the period through incremental pricing surcharges. The total projected gas acquisition cost, as reduced, would be used to derive the pipeline's PGA rate for the PGA period in the manner prescribed in the pipeline's PGA provision.

In order to project the costs which will be recovered through incremental pricing surcharges during a forthcoming PGA period, an interstate pipeline would estimate both the amount of incremental gas acquisition costs it

would incur during the period and the proportion of those costs which it could pass through to non-exempt industrial boiler fuel users in the form of incremental pricing surcharges.

For purposes of computing the projected gas acquisition costs, the Commission proposes to amend its current regulations to allow purchasers to take into account increased costs which are anticipated due to calling price increases permitted under the NGPA ceiling price regulations.

The estimation of the costs which could be passed through as incremental pricing surchanges would be derived from projections of the maximum surcharge absorption capability ("MSAC") of each non-exempt industrial boiler fuel facility ultimately served by the pipeline, either through direct sales or through sales-for-resale. Each natural gas supplier would estimate the MSAC of each industrial facility it serves directly, following the formula set forth in the regulations. The supplier would then determine, for each of the pipelines supplying it, its capability to absorb a surcharge from the pipeline and would report its surcharge absorption capability to the pipeline. This reporting would continue along a chain or resales until the most "upsteam" supplying pipeline had received reports from all of its customers.

That pipeline would add to the total MSAC reported to it the projected MSAC for its own direct sales. This total would then be compared to the pipeline's estimated incremental acquisition costs for the coming PGA period. The lesser figure would be used to reduce the total acquisition costs which the pipeline would otherwise include in its PGA filing with the Commission.

The reduced PGA rate of a pipeline would be used during the succeeding PGA period. Each month of the PGA period, the pipeline's customers would be billed this reduced PGA rate as well as an incremental pricing surcharge.

Surcharges would be based on actual usage, actual rates and actual alternative fuel price ceilings established for the month in question. The incremental pricing surcharge which would be collected by a pipeline from each of its sale for resale customers would be the MSAC of the sale for resale customer for the previous month, as reported by the customer, or, if less than the MSAC, the customer's pro rata share of the total incremental gas costs incurred by the pipeline during that month.

The incremental pricing surcharge to be billed to each non-exempt industrial boiler fuel facility directly served by a natural gas supplier would be, in turn, the MSAC of the facility for the previous billing month or, if less than the MSAC, the facility's pro rata share of the total incremental gas costs incurred by the natural gas supplier during the previous calendar month.

Under the proposed regulations, incremental pricing surcharges would be stated as a flat dollar amount rather than on an Mcf basis. Any amounts remaining in the unrecovered incremental gas costs account which could not be passed through as a surcharge would be cleared to account 191 for recovery in the pipeline's next PGA period.

The proposal set forth below incorporates the suggestion made by the Natural Gas Pipeline Company of America to allow distributors to bill non-exempt industrial boiler fuel facilities at the level of the alternative fuel price ceiling applicable to the facility. If a local distribution company elects to so bill such a facility, the supplier would, in a later billing, adjust for any overrecovery.

The Commission believes that the potentially greatest obstacle to the successful operation of the UDC/Northern/Natural method of incremental pricing is the very short time permitted for reporting MSAC's up a chain of sale for resale customers. In order to allow for additional time to complete all reporting, the Commission proposes that the billing month for a non-exempt industrial boiler fuel facility end on or about the 20th day of each month. The Commission specifically requests comments on this proposal and, especially, on whether the chain of reporting can be accomplished between the 20th day of a month and the date all information must be available in order to bill on the normal billing date the following month.

III. The Proposed Mechanism: An Alternative

The primary alternative to the "reduced PGA" approach would be to structure an incremental pricing mechanism along the lines suggested by the Interstate Natural Gas Association of America (INGAA) at the February and April conferences. The approach was described in detail in the appendix to the March 16, 1979, Notice convening the April conference. Briefly, under the INGAA approach, every month each interstate pipeline would: (1) bill all customers its normal PGA rate reflecting the full amount of its purchased gas costs, (2) bill non-exempt end users an incremental pricing surcharge, and (3) extend a pro rata credit to all exempt end users in the amount of the total incremental surcharges billed.

Incremental pricing surcharges would be computed each month on the basis of either: (1) the aggregate MSAC for the previous month (if the amount recorded in the incremental gas costs account at the beginning of the current month were greater than such aggregate MSAC) or (2) a pro-rata share of the amount recorded in the incremental gas costs account (if the amount charged to the incremental gas costs account at the beginning of the current month were less than the aggregate MSAC for the previous month).

The Commission, on the basis of the material presented to it, and its study and analysis, prefers the "reduced PGA" approach proposed by UDC, Northern and Natural. It is the Commission's view that such an approach has the advanage of being a less burdensome regulatory program for all affected parties.

The Commission notes, however, that it has given and will continue to give serious attention to the approach sponsored by INGAA. Those who believe that the Commission should adopt the INGAA approach in preference to the approach proposed here are invited to provide comments and arguments to that effect. Those who would advocate Commission adoption of still other alternatives are invited to present them in as much detail as possible.

IV. Exemptions

A. *Exemptions under §§ 206(a), (b) and (c) of the NGPA.*—Subsections 206(a), (b) and (c) of the NGPA provide that small existing industrial boiler fuel users, agricultural users, schools, hospitals and certain other facilities shall be exempt from incremental pricing. Section 282.204 of the proposed regulations would establish a procedure by which those exemptions could be obtained.

These regulations would be interim in nature for small boiler fuel facilities and agricultural users. Section 206 requires that by May 9, 1980, the Commission prescribe permanent exemption rules for these users. The permanent rules are to contain certain statutorily prescribed refinements of the interim rules.

Basically, under the proposed regulations, the exemptions permitted by subsections 206(a), (b) and (c) would be obtained by an industrial boiler fuel facility by filing an affidavit with the Commission and sending a copy to the facility's natural gas supplier. A copy of

the proposed Exemption Affidavit is attached to the regulations below as Appendix A.

The Commission believes that affidavits for exemption should be updated on a regular basis so that if a facility no longer uses gas for exempt purposes, the facility would lose its exemption from incremental pricing. The Commission requests comments on how this updating should be done. The proposed regulations would require that annual reaffirmations of an affidavit for exemption be filed with the Commission. Another possible approach would be to make exemptions expire automatically when a change of circumstances occurs with respect to the facility.

B. *Exemptions under section 206(d) of the NGPA.*—Under subsection 206(d) of the NGPA, the Commission may provide for the exemption of either individual industrial facilities or categories of such facilities which are not exempt from incremental pricing under subsections 206 (a), (b) and (c) of the Act. Any such action by the Commission is required to be submitted to the Congress for its review prior to the action taking effect. Either House of the Congress can veto a proposed exemption.

Section 282.206 of the proposed regulations would establish procedures whereby any interested person would be able to petition under subsection 206(d) of the NGPA for an exemption, in whole or in part, of any individual incrementally priced industrial facility or category of such facility.

During the informal conferences which were convened by staff in connection with the preparation of this Notice of Proposed Rulemaking, some participants suggested exemptions which the Commission could adopt under subsection 206(d). The suggestions generally fell into four categories:

An exemption for gas used in small boilers which have been constructed since November 9, 1978, and for gas used in boilers which were in existence on November 9, 1978, which used more than an average of 300 Mcf per day for boiler fuel during a calendar month of 1977, but which have used less than 300 Mcf per day since 1977;

A partial or complete exemption for gas used in industrial facilities which have the capabilities to use coal as an alternative fuel;

An exemption for gas used in industrial facilities which have the capability to use oil as an alternative fuel and which provide a load-balancing function on gas distribution systems; and

An exemption for gas used in industrial facilities in states where the prices of natural gas are at or above the FERC alternative fuel price ceilings on incremental pricing.

The Commission will, in several weeks, issue a Notice of Proposed Rulemaking in Docket No. RM79–48 regarding a new small boiler exemption. The Commission, at this time, does not intend to institute rulemakings with regard to the other three subsections 206(d) exemption proposals, however.

It is the Commission's view that an exemption for facilities which have the capability to burn coal rather than gas would have the effect of encouraging the consumption of gas rather than coal, and that such a result would be contrary to both national energy policy and the policies embodied in the National Energy Act of 1978.

It is also the Commission's view that an exemption for load-balancing customers which have the capability to burn oil is unnecessary. The Commission has proposed in Docket No. RM79–21 a method for determining alternative fuel price ceilings on incremental pricing that should minimize any load-shifting from gas to oil which otherwise might have occurred under incremental pricing. Thus, the benefits to a system of load-balancing customers who have the capability to burn oil will not be lost.

Finally, regarding the state-wide exemption proposal, the Commission believes it would be premature to attempt to determine at this stage whether any state can assure the Commission that it has a ratemaking program or procedure in effect which would accomplish the ends of incremental pricing as mandated by the NGPA. Any state program must be measured against the incremental pricing program established by this Commission, and particularly the alternative fuel price ceiling aspect of the program. Thus, only after final rules are adopted on, at least, the alternative fuel price ceiling will the Commission have established the point of comparison for state programs or plans which are described as satisfying the objectives of Title II of the NGPA.

As mentioned, comments regarding the coal exemption, the oil exemption and state-wide exemptions have, to this point, been made only in the highly informal context of the conferences convened prior to this Notice of Proposed Rulemaking. In order to provide interested persons with a further opportunity to present to the Commission their views regarding these three exemption proposals, the Commission will provide an opportunity for further comments to be filed on the question of whether or not the Commission should establish a rulemaking proceeding with respect to any one of them.

Comments on establishing a rulemaking on the coal exemption should be filed in Docket No. RM79–45. Comments on establishing a rulemaking on the oil exemption should be filed in Docket No. RM79–48. Comments will be due by August 1, 1979.

Comments urging the Commission to establish one or more rulemaking proceedings on statewide exemption proposals should be filed in Docket No. RM79–47. The final date for filing comments in this docket will be September 1, 1979, in order to permit the parties to have before them the final rules to be issued in Docket No. RM79–21 and this docket.

Issues regarding subsection 206(d) exemptions, aside from questions regarding the procedures set forth in the proposed § 282.206, will not be further considered by the Commission in this proceeding, Docket No. RM79–14.

V. Time Line

The following is a brief time-line of the events which would take place under the incremental pricing regulations contained in this proposal and the companion docket to this proposal, Docket No. RM79–21. Comments are requested on all aspects of this time-line. (Minor conforming changes to the regulations proposed in RM79–21 will have to be made to comport with this time-line.)

August 1, 1979—Commission issues final regulations.

September 1, 1979—Regulations become effective. Exemption affidavits and alternative fuel price ceiling affidavits available through the Office of Public Information.

September 14, 1979—Natural gas suppliers mail exemption affidavits and alternative fuel price ceiling affidavits to all industrial boiler fuel facilities which were not determined to be exempt from an examination of the natural gas supplier's own records.

October 1, 1979—In accordance with the natural gas suppliers' requests as contained in the suppliers' mailings of September 14, exemption affidavits are returned to natural gas suppliers by industrial boiler fuel facilities claiming an exemption in whole or in part.

October 15, 1979—Local distribution companies notify supplying pipelines of their projected MSAC's for the period commencing January 1, 1980.

November 1, 1979—Interstate pipelines file revised PGA provisions and incremental pricing surcharge provisions; pipelines determine projected MSAC's.

December 1, 1979—Interstate pipelines file reduced PGA tariff sheets and estimated incremental pricing surcharge tariff sheets for the period commencing January 1, 1980.

January 1, 1980—Effective date of tariff sheet filed December 1, 1979. Incremental gas acquisition costs begin to be booked by natural gas suppliers.

January 15, 1980—Natural gas suppliers file lists of non-exempt industrial boiler fuel facilities with the Federal Energy Regulatory Commission.

December 15, 1980—Natural gas suppliers mail exemption reaffirmation affidavits and alternative fuel price ceiling reaffirmation affidavits to exempt industrial boiler fuel facilities and non-exempt boiler fuel facilities.

December 31, 1980—Industrial boiler fuel facilities return exemption reaffirmation affidavits and alternative fuel price ceiling reaffirmation affidavits to the Commission and the natural gas supplier.

January 15, 1981—Updated lists of non-exempt industrial boiler fuel facilities are filed with the Commission.

VI. Direct Sales

The regulations set forth below propose the use of unregulated contract rates for the calculations of MSAC's of interstate pipelines' direct sale customers. The reason for this approach is that the Commission did not have jurisdiction over such sales under the Natural Gas Act,[1] and the Commission has found minimal support in the provisions of the NGPA to permit it to take jurisdiction with respect to such sales.

It can be argued, however, that the Congressional intent underlying Title II was not only to protect high priority consumers from increased gas acquisition costs, but to maximize that protection by, among other things, maximizing the surcharges to direct non-exempt customers. This Congressional intent could arguably establish a new basis for jurisdiction.

The regulations below, thus, reflect use of the contract rate merely for purposes of generating comments and further discussion. The proposal does not reflect a conclusion that the contract rate approach is the only one available to the Commission. There are several conceivable alternative approaches. In each approach, the higher determinant of the MSAC would be the established applicable alternative fuel price ceiling. The number which would be used for the lower determinant could be:

(1) The unit cost allocated to non-jurisdictional service in the pipeline's last rate proceeding;

(2) The sum of (i) the unit cost allocated to non-jurisdictional service in the pipeline's last rate proceeding and (ii) 50 percent of the difference between the allocated unit cost and the alternative fuel price ceiling;

(3) The sum of (i) the unit cost allocated to non-jurisdictional service in the pipeline's last rate proceeding and (ii) the difference existing on June 1, 1979, between the contract rate and that allocated unit cost;

(4) The contract rate, as determined under the terms of the existing contract as that contract was in efect on June 1, 1979; or

(5) The product of (i) the unit cost allocated to non-jurisdictional service in the pipeline's last rate proceeding and (ii) the ratio of the contract rate as of June 1, 1979, to the unit cost allocated to non-jurisdictional service in the pipeline's last rate proceeding prior to June 1, 1979.

Each of these possible approaches raises jurisdictional issues. As for the first approach, the outermost limit on interstate pipeline rates to direct sale customers is the cost of alternative fuels. Thus, defining direct sale MSAC's as the difference between the level of allocated costs and the level of the alternate fuel price would effectively dictate to a pipeline its markup in a direct sale.

Methods two through five above would at least allow the pipeline a range in which it could negotiate a retail price. In no case would the pipeline's potential markup over allocated costs be reduced to zero or would the retail rate be specifically determined.

Public comment is invited regarding the merits of all of the proposed methods for determining direct sale MSAC's. It is requested that comments address the jurisdictional implications of the proposed methods. As indicated above, the method of determining direct sale MSAC's on the basis of contract rates will be reviewed in light of the comments received, and may be revised as appropriate in light of those comments.

VII. Submetering

The January 12, 1979, staff proposal in this docket provided, in effect, that all natural gas used at a nonexempt industrial boiler fuel facility would be subject to incremental pricing unless the non-exempt boiler fuel usage was separately metered.

A number of commenters opposed the staff proposal. Several commenters contended that installing submeters would entail large capital expenditures to perform a task—quantifying volumes consumed for exempt or process uses in a non-exempt facility—which can be done by means not requiring new capital investment. Further, it was argued that such an expenditure may be rendered moot in whole or in part by the 18-month rule required by Section 202 of Title II. Lastly, it was claimed that the requisite number of meters could not be obtained and installed by the anticipated January 1, 1980, implementation date for incremental pricing.

A submetering requirement would also raise secondary questions as to who should bear the cost—the end user, the distributor, or the pipeline—inasmuch as the incremental pricing program is intended to benefit exempt users.

Several commenters acknowledged that submetering may be necessary, or would at least be preferable to the alternatives which were suggested. The most viable of these alternatives would be to utilize certified estimates in place of actual volume usage as recorded by meters.

The Commission has determined, based on all of the information available to it, that the original staff proposal on submetering, modified to a certain extent, should be retained in this proposal. The slight modification would permit either exempt (including process) or non-exempt uses to be metered, so long as a total volume of non-exempt usage is derivable from meter readings.

Based on the trade press,[2] and staff's study and observations, we believe that considerable in-plant submetering already is being done. In an era of ever-rising energy costs, many companies have determined that they want to know where and in what quantities energy (in any form) is being used.

Further, it appears that submeters can be purchased and installed at reasonable cost. For many industrial applications, a meter installation for loads up to 1000 Mcf per day, for example, would total less than $5000.[3] If such a meter enabled a non-exempt user to reduce its gas bill by as little as 10 cents per Mcf by having 1000 Mcf per day exempted from incremental pricing by submetering, the cost of the meter would be recovered in 50 days or less.

On the question of the availability of submeters, we request additional comment and statistical data on how widespread the use of submetering aleady is, on the numbers of meters that

[2] *E.g., Modern Industrial Energy*, April 1978, p. 12, 13; *Energy User News*, Aug. 14, 1978, p. 1, 10, 11; *Plant Energy Management*, Sept/Oct 1978, p. 40, 42; *Gas Industries*, Sept. 1978, p. 22, Oct. 1977, p. 22, 23.

[3] For example, according to its May 1978 price list, an American Meter Company Model 11M, aluminum housing CVM positive displacement meter capable of measuring over 1100 Mcf per day at 50 psig line pressure would cost less than $2000, F.O.B. Erie, PA. Installation and shipping costs should not result in a drastically increased total cost.

would be needed, and the time required to obtain and install such meters.

For purposes of incremental pricing, it is immaterial whether the exempt or non-exempt volumes are directly measured. If one is measured, the other can be determined. Thus, comments on the number (and cost) of meters should consider the question in terms of accomplishing the metering task in the most efficient manner.

As to the ownership of the submeters, the Commission currently believes that the end user should bear the cost. The end-user is the potential beneficiary of submetering since it would thereby acquire an exemption for non-boiler fuel uses. End-user ownership of meters would avoid the problem of a utility having its property on the end-user's site and would avoid the myriad of regulatory problems inherent in utility ownership. End-user ownership should also tend to maximize the tax benefits generated by the purchase and installation of submeters.

As mentioned above, the most viable alternative to submetering for purposes of identifying volumes which should not be subject to an incremental pricing surcharge would be to use estimates of gas consumption. Some commenters suggested, however, that if used, estimates should be subjected to review by Data Verification Committees (DVC's). Proponents of DVC's cited their useful role in minimizing litigation and resolving disputes in pipeline curtailment cases. DVC opponents raised the spectre of the on-going cost and administrative burden of establishing and maintaining DVC's, in addition to the question of whether they could complete their tasks prior to the expected January 1, 1980, implementation date for the incremental pricing program.

The Commission does not currently view the use of estimates and DVC's as a viable long-term alternative to submetering. The ongoing commitment of professional talent for an indefinite period of time to accomplish the same task that can be—and in many cases already is being—done by meters, would appear to be an overly burdensome regulatory solution.

To the extent, however, that meters cannot be acquired and installed by January 1, 1980, some short-term use of estimates may be needed. One possible approach would be to permit estimates for the period January–March of 1980, based on actual meter readings for 30 days of continuous use at some point during calendar year 1979. Under this approach, a facility could utilize one meter to measure the usage of several boilers until such time as meters could be installed as needed on a permanent basis. Commenters are requested to describe, in as much detail as possible, whether and how a short-term estimating procedure should be implemented.

VIII. Environmental Issues

The staff has completed its environmental assessment of this proposed rulemaking. Staff has concluded, based on the information currently available, that the proposed regulations would not be a major Federal action significantly affecting the quality of the human environment.

This environmental assessment has been made part of the public record in this docket and in Docket No. RM79–21. It is available for inspection in the Commission's Office of Public Information.

The Commission requests comments on any environmental issues which are believed relevant to this rulemaking and on what is believed to be the scope of the Commission's responsibility in this area. Comments relating to environmental issues should, if possible, be substantiated with detailed analysis.

IX. Comments Requested

The Commission requested comments on all aspects of the proposed regulations set forth below. The Commission particularly invites comments on the issues identified above and on approaches to those issues other than the ones reflected in the regulations below.

X. Comment Procedures

A. *Written Comments*

Interested persons are invited to submit written comments, data, views, or arguments with respect to this proposal. Comments should be submitted to the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, and should reference Docket No. RM79–14. An original and 14 copies should be filed. All comments received prior to 4:30 p.m. EDT, July 9, 1979, will be considered by the Commission prior to promulgation of final regulations. All written submissions will be placed in the public file which has been established in this docket and which is available for public inspection in the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during regular business hours.

B. *Public Hearing*

A public hearing concerning this proposal will be held in Washington, D.C. on June 27, 1979. The hearing will be held at the Federal Energy Regulatory Commission, Hearing Room "A", 825 North Capitol Street, N.E., Washington, D.C. 20426, and will begin at 10:00 a.m. Any person interested in this proceeding or representing a group or class of persons interested in this proceeding may make a presentation at this hearing provided that a written request to participate is submitted to the Secretary of the Commission at the address given above by June 22, 1979. Requests to participate should include a reference to Docket No. RM79–14, should indicate the amount of time desired, and should include a telephone number where the person making the request may be reached. A list of the participants in the hearing will be available in the Commission's Office of Public Information on June 25, 1979 and will be available at the site of the hearing on the morning of the hearing. The presiding officer is authorized to limit oral presentations at the hearing both as to length and as to substance. Participants should, if possible, bring 150 copies of their testimony to the hearing.

The hearing will not be a judicial or evidentiary-type hearing. There will be no cross-examination of persons making statements. The presiding officer will question such persons and any interested person may submit questions to the presiding officer to be asked of persons making statements. The presiding officer will determine whether the question is relevant and whether the time limitations permit it to be presented. Any further procedural rules will be announced by the presiding officer at the hearing. Transcripts of the hearing will be available in the public file for this proceeding, Docket No. RM79–14, in the Commission's Office of Public Information.

The Commission proposes to make these amendments, when adopted, effective on September 1, 1979. As noted above, Title II of the NGPA requires that final regulations be in place by November 9, 1979. In order that both the regulations set forth below and the regulations to be adopted in Docket No. RM79–21 can be implemented with the least disruption to currently followed reporting and accounting practices, the Commission proposes to adopt these regulations prior to the November 9th deadline.

(Natural Gas Act as amended, 15 U.S.C. 17 *et seq.*; the Natural Gas Policy Act of 1978, Pub.

L. 95–621, 92 Stat. 3350, 15 U.S.C. 3301, *et seq.*; the Department of Energy Organization Act, 42 U.S.C. 7101, *et seq.*; E.O. 12009, 42 FR 46267.)

In consideration of the foregoing, it is proposed to amend Title 18 of the Code of Federal Regulations in Parts 154, 201, 204 and by the addition of a new Part 282, to read, in part, as set forth below.

By Direction of the Commission.

Kenneth F. Plumb,

Secretary.

PART 154—RATE SCHEDULES AND TARIFFS

1. Section 154.38 is amended in paragraph (d) by revising subparagraph (1) and clause (iv) (*a*) of subparagraph (4) to read as follows:

§ 154.38 Composition of rate schedule.

* * * * *

(d) *Statement of rate.* (1) Except as permitted in §§ 154.52, 154.82, and Part 282, all rates shall be clearly stated in cents or in dollars and cents per unit. Only the rates and charges to be used in current billing shall be included in the rate schedules. * * *

(4) * * *

(iv)(*a*) Rate changes which reflects both the projected [2] cost of purchased gas and a revised surcharge to clear the amounts accrued in the deferred account for both producer and pipeline suppliers shall be computed and filed not more frequently than semi-annually.

* * * * *

PART 201—UNIFORM SYSTEM OF ACCOUNTS PRESCRIBED FOR NATURAL GAS COMPANIES SUBJECT TO THE PROVISIONS OF THE NATURAL GAS ACT (CLASS A AND CLASS B)

2. Part 201, account 191 is amended in paragraph A to read as follows:

191 Unrecovered purchased gas costs.

A. This account shall include purchased gas costs related to Commission approved purchased gas adjustment clauses when such costs are not included in the utility's rate schedules on file with the Commission. This account shall also include such other costs as authorized by the Commission. Costs of purchased gas subject to passthrough under the incremental pricing requirements of the Commission shall be excluded from this account and included in account 192.1, Unrecovered Incremental Gas Costs.

* * * * *

[2] Pipeline companies may reflect in their rates during their normal PGA period monthly changes in the ceiling rates permitted producers of natural gas under the Natural Gas Policy Act of 1978.

3. Part 201 is amended to add a new account 192.1 to read as follows:

192.1 Unrecovered incremental gas costs.

A. This account shall include the unrecovered costs of purchased gas which are subject to passthrough by means of an incremental pricing surcharge. This account shall also include any other costs authorized by the Commission.

B. This account shall be debited and account 805.2, Incremental Gas Cost Adjustments, shall be credited for unrecovered costs of purchased gas subject to incremental pricing.

C. This account shall be credited and account 805.2 debited for those costs included in this account which are passed through by means of incremental pricing surcharges.

D. Those costs accumulated in this account for gas received during a calendar month which are not subject to passthrough by incremental pricing surcharges because of alternative fuel price ceilings shall be transferred to account 191, Unrecovered Purchased Gas Costs, no later than the end of the month in which the applicable surcharges are billed.

E. Separate subaccounts shall be maintained for the accumulation of incremental gas costs each calendar month and the passthrough or transfer of such costs so as to keep each period separate.

4. Part 201 is amended to add a new account 192.2 to read as follows:

192.2 Unrecovered incremental surcharges.

A. This account shall include any incremental pricing surcharges passed through to the company by pipeline suppliers.

B. This account shall be debited and account 805.2, Incremental Gas Cost Adjustments, shall be credited with the amount of each incremental pricing surcharge as incurred.

C. This account shall be credited and account 805.2 shall be debited with the amounts included in this account which are passed through to customers.

5. Part 201 is amended to add a new account 805.2 to read as follows:

§ 805.2 Incremental gas cost adjustments.

A. This account shall be credited with the costs of purchased gas which are subject to passthrough by means of incremental pricing surcharges.

B. This account shall also be credited with any incremental pricing surcharges passed through to the company by pipeline suppliers.

C. This account shall be debited with amounts from account 192.1, Unrecovered Incremental Surcharges, which are passed through by means of incremental pricing surcharges.

D. This account shall also be debited with amounts from account 192.2, Unrecovered Incremental Surcharges, which are passed through by means of incremental pricing surcharges.

PART 204—UNIFORM SYSTEM OF ACCOUNTS PRESCRIBED FOR NATURAL GAS COMPANIES SUBJECT TO THE PROVISIONS OF THE NATURAL GAS ACT (CLASS C AND CLASS D)

6. Part 204, account 191 is amended in paragraph A to read as follows:

191 Unrecovered purchased gas costs.

A. This account shall include purchased gas costs related to Commission approved purchased adjustment clauses when such costs are not included in the utility's rate schedules on file with the Commission. This account shall also include such other costs as authorized by the Commission. Costs of purchased gas subject to passthrough under the incremental pricing requirements of the Commission shall be excluded from this account and included in account 192.1, Unrecovered Incremental Gas Costs.

* * * * *

7. Part 204 is amended to add a new account 192.1 to read as follows:

192.1 Unrecovered incremental gas costs.

A. This account shall include the unrecovered costs of purchased gas which are subject to passthrough by means of incremental pricing surcharges. This account shall also include any other costs authorized by the Commission.

B. This account shall be debited and account 731.2, Incremental Gas Cost Adjustments, shall be credited for unrecovered costs of purchased gas subject to incremental pricing.

C. This account shall be credited and account 731.2 debited for those costs included in this account which are passed through by means of incremental pricing surcharges.

D. Those costs accumulated in this account for gas received during a calendar month which are not subject to passthrough by incremental pricing surcharges because of alternative fuel price ceilings shall be transferred to account 191, Unrecovered Purchased Gas Costs, no later than the end of the month in which the applicable surcharges are billed.

E. Separate subaccounts shall be maintained for the accumulation of incremental gas costs each calendar month and the passthrough or transfer of such costs so as to keep each period separate.

8. Part 204 is amended to add a new account 192.2 to read as follows:

192.2 Unrecovered incremental surcharges.

A. This account shall include incremental pricing surcharges passed through to the company by its pipeline suppliers.

B. This account shall be debited and account 731.2, Incremental Gas Cost Adjustments, shall be credited with the amount of each incremental pricing surcharge as incurred.

C. This account shall be credited and account 731.2 shall be debited with the amounts included in this account which are passed through to customers.

9. Part 204 is amended to add a new account 731.2 to read as follows:

§ 731.2 Incremental gas cost adjustments.

A. This account shall be credited with the costs of purchases gas which are subject to passthrough by means of incremental pricing surcharges.

B. This account shall also be credited with any incremental pricing surcharges passed through to the company by its pipeline suppliers.

C. This account shall be debited with amounts from account 192.1, Unrecovered Incremental Gas Costs, which are passed through by means of incremental pricing surcharges.

D. This account shall also be debited with amounts from account 192.2, Unrecovered Incremental Surcharges, which are passed through by means of incremental pricing surcharges.

10. Subchapter I of Chapter 1 is amended by adding a new Part 282 to read as follows:

PART 282—INCREMENTAL PRICING

Subpart A—General Rules and Definitions

Sec.

282.101 Purpose.
282.102 Applicability and effective date.
282.103 Definitions.

Subpart B—Exemptions

282.201 General rule.
282.202 Definitions.
282.203 Exempt end-uses.
282.204 Obtaining an exemption.
282.205 Annual reinstatement of exemptions.
282.206 Petitions for exemptions under § 206(d).

Subpart C—Determination of Costs Subject to Incremental Pricing

282.301 Costs subject to incremental pricing.
282.302 Gas qualifying under more than one provision.
282.303 First sale acquisition cost.
282.304 Incremental pricing threshold.

Subpart D [Proposed in notice of proposed rulemaking issued May 11, 1979 (44 FR 28000, May 18, 1979)]

Subpart E—Incremental Pricing Accounts and Surcharges

282.501 General rule.
282.502 Accounting.
282.503 PGA reduction.
282.504 Incremental pricing surcharge.
282.505 Recovery of amounts in excess of maximum surcharge absorption capabilities.

Subpart F—Filing Requirements

282.601 FERC gas tariff provisions.
282.602 Tariff sheets.
282.603 Informational filings.

Authority: This part is issued under the Natural Gas Act, as amended, 15 U.S.C. 717 *et seq.*; the Natural Gas Policy Act of 1978, Pub. L. 95-621, 92 Stat. 3350, 15 U.S.C. 3301, *et seq.*; the Department of Energy Organization Act, 42 U.S.C. 7101, *et seq.*; E.O. 12009, 42 FR 46267.

Subpart A—General Rules and Definitions [1]

§ 282.101 Purpose.

The purpose of this part is to set forth an incremental pricing rule in accordance with Title II of the Natural Gas Policy Act of 1978. The rule requires that certain costs of acquiring natural gas be passed through as a surcharge on sales of natural gas used as specified in the rule.

§ 282.102 Applicability and effective date.

(a) *Uses.* Natural gas used as boiler fuel in industrial boiler fuel facilities on and after January 1, 1980, shall be subject to incremental pricing under this part.

(b) *Costs.* Costs described in Subpart C and incurred by natural gas suppliers on or after January 1, 1980 shall be subject to this part.

(c) *Natural gas suppliers.* Interstate pipelines and local distribution companies shall be subject to this part.

(d) *Effective date.* The provisions of this part shall be effective September 1, 1979.

§ 282.103 Definitions.

For purposes of this part:

(a) "Natural gas supplier" means an interstate pipeline or a local distribution company.

(b) "Industrial facility" means any facility which primarily changes raw or unfinished materials into another form or product.

(c) "Non-exempt industrial boiler fuel facility" means any industrial boiler fuel facility other than any such facility which has been exempted from the provisions of this part in accordance with Subpart B.

(d) "No. 2 fuel oil" means No. 2 oil as defined in the standard specification for fuel oils published by the American Society for Testing and Materials, ASTM D 396-78.

(e) "No. 6 fuel oil" means No. 6 oil as defined in the standard specification for fuel oils published by the American Society for Testing and Materials, ASTM D 396-78.

(f) "Low sulfur fuel oil" means any oil containing 1 percent (1%) or less sulfur content by weight.

(g) "High sulfur fuel oil" means any oil containing more than 1 percent (1%) sulfur content by weight.

(h) "British thermal unit" or "Btu" shall have the meaning set forth in § 270.102.

Subpart B—Exemptions

282.201 General rule.

(a) *Statutory exemptions.* Natural Gas used for purposes described in § 282.203 shall be exempt from incremental pricing as provided in subsections 206(a), (b) and (c) of the NGPA. Exemptions for such gas may be obtained in the manner prescribed in § 282.204. Adjustments under authority of subsection 502(c) of the NGPA as may be necessary to prevent special harship, inequity, or unfair distribution of burdens may be obtained as provided in § 1.41.

(b) *Discretionary exemptions.* Petitions for an exemption under authority of subsection 206(d) of the NGPA may be filed in the manner prescribed in § 282.206.

§ 282.202 Definitions.

For the purposes of this subpart:

(1) "Qualifying cogeneration facility" means a cogeneration facility which meets the requirements prescribed in § ——.

(2) "School" means a facility the primary function of which is the delivery of instruction to regularly enrolled students in attendance at such facility. Facilities used for both educational and non-educational activities are not included under this definition unless the

[1] For convenience of the reader, most of Subpart A as it appears here was included in the Notice of Proposed Rulemaking issued in Docket No. RM79-21 on May 11, 1979 (44 FR 28000, May 18, 1979). Commenters are asked to comment on Subpart A in this docket rather than in Docket No. RM79-21.

latter activities are merely incidental to the delivery of instruction.

(3) "Hospital" means a facility the primary function of which is the delivery of medical care to patients who remain at the facility. Outpatient clinics or doctor's offices are not included in this definition. Nursing homes and convalescent homes are included in this definition.

(4) "Similar institution" means a facility the primary function of which is the same as the primary function of the facility to which it is compared.

(5) "Agricultural use" means any use of natural gas which is certified by the Secretary of Agriculture under 7 CFR § 2900.3 as an "essential agricultural use" pursuant to section 401(c) of the NGPA.

§ 282.203 Exempt end-uses.

Natural gas used for the following purposes shall be exempt from incremental pricing under this part:

(a) All gas used for boiler fuel by an industrial boiler fuel facility which was:

(1) In existence on November 9, 1978; and

(2) Did not consume more than an average of 300 Mcf per day for boiler fuel during any calendar month of calendar year 1977;

(b) All gas used for an agricultural use;

(c) All gas used in a qualifying cogeneration facility;

(d) All gas used for the generation of electricity by an electric utility; and

(e) All gas used in a school, hospital, or similar institution.

§ 282.204 Obtaining an exemption.

(a) *General.* This section establishes procedures by which owners or operators of industril boiler fuel facilities may obtain an exemption for natural gas used for the purposes described in § 282.203.

(b) *Determination of industrial boiler fuel facilities.* On or before September 14, 1979, each natural gas supplier shall determine which facilities served directly by it are industrial boiler fuel facilities.

(c) *Exemption on the basis of company records.* (1) On or before September 14, 1979, each natural gas supplier shall determine from an examination of its records which industrial boiler fuel facilities, as identified under paragraph (b), were in existence on November 9, 1978, and either:

(i) Did not use more than an average of 300 Mcf per day during any calendar month of calendar year 1977; or

(ii) Did not use more than an average of 300 Mcf per day for boiler fuel during any calender month of calendar year 1977.

(2) Natural gas used by an industrial boiler fuel facility for which an affirmative determination is made under subparagraph (1) shall be exempt from incremental pricing under this part.

(d) *Exemption on the basis of affidavit.* (1) *Commission to provide exemption affidavits.* As of the effective date of this part, exemption affidavits as described in subparagraph (3) will be available to natural gas suppliers for purposes of subparagraph (2) and to any other interested person upon request from the Office of Public Information, Federal Energy Regulatory Commission, Room 1000, 825 North Capitol Street, NE., Washington, D.C. 20426.

(2) *Availability of exemption affidavits from natural gas suppliers.* (i) *Initial service.* Not later than September 14, 1979, each natural gas supplier shall mail or otherwise supply an exemption affidavit, as described in subparagraph (3), to the owner or operator of each industrial boiler fuel facility on such natural gas supplier's system which the natural gas supplier did not determine to be exempt pursuant to paragraph (c).

(ii) *Response date.* Natural gas suppliers which supply exemption affidavits under clause (i) shall request that executed affidavits be filed on or before October 1, 1979, in accordance with subparagraph (4).

(iii) *Ongoing availability.* After September 14, 1979, natural gas suppliers shall make exemption affidavits available at their principal place of business on an ongoing basis during regular business hours.

(3) *Contents of exemption affidavit.* (i) The exemption affidavit will provide the owner or operator of an industrial boiler fuel facility with an opportunity to respond to the following questions:

(A) Did the customer's facility, on the basis of records, documents, or data in the customer's possession, consume no more than an average of 300 Mcf per day for boiler fuel during any calendar month of calendar year 1977?

(B) Is all of the natural gas consumed at the customer's facility used as boiler fuel for an agricultural use?

(C) Is the customer's facility, in its entirety, a qualifying cogeneration facility?

(D) Is the customer's facility, in its entirety, a school, hospital, or similar facility?

(E) Is the customer's facility, in its entirety, used for the generation of electricity by an electric utility?

(F) Is a portion, though not all, of the gas consumed at the customer's facility used as boiler fuel for an agricultural use?

(G) Is the customer's facility, in part but not in its entirety, a qualifying cogeneration facility?

(H) Is the customer's facility, in part but not in its entirety, a school, hospital, or similar facility?

(I) Is the customer's facility, in part but not in its entirety, used for the generation of electricity by an electric utility?

(ii) The exemption affidavit will notify the customer that, if he affirmatively responds to any of the questions (F) through (I), volumes of natural gas used in the customer's facility will be exempt from incremental pricing only to the extent that the customer maintains submeters and records as required by subparagraph (6).

(iii) The exemption affidavit will indicate the record retention obligation which may be incurred by the customer under subparagraph (6) of this paragraph.

(iv) The exemption affidavit will contain such other information as may be necessary for completion and return of the affidavit.

(4) *Filing of exemption affidavits.* In order to obtain an exemption from incremental pricing, an owner or operator of an industrial boiler fuel facility shall file an executed exemption affidavit, signed and dated by a responsible official, under oath, with the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, and send a copy of the executed affidavit to the natural gas supplier serving the industrial boiler fuel facility.

(5) *Effect of filing an exemption affidavit.* (i) If the owner or operator of an industrial boiler fuel facility affirmatively responds to any of the questions (A) through (E), as set out in subparagraph (3), and files the affidavit in accordance with subparagraph (4), then natural gas used in the facility shall be exempt from incremental pricing under this part.

(ii) If the owner or operator of an industrial boiler fuel facility affirmatively responds to any of the questions (F) through (I) as set out in subparagraph (3), and files the affidavit in accordance with subparagraph (4), then natural gas used in the industrial boiler fuel facility shall be exempt from incremental pricing to the extent determined in accordance with the applicable provision of subparagraph (6).

(6) *Determination of extent of partial exemption.* (i) If the owner or operator of an industrial boiler fuel facility affirmatively responds to question (F) as set out in subparagraph (3), the volume of natural gas used in the facility which shall be exempt from incremental pricing shall be determined on the basis of and to the extent there are submeter reading records for each billing month, as signed under oath by a responsible company official, that show the extent to which gas is consumed for an agricultural use and that are made available to the facility's natural gas supplier as required by the supplier for billing purposes.

(ii) If the owner or operator of an industrial boiler fuel facility affirmatively responds to any of the questions (G) through (I), the volume of natural gas used in the facility which shall be exempt from incremental pricing shall be determined on the basis of and to the extent there are submeters which permit determination of the volume of exempt usage and which are available to be read by the facility's natural gas supplier as required for billing purposes.

(7) *Effective date of exemption.* (i) If the owner or operator of an industrial boiler fuel facility files an exemption affidavit with the Commission and sends a copy to the facility's natural gas supplier in accordance with subparagraph (4) on or before December 31, 1979, the facility shall be exempt from incremental pricing under this part as of January 1, 1980.

(ii) If the owner or operator of an industrial boiler fuel facility files an exemption affidavit with the Commission and sends a copy to the facility's natural gas supplier in accordance with subparagraph (4) on or after January 1, 1980, the facility shall be exempt from incremental pricing under this part as of the beginning of the first full billing month following the date the exemption affidavit is filed with the Commission and received by the facility's natural gas supplier.

(8) *Record retention.* If the owner or operator of an industrial boiler fuel facility obtains an exemption as a result of affirmatively responding to question (A) as set out in subparagraph (3), the owner or operator shall retain all records, documents or data which formed the basis of the response.

(e) *Public availability of exemption information.* (1) *Executed exemption affidavits.* (i) Copies of executed exemption affidavits which are filed with the Commission shall be available for public inspection at the Office of Public Information, Federal Energy Regulatory Commission, Room 1000, 825 North Capitol Street NE., Washington, D.C. 20426.

(ii) Each natural gas supplier shall maintain copies of all executed exemption affidavits which it has received and shall make such copies available for public inspection at its principal place of business during regular business hours.

(2) *Lists of non-exempt facilities.* (i) On or before January 15, 1980, each natural gas supplier shall file with the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, a list of all industrial boiler fuel facilities on each supplier's system which did not qualify for an exemption under paragraph (c) or (d) as of December 31, 1979.

(ii) On or before January 15th of each year after 1980, each natural gas supplier shall file a revised list of the non-exempt industrial boiler fuel facilities on such supplier's system. A revised list shall indicate all additions to or deletions from the prior year's list and shall reflect determinations and reaffirmations made pursuant to § 282.205.

(iii) Lists of non-exempt facilities filed in accordance with clause (i) or (ii) shall be available for public inspection through the Office of Public Information, Federal Energy Regulatory Commission, Room 1000, 825 North Capitol Street NE., Washington, D.C. 20426.

(iv) Each natural gas supplier shall make lists filed in accordance with clause (i) or (ii) available for public inspection at its regular place of business during regular business hours.

(f) *Protests.* Any interested person may protest the exemption of an industrial boiler fuel facility form incremental pricing. The procedures set forth in § 1.10 shall govern the filing of such a protest.

§ 282.205 Annual reinstatement of exemptions.

(a) *Review of exemption determinations by natural gas suppliers.* On or before December 31, 1980, and December 31st of every year thereafter, each natural gas supplier shall review the determinations made by its pursuant to § 282.204(b) in order to ascertain whether all such determinations remain accurate.

(b) *Filing of reaffirmations of eligibility for exemption.* On or before December 31st of 1980 and of every year thereafter, the owner or operator of each industrial boiler fuel facility which has been exempted in part or in whole from the incremental pricing program during the immediately preceding calendar year through the filing of an exemption affidavit pursuant to § 282.204(d) or a reaffirmation of such affidavit, as set forth herein, shall, if appropriate, file a reaffirmation of eligibility for exemption from the incremental pricing program, signed and dated by a responsible official, under oath, with the Secretary, Federal Energy Regulatory Commission, Room 1000, 825 North Capitol Street NE., Washington, D.C. 20426, and send a copy of the executed reaffirmation affidavit to the natural gas supplier serving the industrial boiler fuel facility.

(c) *Effect of not filing a reaffirmation.* (1) If a natural gas supplier does not receive by December 31st of 1980 and every year thereafter a reaffirmation of eligibility with respect to an industrial boiler fuel facility which it has treated as a partially or wholly exempt facility during the immediately preceding calendar year, the natural gas supplier shall add the facility to the list of non-exempt industrial boiler fuel facilities which it files with the Commission under § 282.204(e)(2)(ii) and shall treat the facility as a non-exempt facility beginning with the next full billing month following the December 31 date.

(2) An industrial boiler fuel facility may file an entirely new exemption affidavit rather than a reaffirmation affidavit in order to reflect a change of circumstances in the operations of the facility.

(d) *Commission to provide reaffirmation affidavits.* Affidavits for the reaffirmation of eligibility for exemption from the incremental pricing program will be available to natural gas suppliers and to any other interested person upon request from the Office of Public Information, Federal Energy Regulatory Commission, Room 1000, 825 North Capitol Street NE., Washington, D.C. 20426.

(e) *Natural gas suppliers to make reaffirmation affidavits available.* (1) *Initial service.* On or before December 15, 1980 and December 15 of each following year, each natural gas supplier shall mail or otherwise supply a reaffirmation affidavit to the owner or operator of each industrial boiler fuel facility which has been exempted in whole or in part from the incremental pricing program during the immediately preceding calendar year through the filing of either an exemption affidavit pursuant to § 282.204(d) or a reaffirmation of eligibility affidavit pursuant to paragraph (b).

(2) *Ongoing availability.* Natural gas suppliers shall make reaffirmation affidavits available at their principal place of business on an ongoing basis during regular business hours.

§ 282.206 Petitions for exemptions under § 206(d).

(a) *General rule.* Any interested person may petition under authority of subsection 206(d) of the NGPA for the exemption, in whole or in part, of any non-exempt industrial boiler fuel facility or category thereof.

(b) *Filing requirements.* A petition for an exemption under authority of subsection 206(d) shall:

(1) Conform to the requirements of § 1.7;

(2) Contain sufficient information and data to permit review of the petition on the merits; and

(3) Provide an analysis of any environmental issues which are relevant to the request for an exemption.

(c) *Notice.* Public notice of the filing of a petition for an exemption under authority of subsection 206(d) shall be given with opportunity for comment by interested persons.

(d) *Denial without prejudice.* A petition for an exemption under authority of subsection 206(d) which is not acted upon within 60 days of the date for submission of comments shall be deemed denied without prejudice.

Subpart C—Determination of Costs Subject to Incremental Pricing

§ 282.301 Costs subject to incremental pricing.

The costs specified in this section are acquisition costs which shall be subject to the passthrough provisions of this part.

(a) *New natural gas.* In the case of new natural gas (as defined in section 102(c) of the NGPA), any portion of the first sale acquisition cost of such natural gas which exceeds the incremental pricing threshold applicable for the month in which the delivery of such natural gas occurs shall be subject to this part.

(b) *Natural gas under intrastate rollover contract.* In the case of natural gas delivered under a rollover contract which was not committed or dedicated to interstate commerce on November 8, 1978, any portion of the first sale acquisition cost of such natural gas which exceeds the incremental pricing threshold applicable for the month in which the delivery occurs shall be subject to this part.

(c) *New, onshore production well gas.* In the case of natural gas produced from any new, onshore production well (as defined in section 103(c) of the NGPA), any portion of the first sale acquisition cost of such natural gas which exceeds the incremental pricing threshold applicable for the month in which the delivery of such natural gas occurs shall be subject to this part.

(d) *LNG imports.* (1) Subject to the provisions in subparagraph (2), in the case of liquefied natural gas imported into the United States, any portion of the first sale acquisition cost of such natural gas (whether or not liquefied when acquired) which exceeds the incremental pricing threshold applicable for the month in which such liquefied natural gas enters the United States shall be subject to this part.

(2) Costs of liquefied natural gas imported into the United States shall not be subject to this part if:

(i) The importation of the liquefied natural gas was authorized under section 3 of the Natural Gas Act on or before May 1, 1978;

(ii) An application for such authority was pending under section 3 of the Natural Gas Act on such date, except as set forth in subparagraph (3) below; or

(iii) In connection with the granting of any authority under the Natural Gas Act to import such liquefied natural gas, the Secretary of the Department of Energy or the Commission, in accordance with the Department of Energy Organization Act (or any delegation or assignment thereunder), determines that a contract binding on the importer or other substantial financial commitment of the importer was made on or before such date, except as set forth in subparagraph (3) below.

(3) Clauses (ii) and (iii) of subparagraph (2) shall not apply with respect to any liquefied natural gas imports if, in connection with the granting of any authority under the Natural Gas Act to import such liquefied natural gas, the Secretary of the Department of Energy or the Commission, in accordance with the assignment of functions under the Department of Energy Organization Act, determines that the portion of the costs of such imports as described in subparagraph (1) shall be subject to this part.

(e) *Natural gas (other than LNG) imports.* (1) Subject to subparagraph (2), in the case of natural gas (other than liquefied natural gas) imported into the United States, any portion of the first sale acquisition cost of such imported natural gas which exceeds the maximum lawful price, per million Btu's, computed under section 102 of the NGPA (relating to new natural gas) for the month in which such natural gas enters the United States without regard to section 110 of the NGPA, shall be subject to this part.

(2) Subject to subparagraph (3), subparagraph (1) shall only apply to costs of volumes of natural gas (other than liquefied gas) imported into the United States which exceed both:

(i) The maximum delivery obligations for the month in which such delivery of natural gas occurs, as specified by contracts entered into on or before May 1, 1978 and in effect when such delivery occurs; and

(ii) The volume of natural gas imported into the United States by the interstate pipeline involved during the corresponding month of calendar year 1977.

(3) Subparagraph (2) notwithstanding, subparagraph (1) shall apply to the portion of first sale acquisition costs, as described in subparagraph (1), of volumes of natural gas (other than liquefied natural gas) imported into the United States which exceed the volume of natural gas imported into the United States by the interstate pipeline involved during calendar year 1977 if, in connection with the granting of any authority under the Natural Gas Act to import such natural gas, the Secretary of the Department of Energy or the Commission, in accordance with the assignment of functions under the Department of Energy Organization Act, determines that subparagraph (1) shall apply with respect to such natural gas imports.

(f) *Stripper well natural gas.* In the case of stripper well natural gas (as defined in section 108(b) of the NGPA) any portion of the first sale acquisition cost of such natural gas which exceeds the maximum lawful price, per million Btu's, computed under section 102 of the NGPA (relating to new natural gas) for the month in which the delivery of such gas occurs without regard to section 110 of the NGPA, shall be subject to this part.

(g) *High-cost natural gas.* In the case of high-cost natural gas (as defined in section 107(c) of the NGPA), any portion of the first sale acquisition cost of such natural gas which exceeds 130 percent of—

(1) The weighted average per barrel cost of No. 2 fuel oil landed in the greater New York City metropolitan area, as published by the energy Information Administration of the Department of Energy, during the month preceding the month in which delivery of such natural gas occurs, divided by,

(2) A Btu conversion factor of 5.8 million Btu's per barrel—shall be subject to this part.

(h) *Alaska Natural Gas Transportation System.* In the case of natural gas produced from the Prudhoe Bay Unit of Alaska (as defined in section 2 of the NGPA), and transported

through the natural gas transportation system approved under the Alaska Natural Gas Transportation Act of 1976, the following amounts shall be subject to this part:

(1) Any portion of the first sale acquisition cost of natural gas which is not described in subparagraph (2) and which exceeds the maximum lawful price, per million Btu's computed under section 109 of the NGPA (relating to other categories of natural gas) for the month in which delivery of such natural gas occurs without regard to section 110 of the NGPA; and

(2) Any amount paid to any person (other than the producer of such natural gas or an affiliate of such producer) for, or attributable to, any compressing, gathering, processing, treating, liquefying, or transporting of such natural gas, or any similar service provided with respect to such natural gas, before the delivery of such natural gas to such system.

(i) *Increased state severance taxes.* (1) Subject to the provisions of subparagraph (2), any portion of the cost of natural gas at any first sale attributable to any increase in the amount of state severance taxes (as defined in section 110(c) of the NGPA) which results from a provision of state law enacted on or after December 1, 1977, shall be subject to this part.

(2) Subparagraph (1) shall not apply to any increase in state severance taxes resulting from a change in the method of computation of such tax by reason of any provision of state law enacted on or after December 1, 1977, if:

(i) As of the effective date of such change in method of computation, such increase does not result in an increase in the level of such tax, expressed as a percentage of the weighted average first sale price of natural gas produced in such state, above the percentage of such average first sale price which such tax constituted on the day before such effective date; and

(ii) Such provision of law is equally applicable to natural gas produced in the state and delivered to interstate commerce and to natural gas produced in the state and not so delivered.

(3) The price to be used in determining the weighted average first sale price for purposes of subparagraph (2) shall be the price paid at the first sale which is used by the State in administering such tax (or an imputed value, if the state uses an event other than a first sale in administering such tax).

(j) *Transactions under section 311(b) of the NGPA.* In the case of any sale under section 311(b) of the NGPA by an intrastate pipeline to an interstate pipeline or a local distribution company, any portion of the amount paid, per million Btu's, by the purchaser to the intrastate pipeline which exceeds the incremental pricing threshold for the month in which the acquisition of the natural gas occurs shall be subject to this part.

(k) *Pipeline produced gas.* (1) In the case of any natural gas produced by an interstate pipeline which is priced in its overall cost of service without regard to the cost of producing the gas, any portion of the first sale acquisition cost imputed under § 282.303 shall be subject to this part if it would have been subject to this part under paragraphs (a) through (h) had the gas been produced by an independent producer and purchased by the interstate pipeline at the imputed level.

(2) Gas produced by interstate pipelines which is treated, for rate purposes, on a cost of service basis shall not be subject to this part.

(3) Costs of gas produced by producers affiliated with interstate pipelines shall be treated as production by an independent producer and shall be subject to this part, except to the extent that different treatment has been found appropriate under the Natural Gas Act.

(l) *Surcharges paid to other pipelines.* The amount of any incremental pricing surcharge (described in § 282.504) paid by any interstate pipeline for natural gas acquired by such pipeline from another pipeline shall be subject to this part.

§ 282.302 Gas qualifying under more than one provision.

If natural gas qualifies under more than one paragraph of § 282.301, the paragraph which reflects a determination made in acordance with section 101(b)(5) of the NGPA and regulations promulgated thereunder shall be applicable for purposes of determining the portion of the first sale acquisition costs of such natural gas which shall be subject to passthrough under this part.

§ 282.303 First sale acquisition cost.

(a) *General rule.* For purposes of this part, the first sale acquisition cost of natural gas is:

(1) the price paid, per million Btu's, in any first sale of such natural gas, in the case of any natural gas produced in the United States and acquired in such first sale; or

(2) the price paid for such natural gas, per million Btu's, at the point of entry to the United States, in the case of natural gas or liquefied natural gas imported into the United States.

(b) *State severance taxes.* Any amount of state severance taxes paid at any first sale shall not be included in determining the price paid for purposes of paragraph (a).

(c) *Pipeline produced gas.* A first sale acquisition cost shall be imputed to gas produced by an interstate pipeline which is priced in its overall cost of service without regard to the cost of producing the gas. The imputed cost shall be the maximum lawful price which would have been paid under Title I of the NGPA if the gas had been produced by an independent producer. The determination of this maximum lawful price shall be made by the body which, by terms of the NGPA and the regulations promulgated thereunder, would have made the determination if the gas had been produced by an independent producer.

§ 282.304 Incremental pricing threshold.

(a) *General rule.* For purposes of this part, the incremental pricing threshold applicable for any month shall be:

(1) $1.48 per million Btu's in the case of March 1978; and

(2) in the case of any month thereafter, the amount, per million Btu's, determined under this section for the preceding month multiplied by the monthly equivalent of the annual inflation adjustment factor (as defined in section 101(a) of the NGPA) applicable for such month.

(b) *Publication.* Not later than 5 days before the beginning of each month, commencing with January, 1980, the Commission shall issue the incremental pricing threshold applicable for such month. As soon as possible thereafter, such incremental pricing threshold shall be published in the Federal Register.

Subpart D [Proposed in notice of proposed rulemaking issued May 11, 1979 (44 FR 29090, May 18, 1979)]

Subpart E—Incremental Pricing Accounts and Surcharges

§ 282.501 General rule.

(a) Each natural gas supplier shall, on a monthly basis, accumulate in an unrecovered incremental gas costs account, as provided in § 282.502, the costs described in paragraph (a) through (k) of § 282.301 as being subject to passthrough under this part.

(b) Each interstate pipeline shall derive a reduced PGA rate for each PGA period, as provided in § 282.503.

(c) Each month, in accordance with § 282.504, each natural gas supplier shall bill incremental pricing surcharges to the sale for resale customers and the

non-exempt industrial boiler fuel facilities on the supplier's system.

(1) Surcharges shall be calculated to recover the lesser of the total incremental gas costs, as defined in § 282.504, which were incurred by the supplier during the prior month or an amount equivalent to the maximum surcharge absorption capability of the supplier's customers.

(2) The maximum surcharge absorption capability of a non-exempt industrial boiler fuel facility shall be the difference between the cost to the facility for its use of natural gas, calculated on the basis of the rates of its natural gas suppliers before inclusion of incremental pricing surcharges, and the cost of that same volume of natural gas priced at the alternative fuel price ceiling applicable to the facility.

(d) Each month, in accordance with § 282.505, the amount accumulated in the natural gas supplier's unrecovered incremental gas costs account which cannot be recovered by way of incremental pricing surcharges shall be transferred from that account to account 191, Unrecovered Purchased Gas Costs.

§ 282.502 Accounting.

(a) *General rule.* For purposes of incremental pricing, each natural gas supplier shall establish an unrecovered incremental gas costs account, an unrecovered incremental surcharges account and an incremental gas cost adjustments acoount.

(b) *Establishment of accounts.* (1) *Unrecovered incremental gas costs account.* Each natural gas supplier shall establish an unrecovered incremental gas costs account.

Such account shall be designated account 192.1, Unrecovered Incremental Gas Costs, for interstate pipeline following the Uniform System of Acounts, Parts 201 and 204 of this chapter. The underlying records of such account shall be maintained to permit identification of:

(i) Each purchase that gave rise to costs being charged to the account;

(ii) The paragraph of § 282.301 under which the costs associated with such purchase qualify for inclusion in the account; and

(iii) Any other charges to the account.

(2) *Unrecovered incremental surcharges account.* The unrecovered incremental surcharges account shall be designated account 192.2, Unrecovered Incremental Surcharges, for interstate pipelines following the Uniform System of Accounts, Parts 201 and 204 of this chapter. The underlying records of this account shall be maintained so as to permit identification of each incremental pricing surcharge debited to the account in accordance with paragraph (e).

(3) *Incremental gas cost adjustments account.* Each natual gas supplier shall establish an incremental gas cost adjustments account. Such account shall be designated account 805.2, Incremental Gas Cost Adjustments, for interstate pipelines following the Uniform System of Accounts, Part 201 of this chapter. Such account shall be designated account 731.2, Incremental Gas Cost Adjustments, for interstate pipelines following the Uniform System of Accounts, Part 204 of this chapter.

(c) *Debiting the unrecovered incremental gas costs account.* The unrecovered incremental gas costs account shall be debited and the incremental gas cost adjustment account shall be credited with:

(1) Costs described in paragraphs (a) through (k) of § 282.301 which are incurred during each calendar month; and

(2) Any other costs as permitted by order of the Commission.

(d) *Crediting the unrecovered incremental gas costs account.* (1) The unrecovered incremental gas costs account shall be credited and the incremental gas cost adjustments account shall be debited when costs included in the unrecovered incremental gas costs account are recovered by means of incremental pricing surcharges.

(2) The unrecovered incremental gas costs account shall be credited with any amount which was accumulated in the account for gas received during a calendar month but which, due to the alternative fuel price ceilings established pursuant to § 282.404, cannot be collected by way of incremental pricing surcharges to be billed during the subsequent month. Such amount may be transferred to account 191 immediately, but no later than the end of the month in which the applicable surcharges are billed.

(e) *Debiting the unrecovered incremental surcharges account.* A natural gas supplier's unrecovered incremental surcharges account shall be debited and the incremental gas cost adjustment account shall be credited with any incremental pricing surcharge which is billed to it by its supplier in accordance with a tariff sheet filed by such supplier in accordance with § 282.602.

(f) *Crediting the unrecovered incremental surcharges account.* The unrecovered incremental surcharges account shall be credited and the incremental gas cost adjustments account shall be debited for those amounts which are recovered by means of an incremental pricing surcharge.

§ 282.503 PGA reduction.

(a) *General rule.* (1) An interstate pipeline company which files purchased gas adjustment (PGA) rate changes with the Commission under authority of § 154.38(d) shall, each PGA period, reduce its total projected gas acquisition cost by the amount which it projects it will recover during the next PGA period through incremental pricing surcharges. The total projected gas acquisition cost, as reduced, shall be used to derive the pipeline's PGA rate for the coming PGA period in the manner prescribed in the pipeline's effective PGA provision.

(2) The amount which an interstate pipeline projects it will recover through incremental pricing surcharges during a PGA period shall be the lesser of:

(i) The costs subject to incremental pricing, as described in paragraphs (a) through (l) of § 282.301, which the pipeline projects it will incur during the coming PGA period; or

(ii) The total of the projected maximum surcharge absorption capabilities (MSAC) of each of the non-exempt industrial boiler fuel facilities directly served by the pipeline, as computed in accordance with paragraph (b), plus the total of the projected MSAC's of the pipeline's sale for resale customers, as determined by each of the customers in accordance with paragraph (c) and reported to the pipeline in accordance with paragraph (d).

(b) *Projected MSAC of a non-exempt industrial boiler fuel facility.* (1) The projected MSAC of a non-exempt industrial boiler fuel facility for a coming PGA period shall be calculated by a natural gas supplier in accordance with the following formula:

$$M = [(A_1 - R_1) V_1] + [(A_2 - R_2) V_2] + \ldots + [(A_n - R_n) V_n]$$

where:

M = Projected MSAC of the non-exempt industrial boiler fuel facility.

A = Projected alternative fuel price ceiling for the non-exempt industrial boiler fuel facility, plus taxes, as determined in accordance with subparagraph (2).

R = Projected rate per million Btu's (excluding any incremental pricing surcharge), plus taxes, at which the non-exempt industrial boiler fuel facility will purchase natural gas, as determined in accordance with subparagraph (3).

V = Projected volume of natural gas (at 1,000 Btu's per cubic foot) that the non-exempt industrial boiler fuel facility will purchase from the natural gas supplier and use for boiler fuel, as estimated for each of the months "1" through "n" of the PGA period.

n = Last month of the PGA period.

(2)(i) *As a value for "A"* for each of the months "1" through "n" of the coming PGA period, a natural gas supplier shall use the most recently established alternative fuel price ceiling applicable to the facility, plus taxes, unless the supplier elects to estimate the applicable alternative fuel price ceilings for each of the months of the PGA period. In that case, the estimated ceilings, plus taxes, may be used as values for "A".

(ii) If a local distribution company desires assistance in estimating applicable alternative fuel price ceilings for each of the months of the coming PGA period, the interstate pipeline which supplies the local distribution company shall provide such assistance.

(3)(i) *Local distribution company.* As a value for "R" for each of the months "1" through "n" of the coming PGA period, a local distribution company shall use its effective rate per million Btu's at the time of projection, plus taxes but exclusive of any incremental pricing surcharges, unless the local distribution company elects to adjust such rate to reflect general rate changes which it is known will occur during the PGA period under authority of a state or local regulatory body. If the local distribution company elects to adjust the rate, the values used for "R" may reflect the adjustments for the months of the PGA period for which the adjustments are appropriate.

(ii) *Interstate pipeline.* As a value for "R" for each of the months "1" through "n" of the coming PGA period, an interstate pipeline shall use its effective contract rate per million Btu's at the time of projection, plus taxes but exclusive of any incremental pricing surcharges, unless the pipeline elects to adjust such rate to reflect rate changes which it is known will occur during the PGA period.

(c) *Projected MSAC of a sale for resale customer.* With respect to each of its natural gas suppliers, the projected MSAC of a sale for resale customer shall be derived by adding the sum of the projected MSAC's of the non-exempt industrial boiler fuel facilities served directly by the sale for resale customer, as determined in accordance with paragraph (b), to the sum of the projected MSAC's of the customer's own sale for resale customers, as reported in accordance with paragraph (d), and multiplying the resulting total by the percentage reflecting the ratio between:

(i) The volume of natural gas (at 1,000 Btu's per cubic foot) which the customer estimates it will purchase from the supplier during the coming PGA period; and

(ii) The total of:

(A) The volume of natural gas (at 1,000 Btu's per cubic foot) which the customer estimates it will purchase from interstate pipelines;

(B) The volume of natural gas (at 1,000 Btu's per cubic foot) which is included in any of the categories specified in paragraphs (a) through (k) § 282.301 and which the customer estimates it will purchase from sources other than interstate pipelines; and

(C) If the sale for resale customer is an interstate pipeline, the estimated volume of pipeline produced natural gas (at 1,000 Btu's per cubic foot) to which a first sale acquisition cost will be imputed under paragraph (c) of § 282.303.

(d) *Reporting.*—(1) *Pipeline to request information.* Prior to the beginning of each of its PGA periods, each interstate pipeline shall request that each of its sale for resale customers report to it the customer's projected MSAC in a timely fashion.

(2) *Pipeline customers to report.* Each natural gas supplier shall respond to the requests of interstate pipelines for projected MSAC's for a coming PGA period in a timely fashion.

(iii) *Scheduling by the Commission.* In those instances where the Commission finds that natural gas suppliers have not arranged for the reporting of information in accordance with this section, the Commission shall prescribe by order an appropriate schedule for the expeditious transmission of the information necessary for interstate pipelines to make their regular PGA filings with the Commission.

§ 282.304 Incremental pricing surcharge.

(a) *General rule.* Each natural gas supplier shall include an incremental pricing surcharge, stated as a dollar amount, in its monthly bills to the non-exempt industrial boiler fuel facilities and sale for resale customers on its system. Surcharges billed to non-exempt industrial boiler fuel facilities shall be determined in accordance with paragraph (c). Surcharges billed to sale for resale customers shall be determined in accordance with paragraph (d). Such surcharges shall recover, subject to the limitation of the alternative fuel price ceilings described in § 282.404, the total incremental gas costs as defined in paragraph (b), which were incurred by the natural gas supplier during the previous month.

(b) *Definitions.* For purposes of this section:

(1) "Total incremental gas costs" means the sum of the following:

(i) the amount of the costs accumulated in a natural gas supplier's unrecovered incremental gas cost account for a period; and

(ii) any incremental pricing surcharges imposed on the natural gas supplier by its own supplier(s) for that period.

(2) "Billing month" means, for a non-exempt industrial boiler fuel facility, the period between the meter reading on or about the twentieth day of one month and the meter reading on or about the twentieth day of the following month, *provided that* for the month of January 1980, the billing month shall commence January 1, 1980.

(c) *Surcharges on non-exempt industrial boiler fuel facilities.* (1) *General rule.* The incremental pricing surcharge to be billed for the previous billing month by a natural gas supplier for each of the non-exempt industrial boiler fuel facilities which it directly serves shall, subject to subparagraph (4), be the lesser of:

(i) The MSAC of the non-exempt industrial boiler fuel facility for the previous billing month, as determined in the manner described in subparagraph (2); or

(ii) The non-exempt industrial boiler fuel facility's pro rata share of the total incremental gas costs incurred by its natural gas supplier during the previous calendar month, as determined in the manner described in subparagraph (3) of this paragraph.

(2) *MSAC of a non-exempt industrial boiler fuel facility.* (i) The MSAC of a non-exempt industrial boiler fuel facility for the previous billing month shall be determined in accordance with the following formula:

$$M = [[A - R][V]]$$

where:

M = MSAC of the non-exempt industrial boiler fuel facility.

A = Alternative fuel price ceiling applicable to the non-exempt industrial boiler fuel facility for the billing month, plus taxes.

R = Rate per million Btu's (excluding any incremental pricing surcharge), plus taxes, at which the non-exempt industrial boiler fuel facility purchased gas from the natural gas supplier during the billing month.

V = Volume of natural gas (at 1,000 Btu's per cubic foot) supplied by the natural gas supplier to the non-exempt industrial boiler fuel facility for boiler fuel use during the billing month, as determined in accordance with clause (ii).

(ii) The volume of natural gas supplied by a natural gas supplier to a non-exempt industrial boiler fuel facility for boiler fuel use during a billing month shall be deemed to be the total volume of natural gas supplied to the facility during the billing month, unless the

natural gas supplier serving the facility distinguishes the volumes used for boiler fuel from the volumes not so used on the basis of submeter readings. If volumes used for boiler fuel are so identified, such volumes shall be used for purposes of determining the MSAC of the non-exempt industrial boiler fuel facility in accordance with clause (i).

(3) *Pro rata share of total incremental gas costs.* A non-exempt industrial boiler fuel facility's pro rata share of the total incremental gas costs incurred by its natural gas supplier during the previous calendar month shall be determined by multiplying the total incremental gas costs by a percentage reflecting the ratio between:

(i) The MSAC of the non-exempt industrial boiler fuel facility for the previous billing month, as determined in accordance with subparagraph (2); and

(ii) The sum of the MSAC's of the non-exempt industrial boiler fuel facilities on the natural gas supplier's system, as determined for the previous billing month in accordance with subparagraph (2), plus the sum of MSAC's reported to the natural gas supplier by its sale for resale customers for the previous month.

(4) *Optional billing procedures for local distribution companies.* A local distribution company may elect to bill non-exempt industrial boiler fuel facilities served by it at the level of the alternative fuel price ceilings which are applicable to such facilities.

(i) If a local distribution company bills a non-exempt industrial boiler fuel facility at the level of the applicable alternative fuel price ceiling for service during the previous billing month and the MSAC of the non-exempt boiler fuel facility for such billing month exceeds the facility's pro rata share of the total incremental gas costs incurred by the local distribution company during the previous calendar month, then such local distribution company shall either refund the excess to the facility during the month after the bill was rendered or shall make such other disposition of such amount as may be ordered by a state or local regulatory authority having jurisdiction over the local distribution company.

(ii) An election made by a local distribution company in accordance with clause (i) shall be subject to review and action by a state or local regulatory authority which has jurisdiction over such company.

(d) *Surcharges on sale for resale customers.* (1) *General rule.* The incremental pricing surcharge to be collected by a natural gas supplier from each of its sale for resale customers shall be the lesser of:

(i) The MSAC of the sale for resale customer for the previous month, as determined by the customer in the manner described in subparagraph (2) of this paragraph and reported to the natural gas supplier pursuant to paragraph (e); or

(ii) The sale for resale customer's pro rata share of the total incremental gas costs incurred by its natural gas supplier during the previous month, such share being determined in the manner described in subparagraph (3) of this paragraph.

(2) *MSAC of a sale for resale customer.* With respect to each of its natural gas suppliers, the MSAC of a sale for resale customer shall be derived by adding the sum of the MSAC's of the non-exempt industrial boiler fuel facilities served directly by the sale for resale customer, as determined for the previous billing month in accordance with subparagraph (2) of paragraph (c), to the sum of the MSAC's of the customer's own sale for resale customers, as reported for the previous month in accordance with paragraph (e), and multiplying the resulting total by the percentage reflecting the ratio between:

(i) The volume of natural gas (at 1,000 Btu's per cubic foot) purchased by the customer from the natural gas supplier during the previous month; and

(ii) The total of:

(A) The volume of natural gas (at 1,000 Btu's per cubic foot) which the customer purchased from interstate pipelines during the previous month;

(B) The volume of natural gas (at 1,000 Btu's per cubic foot) which is included in any of the categories specified in paragraphs (a) through (k) of § 282.301 and which the customer purchased from sources other than interstate pipelines during the previous month; and

(C) If the sale for resale customer is an interstate pipeline, the volume of pipeline produced natural gas (at 1,000 Btu's per cubic foot) to which a first sale acquisition cost has been imputed under paragraph (c) of § 282.303.

(3) *Pro rata share of total incremental gas costs.* A sale for resale customer's pro rata share of the total incremental gas costs incurred by its natural gas supplier during the previous month shall be determined by the ratio between:

(i) The MSAC reported to the natural gas supplier by the sale for resale customer for the previous month in accordance with paragraph (e); and

(ii) The sum of the MSAC's of the non-exempt industrial boiler fuel facilities on the natural gas supplier's system, as determined for the previous billing month, in accordance with subparagraph (2) of paragraph (c), plus the sum of the MSAC's reported to the natural gas supplier by its sale for resale customers for the previous month in accordance with paragraph (e).

(e) *Reporting.*—(1) *Pipeline to request information.* Each interstate pipeline shall request that, each month, each of its sale for resale customers report its MSAC to the pipeline in a timely fashion for the monthly billing of incremental pricing surcharges.

(2) *Pipeline customers to report.* Each month each natural gas supplier shall respond to the requests of interstate pipelines for its MSAC.

(3) *Suppliers to customers.* Each month each natural gas supplier shall inform each of its sale for resale customers of the amount of the incremental pricing surcharge which will be billed to such customer. Such information shall be conveyed within sufficient time so as to enable the last customer in a chain of sale for resale customers to bill incremental pricing surcharges to its customers in a timely fashion.

(f) *Scheduling by the Commission.* In those instances where the Commission finds that natural gas suppliers have not arranged for the reporting of information in accordance with this section, the Commission will prescribe by order an appropriate schedule for the transmission of the information necessary for the monthly billing of incremental pricing surcharges.

§ 282.505 Recovery of amounts in excess of the maximum surcharge absorption capabilities.

(a) The amount accumulated in a natural gas supplier's unrecovered incremental gas costs account for gas received during a calendar month which, due to alternative fuel price ceilings, cannot be recovered through incremental pricing surcharges shall:

(1) In the case of interstate pipelines, be collected under the Commission's provisions governing recovery of unrecovered gas costs as set forth in § 154.38(d)(4); and

(2) In the case of local distribution companies, be recovered in the manner permitted by the appropriate state or local authority.

Subpart F—Filing Requirements

§ 282.601 FERC gas tariff provisions.

(a) *Incremental pricing surcharge provision.* Each interstate pipeline shall establish an incremental pricing surcharge provision in its FERC Gas Tariff. The incremental pricing surcharge provision shall provide for the

pass-through of costs in accordance with the requirements of this part.

(b) *Revised PGA provision.* Each interstate pipeline shall revise its PGA provision, as established in accord with § 154.38(d), to provide for a reduced PGA rate in accordance with the requirements of this part.

(c) *Filing dates.* The incremental pricing surcharge provision and revised PGA provision shall be filed with the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 and served on all parties by November 1, 1979. The provision shall become effective on December 1, 1979, unless disapproved in whole or in part by the Commission.

§ 282.602 Tariff sheets.

(a) *General rule.* (1) On or before December 1, 1979, for the period January 1, 1980 to the effective date of the pipeline's next normally scheduled PGA filing, each interstate pipeline shall file concurrently:

(i) A tariff sheet reflecting a reduced PGA rate as determined in accordance with § 282.502; and

(ii) For informational purposes only, and so labeled, a tariff sheet reflecting projected incremental pricing surcharges, as determined on the basis of data used in deriving the reduced PGA rates referenced in clause (i), for each of the non-exempt industrial boiler fuel facilities and sale for resale customers on the pipeline's system.

(2) Revisions to the tariff sheets filed pursuant to subparagraph (1) shall be filed in accordance with each interstate pipeline's normal PGA schedule, as necessary to revise the previously effective tariff sheets.

(b) *Form and filing requirements.* Any tariff sheet filed pursuant to paragraph (a) shall be subject to the provisions and requirements of Part 154 of this chapter.

(c) *Service.* The interstate pipeline which files tariff sheets pursuant to paragraph (a) shall concurrently serve copies on each sale for resale customers subject to the tariff sheets and each interested state commission.

(d) *Material to be submitted.* (1) Tariff sheets filed pursuant to paragraph (a) shall be accompanied by a report containing computations showing the derivation of the reduced PGA rate and the incremental pricing surcharges set forth in such tariff sheets.

(2) Tariff sheets filed pursuant to paragraph (a) shall be accompanied by a supplement to the statement of a pipeline's current cost of purchased gas as required by § 154.38(d).

(i) Such supplement shall identify, for the prior PGA period, each source of supply by API well identification number, contract date and FERC rate schedule number. Where multiple wells are metered through a common delivery point or where production from multiple wells is sold under a single contract, the supplement shall identify each well that produces gas which is subject to this part. Such supplement shall identify the price paid for gas from each well identified in accordance with this paragraph.

(ii) Such supplement shall show for account 192.1, for the prior PGA period:

(A) Total monthly debits to such account;

(B) Total monthly credits to such account resulting from the recovery of costs by means of incremental pricing surcharges; and

(C) The monthly amount credited to clear the account to account 191 and the date the clearing entry was made.

(iii) Such supplement shall show for account 192.2, for the prior PGA period:

(A) The incremental pricing surcharges debited to the account each month by the pipeline; and

(B) The total monthly credits to the account resulting from the recovery of costs by means of incremental pricing surcharges.

(e) *Additional information.* The Commission may, upon receipt of a tariff sheet filed pursuant to this section, require the submission of additional information as it deems necessary and appropriate.

§ 282.603 Informational filings.

(a) *General rule.* For informational purposes, each month commencing March 1, 1980, each interstate pipeline company shall tender to this Commission a statement setting forth the incremental pricing surcharge actually billed to each non-exempt industrial boiler fuel facility and sale for resale customer on its system in the preceding month.

(b) *Address.* The informational filings required by paragraph (a) shall be addressed to Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Appendix A

Federal Energy Regulatory Commission,
Washington, D.C. 20426.

Docket No. RM79-14

Exemptions From Incremental Pricing for Certain Categories of Industrial Boiler Fuel Use of Natural Gas

Participation is Voluntary.

Copies of executed exemption affidavits filed with the Commission shall be available through the Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Please Read Before Completing This Affidavit

Purpose

The Natural Gas Policy Act of 1978 (NGPA) provides that natural gas used as boiler fuel by any industrial boiler fuel facility will be subject to incremental pricing surcharges unless otherwise exempted. The statute also provides for certain exemptions from these incremental pricing surcharges. To be wholly or partially exempt from incremental pricing surcharges the boiler fuel must be consumed for one of the statutorily exempt uses. This affidavit serves the purpose of identifying those natural gas uses within your facility which are entitled to a full or partial statutory exemption from incremental pricing surcharges but which could not be identified as exempt through review of the records of your natural gas supplier. If a facility has not been identified as totally or partially exempt from incremental pricing surcharges through review of your natural gas supplier's records or through the filing of this affidavit in accordance with the general instructions below, all gas sold to the facility will be subject to incremental pricing surcharges.

General Instructions

If you claim an exemption from incremental pricing surcharges for all, or a portion, of the gas used by your facility which has been identified by your natural gas supplier as a potentially non-exempt industrial boiler fuel facility, this affidavit should be completed and signed, under oath, by a responsible official associated with the facility. A separate affidavit must be filed for each facility for which a total or partial exemption from incremental pricing surcharges is claimed.

The original and five copies of this affidavit should be submitted to: Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Also, one copy must be submitted to your natural gas supplier. Additionally, each industrial facility shall retain such records, documents and data which formed the basis for the exemption claimed on this affidavit. Definitions which may be helpful in completing this affidavit are provided below.

If you have any questions concerning this affidavit contact Mr. Warren Edmunds on (202) 275-4415.

Definitions

(1) "Natural gas supplier" means an interstate pipeline or a local distribution company.

(2) "Boiler fuel use" means the use of any fuel for the generation of steam or electricity.

(3) "Industrial facility" means any facility which primarily changes raw or unfinished materials into another form or product.

(4) "Non-exempt industrial boiler fuel facility" means any industrial boiler fuel facility other than any such facility which has been exempted from the provisions of this part in accordance with Part 292 of the Commission's rules and regulations.

(5) "Agricultural use" means any use of natural gas which is certified by the Secretary of Agriculture under 7 CFR 2900.3 as an "essential agricultural use" pursuant to section 401(c) of the NGPA.

(6) "Qualifying cogeneration facility" means a cogeneration facility which meets the requirements prescribed in § —— of the Commission's rules and regulations.

(7) "School" means a facility the primary function of which is the delivery of instruction to regularly enrolled students in attendance at such facility. Facilities used for both educational and non-educational acitivities are not included under this definition unless the latter activities are merely incidental to the delivery of instruction.

(8) "Hospital" means a facility the primary function of which is the delivery of medical care to patients who remain at the facility. Outpatient clinics or doctor's offices are not included in this definition. Nursing homes and convalescent homes are included in this definition.

(9) "Similar institution" means a facility the primary function of which is the same as the primary function of the facility to which it is compared.

1.0 Name of Company or Organization: ——

* * * * *

2.0 Name of Facility: ——

* * * * *

3.0 Address: ——

Number Street

City/Town County State Zip Code

* * * * *

4.0 Name of Natural Gas Supplier: ——

* * * * *

5.0 Did your facility, on the basis of records, documents or data in your possession, consume less than an average of 300 Mcf per day as boiler fuel during all calendar months during calendar year 1977?

(a) ☐ Yes.....Sign and return affidavit.
(b) ☐ No.....Continue to 6.0

* * * * *

6.0 Is all of the natural gas consumed as boiler fuel at your facility for an agricultural use?

(a) ☐ Yes.....Sign and return affidavit.
(b) ☐ No.....Continue to 7.0

* * * * *

7.0 Is your facility, in its entirety, any of the following:

(a) A qualifying co-generation facility?
☐ Yes ☐ No

(b) A school, hospital, or similar facility?
☐ Yes ☐ No

(c) Used for generation of electricity by an electric generation station owned by an electric utility?
☐ Yes ☐ No

If the answer is "yes" to any of the above, sign and return this affidavit. If the answer is "no", continue to 8.0.

* * * * *

8.0 Is a portion, though not all, of the gas consumed at your facility used as boiler fuel for an agricultural use?

(a) ☐ Yes.....See "NOTICE" below.
(b) ☐ No.....Continue to 9.0

* * * * *

9.0 Is your facility, in part, but not in its entirety, any of the following:

(a) A qualifying co-generation facility?
☐ Yes ☐ No

(b) A school, hospital, or similar facility?
☐ Yes ☐ No

(c) Used for the generation of electricity by an electric generation station owned by an electric utility?
☐ Yes ☐ No

If the answer is "yes" to any of the above, see "NOTICE" below, sign and return this affidavit. If the answer is "no" to all questions in items 5.0 through 9.0, you should not return this affidavit.

* * * * *

Notice

If you have responded affirmatively to question 8.0, the volume of natural gas used in your facility which shall be exempt from incremental pricing shall be determined on the basis of and to the extent there are submeter reading records for each billing month, as signed under oath by a responsible company official; which show the extent to which gas is consumed for an agricultural use and which are made available to the facility's natural gas supplier as required by the supplier.

If you have responded affirmatively to any part of question 9.0, the volume of natural gas which shall be exempt from incremental pricing shall be determined on the basis of and to the extent there are submeters which permit determination of the volume of exempt usage and which are available to be read by the facility's natural gas supplier.

BILLING CODE 6450-01

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 2]

[Docket No. 76N-0460]

Chlorofluorocarbon Propellants in Self-Pressurized Containers; Proposed Essential Uses

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This document proposes to add to the list of products containing a chlorofluorocarbon for an essential use a polymyxin B sulfate-zinc bacitracin-neomycin sulfate skin wound antibiotic for human use and a topical anesthetic drug for human use where a cannulae is used for application. The action is based upon two citizen petitions requesting that these products be added to the list of uses considered essential and establishing that the products provide unique health benefits unavilable without the use of the chlorofluorocarbon.

DATE: Comments by July 9, 1979.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Ed Farha, Bureau of Drugs (HFD-30), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-6490.

SUPPLEMENTARY INFORMATION: In the Federal Register of March 17, 1978 (43 FR 11301), the Food and Drug Administration (FDA) issued a final rule (21 CFR 2.125) prohibiting nonessential uses of chlorofluorocarbons as propellants in self-pressurized containers in certain products subject to

the Federal Food, Drug, and Cosmetic Act. This action and an earlier action to require a warning statement on the labels of products containing chlorofluorocarbon propellants (published in the Federal Register of April 29, 1977 (42 FR 22018)) were taken in response to recent scientific research indicating that the release of chlorofluorocarbons may result in the depletion of stratospheric ozone. A reduction of stratospheric ozone would increase the amount of biologically damaging ultraviolet radiation reaching the earth and, as a result, might increase the incidence of skin cancer and produce other adverse effects. These two previous rulemaking actions contain a detailed discussion of the scientific issues pertaining to chlorofluorocarbon use.

Section 2.125 provides that any food, drug, device, or cosmetic in a self-pressurized container that contains a chlorofluorocarbon propellant is adulterated and/or misbranded in violation of the act and that any drug product for human or animal use in a self-pressurized container that contains a chlorofluorocarbon propellant is a new drug on new animal drug. The regulation exempts certain products containing chlorofluorocarbons in self-pressurized containers from the adulteration and misbranding provisions if FDA determines that the products provide a unique health benefit that would not be available without the use of a chlorofluorocarbon. These products are referred to in the regulation as essential uses of chlorofluorocarbon.

Under § 2.125(f), a person may petition the agency to request additions to the list of uses considered essential. To demonstrate that the use of a chlorofluorocarbon is essential, the petition must be supported by an adequate showing that (1) there are no technically feasible alternatives to the use of a chlorofluorocarbon in the product, (2) the product provides a substantial health, environmental, or other public benefit unobtainable without use of the chlorofluorocarbon, and (3) the use does not involve a significant release of chlorofluorocarbons into the atmosphere or, if it does, the release is warranted by the benefit conveyed.

Two petitions have been received requesting additions to the list of uses considered essential. These two petitions, submitted under § 2.125(f) and Part 10 (21 CFR Part 10) are on file and may be seen in the office of the Hearing Clerk, FDA, at the address above. One petition was submitted by the Borroughs Wellcome Company. It requests that § 2.125(e) be amended to include Neosporin Aerosol, a polymyxin B sulfate-zinc bacitracin-neomycin sulfate antibiotic powder for human use intended for the treatment of open skin wounds and burns, as an essential use of chlorofluorocarbon. The petition contains a detailed discussion supporting the position that there are no technically feasible alternatives to the use of chlorofluorocarbons in Neosporin Aerosol. It includes data showing that only a chlorofluorocarbon propellant can provide the safe delivery of pure, undiluted antibiotic in a dry state with the degree of fineness that is necessary in the topical treatment of an open wound or burn. Also, the petition states that the product provides a substantial health benefit that would not be obtainable without the use of the chlorofluorocarbon. In this regard, the petition contains data to support the use of this product in the treatment of an open wound and asserts that this form of treatment is superior to other forms because it provides uniform distribution on the wound and does not lead to maceration of the tissue. The petition also asserts that the use of this product would not involve a significant release of chlorofluorocarbons into the atmosphere because only 900 milligrams of chlorofluorocarbons would be released per 1-second spray.

The second petition was submitted on behalf of Cetylite Industries, Inc. This petition requests that § 2.125(e) be amended to include Cetacaine Aerosol, a topical anesthetic drug for human use containing benzocaine, tetracaine hydrochloride, and butyl aminobenzoate, as an essential use of chlorofluorocarbons. The petition contains a detailed discussion supporting the position that there are no technically feasible alternatives to the use of a chlorofluorocarbon propellant in Cetacaine Aerosol. It includes data showing why the compound FC–152(a), the only commercially available hydrofluorocarbon that may be used as an aerosol propellant, would increase the pressure in the container to such an extent that the delivery rate would be increased to an unacceptable level. In addition, FC–152(a) is much more flammable than the present propellant formulation. The petition also states that the product provides a substantial health benefit that could not be obtainable without the use of the chlorofluorocarbon. In this regard, the petition contains data to support the use of Cetacaine Aerosol as an anesthetic applied topically to the laryngeal and pharyngeal areas before the performance of diagnostic procedures, and contends that this method of delivery is presently superior to other methods such as swabs or bulb sprays. The petition also asserts that the use of Cetacaine Aerosol would not involve a significant release of chlorofluorocarbons into the atmosphere because each bottle contains approximately 32.5 grams of propellants and is sufficient for approximately 60 patient applications.

The agency tentatively agrees that the use of Neosporin Aerosol and Cetacaine Aerosol provides special benefits for patients in the treatment of skin wounds and for patients requiring a topical anesthetic to the laryngeal and pharyngeal areas, respectively. Further, the agency tentatively agrees that the benefits these two products provide would be unavailable without the use of chlorofluorocarbons. Therefore, the Commissioner proposes to amend § 2.125(e) to include a polymyxin B sulfate-zinc bacitracin-neomycin sulfate skin wound antibiotic powder for topical use on humans and anesthetic drugs for topical use on accessible mucous membranes of humans where a cannulae is used for application, as essential uses of chlorofluorocarbons.

The proposed OTC drug monograph for topical antibiotic products (published in the Federal Register of April 1, 1977 (42 FR 17642)) tentatively classified the combination of neomycin sulfate, polymyxin B sulfate, and zinc bacitracin as Category III. Neosporin Aerosol contains this combination of ingredients. The agency advises, therefore, that any finding as to Neosporin Aerosol's essentiality under § 2.125(e) will be a conditional one, pending final classification of the triple antibiotic combination.

Also, with respect to Cetacaine Aerosol, a request for a hearing about its effectiveness as a combination drug product is currently being reviewed by FDA. This request was made by Cetylite Industries, Inc., and was in response to a notice (DESI 8076 (Docket No. 75N–0203) published in the Federal Register of December 9, 1975 (40 FR 57379)) in which the agency offered an opportunity for a hearing on a proposal to withdraw approval of a combination drug product containing two of the three ingredients also contained in Cetacaine Aerosol. Therefore, until a final ruling is made on this request, any finding as to Cetacaine Aerosol's essentiality under § 2.125(e) will be conditional.

The agency recognized that final determination of this action would not be completed by the December 15, 1978 effective date of the final rule prohibiting the manufacture and

packaging of products containing chlorofluorocarbons for nonessential uses. Accordingly, the agency notified the petitioners by letter that the continued manufacture and packaging of their respective products will be permitted, at least until this rulemaking action is completed. This was done because the finding that the uses of these products are essential uses of chlorofluorocarbon is likely, and to have required cessation of manufacturing in the interim would have prematurely interrupted their availability.

The potential environmental effects of this action have been carefully considered, and FDA has concluded that the action will not significantly affect the quality of the human environment. This action is one of a type for which the agency has determined that the preparation of an environmental impact statement is not required, except in rare and unusual circumstances (see 21 CFR 25.1(f)(1)(i)). Thepreparation of an environmental impact analysis report for this action is not required pursuant to 21 CFR 25.1(g).

Accordingly, under the Federal Food, Drug, and Cosmetic Act (secs. 301, 501, 502, 505, 701(a), 52 Stat. 1042–1043 as amended, 1049–1053 as amended, 1055 (21 U.S.C. 331, 351, 352, 355, 371(a))) and the National Environmental Policy Act of 1969 (sec. 102(2), 83 Stat. 853 (42 U.S.C. 4332)) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Part 2 be amended in § 2.125 by adding new paragraph (e)(7) and (8) to read as follows:

§ 2.125 Use of chlorofluorocarbon propellants in self-pressurized containers.

* * * * *

(e) * * *

(7) Polymyxin B sulfate-zinc bacitracin-neomycin sulfate soluble antibiotic powder without excipients, for topical use on humans.

(8) Anesthetic drugs for topical use on accessible mucous membranes of humans where a cannulae is used for application.

* * * * *

Interested persons may, on or before July 9, 1979, submit to the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: May 29, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 1243-3]

Approval and Promulgation of State Implementation Plans; South Dakota

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This action proposes to approve a revision to the South Dakota State Implementation Plan (SIP) submitted by the Governor of South Dakota and received by EPA on April 16, 1979. The revision grants a variance to the existing coal-fired steam-heat generating facility located on the South Dakota State University (SDSU) campus. This variance is not expected to have any severe impacts on the ambient air based on the report by Briant L. Davis, et. al., from the Institute of Atmospheric Sciences, South Dakota School of Mines and Technology in Rapid City, South Dakota.

DATES: Comments must be received on or before July 9, 1979.

ADDRESSES: The proposed South Dakota revision is available for public inspection at the office of the South Dakota Department of Environmental Protection, Joe Foss Building, Pierre, South Dakota 57501. Copies of the revision, an evaluation of the revision and public comments will be available at the offices of the EPA listed below.

Environmental Protection Agency, Air Programs Branch, 1860 Lincoln Street, Denver, Colorado 80295.

Environmental Protection Agency, Public Informaiton Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: David Kircher, Chief, Planning & Operations Section, Air Programs Branch, U.S. Environmental Protection Agency, Region VIII, 1860 Lincoln Street, Denver, Colorado 80295.

SUPPLEMENTARY INFORMATION: The State of South Dakota is required by Section 110 of the Federal Clean Air Act (CAA), to have a SIP for the control of air pollution within its boundaries. At present the city of Brookings does not violate the National Ambient Air Quality Standards and a report by Briant L. Davis, et. al., entitled "Air Quality Measurements and Diffusion Modeling of the Heating Plant Plume at South Dakota State Unviersity, Brookings, South Dakota," concludes that the area will not be in violation in the future. As a result of this determination, the State granted to the south Dakota State University heating plant a variance to regulations ARSD 34:10:05:05, 34:10:03:01, and successor provisions setting a new emission limit at .8 lbs. particulate/MBTU.

The Administrator hereby issues this notice setting forth as proposed rulemaking, pursuant to approval of Section 110 of the Clean Air Act and 40 CFR Part 51 approval of the South Dakota revision received on April 16, 1979.

Authority: Section 110 of the Clean Air Act, as amended (42 U.S.C. 1857c–5); Section 301 as amended (42 U.S.C. 1857g).

Dated: May 31, 1979.

Alan Merson,

Regional Administrator.

BILLING CODE 6560-01-M

[40 CFR Part 80]

[FRL 1243-1]

Regulation of Fuel and Fuel Additives; Lead Phase-Down Regulations

AGENCY: Environmental Protection Agency.

ACTION: Notice of Suspension of Enforcement and Notice of Proposed Rulemaking.

SUMMARY: EPA will suspend enforcement of the 0.8 gram per gallon (gpg) lead phase-down standard (40 CFR 80.20(a)(1)(i)) for all refineries between June 8, 1979 and October 1, 1979. In addition, EPA proposes to amend the lead phase-down schedule to give refiners an option of: (1) Meeting the 0.5 gpg standard on October 1, 1979, or (2) meeting a 0.8 gpg standard from October 1, 1979, to October 1, 1980, conditioned

upon producing an increased percentage of unleaded gasoline until October 1, 1980, and meeting a 0.5 gpg standard effective October 1, 1980.

DATES: Comments must be received by July 20, 1979. Hearing date will be June 20, 1979, at Washington, D.C. Requests to speak by June 10, 1979.

ADDRESSES: Send comments to Docket Number EN–79–14, EPA, Washington, D.C. 20460. Comments should be identified with the docket number EN–79–14. Comments will be available for public inspection at the Central Docket Section (Docket No. EN–79–14), Room 2903B, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, from 8:00 a.m. to 4:30 p.m. Monday through Friday. Requests to speak should be sent to Director, Mobile Source Enforcement Division (EN–340), EPA, 401 M Street, SW., Washington, D.C. 20460, or by calling Robert A. Weiseman at (202) 755–2610. Hearings will be held at the GSA Auditorium, 18th and F Streets NW., Washington, D.C., on June 20, 1979, at 9:30 a.m.

FOR FURTHER INFORMATION CONTACT: Robert A. Weiseman, Attorney, Mobile Source Enforcement Division, at (202) 755–2610.

SUPPLEMENTARY INFORMATION: On September 28, 1978, the Environmental Protection Agency (EPA) published amended regulations which postponed the dates by which gasoline manufacturers would be required to control the average lead content in gasoline produced at each refinery. The amended regulations provided for a lead content of 0.8 grams per gallon (gpg) effective January 1, 1978, and a lead content of 0.5 gpg effective October 1, 1979. The amendments were to permit sufficient time for refiners to install the equipment necessary to meet the reduced lead level without causing a gasoline shortage.

The regulations provided that the 0.8 gpg standard could be suspended if a refiner showed good faith efforts to achieve the 0.8 gpg standard at the earliest practicable date and the 0.5 gpg standard no later than October 1, 1979. Based on submission of compliance schedules detailing planned construction or blending component or feedstock process and exchange agreements, EPA granted suspensions to that portion of the refining industry producing over 75% of the nation's gasoline production.

Permitting the use of lead in excess of the standards will make it possible for refiners to make more leaded gasoline as well as more unleaded gasoline. The recent interruption of crude oil supplies from Iran and the tightness in gasoline supplies leads us to believe that further temporary relaxation of the lead phase-down standard is warranted. Therefore, EPA plans to suspend enforcement of the interim standard (40 CFR 80.20(a)(1)(i)), until October 1, 1979, and relax the 0.5 gpg standard to 0.8 gpg until October 1, 1980, for those refiners who produce increased percentages of unleaded gasoline.

EPA is particularly concerned that, if shortages of unleaded gasoline should occur, motorists might use leaded gasoline in vehicles requiring unleaded fuel. Use of leaded fuel in a vehicle requiring unleaded will deactivate emission control systems, causing an increase in automobile exhaust emissions. We continue to believe that a 0.5 gpg lead standard should be achieved as rapidly as possible for purposes of public health. However, a delay in imposing that standard will help offset the irreversible loss of billions of dollars worth of investment in emission control systems that would likely result from widespread fuel switching if shortages of unleaded gasoline were to occur. Many refiners are already allocating gasoline supplies to their customers, and some expect the situation to worsen.

For those refineries which are presently subject to the 0.8 gpg standard or which will be subject to that standard for some period of time prior to October 1, 1979, a suspension of enforcement is hereby granted by EPA. The suspension of enforcement is effective immediately and terminates on October 1, 1979. This will permit greater flexibility in the production of gasoline for this summer.

EPA proposes to amend the lead phase-down regulation to permit refiners to choose between two alternatives. A refiner, for any refinery not otherwise subject to relief as a small refinery, may elect to meet a lead standard of 0.5 gpg for each quarter beginning October 1, 1979 (Option 1). As the alternative, a refiner may register with EPA (for all or some refineries) an election to meet a 0.8 gpg standard each quarter from October 1, 1979, through September 30, 1980, and a 0.5 gpg standard each quarter beginning October 1, 1980 (Option 2).

To qualify for option 2 a refiner will be required, for those refineries registered for option 2, to: 1) state for each refinery gasoline production and octane by grade for each calendar quarter from January 1, 1978, through June 30, 1979, 2) state for each refinery projected gasoline production and octane by grade at compliance with a 0.8 gpg standard for each quarter from October 1, 1979, through September 30, 1980, 3) actually produce, on a quarterly basis for the total gasoline produced on an aggregate basis at those registered refineries, unleaded gasoline as a percentage of total gasoline equal to that percentage in the comparable quarter one year previous plus 8% or actually produce, on a quarterly basis, unleaded gasoline as a percentage of total gasoline greater than 45%, and 4) report, for each calendar quarter from July 1, 1979, through September 30, 1980, gasoline production and octane by grade.

It is the intent of EPA to allow the relaxation of the phase-down standard only where it will result in added percentage of unleaded gasoline. EPA may require that an adequate supply of unleaded gasoline be available based on EPA's authority to control the introduction into commerce of leaded gasoline, as found in *Amoco Oil Company* v. *EPA*, 501 F.2d 722 (D.C. Cir. 1974). Conditioning relaxation of the health based lead phase-down standard on a showing that greater production of unleaded gasoline will ensue is necessary to insure that additional supplies of unleaded gasoline will be produced, to help protect against increased fuel switching due to shortages of unleaded gasoline.

Refiners electing Option 2 for any refineries must submit a registration form as indicated in Format 1 in the Appendix. Unless otherwise notified by EPA within sixty days of submission of the registration form, the refiner will be considered bound by its election of the 0.8 gpg option. In that event, any noncompliance with either the 0.8 gpg interim standard or noncompliance with the production ratio requirements will be subject to civil penalties. EPA intends to publish penalty guidelines in the near future to address the extent of penalties that will be assessed for noncompliance with both the lead standards and the production requirements, and will take comments at that time on what factors should be considered in penalty mitigation.

Because this proposal results in a relaxation of an existing regulatory standard, EPA has determined that this document does not contain a major proposal requiring an Economic Impact Analysis under Executive Orders 11821, 11949, 12044, and section 317 of the Clean Air Act, as amended.

Comments

EPA solicits comments on the proposed rule allowing refiners to choose between two regulatory options. Comments should address the increases in ambient lead levels likely to result

from this proposed rule. Comments are also solicited on whether a refiner which registers refineries for the 0.8 gpg standard should have the opportunity to withdraw the registration and comply with the 0.5 gpg standard. (Sections 211 and 301 of the Clean Air Act, as amended, 42 U.S.C. 7545, 7602).

Dated June 4, 1979.

Douglas Costle,

Administrator.

It is proposed that 40 CFR Part 80 is amended as follows:

§ 80.20 [Amended]

1. In § 80.20, subparagraph (a)(1)(ii), by inserting the words "except as provided in paragraph (a)(6) of this section." immediately following the words "after October 1, 1979."

2. In § 80.20, adding new paragraphs (a)(6), (a)(7), (a)(8) and (a)(9) to read as follows:

§ 80.20 Controls applicable to gasoline refiners.

(a) * * *

* * * * *

(6) The provisions of subparagraph (a)(1)(ii) will not apply to any refinery for which a refiner submits, not later than August 1, 1979, a valid registration form indicating a commitment to achieve a 0.8 gram per gallon standard by October 1, 1979, and a 0.5 gram per gallon standard by October 1, 1980. The Administrator may, if the registration form is unclear, incomplete, or otherwise inadequate, notify the refinery that the registration is invalid. If the Administrator has not so notified the refinery within 60 days of receipt of the registration form, the registration will be deemed complete. A registration form must contain the following information to be considered valid:

(i) Name, location, and crude capacity in barrels per calendar day (as certified by the Department of Energy, Office of Refinery Operations) of each refinery owned or controlled by the refiner.

(ii) For each quarter January 1, 1978, through June 30, 1979, the following information for each refinery:

—Total gasoline production (bpcd)
—Unleaded gasoline production (bpcd) (all grades)
—Octane of unleaded gasoline (RON, AKI) (all grades)
—Clear pool octane (RON, AKI)

(iii) For each quarter October 1, 1979, through September 30, 1980, assuming compliance with a 0.8 gpg standard, the following information:

—Projected total gasoline production (bpcd)
—Projected unleaded gasoline production (bpcd) (all grades)
—Projected octane of unleaded gasoline (RON, AKI) (all grades)
—Projected clear pool octane (RON, AKI)

(7) In the manufacture of gasoline, no gasoline refiner who has submitted a valid registration form for refineries in accordance with paragraph (a)(6), shall in aggregate at those refineries produce unleaded gasoline as a percentage of total gasoline for each quarter, October 1, 1979, through September 30, 1980, that is less than that percentage in the comparable quarter October 1, 1978, through September 30, 1979, plus 8%, *unless* the production of unleaded gasoline as a percentage of total gasoline is greater than 45%.

(8) Each refiner who has submitted a valid registration form in accordance with paragraph (a)(6) shall for each quarter July 1, 1979, through September 30, 1980, submit to the Administrator a report showing the following information for each refinery:

—Total gasoline production (bpcd)
—Unleaded gasoline production (bpcd) (all grades)
—Unleaded gasoline production as a percentage of total gasoline production
—Octane of unleaded gasoline (RON, AKI) (all grades)
—Clear pool octane (RON, AKI).

Reports shall be submitted within 15 days after the close of the reporting period.

(9) In the manufacture of gasoline at any refinery for which a refiner has submitted a valid registration form in accordance with paragraph (a)(6), no gasoline refiner shall exceed the average lead content specified below for each 3-month period:

(i) 0.8 grams of lead per gallon after October 1, 1979,

(ii) 0.5 grams of lead per gallon after October 1, 1980.

BILLING CODE 6560-01-C

FEDERAL COMMUNICATIONS COMMISSION
[47 CFR Part 73]
[BC Docket No. 79-130; RM-3132; RM-3167]

FM Broadcast Stations in Fort Neches, Tex., and Bridge City, Tex.; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Action taken herein proposes the assignment of a Class A channel to Port Neches or Bridge City, Texas, in response to petitions filed by Ralph H. McBride and Harold D. and Linda Richardson. The proposed channel could provide for additional full-time local service in the area.

DATES: Comments must be filed on or before July 23, 1979, and reply comments must be filed on or before August 13,1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Louis C. Stephens, Broadcast Bureau, (202) 632-6302.

SUPPLEMENTARY INFORMATION: In the matter of amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations. (Port Neches and Bridge City, Texas), BC Docket No. 79-130, RM-3132, RM-3167.

Adopted: May 23, 1979.
Released: May 31, 1979.

1. The Commission invites comments on proposals for the assignment of FM Channel 221A to Port Neches or Bridge City, Texas. Only seven miles apart, these cities are too close to permit the assignment of the same channel to both.

2. Ralph H. McBride, of Port Neches, asks that we assign Channel 221A to Port Neches, a city in Jefferson County, Texas. The 1970 U.S. Census reports Port Neches' population as 10,894 and Jefferson County's as 246,402. The only radio station assigned to Port Neches is KSUZ, which operates daytime-only on AM frequency 1150 kHz.

3. Harold D. and Linda Richardson propose that Channel 221A be assigned to Bridge City, Texas (1970 pop. 8,164), located in Orange County (1970 pop. 71,170). No radio station is now assigned to Bridge City.

4. Port Neches and Bridge City are both located in the "Golden Triangle" area lying between Beaumont, Orange and Port Arthur, which, petitioners state, has cultural, industrial, and other characteristics different from those nearby larger citites.

5. The proposed assignments would preclude use of Channel 221A in eleven other communities of greater than 1,000 population now lacking AM stations or FM channel assignments. Eight of these are part of the Port Arthur-Beaumont-Orange urbanized area which has a total of eight commercial FM stations. The remaining three, Newton, Texas, Merryville, Louisiana, and DeQuincy, Louisiana, are more than 32 kilometers (20 miles) from this or any other urbanized area. Petitioners should indicate what, if any, channels are available to those three communities.

6. We find in petitioners' submissions sufficient showing of probable need for additional full-time local radio service in the area to warrant the institution of these proceedings to invite comments as to whether the public interest would be seved by assigning FM Channel 221A to either Port Neches or Bridge City, Texas, and, if so, which assignment would be preferable.

7. Accordingly, we propose to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules to provide either as follows:

City	Channel No.	
	Present	Proposed
Port Neches, Texas		221A
or		
Bridge City, Texas		221A

8. Authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

9. Interested parties may file comments on or before July 23, 1979, and reply comments on or before August 13, 1979.

10. For further information concerning this proceeding, contact Louis C. Stephens, Broadcast Bureau, (202) 632-6302. However, members of the public should note that from the time a notice of proposed rule making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

Federal Communications Commission.

Philip L. Verveer,
Chief, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g), and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission' rules, it

is proposed to amend the FM table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the *Notice of Proposed Rulemaking* to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rulemaking to which this Appendix is attached. Proponent(s) will expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rulemaking* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[FR Doc. 79-17697 Filed 6-7-79; 8:45 am]

[47 CFR Part 73]

[BC Docket No. 79-127; RM-3112]

Television Broadcast Station in High Point N.C.; Proposed changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Action taken herein proposes the assignment of UHF television Channel 67 to High Point, North Carolina, in response to a petition filed by Clyde Parker. The proposal would provide for a second commercial television station in High Point.

DATES: Comments must be filed on or before July 23, 1979, and reply comments on or before August 13, 1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mildred B. Neeterak, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION: In the matter of amendment of § 73.606(b), *Table of Assignments*, Television Broadcast Stations. (High Point, North Carolina), BC Docket No. 79-127, RM-3112.

Adopted: May 23, 1979.
Released: May 31, 1979.

1. Before the Commission is a petition for rulemaking (Public Notice No. 1121, issued May 10, 1978), submitted by Clyde Parker ("petitioner"). The petition seeks amendment of § 73.606(b) of the Commission's rules, the Television Table of Assignments, by removing the reservation of Channel *32 at High Point, North Carolina, which limits it to noncommercial educational use only. Public Broadcasting Service ("PBS"), Corporation for Public Broadcasting ("CPB"), and Southern Broadcasting Company ("Southern"), licensee of Station WGHP-TV, High Point, North Carolina, opposed the proposal and petitioner responded.

2. High Point (pop. 63,204), in Guilford County (pop. 288,590) [1], is located in central North Carolina, and is part of the Greensboro-Winston-Salem-High Point television market. High Point is currently assigned Channel 8 (WGHP-TV) and Channel *32 (presently unoccupied and unapplied for); Greensboro is assigned Channel 2 (WFMY-TV) and Channels 48 and 61 (both unoccupied although both have applications on file); and Winston-Salem is assigned Channel 12 (WXII),

[1] Population figures are taken from the 1970 U.S. Census.

Channel *28 (WUNL–TV), and Channel 45 (CP granted for WGNN–TV).

3. Regarding the need for use of this channel by a commercial station, petitioner asserts that the commercial facilities in the Greensboro-Winston-Salem-High Point market only provide viewers with network programming from the three major networks. He notes that there is no independent television station licensed to the area and states that if Channel 32 is available for commercial use, he would use it to provide for a new and diversified source of television programming to a large area and population which would not otherwise receive such service.

4. Petitioner asserts that educational interests in the community have neither made constructive efforts to utilize Channel 32 in the past, nor does he believe that there is evidence of an indication to do so in the future. He claims that the apparent lack of interest in Channel 32 is due to the proliferation of educational television channels in the State of North Carolina. On this basis he asks us to proceed with deleting the reservation.

5. The opposing parties respond by stating that the underlying concept behind the reservation of channels was to make sure that the frequencies would be available in the future. This they think is important so that the unique programming which the Commission foresaw that public broadcasting would provide, could be made available to as much of the public as possible. They contend that these reservations should not be removed except in the most unusual circumstances.[2]

6. We believe that petitioner's proposal to bring a first independent television service to High Point is worth exploring. However, we do not believe the public interest would be served by deleting the educational reservation of the present assignment, especially since another channel can be assigned. Becausse of the availability of Channel 67 for assignment to High Point, there is no need to discuss further the dispute between the parties nor to consider a possible change in the vacant Greensboro channels to assign either of them to High Point.

7. Comments are invited on the following proposal to amend the Television Table of Assignments with regard to the city of High Point, North Carolina:

City	Channel No.	
	Present	Proposed
High Point, N.C.	8–, *32+	8–, *32+, 67+

8. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

9. Interested parties may file comments on or before July 23, 1979, and reply comments on or before August 13, 1979.

10. For further information concerning this proceeding, contact Mildred B. Nesterak, Broadcast Bureau (202) 632–7792. However, members of the public should note that from the time a notice of proposed rule making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

Federal Communications Commission.

Philip L. Verveer,

Chief, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's rules and regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[FR Doc. 79-17808 Filed 6-7-79; 8:45 am]

BILLING CODE 6712-01-M

[2] They suggested originally that petitioner apply for one of the vacant Greensboro channels (48 and 61), but both have applications on file and petitioner correctly points out that neither channel is available for use in High Point since the 15-mile rule makes this option available only to communities not listed in the Table of Assignments.

[47 CFR Part 73]

[BC Docket No. 79–129; RM–3276]

FM Broadcast Station in Bandera, Tex.; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Action taken herein proposes the assignment of a Class A FM channel to Bandera, Texas, in response to a petition filed by Paloma Broadcasting Corporation. The proposed channel could provide for a first local aural broadcast service to Bandera.

DATES: Comments must be filed on or before July 23, 1979, and reply comments on or before August 13, 1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:
Mildred B. Neeterak, Broadcast Bureau, (202) 632–7792.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations. (Bandera, Texas), BC Docket No. 79–129, RM–3276.

Adopted: May 23, 1979.

Released: May 31, 1979.

1. *Petitioner, Proposal, Comments.* (a) A petition for rule making [1] was filed by Paloma Broadcasting Corporation ("petitioner"), proposing the assignment of Channel 252A to Bandera, Texas, as its first FM assignment. No responses to the petition were filed.

(b) The channel can be assigned in compliance with the minimum distance separation requirements provided the transmitter site is located at least 9 kilometers (6 miles) north of Bandera.

(c) Petitioner states that it will apply for the channel, if assigned.

2. *Community Data.*—(a) *Location.* Bandera, seat of Bandera County, is located approximately 74 kilometers (46 miles) northwest of San Antonio, Texas.

(b) *Population.* Bandera—891; Bandera County-4,747. [2]

(c) *Local Aural Broadcast Service.* There is no local aural broadcast service in Bandera.

3. *Economic Considerations.* Petitioner states that Bandera is a favorite hunting, fishing and recreational area for tourists in addition to having numerous dude ranches. It notes that Bandera County leads the State of Texas in goat and sheep raising and that over 95% of Bandera's $3.5 million grossed yearly has been in agricultural sales. Petitioner asserts that the proposed station will respond to the needs of the citizens of the community with regular weather reports, local discussion forums and broad coverage of local, state and national news.

4. Since Bandera is located within 320 kilometers (199 miles) of the U.S.-Mexico border, the proposed assignment of Channel 252A to Bandera requires coordination with the Mexican Government before it can be adopted.

5. In view of the apparent need for a first local aural broadcast service in Bandera, the Commission believes it appropriate to propose amending the FM Table of Assignments, § 73.202(b) of the Rules, as it pertains to Bandera, Texas, as follows:

[1] Public Notice of the petition was given on December 18, 1978, Report No. 1155.

[2] Population figures are taken from the 1970 U.S. Census.

City and Channel No.		
Bandera, Tex.:	Present: —;	Proposed: 252A.

6. Authority to institute rule making proceedings, showings required, cut-off procedures and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

7. Interested parties may file comments on or before July 23, 1979, and reply comments on or before August 13, 1979.

8. For further information concerning this proceeding, contact Mildred B. Neeterak, Broadcast Bureau, (202) 632–7792. However, members of the public should note that from the time a notice of proposed rule making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

Federal Communications Commission.

Philip L. Verveer,

Chief, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g), and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, Section 73.202(b) of the Commission's rules and regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission rules.—

5. *Number of copies.* In accordance with the provisions of Section 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[BC Docket No. 79–131; RM–3288]

FM Broadcast Station in Fordyce, Ark.; Proposed changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Action taken herein proposes the assignment of a Class A FM channel to Fordyce, Arkansas, in response to a petition filed by KBJT, Inc. The proposed channel could be used to provide a first full-time local aural broadcast service to Fordyce.

DATES: Comments must be filed on or before July 24, 1979, and reply comments must be filed on or before August 14, 1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:
Mildred B. Neslerak, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: May 24, 1979.

Released: May 31, 1979.

In the matter of amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations. (Fordyce, Arkansas), BC Docket No. 79-131, RM-3288.

1. The Commission has before it for consideration a petition for rule making,[1] filed by KBJT, Inc. ("petitioner"), requesting the assignment of FM Channel 288A to Fordyce, Arkansas, as that community's first FM assignment. No responses to the proposal have been received.

2. Fordyce (pop. 4,090), in Dallas County (pop. 10,022),[2] is located approximately 104 kilometers (65 miles) south of Little Rock, Arkansas. Fordyce is served locally by daytime-only AM Station KBJT. Channel 288A can be assigned to Fordyce in compliance with the minimum distance separation requirements. Petitioner informs us that it will apply for the channel, if asigned.

3. Petitioner states that the area's economy is based on forest products and allied industries. It notes that the Georgia-Pacific and Phelps-Dodge plants are located in Fordyce, each employing over 300 people. In support of its petition, petitioner has submitted detailed information with respect to the form of government, school system, housing and medical facilities. It claims that the proposed assignment would provide a three-county area with its first local nighttime aural service, bringing them local coverage of nighttime sporting events, election returns and severe weather warnings.

4. In light of the above information and the fact that the proposed FM channel could provide Fordyce with its first full-time local aural broadcast service, the Commission believes it appropriate to propose amending the FM Table of Assignments, § 73.202(b) of the Commission's rules, with respect to Fordyce, Arkansas, as follows:

City and Channel No.	
Fordyce, Ark.;	Present: —; Proposed: 288A.

5. Authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

[1] Public Notice of the petition was given on January 3, 1979, Report No. 1137.

[2] Population figures are taken from the 1970 U.S. Census.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or befoe July 24, 1979, and reply comments on or before August 14, 1979.

7. Further information concerning this proceeding may be obtained by contacting Mildred B. Nesterak, Broadcast Bureau, (202) 632—7792. However, members of the public should note that from the time a notice of proposed rule making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

Federal Communications Commission.

Philip L. Verveer,
Chief, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The Proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[BC Docket No. 79-132; RM-3340]

FM Broadcast Station in Oakhurst, Calif.; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Action taken herein proposes the assignment of a first Class A FM channel to Oakhurst, California. Petitioners, Randolph L. Johnston and James T. Dee, state the proposed channel could bring a first local aural broadcast service to Oakhurst and the surrounding area.

DATES: Comments must be filed on or before July 24, 1979, and reply comments on or before August 14, 1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:
Mildred B. Nesterak, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: May 24, 1979.

Released: May 31, 1979.

In the matter of amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations. (Oakhurst,

California), BC Docket No. 79-132, RM-3340.

1. *Petitioner, Proposal, Comments.* (a) Notice of Proposed Rule Making is given concerning amendment of the FM Table of Assignments (§ 73.202(b) of the Commission's rules) as it relates to Oakhurst, California.

(b) Petition for rulemaking [1] was filed on behalf of Randolph L. Johnston and James T. Dee ("petitioners"), seeking the assignment of Channel 296A to Oakhurst, California, as its first FM assignment. No responses to the petition were received.

(c) Channel 296A could be assigned to Oakhurst in conformity with the minimum distance separation requirements.

(d) Petitioners state they will promptly apply for and build a station if the channel is assigned.

2. *Community Data*—(a) *Location.* Oakhurst, an unincorporated community in Madera County, is located approximately 80 kilometers (50 miles) northeast of Fresno, California.

(b) *Population.* Oakhurst—5,500 [2]; Madera County—41,519.[3]

(c) *Local Aural Broadcast Service.* There is no local aural broadcast service in Oakhurst.

3. *Economic Data.* Petitioners state that approximately three-quarters of Madera County's 1970-1978 population growth [4] occurred in unincorporated areas of which Oakhurst is included. They claim that business has grown steadily the past 18 years with the taxable retail sales for the county in 1977 amounting to $151.9 million. Petitioners assert that the population growth in Oakhurst is attributed to an influx of people from other areas because of the community's mountain environment and recreational attractions.

4. *Other Considerations.* Petitioners state that because the town is located in a valley surrounded by mountains, radio reception is intermittent and FM reception is hampered by multipath distortion. They note that there are no radio stations in eastern Madera County, the nearest service coming from an FM station in adjacent Mariposa County, 40 kilometers (25 miles) to the northwest. Petitioners point out that the only radio service in Madera County is 80 kilometers (50 miles) to the southwest. They assert that an FM station in Oakhurst would provide a first local aural service in an area that has shown steady growth during the past several years.

5. We are willing to consider whether there is a need for a first local aural broadcast service in Oakhurst which could bring service to an area with few radio services. The proposal is being advanced for the purpose of determining whether such an assignment is warranted. There is a need for petitioners to submit additional information which would assist the Commission in determining whether the proposed channel assignment would be in the public interest. Petitioners are therefore requested to submit the following information:

(a) Information which demonstrates whether Oakhurst in fact is a community. This information should include a description of governmental structure, and social and economic activities.

(b) Information as to the permanent population of the unincorporated area in which petitioners claim Oakhurst is situated, the unofficial boundary of the community and the location of the community relative to any neighboring incorporated communities.

(c) Information which would indicate the need for a station at Oakhurst.

6. In view of the foregoing, the Commission proposes to amend the FM Table of Assignments (§ 73.202(b) of the rules), with respect to the community listed below:

City	Channel No.	
	Present	Proposed
Oakhurst, Calif.		296A

7. Authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—Showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

8. Interested parties may file comments on or before July 24, 1979, and reply comments must be filed on or before August 14, 1979.

9. For further information concerning this proceeding, contact Mildred B. Neshtrak, Broadcast Bureau, (202) 632-7792. However, members of the public should note that from the time a notice of proposed rule making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

Federal Communications Commission.

Philip L. Verveer,

Chief, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. [Sec

[1] Public Notice of the petition was given on March 19, 1979, Report No. 1165.

[BC Docket No. 79-128; RM-3277]

FM Broadcast Station in Haynesville, La.; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Action taken herein proposes the assignment of a Class A FM channel to Haynesville, Louisiana. The proposed channel, which could provide the community with its first full-time local aural broadcast service, was requested in a petition filed by Robillard Communications, Inc.

DATES: Comments must be filed on or before July 23, 1979, and reply comments must be filed on or before August 13, 1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mildred B. Nesterak, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: May 23, 1979.

Released: May 31, 1979.

In the matter of amendment of § 73.202(b), *Table of Assignments,* FM Broadcast Stations. (Haynesville, Louisiana), BC Docket No. 79-128, RM-3277.

1. The Commission has under consideration a petition for rulemaking [1] seeking the amendment of § 73.202(b) of the Commission's rules, the Table of FM Assignments. The petition was filed on behalf of Robillard Communications, Inc. ("petitioner"), proposing the assignment of FM Channel 288A to Haynesville, Louisiana. The channel could be assigned in conformity with the minimum distance separation requirements without affecting the present assignments in the FM Table. Petitioner states that it will apply for the channel, if assigned.

2. Haynesville (pop. 3,055) in Claiborne Parish (pop. 17,024),[2] is located approximately 80 kilometers (50 miles) northeast of Shreveport, Louisiana. Haynesville is served locally by daytime-only AM Station KLUV.

3. In support of its proposal, petitioner asserts that Haynesville is the second largest community in the parish. We are told that the leading industry in Haynesville is oil and gas, with agriculture, dairy and the raising of beef cattle also contributing to the economy. Petitioner has submitted detailed demographic data with respect to Haynesville in order to demonstrate its need for a first FM assignment.

4. In view of the fact that the proposed FM channel assignment would provide Haynesville an opportunity to acquire a first full-time local aural broadcast service, the Commission believes it appropriate to propose amending the FM Table of Assignments, Section 73.202(b) of the Rules, with regard to the community listed below:

City	Channel No.	
	Present	Proposed
Haynesville, Louisiana		288A

5. Authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required before a channel will be assigned.

6. Interested parties may file comments on or before July 23, 1979, and reply comments on or before August 13, 1979.

7. For further information concerning this proceeding, contact Mildred B. Nesterak, Broadcast Bureau, (202) 632-7792. However, members of the public should note that from the time a notice of proposed rule making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

Federal Communications Commission.

Phillip L. Verveer,

Chief, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for

National Oceanic and Atmospheric Administration

[50 CFR Part 410]

Public Hearings; Fish and Wildlife Coordination Act; Proposed Rulemaking

AGENCY: National Oceanic and Atmospheric Administration, Commerce Fish and Wildlife Service, Interior.

ACTION: Public Hearings.

SUMMARY: Proposed rules which would standardize agency procedures and interagency relationships in the analysis of the impacts of federal, or federally-approved, water-related projects upon fish and wildlife resources were published in the Federal Register at 44 FR 29300, May 18, 1979. This document announces public hearings to receive written and oral testimony on the proposed rules implementing the Fish and Wildlife Coordination Act. It is not to engage in a question/answer session or dialgue between the hearing panel and those who testify. Questions may be asked by members of the panel solely for the purpose of clarifying testimony by a witness.

Oral presentations should be limited to not more than 10 minutes. Written documents may be presented to the Hearing Officer for entry into the official record. Witnesses who submit written testimony in addition to making oral presentations should summarize the written testimony.

DATES: Hearings will be held:

June 26, 1979—San Francisco, California

June 27, 1979—Arlington, Texas

June 27, 1979—Twin Cities, Minnesota

June 27, 1979—Denver, Colorado

June 27, 1979—New Orleans, Louisiana

June 28, 1979—Washington, D.C.

ADDRESSES: These comments will be received at the following locations, dates and times:

June 26, 1979: San Francisco, California, Golden Gate National Recreation Area, Fort Mason, Building 201, Bay and Franklin Streets.

Starting time: 9:00 a.m.

Write: Regional Director, U.S. Fish and Wildlife Service, Lloyd 500 Building, Suite 1692, 500 N.E. Multnomah Street, Portland, Oregon 97232.

Telephone: (503) 231-6158.

June 27, 1979: Arlington, Texas—Quality Inn—Cibola, U.S. Highway 80, 1601 E. Division Street.

Starting time: 1:00 p.m.

Write: Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuqerque, New Mexico 87103.

Telephone: (505) 766-2914.

June 27, 1979: Twin Cities, Minnesota—Federal Building, Fort Snelling, Room 564-568.

Starting time: 1:00 p.m.

Write: Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Telephone: (612) 725-3510.

June 27, 1979: Denver, Colorado—Bureau of Reclamation Auditorium, Entrance W-1, Building 56, Denver Federal Center.

Starting time: 9:00 a.m.

Write: Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225.

Telephone: (303) 234-3990.

June 28, 1979: Washington, D.C.—Department of Commerce Auditorium, 14th at Constitution Ave., N.W.

Starting time: 9:00 a.m.

Write: Mr. E. Erdhein, Hearing Officer, Office of General Counsel, NOAA, 3300 Whitehaven St., N.W., Page Building II, Washington, D.C. 20235.

Telephone: (202) 634-4224.

June 27, 1979: New Orleans—Hotel Monteleone, 214 Royal St.

Starting time: 10:00 a.m.

Write: Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, N.E., P.O. Box 95067, Atlanta, Georgia 30347.

Telephone: (404) 881-4781.

FOR FURTHER INFORMATION CONTACT: Karl F. Stutzman, 202-343-4787.

Lynn A. Greenwalt,

BILLING CODE 4310-55-M

ENDANGERED SPECIES COMMITTEE

50 CFR Parts 450, 452 and 453

Interim Final Rules on Endangered Species Review Board and Endangered Species Committee

NOTE.—This document inadvertently appearing in the Proposed Rules section should have appeared in the Rules and Regulations section.

AGENCY: Endangered Species Committee.

ACTION: Interim Final Rules and Request for Public Comments.

SUMMARY: These regulations describe the functions and the procedures of Endangered Species review boards (review boards) and the Endangered Species Committee (the Committee) under the Endangered Species Act of 1973, as amended, 16 U.S.C. 1531 *et seq.* (the Act). According to section 7(a) of the Act, each Federal agency must, in consultation with the Secretary, insure that its actions do not jeopardize the continued existence of any endangered or threatened species, or result in the destruction or adverse modification of critical habitats. An exemption from these requirements may be granted by the Committee, however.

In accordance with section 7(g) of the Act, review boards are responsible for initially examining applications for exemption. If a review board makes certain threshold determinations, it is required to prepare and submit a report to the Committee. The Committee then makes the final determination whether or not to grant an exemption.

These rules cover the exemption application processing period from the appointment of a review board to the final determination by the Committee. Rules covering procedures for applying for an exemption and for initial review and handling of an exemption application, including appointment of a review board, have previously been proposed as 50 CFR Part 403. 44 FR 7777 (Feb. 7, 1979).

DATES: Effective date: June 8, 1979. Comments on these regulations must be submitted by September 4, 1979.

ADDRESS: Please send comments to the Chairman, Endangered Species Committee, c/o Office of Policy Analysis, Department of the Interior, 18th and C Streets, NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Raphaelle Semmes, Office of Policy Analysis, Department of the Interior, Room 4160, Interior Building, 18th & C

Streets, N.W., Washington, D.C. 20240, 202–343–5978.

SUPPLEMENTARY INFORMATION:

The Exemption Process

The Endangered Species Act Amendments of 1978 (Pub. L. 95–632), enacted on November 10, 1978, establish a procedure for obtaining exemptions from Section 7 of the Endangered Species Act of 1973 (now renumbered 7(a)). Section 7(a) requires Federal agencies to insure, in consultation with the Secretary of the Interior or Commerce, that their actions do not jeopardize the continued existence of endangered or threatened species or destroy or adversely modify critical habitats. Applications for exemption from this requirement may be made by a Federal agency, by the Governor of a State in which a proposed action would occur, or by a person whose permit or license application has been denied primarily because of section 7(a) considerations. An application is to be directed to the appropriate Secretary, who determines if it is properly presented. It is then evaluated by a review board and, if certain criteria are met, decided upon by the Endangered Species Committee.

These regulations implement section 7(g) paragraphs (4) to (12); section 7(e); and sections 7 (h) through (l) of the Act.

Review Boards. A review board is to be established for each exemption application. Review boards make threshold determinations on the application and develop a comprehensive record and report for the Endangered Species Committee. They consist of three members: one member appointed by the Secretary; one member (who shall be a resident of the State, if any, in which the agency action would be, or is being carried out) appointed by the President; and an Administrative Law Judge. Within 60 days of appointment, or a longer period mutually agreed upon by the exemption applicant and the Secretary, a review board must determine by majority vote:

(1) Whether any required biological assessment was conducted;

(2) Whether the Federal agency and permit or license applicant, if any, refrained from making any irreversible or irretrievable commitment of resources that forecloses any reasonable or prudent alternatives that would avoid an irresolvable conflict;

(3) Whether the Federal agency and permit or license applicant, if any, carried out consultation responsibilities in good faith, and have made a reasonable and responsible effort to develop and fairly consider modifications or reasonable and prudent alternatives that would have avoided an irresolvable conflict; and

(4) Whether the finding of an irresolvable conflict between the proposed action and the requirements of section 7(a) is supported by substantial evidence.

If a review board makes affirmative determinations on all four questions, the application will be forwarded to the Endangered Species Committee. If a review board determines that the application fails to meet these requirements and the deficiency is subsequently corrected, a new application can be made to the Secretary. Any determination by the review board that the exemption applicant has not met one of the threshold requirements is final agency action and may be appealed to Federal court.

If the review board determines that all four requirements are met, it must submit a report to the Committee within an additional 180 days, discussing:

(1) The availability of reasonable and prudent alternatives to the proposed action, and the nature and extent of the benefits of the agency action and of alternative courses of action consistent with conserving the species or the critical habitat;

(2) A summary of the evidence concerning whether or not the proposed action is in the public interest and is of national or regional significance; and

(3) Appropriate and reasonable mitigation and enhancement measures which should be considered by the Committee in granting an exemption.

Section 7(g) authorizes a review board to take testimony, receive evidence, request information, use the United States mails as a Federal agency, detail Federal agency personnel, and obtain administrative support services from the General Services Administration. It requires that any review board hearings be conducted in accordance with the adjudicatory procedures of the Administrative Procedure Act, to the extent practicable within the time limits and other constraints of the exemption process. It further requires all review board meetings and records to be open to the public.

Endangered Species Committee. Sections 7(e) and 7(h) require the Endangered Species Committee to review all applications submitted to it by a review board and to determine whether or not to grant exemptions. The Endangered Species Committee is composed of:

(1) The Secretary of the Interior, who is the Chairman;

(2) The Secretary of the Agriculture;

(3) The Secretary of the Army;

(4) The Chairman of the Council of Economic Advisors;

(5) The Administrator of the Environmental Protection Agency;

(6) The Administrator of the National Oceanic and Atmospheric Administration; and

(7) A person nominated by the Governor of each affected State, or if no State is affected an otherwise qualified individual, and appointed by the President, for each exemption application.

The Committee must determine whether or not to grant an exemption within 90 days after receiving the review board's report. An exemption requires an affirmative vote of five or more Committee members voting in person. To grant an exemption, the Committee must:

A. Determine that—

(1) There are no reasonable and prudent alternatives to the proposed action;

(2) The benefits of the action clearly outweigh the benefits of alternative courses of action consistent with conserving the species or its critical habitat and the action is in the public interest;

(3) The action is of regional or national significance; and

B. Establish reasonable mitigation and enhancement measures that are necessary and appropriate to minimize the adverse effects of the agency action upon the species or critical habitat concerned.

Any final determination by the Committee on (A) and (B) is final agency action and subject to judicial review under Chapter 7 of title 5 of the United States Code.

If an exemption is granted by the Committee, the exemption applicant, in implementing the agency action, must carry out and pay for the mitigation and enhancement measures ordered by the Committee. The exemption applicant also must report to the Council on Environmental Quality annually until the mitigation and enhancement measures are completed.

Sections 7(e) and 7(h) authorize the Committee to hold hearings, take testimony, receive evidence, request information, use the United States mails as a Federal agency, detail Federal agency personnel, obtain administrative support services from the General Services Administration, promulgate and amend rules, regulations and procedures, issue and amend orders, and issue subpenas. All meetings and records of the Committee shall be open to the public.

Description of Rulemaking

The scope of these regulations is limited to procedures for the period between the submission of an application to a review board and the Committee's determination whether or not to grant an exemption. These regulations do not cover procedures for filing or initial review and handling of exemption applications, which are set out in proposed 50 CFR Part 403 (44 FR 7777 (Feb. 7, 1979).)

The regulations establish procedures for information gathering by review boards and by the Endangered Species Committee, including procedures for conduct of review board and Committee hearings. Procedures are also established for the review board and Committee decision process. Opportunities for public involvement, both before review boards and the Committee, are provided.

An issue which arose during drafting of these regulations on which comment is solicited concerns review board determinations of irresolvable conflicts.

Review boards are directed by section 7 (g) of the Act to determine that a proposed action involves an irresolvable conflict with section 7(a) of the Act before referring an exemption application to the Committee.

Ordinarily, the acting agency and the Fish and Wildlife Service or National Marine Fisheries Service will have developed a record on the jeopardy question during previous consultation on the proposed agency action. In some cases, usually involving permit or license applications, the acting agency will have held a full adversary hearing on the issue.

Because of the short time for review board consideration of the irresolvable conflict issue (60 days) * and because the statute provides that a review board use adjudicatory procedures only "to the extent practicable within the time required for action", the interim regulations anticipate that a board will ordinarily rely on the previously developed record on this issue. In particular, where there has been a previous adversary hearing on the issue, a review board will not conduct its own hearing, unless intervening circumstances require that the earlier record be supplemented. Comment is invited on the alternative of always limiting review to the agency record.

The regulations also provide that the review board will adopt the "substantial evidence" test of review, which shows considerable deference to the findings and judgment of the acting agency and the appropriate Service on the irresolvable conflict issue. This is consistent with the duty of those agencies to make the basic decision on the matter and reflects the deference which the findings would receive if subject to challenge in court. The Committee expects that, if a review board finds that an irresolvalbe conflict finding is not supported by substantial evidence, the acting agency and the appropriate Service will reinitiate consultation on the issue.

*The Environmental Protection Agency, as a member of the committee, adds: "If both the responsible agency and the review board were to assemble different records de novo on this question, severe procedural confusion would result. The responsible agency and the review board might reach different results, and it would be very difficult to assess which one was right because the records would be different. In addition, to generate two records on the same topic would be clearly inefficient."

Adoption and Request for Comments

These regulations are published as interim final regulations, and will remain in effect for 240 days from the date of publication. Permanent regulations will be published before the expiration of the 240-day period.

Because these regulations relate to agency procedure and practice, the Administrative Procedure Act does not require that they be subject to notice-and-comment rulemaking. Consistent with the Adminsitration's policy of encouraging public involvement, however, public comments on the interim regulations are requested. These comments must be submitted by September 4, 1979.

Because a review board will commence consideration of two exemption applications on or about June 4, 1979, there is a need for these regulations to be effective immediately. Good cause for waiver of the normal thirty-day period between publication and the effective date therefore exists.

It has been determined that this document does not contain a proposal which is required to be developed as a "significant rule" under criteria established by Executive Order 12044 (March 23, 1978) ("Improving Government Regulations").

The primary authors of these regulations are Jan Chrisman, Byron Swift and Deborah Williams, Office of the Solicitor, Department of the Interior.

These regulations are issued under the authority of the Endangered Species Act, as amended. 16 U.S.C. 1531 *et seq.* Accordingly, chapter IV of Title 50 is retitled "Joint Regulations (***); Endagered Species Committee Regulations" and is amended to designate present parts 401 and 402 as Subchapter A, reserve Subchapter B and add a Subchapter C with parts 450, 452 and 453 as set forth below:

Subchapter C—Endangered Species Exemption Process

PART 450—GENERAL PROVISIONS

Sec.
450.01 Definitions.

Authority: Endangered Species Act of 1973, 16 U.S.C. 1531, *et seq.*, as amended.

§ 450.01 Definitions.

The following definitions apply to terms used in this subchapter.

(1) "Act" means the Endangered Species Act of 1973, as amended, 16 U.S.C. 1531, *et seq.*

(2) "Agency action" means all actions of any kind authorized, funded or carried out, in whole or in part, by Federal agencies.

(3) "Alternative courses of action" means all reasonable alternatives, including both no action and alternatives extending beyond original project objectives and acting agency jurisdiction.

(4) "Benefits" means all benefits of an agency action, both tangible and intangible, including but not limited to economic, environmental and cultural benefits.

(5) "Biological assessment" means the report prepared pursuant to section 7(c) of the Act, 16 U.S.C. 1536(c).

(6) "Biological opinion" means the written statement prepared pursuant to section 7(b) of the Act, 16 U.S.C. 1536(b).

(7) "Chairman" means the Chairman of the Endangered Species Committee, who shall be the Secretary of the Interior.

(8) "Committee" means the Endangered Species Committee established pursuant to section 7(e) of the Act, 16 U.S.C. 1536(e).

(9) "Critical Habitat" refers to those areas listed as Critical Habitat in 50 CFR Parts 17 and 226.

(10) "Destruction or adverse modification" is defined at 50 CFR 402.02.

(11) "Federal agency" means any department, agency or instrumentality of the United States.

(12) "Irresolvable conflict" means a situation in which a proposed agency action, together with any cumulative effects, would violate section 7(a) of the Act, 16 U.S.C. 1536(a).

(13) "Jeopardize the continued existence of" is defined at 50 CFR 402.02.

(14) "Mitigation and enhancement measures" means measures, including live propagation, transplantation and habitat acquisition and improvement, necessary and appropriate (i) to minimize the adverse effects of a proposed action on listed species or their critical habitats and/or (ii) to improve the conservation status of the species beyond that which would occur without the action. The measures must be likely to protect the listed species or the critical habitat, and be reasonable in their cost, the availability of the technology required to make them

effective, and other considerations deemed relevant by the Committee.

(15) "Permit or license applicant" means any person whose application to an agency for a permit or license has been denied primarily because of the application of section 7(a) of the Act, 16 U.S.C. 1536(a).

(16) "Person" means an individual, corporation, partnership, trust, association, or any other private entity, or any public body or officer, employee, agent, department, or instrumentality thereof.

(17) "Proposed action" means the action proposed by the Federal agency or by a permit or license applicant, for which exemption is sought.

(18) "Secretary" means the Secretary of the Interior or the Secretary of Commerce, or his or her delegate, depending upon which Secretary has responsibility for the affected species as determined pursuant to 50 CFR 402.01.

(19) "Service" means the United States Fish and Wildlife Service or the National Marine Fisheries Service, as appropriate.

(20) "To the extent that such information is available to the applicant" means all pertinent information the applicant has on the subject matter at the time the application is submitted, and all other pertinent information obtainable from the appropriate Federal agency pursuant to a Freedom of Information Act request.

PART 452—ENDANGERED SPECIES REVIEW BOARDS

Sec.

452.01 Purpose and scope.
452.02 Definitions.
452.03 Threshold review and determinations.
452.04 Preparation and submission of informational report.
452.05 Review board hearings.
452.06 Other meetings.
452.07 Open meetings and records.
452.08 Parties and intervenors.
452.09 Separation of fuctions and ex parte communications.
452.10 Additional review board powers.

Authority: Endangered Species Act of 1973, 16 U.S.C. 1531, et seq., as amended.

§ 452.01 Purpose and scope.

This part prescribes the procedures to be used by endangered species review boards when examining applications for exemption from section 7(a) of the Endangered Species Act.

§ 452.02 Definitions.

Definitions applicable to this part are contained in 50 CFR 450.01.

§ 452.03 Threshold review and determinations.

(a) *Initiation of Review.* Upon receiving an exemption application, a review board shall promptly initiate its review of the application.

(b) *Notice.* Upon receiving an exemption application, a review board shall promptly publish a notice in the Federal Register containing: (1) a brief description of the exemption application; (2) the time and place for parties to file written submissions; (3) a date by which all motions to intervene must be filed; and (4) the time, place and location of planned review board meetings or hearings on its threshold determinations.

(c) *Threshold Determinations.* Within 60 days after its appointment, or a longer time agreed upon between the exemption applicant and the Secretary, the review board shall conclude its review and, by majority vote, determine:

(1) Whether any required biological assessment was conducted;

(2) Whether the Federal agency and permit or license applicant, if any, have refrained from making any irreversible or irretrievable commitment of resources which has the effect of foreclosing the formulation or implementation of any reasonable and prudent alternative which will avoid jeopardizing the continued existence of an endangered or threatened species or result in the adverse modification or destruction of a critical habitat;

(3) Whether the Federal agency and permit or license applicant, if any, have carried out consultation responsibilities in good faith and have made a reasonable and responsible effort to develop and fairly consider modifications or reasonable and prudent alternatives to the proposed action which will avoid jeopardizing the continued existence of an endangered or threatened species or result in the adverse modification or destruction of critical habitat;

(4) Whether the finding of irresolvable conflict which resulted in the exemption application is supported by substantial evidence.

(d) *Burden of Proof.* The exemption applicant has the burden of proof on its position on the threshold determinations.

(e) *Negative Finding.* If a review board makes a negative finding on any threshold determination, the review board shall notify the exemption applicant and all other parties in writing of its finding and grounds therefor. The exemption process shall terminate when the applicant receives such written notice. A negative finding by the review board shall constitute final agency action for purposes of judicial review under Chapter 7 of Title 5 of the United States Code.

(f) *Positive Finding.* If the review board makes a positive finding on each of the threshold determinations, it shall notify the exemption applicant and all other parties in writing that the application qualifies for consideration by the Endangered Species Committee.

(g) *Secretary of State Opinion.* The review board process shall terminate immediately if the Secretary of State, pursuant to section 7(i) of the Act, certifies in writing to the Committee that granting an exemption and carrying out the proposed action would violate an international treaty obligation or other international obligation of the United States.

§ 452.04 Preparation and submission of the information report.

(a) *Preparation of the Report.* If the review board has made a positive finding on each of the threshold determinations, it shall proceed to gather information according to procedures set out in 50 CFR 452.05 through .07 and prepare a report for the Endangered Species Committee;

(1) Discussing the availability of reasonable and prudent alternatives to the proposed action;

(2) Discussing the nature and extent of the benefits of the proposed action;

(3) Discussing the nature and extent of the benefits of alternative courses of action consistent with conserving the species or the critical habitat;

(4) Summarizing whether the proposed action is of national or regional significance;

(5) Summarizing whether the proposed action is in the public interest; and

(6) Discussing appropriate and reasonable mitigation and enhancement measures which should be considered by the Committee in granting an exemption.

(b) *Submission of Report.* The review board shall submit its report and the record of its proceedings to the Committee within 180 days after making its threshold determinations.

(c) *Applicant Responsibility.* In review board proceedings conducted pursuant to this section, the exemption applicant has the burden of going forward with evidence concerning the criteria for exemption.

§ 452.05 Review board hearings.

(a) *Hearings.* (1) A review board may hold such hearings as it determines are necessary in making its threshold determinations. If the issue of

irresolvable conflict has previously been the subject of a hearing required to be conducted under 5 U.S.C. 554, 556, and 557, however, the review board's determination of irresolvable conflict shall be based solely on a review of the record, unless the review board determines intervening circumstances require that the record be supplemented.

(2) A hearing shall be held to aid the review board in preparing its informational report under 50 CFR 452.04.

(b) *Prehearing conferences.* (1) The review board may, on its own motion or the motion of a party or intervenor, hold a prehearing conference to consider: (i) the possibility of obtaining stipulations, admissions of fact or law and agreement to the introduction of documents; (ii) the limitation of the number of witnesses; (iii) questions of law which may bear upon the course of the hearings; (iv) prehearing motions, including motions for discovery; and (v) any other matter which may aid in the disposition of the proceedings.

(2) The review board may issue a statement of the actions taken at the conference and the agreements made. Such statement shall control the subsequent course of the hearing unless modified for good cause by a subsequent statement.

(c) *Notice of Hearings.* Unless announced in the notice published upon receipt of an exemption application pursuant to 50 CFR 452.03(b), review board hearings and prehearing conferences will be announced by a notice in the **Federal Register** stating: (1) the time, place and nature of the hearing or prehearing conference; and (2) the matters of fact and law to be considered. Such notices will ordinarily be published at least 15 days before the scheduled hearing.

(d) *Conduct of Hearings.* (1) *General conduct.* To the extent practicable within the time required for action by the review board, and except to the extent inconsistent with requirement of section 7(g) of the Endangered Species Act, the conduct of all review board hearings shall be in accordance with 5 U.S.C. 554, 555 and 556 (other than section (b)(3) of section 556).

(2) *Presence of members.* Absent unforeseen circumstances, the review board members shall be physically present during the hearings.

(3) *Evidence.* (i) *Admissibility.* Relevant, material, and reliable evidence shall be admitted. Immaterial, irrelevant, unreliable, and unduly repetitious parts of an admissible document may be segregated and excluded so far as practicable.

(ii) *Official notice.* When a review board finding rests, in whole or in part, upon the taking of official notice of a material fact not appearing in evidence of record, opportunity to disprove such noticed fact shall be granted to any party making a timely motion.

(4) *Motions, objections, rebuttal and cross-examination.* Motions and objections may be filed with the review board, rebuttal evidence may be submitted, and cross-examination may be conducted, as required for a full and true disclosure of the facts, by parties, witnesses under subpena, and their respective counsel.

(i) *Objections.* Objections to evidence shall be timely, and the party making them may be required to state briefly the grounds relied upon.

(ii) *Offers of proof.* When an objection is sustained, the examining party may make a specific offer of proof and the review board may receive the evidence in full. Rejected exhibits, adequately marked for identification, shall be retained in the record for consideration by any reviewing authority.

(iii) *Motions.* Motions and petitions shall state the relief sought, the basis for relief and the authority relied upon. If made before or after the hearing itself, these matters shall be in writing and shall be filed and served on all parties. If made at the hearing, they may be stated and responded to orally; but the review board may require that they be reduced to writing. Oral argument on motions and deadlines by which to file responses to written motions will be at the discretion of the review board.

§452.06 Other meetings.

(a) In addition to hearings and prehearing conferences held pursuant to § 452.05, a review board may hold such other meetings as it determines are necessary.

(b) Unless announced in the notice published upon receipt of an exemption application pursuant to 50 CFR 452.02(b), such meetings shall be announced by a notice in the **Federal Register** stating: (1) the time and place of the meeting; and (2) the nature or purpose of the meeting. Such notices will ordinarily be published at least 15 days before the scheduled meeting.

§452.07 Open meetings and records.

All review board meetings and hearings and all review board records shall be open to the public.

§452.08 Parties and intervenors.

(a) *Parties.* The parties shall consist of the exemption applicant, the Federal agency responsible for the agency action in question, the Service, and intervenors whose motions to intervene have been granted.

(b) *Intervenors.* (1) A review board shall provide an opportunity for intervention in its proceedings. A motion to intervene must state the petitioner's name and address, identify its representative, if any, set forth the interest of the petitioner in the proceeding and show that the petitioner's participation will assist in the determination of the issues in question.

(2) A review board shall grant leave to intervene if it determines that an intervenor's participation would contribute to the fair determination of issues before the board. In making this determination, the review board may consider whether an intervenor represents a point of view not adequately represented by a party or another intervenor.

§ 452.09 Separation of functions and ex parte communications.

(a) *Separation of Functions.* A review board and its members shall not:

(1) Be responsible for or subject to the supervision or direction of any person engaged in the performance of the endangered species consultation at issue;

(2) Allow an agency employee or agent engaged in performance of the endangered species consultation at issue, or a factually related matter, to participate or advise in a determination under this part except as a witness or counsel in public proceedings.

(b) *Ex Parte Communications.* As provided in 5 U.S.C. 557(d), review board members and staff shall not communicate with parties or their respective counsel concerning the merits of issues before the review board without reasonable prior public notice and opportunity to participate.

§ 452.10 Additional review board powers.

(a) *Request assistance.* (1) The review board may request and receive:

(i) Administrative support services, on a reimbursable basis, from the Administrator of the General Services Administration;

(ii) Personnel, from any Federal agency, on a nonreimbursable basis, to assist the review board in carrying out its duties.

(2) The review board should minimize reliance on personnel provided on a reimbursable basis by the GSA and maximize use of personnel provided by heads of Federal agencies on a nonreimbursable basis.

(b) *Use of the mails.* A review board may use the United States mails in the same manner and under the same conditions as a Federal agency.

(c) *Request information.* Subject to the Privacy Act of 1974, a review board may request of any person information necessary to carry out review board duties. Any Federal agency or the exemption applicant shall furnish such information to the review board.

(d) *Request subpenas.* A review board may request the Committee to issue subpenas for the attendance and testimony of such witnesses, and the production of such relevant papers, books, and documents as are necessary for consideration of an exemption application.

(e) *Take depositions.* A review board may take depositions or have depositions taken as necessary to carry out its functions.

(f) *Delegate Functions.* A review board may delegate its functions under paragraphs (a) through (e) of this section to any member.

(g) *Consolidated and Joint Proceedings.* (1) When two or more exemption applications are referred to the same review borad, the board may consolidate proceedings on the application, if consolidation would expedite or simplify consideration of the issues.

(2) When two or more review boards are considering related exemption applications, the review boards may conduct joint proceedings, if joint proceedings would expedite or simplify consideration of the issues.

PART 453—ENDANGERED SPECIES COMMITTEE

Sec.
453.01 Purpose.
453.02 Definitions.
453.03 Committee review and final determinations.
453.04 Committee information gathering.
453.05 Committee meetings.
453.06 Additional committee powers.

Authority.—Endangered Species Act of 1973, 16 U.S.C. 1531, *et seq.*, as amended.

§ 453.01 Purpose.

This part prescribes the procedures to be used by the Endangered Species Committee when examining applications for exemption from section 7(a) of the Endangered Species Act of 1973, as amended.

§ 453.02 Definitions.

Definitions applicable to this part are contained in 50 CFR 450.01.

§ 453.03 Committee review and final determinations.

(a) *Initiation.* Upon receiving a review board's report and record, the Committee shall promptly initiate its review of the application.

(b) *Final Determinations.* Within 90 days of receiving a review board's report and record, the Committee shall grant an exemption from the requirements of section 7(a) of the Act for an agency action if, by a vote of not less than five of its members voting in person:

(1) It determines on the record, based on the report of the review board and on such other testimony or evidence as it may receive, that—

(i) There are no reasonable and prudent alternatives to the proposed action;

(ii) The benefits of such action clearly outweigh the benefits of alternative courses of action consistent with conserving the species or its critical habitat, and such action is in the public interest; and

(iii) The action is of regional or national significance; and

(2) It establishes such reasonable mitigation and enhancement measures as are necessary and appropriate to minimize the adverse effects of the proposed action upon the endangered species, threatened species, or critical habitat concerned.

(c) *Decision and Order.* The Committee's final determinations shall be written and shall be based on the whole public record of testimony, evidence and other written comments submitted to the Committee. If the Committee determines that an exemption should be granted, the Committee shall issue an order granting the exemption and specifying required mitigation and enhancement measures. The Committee shall publish its decisions in the Federal Register as soon as practicable.

(d) *Permanent Exemptions.* Under section 7(h)(2)(B) of the Act, an exemption granted by the Committee shall constitute a permanent exemption with respect to all endangered or threatened species for the purposes of completing such agency action, provided that a biological assessment has been conducted, unless the Secretary finds, based on the best scientific and commercial data available, that such exemption would result in the extinction of the species. If the Secretary so finds, the Committee shall determine within 30 days after such finding whether to continue the exemption for the agency action notwithstanding the Secretary's finding. During the 30 day period, the holder of the exemption shall refrain from any action which would result in extinction of the species.

(e) *Review by the Secretary of Defense.* If the Secretary of Defense certifies in writing that an exemption for the agency action is necessary for reasons of national security, the Committee shall grant the exemption, notwithstanding any other provision in this part.

§ 453.04 Committee information gathering.

(a) *Written Submissions.* When the Chairman or four Committee members decide that written submissions are necessary to enable the Committee to make its final determinations, the Chairman shall publish a notice in the Federal Register inviting written submissions from interested persons. The notice shall include: (1) the address to which such submissions are to be sent; (2) the deadline for such submissions; and (3) a statement of the type of information needed.

(b) *Information Gathering Proceedings.* (1) When the Chairman or four Committee members decide that oral presentations are necessary to enable the Committee to make its final determinations, an information gathering proceeding shall be held.

(2) The information gathering proceeding shall be conducted by (i) the Committee or (ii) a member of the Committee or other person, designated by the Chairman or by four members of the Committee.

(3) *Notice.* The Chairman shall publish in the Federal Register a general notice of an information gathering proceeding, stating: (1) the time, place and nature of the information gathering proceeding; and (2) the type of information needed. The Federal Register notice shall be published at least 15 days prior to the proceeding.

(4) *Procedure.* The information gathering proceedings shall be open to the public and conducted in an informal manner. All information relevant to the Committee's final determinations shall be admissible, subject to the imposition of reasonable time limitations on oral testimony.

(5) *Transcript.* Information gathering proceedings will be recorded verbatim and a transcript thereof will be available for public inspection. Any person may obtain a copy of the transcript upon payment of the actual cost of duplication.

§ 453.05 Committee meetings.

(a) The Committee shall meet at the call of the Chairman or five of its members.

(b) Five members of the Committee or their representatives shall constitute a quorum for the transaction of any function of the Committee, except that in no case shall any representative be considered in determining the existence of a quorum for the transaction of a Committee function which involves a vote by the Committee on the Committee's final determinations.

(c) All meetings and records of the Committee shall be open to the public.

(d) The Chairman shall publish a notice of all Committee meetings in the **Federal Register**. The notice will ordinarily be published at least 15 days prior to the meeting.

§ 453.06 Additional committee powers.

(a) *Request and receive assistance.* The Committee may request and receive:

(1) Administrative support services on a reimbursable basis, from the Administrator of the General Services Administration; and

(2) Personnel from any Federal agency on a nonreimbursable basis, to assist the Committee in carrying out its duties.

(b) *Use The Mails.* The Committee may use the mails in the same manner and under the same conditions as a Federal agency.

(c) *Secure Information.* Subject to the Privacy Act, the Committee may secure information directly from any Federal agency when necessary to enable it to carry out its duties.

(d) *Subpenas.* (1) For the purpose of obtaining information necessary for the consideration of an application for an exemption, the Committee may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents;

(2) The Chairman shall receive review board subpena requests and may issue the subpenas on behalf of the Committee to aid the review board.

(e) *Rules and orders.* The Committee may issue such rules and orders as are necessary to carry out its duties.

(f) *Delegate Authority.* The Committee may delegate its authority under paragraphs (a) through (d) of this section to any member.

Dated: June 2, 1979.

Cecil D. Andrus,

Secretary of the Interior and Chairman, Endangered Species Committee.

Notices

Federal Register
Vol. 44, No. 112
Friday, June 8, 1979

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

Gypsy Moth Laboratory; Issuance of Negative Declaration

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of Availability of Environmental Analysis and Negative Declaration.

SUMMARY: This gives notice that Animal and Plant Health Inspection Service is not preparing an environmental impact statement concerning the continued use of Building 1398, on Otis Air Force Base, Massachusetts, as a Gypsy Moth Laboratory. The environmental assessment of this action indicates that the existing facility has not caused significant adverse local, regional, or national impacts on the environment in the past nor are there any adverse environmental impacts anticipated in the future. No significant controversy has been associated with this project. As a result of these findings, it has been determined that the preparation and review of an evironmental impact statement is not needed for this action.

ADDRESSES: A limited number of copies of the environmental analysis are available upon request from the Energy and Environmental Staff, Architectural Engineering Branch, Administrative Services Division, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 522, Presidential Building, 6525 Belcrest Road, Hyattsville, MD 20782.

Copies are available for public inspection during regular working hours at the following location: Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Building 1398, Otis Air Force Base, MA 02542.

FOR FURTHER INFORMATION: Contact Kenneth J. Dunn, Energy and Environmental Staff, (301) 436–8237.

SUPPLEMENTARY INFORMATION: Animal and Plant Health Inspection Service has been a tenant on Otis Air Force Base since 1960. Since 1976, the Gypsy Moth Laboratory, through a permit agreement with the Corps of Engineers, has occupied Building 1398 on the base. Prior to renewal of this permit, analyses of the environmental impacts of the existing facility are required. This negative declaration has been filed with the U.S. Environmental Protection Agency and with various Federal, State and local agencies.

No administrative action or implementation of permit renewal will be taken until June 25, 1979.

This notice has been reviewed under the U.S. Department of Agriculture criteria established to implement the EO 12044, Improving Government Regulations. A determination has been made that this notice should not be classified significant under those criteria. The environmental assessment referred to in the notice meets the requirements of EO 12044 and Secretary's Memorandum 1955 for an impact analysis statement. The environmental assessment is available from the Energy and Environmental Staff, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Hyattsville, MD 20782.

Done at Washington, D.C., this 25th day of May, 1979.

Francis J. Mulhern,

Administrator, Animal and Plant Health Inspection Service.

CIVIL AERONAUTICS BOARD

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q of the Board's Procedural Regulations

Notice is hereby given that, during the week ended CAB has received the applications listed below, which request the issuance, amendment, or renewal of certificates of public convenience and necessity for foreign air carrier permits under Subpart Q of 14 CFR Part 302.

Answers to foreign permit applications are due 28 days after the application is filed. Answers to certificate applications requesting restriction removal are due within 14 days of the filing of the application. Answers to conforming applications in a restriction removal proceeding are due 28 days after the filing of the original application. Answers to certificate applications (other than restriction removals) are due 28 days after the filing of the application. Answers to conforming applications or those filed in conjunction with a motion to modify scope are due within 42 days after the original application was filed. If you are in doubt as to the type of application which has been filed, contact the applicant, the Bureau of Pricing and Domestic Aviation (in interstate and overseas cases) or the Bureau of International Aviation (in foreign air transportation cases).

Subpart Q Applications

Date filed	Docket No.	Description
May 31, 1979	35715	Turks Air Limited, c/o Gerry Leventhal, Esq., Van Ness, Feldman & Sutcliffe, 1220 Nineteenth Street, NW., Suite 500, Washington, D.C. 20036. Application of Turks Air Limited requests the Board pursuant to Section 402 of the Act for renewal of its foreign air carrier permit authorizing it to engage in: (a) Non-scheduled foreign air transportation of property only between a point or points in the Turks and Caicos Islands on the one hand and Miami, Florida on the other; and (b) Property only all-route charter services. Answers due on June 28, 1979.
May 29, 1979	35660	United Air Lines, Inc., O'Hare International Airport, P.O. Box 66100, Chicago, Illinois 60666. Application of United Air Lines, Inc. requests the Board pursuant to Section 401(d)(7) of the Act and Subpart Q to reissue its certificate of public convenience and necessity for Route 81 without restriction (14) or in the alternative, amend said certificate so as to remove restriction (14) therefrom. Answers due on June 12, 1979.

Subpart Q Applications—Continued

Date filed	Docket No.	Description
June 4, 1979	35741	Ozark Air Lines, Inc., Lambert-St. Louis International Airport, St. Louis, Missouri 63145. Application of Ozark Air Lines, Inc. requests the Board pursuant to Section 401 of the Act for amendment of its certificate of public convenience and necessity for Route 107 so as to authorize it to engage in nonstop scheduled air transportation of persons, property, and mail and between Dallas/Fort Worth, on the one hand, and Honolulu and Hilo, Hawaii, on the other hand. Answers due on June 15, 1979.

Phillis T. Kaylor,
Secretary.

[Order No. 79-5-235; Docket No. 35178]

Houston-Brownsville & Texas International Airlines; Order To Show Cause

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order to Show Cause (79-5-235).

SUMMARY: The Board is proposing to grant Houston-Brownsville authority to Texas International Airlines (Docket 35178) and any other fit, willing and able applicant the fitness of which can be established by officially noticeable material. The complete text of this order is available as noted below.

DATES: All interested persons having objections to the Board issuing an order making final the tentative findings and conclusions shall file, by July 5, 1979, a statement of objections, together with a summary of testimony, statistical data, and other material expected to be relied upon to support the stated objections. Such filings shall be served upon all parties listed below.

ADDRESSES: Objections to the issuance of a final order should be filed in the Dockets Section, Civil Aeronautics Board, Washington, D.C., 20428, in Docket 35707, which we have entitled the *Houston-Brownsville Show Cause Proceeding.*

In addition, copies of such filings should be served on Texas International Airlines.

FOR FURTHER INFORMATION CONTACT: Charles Stohr, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C., 20428, (202) 673-5348.

SUPPLEMENTARY INFORMATION: The complete text of Order 79-5-235 is available from the Distribution Section, Room 516, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 79-5-235 to that address.

By the Civil Aeronautics Board, May 31, 1979.

BILLING CODE 6320-01-M

[Order No. 79-5-243; Docket No. 34803]

Oneida County Aviation, Inc.; Order To Show Cause

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order 79-5-243, Docket 34803.

SUMMARY: The Board is proposing to grant the application of Oneida County Aviation, Inc. d/b/a/ Empire Airlines, for a certificate of public convenience and necessity for authority between Utica/Rome, N.Y. on the one hand, and Buffalo, Washington, D.C., New York city, Newark, N.J. and Boston on the other, between Utica, Syracuse, Albany and Hartford, Ct., and between Syracuse and New York City. The grant would be contingent upon a finding that Empire is fit, willing and able to perform properly the proposed transportation and to conform with the provisions of the Act and the applicable rules and regulations of the Board. Empire is not a certificated carrier, and is currently flying these routes under exemption or unused authority.

DATES: All persons having objections to the Board's proposed action should file, and serve upon all parties, a statement of objections, together with a summary of the testimony, statistical data and other material expected to be relied upon to support the stated objections:

(a) Where the objections are on grounds other than fitness, no later than July 9, 1979;

(b) Where objections are on fitness grounds, by such time as shall be designated by the Administrative Law Judge assigned to the case. Responses to the evidence request set forth below shall be filed no later than June 22, 1979.

ADDRESSES: All objections should be filed in Docket 34803, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428.

FOR FURTHER INFORMATION CONTACT: Mark W. Atwood, B–72, Bureau of Pricing and Domestic Aviation, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428 (202) 673–5333.

SUPPLEMENTARY INFORMATION: Objections should be served upon Empire Airlines.

The complete text of Order 79–5–243 is available from our Distribution Section, Room 516, 1825 Connecticut Avenue, N.W., Washington, D.C. Persons outside the metropolitan area may send a postcard request for Order 79–5–243 to the Distribution Section, Civil Aeronautics Board, Washington, D.C. 20428.

Evidence To Be Submitted Before Hearing

The applicant is to supply the following information to the extent that it has not been supplied in the exhibits to its Petition for an Order To Show Cause. To the extent that such information has been supplied, the response to this request should be crossreferenced to the corresponding exhibit.

A. Identity, Citizenship, and Relationships

1. Name and address.

2. Type of organization and the name of the state under the laws of which it is organized.

3. Statement that the applicant is a citizen of the United States as defined in section 101(16) of the Federal Aviation Act.

4. List the names and addresses and brifly indicate the expertise and responsibilities of all directors, officers and key management personnel of the applicant.

(a) Is each a U.S. citizen? If not, give citizenship;

(b) Set forth for each, the amount of applicant's stock held by class, the number of options and warrants held, including value and the exercise dates and price;

(c) Each should submit a statement describing the shares of stock (if 5 percent or more of total voting stock is owned), officerships and directorships, or other interests held in any (1) air carrier, (2) foreign air carrier, (3) person substantially engaged in the business of aeronautics, (4) common carrier, or (5) person whose principal business (in purpose or in fact) is the holding of a stock in or control of (1), (2), (3) or (4).

5. State the name, address, citizenship and principal business of each person holding 5 percent or more of applicant's total voting stock, together with the amount and percentages held, and the name, address, citizenship and principal business of any person for whose account, if other than the holder, such interest is held; if any of these people are related by blood or marriage, include the relationship;

(a) Is any person or is any subsidiary [1] of any person listed in 5, (1) an air carrier, (2) foreign air carrier, (3) person substantially engaged in the business of aeronautics, (4) common carrier, (5) officer or director of (1)–(4)? If so, describe.

6. List any person included in 4 or 5 above, who has the power to substantially influence the management of the applicant.

7. List all subsidiaries of the applicant, briefly describing the relationship to the applicant and principal business.

8. Describe the shares of stock or other interests the applicant or any of its subsidiaries holds in any (1) air carrier, (2) foreign air carrier, (3) person substantially engaged in the business of aeronautics, (4) common carrier, or (5) person whose principal business (in purpose or in fact) is the holding of stock in or control of (1)–(4).

B. Financial Information

1. Supply copies of 10K reports filed with the SEC for the past two years, if such reports were filed.

2. To the extent not supplied under B.1, supply for the most recent twelve-month period and the preceding calendar year (audited if possible, otherwise notarized), separating out for (b) and (c) transport and nontransport activities;

(a) balance sheet;

(b) profit and loss statement;

(c) cash flow statement.

C. Operational Information

1. Provide a brief chronological narrative of the ownership and operations, including:

(a) CAB, State, and FAA authority under which the applicant has conducted operations;

(b) For the past three calendar years, total aircraft hours, aircraft miles, revenue passenger-miles, and revenue ton-miles flown;

(c) Types of aircraft used, types of service performed, and major (*e.g.*10) markets served.

2. Provide a list of aircraft currently operated indicating aircraft type, capacity, and whether owned or leased.

3. Describe equipment (other than aircraft), ground facilities, and personnel currently utilized.

D. Proposed Operations

1. Describe plans for acquisition or lease of additional aircraft to be used in proposed operations, including number and type of aircraft, and financial plans contemplated for the acquisition or lease of such aircraft.

2. Provide for the first normalized year of operations an illustrative traffic forecast indicating, in the aggregate, estimated revenue hours and revenue miles by type of aircraft, number of passengers and number of tons of cargo carrier, and major markets in which above traffic will be generated.

3. Provide for the first normalized year of operations an illustrative pro-forma balance sheet (as at the end of the period), profit and loss statement on a fully-allocated cost basis, and statement of sources and uses of funds. Provide, to the extent practical, derivation of unit costs used in estimating operating expenses.

4. Describe any assistance agreements the applicant will rely upon for managerial or technical expertise.

E. Compliance Disposition

1. Provide a description of each formal or docketed complaint lodged against the applicant, any predecessor or affiliate thereof (or against any other transportation company over which the applicant or predecessor exercises or has ever exercised control) in the past five years regarding compliance with the Federal Aviation Act or the rules, regulations and requirements issued under that Act. Indicate the final disposition, if any, of the matters.

2. State whether any of the persons and/or companies listed in Item A above, either as a partner, officer, director or stockholder has been affiliated with, controlled, or participated in control of any air carrier which during such association, was found to have committed knowing, willful violations of the Act, or of any order, rule, or regulation issued under

[1] As used in this request, a subsidiary means any business of which the applicant owns 10 percent or more of the total voting stock, and any subsidiaries of the applicant's subsidiary.

the Act. If so, list the orders covering the period from ten years ago to date.

3. Indicate any action taken by the FAA under 14 CFR 13.15 (involving civil penalities of $250 or more per violation), 13.17, 13.19, and 13.23 and the disposition of each.

4. Has the applicant, any predecessor, or any of the persons listed in A.4, 5, or 6 ever been convicted of a felony, anti-trust violation, or fraud (criminal or civil) within the past ten years or is such an action pending? If so, identify the proceeding and provide a description, including current status or final disposition.

5. Provide a description of any civil actions brought against the applicant, or any predecessor or affiliate thereof (or against any other transportation company over which the applicant or predecessor exercised or has ever exercised control) arising out of its air transportation operations. Describe the current status or final disposition.

By the Civil Aeronautics Board, May 31, 1979.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Economic Development Administration

Environmental Impact Statement for the City of Little Rock, Ark., Civic/Convention Center

On April 17, 1979, the Economic Development Administration (EDA) published in the Federal Register (44 FR 22797) a Notice of Intent to prepare an Environmental Impact Statement for a Civic/Convention Center which was proposed to be constructed in Little Rock, Arkansas. EDA was to be the "lead" agency in the preparation of the Environmental Impact Statement.

The City of Little Rock, Arkansas has withdrawn its request for EDA grant assistance for construction of the Civic/Convention Center. EDA will, therefore, not prepare an Environmental Impact Statement on the proposed Civic/Convention Center, and the public is now informed that EDA is no longer financially involved with the Civic/Convention Center proposal.

Dated: June 4, 1979.

Robert T. Hall,

Assistant Secretary for Economic Development.

[FR Doc. 79-17625 Filed 6-7-79; 8:45 am]

BILLING CODE 3510-24-M

Notice of Petitions by 11 Producing Firms for Determinations of Eligibility To Apply for Trade Adjustment Assistance

Petitions have been accepted for filing from eleven firms: (1) The Atlas Company, 17 East Queen Street, Ephrata, Pennsylvania 17522, a producer of women's and children's pants (accepted May 23, 1979); (2) Newark Boneless Meat Products, Inc., 26 Coventry Road, Livingston, New Jersey 07039, a processor or meat (accepted May 23, 1979); (3) Bordentown Industries, Inc., 1 Reiner Place, Englewood Cliffs, New Jersey 07632, a producer of women's coats and jackets (acepted May 24, 1979); (4) Crawfton Coat Company, Inc., 1453 75th Street, North Bergen, New Jersey 07047, a producer of women's coats (accepted May 24, 1979); (5) Merit Enterprises, Inc., 140 Thomas Street, Newark, New Jersey 07114, a producer of small electric appliances (accepted May 24, 1979); (6) Hahn, Inc., 1625 N. Garvin Street, Evansville, Indiana 47711, a producer of lawn mowers, garden tillers, and other equipment (accepted May 29, 1979); (7) Imperial Reading Corporation, 1920 Atherholt Road, Lynchburg, Virginia 24501, a producer of children's jeans, shirts and tops (accepted May 29, 1979); (8) United Canning Corporation, 12505 South Avenue Extension, P. O. Box 158, North Lima, Ohio 44452, a producer of canned mushrooms (accepted May 29, 1979); (9) Oldani Enterprises, Inc., 1015 Locust Street, St. Louis, Missouri 63101, a producer of women's shirts, slacks, blouses and dresses (accepted May 31, 1979); (10) Acme Garment Company, 5th and Elm Streets, Wentzville, Missouri 63385, a producer of women's skirts, pants, shorts, blouses, jackets and vests (accepted May 31, 1979); and (11) Fearing Manufacturing Company, 490 E. Villaume, South Saint Paul, Minnesota 55075, a producer of livestock identification tags and crayons, and calf nursing bottles (accepted June 1, 1979).

The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (Pub. L. 93-618) and Section 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315).

Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than June 18, 1979.

Jack W. Osburn, Jr.,

Chief, Trade Act Certification Division, Office of Eligibility and Industry Studies.

BILLING CODE 3510-24-M

Industry and Trade Administration

Massachusetts Institute of Technology; Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. at 666 11th Street NW., Room 735, Washington, D.C.

Docket Number: 79-00113. Applicant: Massachusetts Institute of Technology, 77 Massachusetts Avenue, Cambridge, MA 02139. Article: Double-Flash Photographic System. Manufacturer: University of Sheffield, United Kingdom. Intended use of article: The article is intended to be used to investigate the rate of fuel nitrogen emission under atmospheres of varying temperature, composition and relative velocity. The experiments will be conducted to determine the size and velocity of an atomized liquid fuel under pyrolysis and combustion conditions and their relationship to nitrogen oxide pollution. The article will also be used for educational purposes in the courses Graduate Thesis (10 ThG), Graduate Research Project(10.91).

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides the abilities to (1) create an image of sufficient magnification to be accurately measured for observing particles of sizes of the order of 10 microns; (2) precisely set the time interval between two successive sparks within the time interval 20 μs to 3 ms; (3) delay initiation of timing for as much as 200 μs after the shutter has opened; (4) delay the first spark after initiation for as much as 100 μs; (5) independently time inter-spark time interval and observe spark output intensity; (6) differentiate between images formed by the two sparks; (7) generate point source spark sources for ease of collimation; (8) align both light sources upon the same axis in order to illuminate an object observable with restricted access; and (9) differentiate by a narrow field of focus, a chosen plane of observation. The National Bureau of Standards advises in its memorandum dated May 15, 1979 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus or combination of domestic instruments of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

Richard M. Seppa,

Director, Statutory Import Programs Staff.

[FR Doc. 79-17765 Filed 6-7-79; 8:45 am]

BILLING CODE 3510-25-M

Medical College of Wisconsin; Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. at 666 11th Street N.W. (Room 735), Washington, D.C.

Docket Number: 79-00104. Applicant: The Medical College of Wisconsin, Inc., 8701 Watertown Plank Road, P.O. Box 26509, Milwaukee, WI 53226. Article: Jasco Model 500C Automatic Recording Spectropolarimeter. Manufacturer: Japan Spectroscopic Co., Ltd., Japan. Intended use of Article: The article is intended to be used for circular dichroism spectroscopy of the following systems, and the changes therein induced by alterations in experimental parameters:

(a) The conformational attributes of proteins and synthetic polypeptides;

(b) The structure and function of heme proteins; and

(c) Complexes between drugs and nucleic acids.

The experimental approaches for each project are, respectively, (a) induction of the order-disorder transformations, (b) ligation and redox processes of the heme groups, and (c) characterization of the stability and specificity of drug-nuclei acid interactions. The article will also be used in the course Biochemistry 222, Protein Chemistry for training of Ph.D. candidates.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article can provide circular dichroism spectoscopy in the 180–1000 nanometer range. The Department of Health, Education, and Welfare advises in its memorandum dated April 19, 1979 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

BILLING CODE 3510-25-M

Northwestern University; Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 A.M. and 5:00 P.M. at 666 11th Street, N.W. (Room 735) Washington, D.C.

Docket Number: 79–00111. Applicant: Northwestern University, 619 Clark Street, Evanston, Illinois 60201. Article: High Resolution Fourier Transform Multinuclear Magnetic Resonance Spectrometer System, Model JNM/FX–90Q and Accessories. Manufacturer: JEOL Ltd., Japan. Intended Use of Article: The article is intended to be used for a variety of chemistry studies including the following:

(1) Studies of inorganic complexes by multinuclear NMR spectroscopy,
(2) Investigation of metalloporphyrins in which the metals are iron, cobalt manganese, and chromium,
(3) Actinide Organometallic Chemistry,
(4) Syntheses of uranium hexamethyoxide and mixed methoxy uranium (VI) fluorides from uranium hexafluoride,
(5) Magnetic resonance spectra of metal nucleic in transition metal cluster complexes,
(6) Biorganic applications, i.e., study of the environment of transition metal ions in porphyrins and related systems,
(7) Determination of imidzole pK_a'S in different polymer matrices,
(8) Structure-function studies in mitochondrial cytochrome *c*,
(9) Effect of inversional motion on spin-lattice relaxation,
(10) Nitrogen-15 relaxation by Spin (Internal Rotation), and
(11) Kinetics of Processes with Long Correlation times.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States at the time the foreign article was ordered.

Reasons: The foreign article provides the capability for measuring $T_{1\rho}$, the spin-lattice relaxation time in the rotating frame. The National Bureau of Standards advises in its memorandum dated May 10, 1979 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

George C. Marshall Space Flight Center, Ala., et al; Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C 20230, on or before June 28, 1979.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comment.

A copy of each application is on file, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, at 666–11th Street, N.W. (Room 735), Washington, D.C.

Docket number: 79–00242. Applicant: George C. Marshall Space Flight Center—National Aeronautics and Space Administration, Alabama 35812. Article: Spacelab. Manufacturer: European Space Agency (ESA), (ERNO) West Germany. Intended use of article: The article is a reusable general-purpose laboratory which will be flown to and from space in the cargo bay of the Orbiter and remains attached to the Orbiter during all phases of the mission. The space missions will involve the disciplines of space processing, advanced technology, earth viewing, life sciences, astronomy, astrophysics, solar physics, and terrestrial physics. In addition, the article will be used to fly experiments specifically for high school students from both the U.S. and Europe. Application received by Commissioner of Customs: April 4, 1979.

Docket number: 79–00264. Applicant: Utah State University, Department of Range Science, UMC 52, Logan, Utah 84322. Article: CO^2 Infrared Gas Analyzer. Manufacturer: Analytical Development Co., United Kingdom. Intended use of article: The article is intended to be used for photosynthetic studies of arid land plants, particularly in the field under natural environmental conditions. These experiments will involve measurement of net photosynthesis and respiration of plants as a function of various environmental factors as well as the different species of plants which will be assayed. Measurements of photosynthesis and respiration involve determinations of the changes in concentrations of carbon dioxide in a small chamber surrounding the plant. In addition to the primary use of the article in research, some use of the article will also be made in teaching of an advanced graduate course Plant Ecophysiology (Range Science 621). Application received by Commissioner of Customs: May 7, 1979.

Docket number: 79–00265. Applicant: Letterman Army Medical Center—Department of Pathology, Building 1100, Presidio of San Francisco, San Francisco, CA 94120. Article: Electron Microscope, Model EM 10A and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article will be used to study human tissues removed surgically or at autopsy. Research will involve studying ultrastructurally all unusual tumors and many other pathologic states. In addition, the article will be used for post doctoral training of ten residents in the medical specialty of pathology. Application received by Commissioner of customs: May 7, 1979.

Docket number: 79–00266. Applicant: The University of Texas Health Science Center at Houston—Medical School, P.O. Box 20036, 6431 Fannin Street, Houston, Texas 77025. Article: Temperature-Jump Spectrometer and Accessories. Manufacturer: Messanlagen Studien-gesellschaft mbH, West Germany. Intended use of article: The article is intended for investigation of the kinetics of the folding-unfolding reactions of globular proteins. These are large, biologically important polymers of amino acids which fold into different types of three dimensional structures depending on the sequence of the amino acids in the particular protein under study. Kinetic methods (stopped flow and fast temperature jumps) will be

used to study the rates a which particular steps infolding (unfolding) take place. It is hoped that these studies will lead to an understanding of how sequence is related to folding. Application received by Commissioner of Customs: May 7, 1979.

Docket number: 79-00268. Applicant: U.C.L.A., Department of Biology, Los Angeles, CA 90024. article: CED Model 509 Dual 308K Byte Floppy Disc Systems and Accessories. Manufacturer: Cambridge Electronic Design (CED), United Kingdom. Intended use of article: The article will be used in conjunction with a CAI Alpha minicomputer to control stimuli, acquire and analyze data during acute studies of the auditory system in lower vertebrates. It will be used in the study of neural mechanisms involved in processing species-specific sounds for the purpose of understanding normal auditory function; this in turn, may serve as baseline data for studies of auditory pathology, including deafness of cochlear origin, tinnitus, etc. The preparation used will be the anesthetized frog, in which the electrical activity of the auditory nerve is recorded and stored on the floppy disc system for subsequent analysis. The disc, then will form an integral part of the recording and analyzing appartus. Application received by Commissioner of Customs: May 7, 1979.

Docket Number: 79-00269. Applicant: University of Southern California, Electrical Engineering Dept., University Park, Los Angeles, CA 9007. Article: Pulsed CO2 TEA Laser, Model TEA 103. Manfacturer: Lumonics Ltd., Canada. Intended Use of Article: the article is intended to be used to optically pump molecules in order to create population inversions between energy states of the pumped molecules. The article will be used by graduate students in order to carry out the original research required for the Ph.D. degree. Application received by Commissioner of Customs: May 7, 1979.

Docket Number: 79-00271. Applicant: University of Florida—College of Pharmacy, Box J-4, JHMHC, Gainesville, Fla. 32610. Article: Dianorm R-4-Equilibrium Dialysis Apparatus and Accessories. Manufacturer: Diachema AG, Switzerland. Intended use of Article: The article is intended to be used for studies of enzymes, proteins and nucleic acids. The quantitative aspects of the interaction of the macromolecules will be investigated, as a function of concentration, pH, ionic strength, etc. The objectives of the investigations are to understand the mechanism of binding of the drugs to the molecules and to correlate the observations with in vivo data obtained from animals and humans. The article will also be used by graduate students, satisfying the research requirements for their Ph.D. degree and by post doctoral fellows in their research program. Application Received by Commissioner of Customs: May 1979.

National Oceanic and Atmospheric Administration

Availability of Evaluation Findings for the Massachusetts, Rhode Island, and Wisconsin Coastal Management Programs

Section 312 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1451 et seq.) requires that the Office of Coastal Zone Management (OCZM) conduct a continuing evaluation of the performance of each coastal State under its Federally approved coastal management program.

On-site evaluations of the Massachusetts, Rhode Island and Wisconsin programs were conducted by Office of Coastal Zone Management in February, 1979.

All three States were found to be adhering to their management programs as a result of which positive results are occurring with respect to resource protection, management of development, increased recreational access and permit simplification.

Notice is hereby given of the availability of these evaluation findings to interested parties. A copy of the written findings made by the Assistant Administrator for Coastal Zone Management for each of these States may be obtained on request from: Carol Sondheimer, Chief, Policy and Program Evaluation, Office of Coastal Zone Management, Page Building 1, 3300 Whitehaven Street, N.W., Washington, D.C. 20235, telephone (202) 634-4245.

Dated: June 4, 1979.

Robert L. Cernahan,

Acting Assistant Administrator for Administration.

Mid-Atlantic Fishery Management Council's Bluefish Subpanel; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The Mid-Atlantic Fishery Management Council was established by section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), and the Council has established a Bluefish Subpanel (AP) which will meet to discuss the Bluefish Fishery Management Plan (FMP).

DATES: The meeting will convene on Friday, June 29, 1979, at 10 a.m. and will adjourn at approximately 3 p.m. The meeting is open to the public.

ADDRESS: The meeting will take place at the Best Western Airport Motel, Philadelphia International Airport, Route No. 291, Philadelphia, Pennsylvania (215) 365-7000.

FOR FURTHER INFORMATION CONTACT: Mid-Atlantic Fishery Management Council, North and New Streets, Room 2115, Federal Building, Dover, Delaware 19901, Telephone: (302) 674-2331.

Dated: June 5, 1979.

Winfred H. Meibohm,

Executive Director, National Marine Fisheries Service.

BILLING CODE 3510-22-M

North Pacific Fishery Management Council and Scientific and Statistical Committee and Advisory Panel; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The North Pacific Fishery Management Council was established by Section 302 of the Fishery Conservation and Management Act (FCMA) of 1976 (Public Law 94-265), and the Council has established a Scientific and Statistical Committee (SSC) and an Advisory Panel (AP) to hold joint and separate meetings, June 26-29, 1979.

DATES: The Council meeting will convene on Thursday, June 28, 1979, at 8:30 a.m. and will adjourn on Friday, June 29, 1979, at 5 p.m. at the Elks Lodge, Homer, Alaska. The SSC meeting will convene on Tuesday and Wednesday, June 26 and 27, 1979, at 9 a.m. and will adjourn at 5 p.m. on both days at the Land's End, Homer, Alaska. The AP meeting will convene on Wednesday, June 27, 1979, at 9:30 a.m. and will adjourn at 5 p.m. at the Elks Lodge, Homer, Alaska. The SSC and AP will

meet jointly, as necessary, on Thursday, June 28, 1979. The meetings may be lengthened or shortened depending on progress on the agenda. The meetings are open to the public.

FOR FURTHER INFORMATION CONTACT: North Pacific Fishery Management Council, P.O. Box 3136DT, Anchorage, Alaska 99510, Telephone: (907) 274–4563.

PROPOSED AGENDAS:

Council

(1) Consider amendment to the Fishery Management Plan (FMP) for Groundfish in the Gulf of Alaska to close some areas to joint venture operations; (2) First Council consideration of changes in definitions of fishery management units for all FMP's in the Gulf of Alaska and the Bering Sea; (3) Consideration of an amendment to the FMP for Groundfish in the Bering Sea/Aleutian Islands closing an area in the central Bering Sea to foreign trawling to protect herring and salmon; (4) Develop recommendations to National Marine Fisheries Service (NMFS) for release of groundfish reserves in the Gulf of Alaska; (5) Hear a report on the Tanner crab fishery in the Bering Sea with the possibility that some action may be required to amend the FMP for Tanner Crab off Alaska if resource conditions warrant; (6) Develop final recommendations for changes to the FCMA of 1976; (7) Review an application from the Soviet Processor/Trawler PRIAMURYE for a permit to support American fishermen in the Gulf of Alaska groundfish fishery; (8) Discussion of the concept of optimum yield (OY) as developed by the Pacific Fishery Management Council; (9) Report from the Working Group on Socio-economic Data Needs in the North Pacific Council fishery FMP's; (10) Report from the Working Group developing guidelines for estimating Domestic Annual Harvesting (DAH) and Processing capacity; (11) Internal audit review report; (12) First consideration of 1980 operating budget for the North Pacific Council; (13) Reports of ongoing fisheries and management problems from NMFS, Alaska Department of Fish and Game (ADF&G), United States Coast Guard (USCG), the AP, and the SSC; (14) A preliminary report from the Council Working Group on Incidental Species on the use of a fourth category of species for FMP's, those species that are unutilized or unwanted and occur as an incidental catch in other fisheries; (15) Report on the Council Chairmen's Meeting of June 19th and 20th; (16) Preliminary report from the Limited Entry Work Group; (17) Council recommendation for reduction of amount of Groundfish (Pollock, Pacific Cod, etc.) set aside for U.S. harvest in 1979, based on the latest survey of U.S. processing intent; and (18) Hold a public comment period on June 28, 1979, at 3:30 p.m.

Scientific and Statistical Committee

(1) Discussion of possible herring/salmon savings trawl closures; (2) Consideration and nomination of a new SSC member; (3) Discussion of State/Federal Regulations; (4) Proposed FCMA changes; (5) Discussion of OY Decision Paper; (6) Discussion on Limited Entry; (7) Review of report on Socio-economic Data Needs Committee; and (8) Discussion of King Crab FMP.

Advisory Panel

(1) Discussion of amendment to the FMP for Groundfish in the Gulf of Alaska to close some areas to joint venture operations; (2) Discussion of an amendment to the FMP for Groundfish in the Bering Sea/Aleutian Islands closing an area in the central Bering Sea to foreign trawling to protect herring and salmon; (3) Discussion on release of groundfish reserves in the Gulf of Alaska; (4) Report from the Working Group developing guidelines for estimating DAH and Processing Capacity; (5) Report from the Working Group on Socio-economic Data Needs in the North Pacific Council FMP's; (6) A preliminary report from the Council Working Group on Incidental Species on the use of a fourth category or species for FMP's, those species that are unutilized or unwanted and occur as an incidental catch in other fisheries.

Dated: June 5, 1979.

Winfred H. Meibohm,

Executive Director, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1979; Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to Procurement List.

SUMMARY: This action adds to Procurement List 1979 commodities to be produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: June 8, 1979.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher (703) 557–1145.

SUPPLEMENTARY INFORMATION: On April 16, 1979 the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (44 FR 22504) of proposed addition to Procurement List 1979, November 15, 1978 (43 FR 53151).

After consideration of the relevant matter presented, the Committee has determined that the commodities listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c, 85 Stat. 77.

Accordingly, the following commodities are hereby added to procurement List 1979:

Class 5120

Screwdriver, Flat-tip, 5120-00-278-1269, 5120-00-269-6062, 5120-00-287-2504, 5120-00-287-2505, 5120-00-278-1267, 5120-00-541-3004, 5120-00-286-7803, 5120-00-236-2127, 5120-00-278-1270, 5120-00-227-7356, 5120-00-260-4637, 5120-00-227-7334, 5120-00-278-1268, 5120-00-293-0314, 5120-00-837-2465, 5120-00-540-0563, 5120-00-180-0708, 5120-00-222-8666, 5120-00-596-6502, 5120-00-278-1273, 5120-00-062-0613, 5120-00-293-3311, 5120-00-222-8662, 5120-00-596-6364, 5120-00-293-0315, 5120-00-293-3309, 5120-00-227-7377, 5120-00-180-3490, 5120-00-236-2140, 5120-00-062-8454, 5120-00-720-4969.

BILLING CODE 6820-33-M

Procurement List 1979; Deletion

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Deletion from Procurement List.

SUMMARY: This action deletes from Procurement List 1979 a service provided by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: June 8, 1979.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher (703) 557-1145.

SUPPLEMENTARY INFORMATION: On April 20, 1979 the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (44 FR 23555) of proposed deletion from Procurement List 1979, November 15, 1978 (43 FR 53151).

After consideration of the relevant matter presented, the Committee has determined that the service listed below is no longer suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77.

Accordingly, the following service is hereby deleted from Procurement List 1979:

SIC 7399

Packaging Service, Portsmouth Naval Shipyard, Portsmouth, New Hampshire.

E. R. Alley, Jr.,
Acting Executive Director.

Intent To Prepare Draft Environmental Impact Statement for a Proposed Flood Control Project, Mingo Creek, Tulsa, Okla.

AGENCY: U.S. Army Corps of Engineers, DOD, Tulsa District.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement (DEIS)

SUMMARY: 1. The primary purpose for this project is to provide 100-year flood protection on 2,200 acres of urban land in the city of Tulsa, Oklahoma.

2. Reasonable Alternatives. The alternatives evaluated include: no action, flood plain acquisition, flood proofing, channelization, levees, detention, and combination of alternatives.

3. Scoping Process.

a. Public Involvement. A comprehensive public involvement program was developed as a means of disseminating information and soliciting public views. A variety of techniques including formal public meetings, informal public information sessions, committees, the newsletter, "Waterlogue", and periodic statements to the local news media were employed to involve organizations, Federal, State, and local agencies, citizen committees, and the interested public in the planning studies.

b. Significant Issues Requiring Indepth Analysis. None.

c. Assignments. U.S. Fish and Wildlife Service prepared a Coordination Act Report dated 23 March 1979.

d. Environmental Review and Consultation Requirements. The draft statement will be circulated for review, and all comments will be incorporated into the final environmental statement.

4. Scoping meeting will not be held.

5. Estimated date when the DEIS will be available. July 1979.

ADDRESS: Mr. Buell G. Atkins, Chief, Environmental Resources Branch, U.S. Army Corps of Engineers, Tulsa District, P.O. Box 61, Tulsa, OK 74121, (918) 581-7857.

Dated: May 30, 1979.

Robert G. Essing,
Colonel, CE, District Engineer.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Albert B. Alkek Consent Order; Extension of Comment Period

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Extension of Comment Period for Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby extends to June 15, 1979 the comment period on the Consent Order executed between Albert B. Alkek of Victoria, Texas, and the Office of Enforcement (ERA). The original notice of action taken was published in 44 FR 24913 (April 27, 1979).

DATES: Comments by June 15, 1979.

ADDRESS: Send comments to: Thomas M. Holleran, Chief, Crude Oil Branch, Office of Enforcement Policy & Planning, 2000 M Street, N.W., Room 5128, Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT: Thomas M. Holleran, Chief, Crude Oil Branch, Office of Enforcement Policy & Planning, 2000 M Street, N.W., Room 5128, Washington, D.C. 20461 (202-254-8580).

Issued in Washington, D.C. on the 1st day of June 1979.

Barton Isaacson,
Assistant Administrator for Enforcement, Economic Regulatory Administration.

Federal Energy Regulatory Commission

[Docket No. CP79-19]

Montana-Dakota Utilities Co.; Protest and Petition for Relief

June 4, 1979.

Take notice that on May 16, 1979, Holly Sugar Corporation (Holly), P.O. Box 1052, Colorado Springs, Colorado

80901, filed in Docket No. GP79–19 a protest of the actions of Montana-Dakota Utilities Co. (MDU) and petition for relief pursuant to Sections 1.6 and 1.7 of the Commission's Rules of Practice and Procedure (18 CFR 1.6 and 1.7) and Section 281.119 of the Interim Curtailment Rule issued pursuant to the Natural Gas Policy Act of 1978 (NGPA), all as more fully set forth in the protest and petition which are on file with the Commission and open to public inspection.

Holly is a manufacturer of sugar, operating several plants at which sugar is processed from sugarbeets, among them one situated near the Town of Worland, Washakie County, Wyoming, and one near Sidney, Richland County, Montana. Holly states that MDU has furnished natural gas at the Sidney and Worland plants under negotiated industrial interruptible contracts and that until 1978, it used natural gas at said plants as its sole energy source except for negligible quantities of oil, the required stand-by fuel, during peak load interruptions.

In 1976 MDU instituted an allocation plan (the Plan) and Holly alleges that at MDU's instance, several of MDU's major customers, including Holly, entered into a stipulation and agreement, approving the Plan, by the terms of which an order of priority was established and customers with lowest priority (4) agreed to a program the effect of which would be to reduce their annual consumption each year thereafter by 20 percent cumulatively. Standard contracts thereafter were offered such customers on a fiscal year July 1–June 30 basis. By agreement, dated June 1, 1978, for the term July 1, 1978–June 30, 1979, Holly states that it was restricted to 40 percent of its base year (1976) consumption of priority 4 usage as defined in the Plan. The plan is pending before the Commission.

Holly asserts that in comments filed April 2, 1979, pursuant to a conference in Docket No. RP76–91 to consider the effect of the NGPA upon current curtailment plans, MDU stated:

> Since the volumetric limitations under the present contracts serve as a cap through June 30, 1979, MDU believes it is in harmonny with the intent of the Commission's interim rule to maintain the same "cap" for the remaining four months during which the Interim Curtailment Rule is to be in effect—*i.e.*, July 1, 1979 through October 31, 1979.
>
> Consequently, new contracts embracing the period July 1, 1979 through October 31, 1979 will establish volumetric limitations at the present level, which is 40 percent of requirements, that is during that four-month period, the contract volume will be 4/12 of 40 percent of Base Period Requirements.

Holly states that reflecting such intention, MDU wrote Holly on April 30, 1979, as follows:

> Section 2.2(a) of our FERC Gas Tariff, First Revised Volume No. 1, requires that Montana-Dakota Utilities Co. shall notify all customers whose base period requirements cannot by completely met, of the percent of service which such customer will receive during the following Supply Year. In compliance with that requirement, we wish to advise you that for the Supply Year 1979–80 (beginning July 1, 1979, and ending June 30, 1980), the curtailment rate will be eighty percent (80%) of your Priority 4 Base Period Requirements as contained in the tariff. You will, therefore, be allotted twenty percent (20%) of the Priority 4 base period requirement volume plus one hundred percent (100%) of the Priority 2 base period requirement for the 1979–80 Supply Year.
>
> A new contract covering the 1979–80 Supply Year, setting forth the new volumes allotted to your plant, will be prepared and submitted to you in the near future. The new contract will incorporate the effect of exemptions or special conditions legally imposed by regulatory bodies, if any, which may affet the volumes applicable to your plant.

Holly alleges that, as an agricultural producer, it is entitled to priority 2 treatment under the U.S. Department of Agriculture's Interim Rule issued pursuant to Section 401 of the NGPA, but that, in reaching a contrary conclusion on April 2, 1979, that its present contract represents a "cap," MDU reasoned as follows:

> Section 281.107(c)(1) provides that MDU's supply obligation is:
>
> "* * * the *lesser* of:
>
> "(i) the volume certified by the Secretary of Agriculture as essential agricultural volumetric requirements and calculated under 7 C.F.R. § 2900.4";
>
> "(ii) the volume which may be delivered by the interstate pipeline to the direct sale customer without causing the interstate pipeline to exceed any volumetric limitations set out in the contract between the interstate pipeline and such direct sale customer (without regard to any contract provision which would otherwise restrict delivery because of supply or capacity shortage of the interstate pipeline)."
>
> Again, it is clear that the volumetric requirements calculated under Agriculture's rule exceed the volumetric limitations under the present contracts (*i.e.*, 40 percent of Base Period Requirements). Hence, under the Commission's rule, the volumetric limitations set forth in the contracts are a "cap" on MDU's supply obligation to essential agricultural use establishments. Accordingly, there is no authority for or requirement under the Commission's rule that "adjustments" exceed such limitation.

Holly contends that the problem with the above reasoning is that Section 281.107(c)(1) refers only to "the contract" (emphasis added). And that *the* contract between it and MDU expires June 30, 1979. Holly maintains that after that, there is no reason for denying it the right to seek priority 2 volumetric entitlement unless Holly has subjected itself to some further contractual limitation by MDU in the meantime, which Holly states it has not and will not do. Holly asserts that without executing such a contract, it may get no gas and that either it must abandon its rights to full entitlement under Section 401 of the NGPA by signing a new restrictive agreement for the coming season with a 20 percent "cap" or it must abandon its rights to service altogether.

Holly protests MDU's action in offering it, as of July 1, 1979, either a contract restricting it to 20 percent of its priority 4 usage or nothing at all, as either (or both) a misconstruction of the Interim Rules or an abandonment of its facilities servicing Holly without requisite approval of the Commission as mandated by Section 7(b) of the Natural Gas Act.

Holly prays that the Commission issue a declaratory order clarifying the following issues:

(1) regarding the aforementioned reference to "the contact," in the Interim Rule, whether such reference refers to unsigned future as well as currently effective contracts between supplier and customer or to currently effective curtailment plans regardless of the existence of individual contracts between supplier and customer;

(2) whether MDU's Plan, aforementioned, is a currently effective curtailment plan;

(3) whether MDU's Plan aforementioned, represents "the contract" referred to in the Interim Rule;

(4) whether MDU's action in offering Holly only a contract as of July 1, 1979 containing volumetric limitations in accordance with the Plan represents an abandonment under Section 7(b) of the Natural Gas Act; and

(5) whether MDU is authorized by Section 401 of the NGPA and the Interim Rule to offer Holly a new contract allowing it only 20 percent of its base period entitlement or whether MDU should offer Holly a contract containing the full volumetric limits to which it would have been entitled had the Plan not been instituted.

Based on the Commission's clarification of the foregoing, Holly prays that the Commission issue its order to MDU, requiring MDU to offer

Holly, as of July 1, 1979, contracts at both its Worland and Sidney plants with volumetric limits of natural gas no less than its full base year entitlement.

Any person desiring to be heard or to make any protest with reference to said petition should on or before June 15, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 79-17748 Filed 6-7-79; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. GP79-21]

Montana-Dakota Utilities Co.; Petition for Declaratory Order

June 4, 1979.

Take notice that on May 16, 1979, The Great Western Sugar Company (Great Western), 1530 16th Street, Denver, Colorado 80217, filed in Docket No. GP79-21 a petition pursuant to Section 1.7(c) of the Commission's Rules of Practice and Procedure (18 CFR 1.7(c)) for a declaratory order with regard to the interpretation by Montana-Dakota Utilities Co. (MDU) of Section 281.107(c)(1)(ii) of the Commission's Interim Curtailment Rule issued pursuant to the Natural Gas Policy Act of 1978 (NGPA) and stating that a pipeline's supply obligation to a direct essential agricultural user under Section 281.107(c)(1)(ii) is determined by the full contractural volumes without regard to any limitation thereon resulting from curtailment, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Great Western owns and operates two factories, one located in Billings, Montana, and the other in Lovell, Wyoming, which use natural gas furnished by MDU in connection with the processing of sugar beets into refined sugar and dried beet pulp for use as a livestock feed. As such, Great Western asserts, it qualifies as an essential agricultural user of natural gas under the regulations issued by the Secretary of Agriculture pursuant to the authority delegated under Section 401 of the NGPA.

Great Western states that MDU has filed tariff sheets as part of its FERC Gas Tariff to provide on an interim basis a plan for the delivery of natural gas for essential agricultural and high priority uses in accordance with Section 401 of the NGPA and that Section 281.107(c)(1) as incorporated into MDU's tariff provides as follows:

"(c) *Essential agricultural supply obligation.*

"(1) *Direct essential agricultural supply obligation.*

"The direct essential agricultural supply obligation of an interstate pipeline for a particular curtailment period with respect to an essential agricultural user which is a direct sale customer of the interstate pipeline is the lesser of:

"(i) The volume certified by the Secretary of Agriculture as essential agricultural volumetric requirements and calculated under 7 CFR § 2900.4; or

"(ii) The volume which may be delivered by the interstate pipeline to the direct sale customer without causing the interstate pipeline to exceed any volumetric limitations set out in the contract between the interstate pipeline and such direct sale customer (without regard to any contract provisions which would otherwise restrict delivery because of supply or capacity shortage of the interstate pipeline)."

Great Western asserts that in comments on the impact of NGPA submitted in Docket No. RP76-91, MDU noted that one of the Commission criteria for determining the volumetric entitlement of large direct essential agricultural users was the volumes certified by the Secretary of Agriculture and that MDU observed that under the Secretary's rule:

"* * * the volumetric requirements certified are the *higher* of (1) the highest volume of gas actually used during the most recent three years (corrected to include amounts of process (fn. omitted) and feedstock gas not used because of curtailment or plant shutdown) or (2) the maximum volume the customer would be entitled to purchase under MDU's curtailment plan *in effect on February 28, 1979.* Because of the large volume * * * customers had, during the past three years, contracts representing various reduced levels of service (*i.e.*, below full 'Base Period Requirements' as set forth in the Tariff), it is apparent that the actual volumes of gas used (corrected for feedstock and process gas not used because of curtailment) will produce the higher calculation of requirements under Agriculture's rule, *i.e.*, the requirements calculated under (1) will exceed the volulmetric limitations specified in the contracts in effect February 28, 1979." (Emphasis in original) (App., p. 5)

Great Western then indicates that further quoting the provision of Section 281.107(c)(1)(ii) set out *supra*, p. 2, MDU then went on to state (App., p. 6):

* * * it is clear that the volumetric requirements calculated under Agriculture's rule exceed the volumetric limitations under the present contracts (*i.e.*, 40 percent of Base Period Requirements). Hence, under the Commission's rule, the volumetric limitations set forth in the contracts are a 'cap' on MDU's supply obligation to essential agricultural use establishments. Accordingly, there is no authority for or requirement under the Commission's rule that 'adjustments' exceed such limitation.

Since the volumetric limitations under the present contracts serve as a cap through June 30, 1979, MDU believes it is in harmony with the intent of the Commission's interim rule to maintain the same 'cap' for the remaining four months during which the Interim Curtailment Rule is to be in effect—*i.e.*, July 1, 1979 through October 31, 1979.

Consequently, new contracts embracing the period July 1, 1979 through October 31, 1979 will establish volumetric limitations at the present level, which is 40 percent of requirements, that is during that four-month period the contract volume will be 4/12s of 40 percent of Base Period Regulations.[1]

Great Western submits that MDU's interpretation of Section 281.107(c)(1)(ii) as imposing a "cap" limiting its obligations to essential agricultural users to 40 percent of base period requirements grossly misconstrues the force and thrust of that provision. Great Western further submits that there is no basis for MDU's position that the volumetric limitations of 40 percent of base period requirements contained in its present contracts would continue in effect for the four months remaining after June 1979 that the Commission's Interim Rule is to be effective; to the contrary, Great Western alleges, the present contracts expire June 30, 1979, and new contracts are required for the post-June 30 period. Similarly unjustified, Great Western contends, is MDU's asserted belief that maintenance of the same "cap" for the post-June 30 period would be "in harmony with the intent of the Interim Rule," since there is nothing in the Interim Rule suggesting a Commission purpose that the same volumetric limitation levels be maintained from period to period within the time frame covered by the Rule. In any case, Great Western contends, assuming *arguendo* that, as MDU urges, the Commission intends the post-June 30 period to be treated the same as the prior period, MDU's conclusion that the

[1] The 40 percent calculation applies only to the Base Period Requirements in the category being curtailed, namely, Priority 4.

40 percent base period requirement operates as a volumetric limitation upon its obligations to direct essential agricultural users such as Great Western is belied by the parenthetical phrase in Section 281.107(c)(1)(ii) "without regard to any other provision which would otherwise restrict delivery because of supply or capacity shortage of the interstate pipeline."

Great Western states that in line with certain curtailment provisions in MDU's tariff, the contracts which MDU's customers enter into with MDU annually expressly provide the level of curtailment which MDU determines for the oncoming year beginning July 1, and, thus, MDU's annual contracts with Great Western not only make clear that they were being entered into in a curtailment context, but the total volumes specifically provided were patently a predetermined percentage of Great Western's agreed-upon base period requirements. Great Western submits that since the 40 percent of base period requirements provided in MDU's contracts with its category 4 customers is an integral part of MDU's curtailment plan purported based on the gas supply shortage on the MDU system, it is clear that under the parenthetical phrase in Section 281.107(c)(1)(ii) the 40 percent limitation is to be disregarded in determining volumetric limitations for the purpose of that Section.

Accordingly, Great Western petitions the Commission to issue an order declaring that a pipeline supply obligation to a direct essential agricultural user under Section 281.107(c)(1)(ii) is determined by the full contractual volumes without regard to any limitation resulting from curtailment.

Any person desiring to be heard or to make any protest with reference to said petition should on or before June 15, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules or Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

Thermodynamics Conference

Notice is hereby given that a conference to discuss the current state-of-the-art and technology and to delineate logical steps in the construciton of a program of thermodynamic research useful in fulfilling the mission of Fossil Fuel Extraction Division will be held June 14–15, 1979, at the Hilton Hotel, Tulsa, Oklahoma. The conference will be open to the public and begin at 8:00 a.m.

The Chairman is Dr. Herman L. Finke, Department of Energy, Fossil Energy, Fossil Fuel Extraction Division, Washington, D.C. The Chairman is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business.

Seating will be made available on a first-come, first-served basis.

Copies of the proceedings of the conference will be made available following their certification by the Chairman and Program Director/Fossil Energy at the Department of Energy's Freedom of Information Reading Room, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, upon payment of appropriate charges.

Issued in Washington, D.C. on June 5, 1979.

Donald M. Kerr,
Acting Assistant Secretary for Energy Technology.

[FR Doc. 79-17852 Filed 6-7-79; 8:45 am]
BILLING CODE 6450-01-M

Environmental Advisory Committee; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770), notice is hereby given that the Ad Hoc Subcommittee of the Environmental Advisory Committee will meet Monday, June 25, 1979, at 9:00 a.m., Room 4222C, Department of Energy, 20 Massachusetts Avenue NW., Washington, D.C. If Subcommittee business is not concluded by the afternoon of June 25, the meeting will continue on June 26, 1979, at 9:00 a.m., Room 4234, 20 Massachusetts Avenue NW., Washington, D.C.

The purpose of the Environmental Advisory Committee is to advise the Department of Energy on the overall activities which pertain to the goals of restoring, protecting and enhancing environmental quality and assuring public health and safety.

The subcommittee will address the use and significance of demand projections in the formulation of national energy policy.

The meeting is open to the public. The Chairwoman of the Subcommittee is empowered to conduct the meeting in a fashion that will, in her judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to the meeting should inform the Advisory Committee Management Office, (202) 252-5187, at least 5 days prior to the meeting and reasonable provision will be made to include their presentation on the agenda.

Transcripts of the meeting will be available for public review and copying at the Freedom of Information Public Reading Room, Room GA-152, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. In addition, any person may purchase a copy of the transcript from the reporter.

Issued at Washington, D.C., on June 4, 1979.

Georgia Hildreth,
Director, Advisory Committee Management.

[FR Doc. 79-17818 Filed 6-7-79; 8:45 am]
BILLING CODE 6450-01-M

Southeastern Power Administration

Intent to Revise Rates and Charges

AGENCY: Southeastern Power Administration (SEPA), Department of Energy.

ACTION: Proposed rate revision.

SUMMARY: SEPA proposes to revise its rate schedule applicable to the sale of energy from the Jim Woodruff Project to the Florida Power Corporation, continuing in effect the present rate schedule applicable to the sale of capacity and energy to preference customers. A decrease in revenue of approximately 13 percent is proposed for the period beginning with approval and ending August 10, 1982. It is the purpose of this Notice to (1) invite interested persons to submit written comments, and to (2) advise that a public comment forum will be held to permit interested persons the

opportunity to present views, data or arguments in oral and/or written form regarding the proposed rates.

DATES: Written comments are due on or before July 2, 1979. The public comment forum will be held in Tallahassee, Florida, on June 26, 1979.

ADDRESSES: Five copies of written comments should be submitted to: Administrator, Southeastern Power Administration, Department of Energy, Samuel Elbert Building, Elberton, Georgia 30635.

The public comment forum will be held beginning at 10:00 a.m., June 26, 1979, in Room 41 at the U.S. Courthouse, 110 East Park Avenue, Tallahassee, Florida 32301.

FOR FURTHER INFORMATION CONTACT: Curtis H. Bell, Southeastern Power Administration, Department of Energy, Samuel Elbert Building, Elberton, Georgia 30635, 404–283–3261.

SUPPLEMENTARY INFORMATION: Revision in the rate to Florida Power Corporation is appropriate for reasons of equity and the reduced revenue level is appropriate in order that payout may be accomplished throughout the entire 50-year repayment period. Proposed monthly rates applicable to customers purchasing power from the Jim Woodruff Project are as follows:

Preference Customers

Capacity/kw	$1.50
Energy/kwh (mils)	4.50

Florida Power Corporation

Energy: a rate equal to 60 percent of the calculated saving in the cost of fuel per kwh to the Company determined as follows:

Energy Rate = 60% × Fm/Sm (Computed to the nearest $0.00001 (1/100 mil) per kwh)

Where: Fm = Company fuel cost in the current period as defined in Federal Power Commission Order 517 issued November 13, 1974, Docket No. R–479.

Sm = Company sales in the current period reflecting only losses associated with wholesale sales for resale. Sale shall be equated to the sum of (a) generation, (b) purchases, (c) interchange-in, less (d) intersystem sales, less estimated wholesale losses (based on average transmission loss percentage for preceding calendar year).

Method of Application: The energy rate applied during the current billing month will be based on costs and equated sales for the second month preceding the billing month.

Copies of proposed rate schedules are available upon request and studies and other information used in developing the proposed rates are available for inspection and/or copying at the headquarters' offices of Southeastern Power Administration.

Additionally, a finding has been made based upon an Environmental Review that the proposed revised rates will not have a significant effect upon the quality of the human environment. The Environmental Review is likewise available for inspection and/or copying at SEPA headquarters.

The public comment forum will not be adjudicative in nature. A SEPA designated official will preside, SEPA representatives will give background information and explanations supporting the proposed revised rates and charges and answer questions relevant thereto, and those making oral presentations may be questioned by the presiding official and other participating SEPA representatives. Any further procedural rules needed for the proper conduct of the forum will be announced prior to the forum by the presiding official. Forum proceedings will be transcribed. Copies of the transcript may be purchased from the reporter. Written comments, written answers to questions, and any other documents submitted to SEPA and not included in the forum transcript will be available for inspection and/or copying at the SEPA headquarters' offices in Elberton, Ga., between the hours of 8 a.m. and 5 p.m., Monday through Friday. The forum transcript will likewise be available for inspection at the SEPA headquarters' offices. Issued in Elberton, Ga., May 23, 1979.

Kenelm E. Rucker,

Acting Administrator.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL 1243–7]

Availability of Environmental Impact Statements

AGENCY: Office of Environmental Review, Environmental Protection Agency.

PURPOSE: This Notice lists the Environmental Impact Statements which have been officially filed with the EPA and distributed to Federal Agencies and interested groups, organizations and individuals for review pursuant to the Council on Environmental Quality's Regulations (40 CFR Part 1506.9).

PERIOD COVERED: This Notice includes EIS's filed during the week of May 28 to June 1, 1979.

REVIEW PERIODS: The 45-day review period for draft EIS's listed in this Notice is calculated from June 8, 1979 and will end on July 23, 1979. The 30-day wait period for final EIS's will be computed from the date of receipt by EPA and commenting parties.

EIS AVAILABILITY: To obtain a copy of an EIS listed in this Notice you should contact the Federal agency which prepared the EIS. This Notice will give a contact person for each Federal agency which has filed an EIS during the period covered by the Notice. If a Federal agency does not have the EIS available upon request you may contact the Office of Environmental Review, EPA for further information.

BACK COPIES OF EIS'S: Copies of EIS's previously filed with EPA or CEQ which are no longer available from the originating agency are available from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

FOR FURTHER INFORMATION CONTACT: Kathi Weaver Wilson, Office of Environmental Review A–104, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202) 755–0780.

SUMMARY OF NOTICE: Appendix I sets forth a list of EIS's filed with EPA during the week of May 28 to June 1, 1979 the Federal agency filing the EIS, the name, address, and telephone number of the Federal agency contact for copies of the EIS, the filing status of the EIS, the actual date the EIS was filed with EPA, the title of the EIS, the State(s) and County(ies) of the proposed action and a brief summary of the proposed Federal action and the Federal agency EIS number if available. Commenting entities on draft EIS's are listed for final EIS's.

Appendix II sets forth the EIS's which agencies have granted an extended review period or a waiver from the prescribed review period. The Appendix II includes the Federal agency responsible for the EIS, the name, address, and telephone number of the Federal agency contact, the title, State(s) and County(ies) of the EIS, the date EPA announced availability of the EIS in the Federal Register and the extended date for comments.

Appendix III sets forth a list of EIS's which have been withdrawn by a Federal agency.

Appendix IV sets forth a list of EIS retractions concerning previous Notices of Availability which have been made because of procedural noncompliance with NEPA or the CEQ regulations by the originating Federal agencies.

Appendix V sets forth a list of reports or additional supplemental information on previously filed EIS's which have

been made available to EPA by Federal agencies.

Appendix VI sets forth official corrections which have been called to EPA's attention.

Dated: June 5, 1979.

William N. Hedeman, Jr.,

Director, Office of Environmental Review.

APPENDIX I

EIS's Filed With EPA During the Week of May 28 to June 1, 1979

DEPARTMENT OF AGRICULTURE

Forest Service

Draft

Elk Wild and Scenic River Study, Routt County, Colo., May 30: Proposed is the inclusion of 35 miles of the Elk River and 7,400 acres of adjacent land of the Routt National Forest in Routt County, Colorado, in the National Wild and Scenic Rivers System, of the area recommended for inclusion 17 miles of river and 3,800 acres will be classified as wild; 12 miles of river and 2,700 acres will be classified as scenic; and 6 miles of river and 900 acres will be classified as recreational. (DES–80–11–79–03–LEG) (EIS Order No. 80541.)

Final

Mammoth-Mono Planning Unit, Inyo NF, Mono, Madera, Fresno Counties, Calif., May 29: The proposed action involves the selection of a management plan for the Mammoth-Mono Planning Unit (MMPU) of the Inyo National Forest. The plan will replace or continue the multiple use management plan, which will be in effect until the unit plan is selected. The proposed action does not involve the planning of private lands. The project purpose is to resolve management problems and to respond to physical biological, social, and economic changes that have occurred since the multiple use management plan was approved in 1970. The entire MMPU is within the counties of Mono, Madera and Fresno, California. (USDA–FS–R5–FES(ADM)–05–04–78–07) Comments made by: EPA, DOI, COE, DOT, DOE, HEW, AHP, DLAB, State and local agencies, individuals and businesses. (EIS Order No. 80534.)

U.S. ARMY CORPS OF ENGINEERS

Contact: Mr. Richard Makinen, Office of Environmental Policy, Attn: DAEN–CWR–P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 20 Massachusetts Avenue NW., Washington, D.C. 20314, (202) 272–0121.

Final

Texas City and Vicinity Hurricane Flood Protection, Galveston County, Tex., May 29: The proposed action is the completion of the authorized Texas City and Vicinity Hurricane-Flood Protection Project, Galveston County, Texas. Completion of the system involves incorporating 4.8 miles of reservoir and canal containment levees into the project at the northwest terminus and incorporating, by enlargement and extension, a locally constructed levee at the southwest terminus of the project. (Galveston District) Comments made by: EPA, DOI, DOC, AHP, USDA, HUD, DOE, DOT, State and local agencies. (EIS Order No. 80532.)

Jarvis Creek Navigation Improvements, Northumberland County, Va., May 31: Proposed is the improvement of navigation at Jarvis Creek by dredging a channel about 2,000 feet long with a bottom width of 80 feet and total depth of 10 feet. Approximately 57,000 cubic yards of highly organic marine silts and clay will be removed by hydraulic pipeline dredge and disposed of in a 10-acre confined upland site. The alternatives considered include: maintenance of emergency channel; reduced dimensions; relocation of processing facilities and vessels; truck hauling of seafood; and a deepwater pier with rehandling to existing processing facilities. This project is locatd in Northumberland County, Virginia. (Norfolk District) Comments made by: DOC, EPA, DOI, USDA, HUD, State Agencies. (EIS Order No. 80540.)

Draft Supplement

Shidler Lake, Salt Creek, Section 404, (DS–1), Osage County, Tex., May 31: This statement supplements final EIS, No. 51080, filed 11–13–75 concerning the construction of Shidler Dam, a multipurpose project on Salt Creek, Osage County, Oklahoma. This supplement is an evaluation of the effects of discharge of dredged or fill material into the waters of Salt Creek during the construction of an earthern dam and the relocation of a section of a county road. (Tulsa District) (EIS Order No. 80542.)

DEPARTMENT OF COMMERCE

Contact: Dr. Sidney R. Galler, Deputy Assistant Secretary, Environmental Affairs, Department of Commerce, Washington, D.C. 20230, (202) 377–4335.

Economic Development Administration

Draft

National Public Works and Economic Development Act, Legislative, May 29: Proposed is the National Public Works and Economic Development Act (NPWEDA) of 1979. It is proposed that the programs of the Public Works and Economic Development Act of 1965, which expires in September 1979, be combined with additional economic development tools which would be exercised by EDA. Assistance under NPWEDA would be targeted at urban and rural areas which have not shared in the National economic growth. The legislation will provide: planning capabilities to enable areas to realize their potentials; essential public services and facilities to supply the infrastructure to support economic development; and financial incentives to attract new private investment. (EIS order No. 80539.)

Nat'l Oceanic and Atmospheric Admin.

Final

Alaska Coastal Zone Management Program (CZM), Alaska, May 30: proposed is a coastal zone management plan for the State of Alaska. The program will develop new coastal policies, rules, responsibilities, obligations and relationships with an established approach of shared local and State coastal management responsibility. Some features of the program include: 1) protection of coastal lands and water habitats; 2) a common basis for coastal decisions; 3) definition of division of responsibility; 4) specific management for areas of extraordinary coastal values; and 5) overall attention for energy, timber, mining, and commerce resources. Comments made by: DOI, COE, USN, EPA, HUD, AHP, DOT, NRC, FERC, State and local agencies, groups and individuals. (EIS order No. 80543.)

DEPARTMENT OF DEFENSE, AIR FORCE

Contact: Dr. Carlos Stern, Deputy for Environment and Safety, Department of the Air Force, Room 4C885, Pentagon, Washington, D.C. 20330, (202) 697–9227.

Draft

Bold Eagle 80, Joint Readiness Exercise, Santa Rosa, Okaloosa, Walton Counties, Fla., May 31: Proposed is the fifth annual large scale JCS coordinated joint readiness exercise, Bold Eagle 80, at Eglin AFB located in Santa Rosa, Okaloosa, and Walton Counties, Florida. Exercise elements will include approximately 20,000 troops, 200 aircraft (and helicopter), 3000 self-propelled wheeled vehicles and 195 tracked vehicles. The action is designed to exercise selected organizations in large unit deployment and in the procedures and tactics to be used as part of a joint force. A portion of the Blackwater River State Forest is also proposed for uncoventional warfare activities. (EIS order No. 80549.)

Final

Pave Paws Radar System Operation, Otis AFB, Barnstable County, Mass., May 31: Proposed is the operation of the Pave Paws Radar System located at Otis Air Force Base, Barnstable County, Massachusetts. Pave Paws is a new surveillance and tracking radar and its primary purpose is to detect, track and provide early warning of sea-launched ballistic missiles. Also, Pave Paws will be used to assist the USAF Space Track System to track objects orbiting the earth. With Pave Paws in operation, older radar systems located in Maine and North Carolina will be retired. (HQ–AFSC–TR–79–04–Part 1) Comments made by: DOT, DOE, HEW, DOC, DOI, HUD, EPA, State and local agencies, groups, individuals and businesses. (EIS order No. 80545.)

GENERAL SERVICES ADMINISTRATION

Contact: Mr. Carl W. Penland, Acting Director, Environmental Affairs Division, General Services Administration, 18th and F Streets NW., Washington, D.C. 20405, (202) 566–1416.

Final

Customs Services Cargo Inspection Facility, Detroit, Wayne County, Mich., May 29: The proposed action is to acquire and convert an existing truck terminal warehouse facility into a United States customs service cargo inspection facility at the Ambassador Bridge border station, Detroit, Wayne County, Michigan. The facility will provide space for approximately 20 customs service employees on a site to be acquired. The facility will include approximately 5,350 square feet of office space, a truck dock inspection warehouse of approximately 14,100 square feet and parking for a minimum of 40 trucks and a minimum of 24 other vehicles. The site area will be approximately 172,000 square feet. (EMI78002) Comments made by: FERC, USDA, COE, DOI, TREA, EPA, State and local agencies, businesses. (EIS order No. 90537.)

Fish and Wildlife Service

Final

Canaan Valley National Wildlife Refuge, Tucker County, W. Va., May 30: The U.S. Fish and Wildlife Service proposed to acquire approximately 28,000 acres of mixed wetlands, upland and farmland habitat for the purpose of preserving and maintaining a unique natural ecosystem in Tucker County, West Virginia. The area, generally known as the Canaan Valley, would become a unit of the National Wildlife Refuge System to be acquired under the existing authority of the Fish and Wildlife Act of 1956. (FES–79–22) Comments made by: FERC, DOT, DOI, EPA, State agencies, groups. (EIS order No. 90544.)

Bureau of Land Management

Draft

Jackson and Klamath Units, Timber Management Plan, Jackson, Josephine, Klamath, Oreg., May 30: Proposed is a ten-year timber management plan for the 488,258 acres of public land in the Jackson and Klamath sustained yield units of the Medford district in the counties of Jackson, Josephine and Klamath, Oregon. The proposed annual timber harvest is 20.55 million cubic feet. Treatments specified by the proposal include road construction harvest by two-stage shelterwood, clearcut, and single tree selection methods; slash disposal; site preparation; planting of trees; herbicide application; precommercial thinning; fertilization; and commercial thinning. (DES–79–29). (EIS order No. 90540.)

Draft

New Engalnd Power Units 1 & 2, Construction Permit, Washington County, Rhode Island, May 31: Proposed is the issuance of a construction permit for the New England Power Units 1 and 2 located near Block Island Sound in Charleston, Washington County, Rhode Island. The units will employ two pressurized-water reactors rated at 3411 MWT per unit. Each steam turbine generator will have a rating of 1164 MWE of electric power capacity. The net electrical output is about 1150 MWE per unit. The exhaust steam will be cooled by once-through flow of water obtained from and discharged to Block Island Sound. (NUREG–0529). (EIS order No. 90547.)

Final Supplement

Pilgrim Nuclear Station, Unit 2, Alternative Sites, Plymouth County, Mass., May 29: This statment supplements a final EIS (No. 41534), filed 10–7–74. The purpose of this supplement is to comply with the Atomic Safety and Licensing Appeal Board which concluded that the analysis of alternative sites for the generating station was inadequate under NEPA. The proposed action is the issuance of a construction permit to Boston Edison Company for the construction of Pilgrim Nuclear Power Station, Unit 2, located in Plymouth County, Massachusetts. (NUREG–0549) Comments made by: USDA, HEW, DOC, EPA, FERC, DOI, State agencies. (EIS order No. 90536.)

Final d

Water and Land Resource Plan, Ohio River Basin, several counties, May 29; Proposed is a regional water and land resource plan for the Ohio River Basin in the States of Illinois, North Carolina, Indiana, Kentucky, New York, Maryland, Ohio, Pennsylvania, Tennessee, Virginia, and West Virginia. The plan consists of: 1) 1,233, PL–566 and RC&D projects; 2) 3 navigation projects; 3) 7 reservoir projects; 4) 45 local flood protection projects; 5) 793 municipal water quality control measures; 6) 107 recreation areas; 7) 9 State wild and scenic rivers; 8) 101 natural areas; 9) 69 fish and wildlife areas; 10)2 hydroelectric power projects, 11) nine state wild and scenic rivers, and 12) 102 natural areas. Comments made by: USDA, USA, DOC, EPA, HEW, HUD, DOI, DOT, State and local agencies. (EIS order No. 90535.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street SW., Washington, D.C. 20590, (202) 426–4357.

Federal Highway Administration

Draft

Alton Beltline Extension, IL–140 to Broadway Blvd., Madison County, Ill., May 30: Proposed is the construction, on a new alignment, of the Alton Beltline Extension (FAP Route 788 S) located in Madison County, Illinois, the project will extend for two miles from the Alton Beltline Highway's present terminus at College Avenue (IL–140) in northeast Alton to Broadway in southeast Alton, near the city's common corporate boundary with east Alton. Project features include the reconstruction of the "Thousand Island" intersection, replacement of the present two-lane Milton Road bridge over Wood River Creek, and relocation of Milton Road over come-in place. (FHWA–IL–EIS–79–02–D) (EIS order No. 90542.)

Final

FAP 412, I–80 to U.S. 51, Illinois River Crossing, LaSalle, McLean Counties, Ill., May 31: Proposed is the construction of a portion of FAP Route 412, between I–55 near Normal, McLean County to I–80, LaSalle County, Illinois. The total length of the project is approximately 30 miles and includes a major river crossing at the Illinois River. All proposed construction is on a new alignment. This statement finalizes a portion of the project proposed in the draft EIS, No. 40635, filed 4–22–74, titled F.A. 412, LaSalle and Lee Counties. A separate final EIS will be issued pending further analysis of the effect on farm lands. (FHWA–IL–EIS–76–02–F) Comments made by: AHP, USDA, DOC, COE, HEW, DOI, EPA, DOT, State and local agencies, individuals. (EIS order No. 90551.)

Final

IL–143 (FAP Route 50), Relocation/Reconstruction, Madison County, Ill., May 29: Proposed is the relocation of IL–143 within the urban area of Wood River, and the reconstruction of IL–143 in rural areas between Wood River and Edwardsville in Madison County, Illinois, from the intersection of IL–3 and FAP 155, a distance of approximately six miles. The two basic alternatives considered in the study were: 1) no build and 2) construction of a four–lane highway within the approved corridor. (FHWA–ILL–EIS–77–03–F) Comments made by: DOI, DOT, EPA, USDA, State agencies. (EIS order No. 90533.)

Urban Mass Transportation Administration

Draft

Transit System Improvements, Los Angeles, Los Angeles County, Calif., June 1: Proposed are improvements to the Los Angeles regional core transit system in Los Angeles County, California. In addition to no build, improvements which are considered fall into two categories of five alternatives each. The first category, rapid rail, consists of alternatives for a line-haul rail rapid transit facility supplemented by a network of feeder buses. The second category, all bus, consisting of line haul and feeder buses, has alternatives ranging from an exclusive grade separated aerial to simple incremental improvements. (EIS order No. 90553.)

North Shore Transit Improvements, Boston, Suffolk County, Mass., May 29: Proposed is the North Shore Transit Improvement Project in the city of Boston, Suffolk County, Massachusetts. Six alternatives are considered. The first alternative concerns no action other than certain improvements already planned, and includes the sub-alternative of upgrading of the local bus system. The remaining alternatives are: 1)

Upgrading of the Wonderland to Lynn Center, 2) extension of the Blue Line from Wonderland to Lynn Center, 3) upgrade the Commuter Rail System, and 4) upgrade the Line-Haul Bus. (UMTA-MA-29-0001) (EIS order No. 90538.)

[FRL 1242-7; PP 8G2066/T207]

Pesticide Programs; Extension of a Temporary Tolerance for Ethephon

The Environmental Protection Agency (EPA) in response to a pesticide petition (PP 8G2066) submitted to the Agency by Union Carbide Agricultural Products Co., Inc., Brookside Ave., Ambler, PA 19002, established a temporary tolerance for residues of the plant regulator ethephon ((2-chloroethyl)phosponic acid) in or on the raw agricultural commodity cottonseed at 0.5 part per million (ppm). This temporary tolerance is scheduled to expire July 14, 1979.

Union Carbide Agricultural Products Co., Inc., requested a one-year extension of this temporary tolerance both to permit continued testing to obtain additional data and to permit the marketing of the above raw agricultural commodity when treated in accordance with the provisions of an experimental use permit (264-EUP-55) that has been extended under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and all other relevant material were evaluated, and it was determined that an extension of the temporary tolerance would protect the public health. Therefore, the temporary tolerance has been extended on condition that the pesticide is used in accordance with the experimental use permit with the following provisions.

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. Union Carbide Agricultural Products Co., Inc., must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary tolerance expires June 15, 1980. Residues not in excess of 0.5 ppm remaining in or on cottonseed after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerance. This temporary tolerance may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Mr. Robert Taylor, Product Manager 25, Registration Division (TS-767), Office of Pesticide Programs, 401 M St., SW, Washington, DC 20460 (202/755-7013).

(Section 408(j) of the Federal Food, and Cosmetic Act [21 U.S.C. 346a(j)])

Dated: May 29, 1979.

Douglas D. Campt,

Director, Registration Division.

BILLING CODE 6560-01-M

[FRL 1242-6; OPP-180296]

Idaho and Washington State Departments of Agriculture; Issuance of Specific Exemptions To Use Dinoseb To Control Broadleaf Weeds in Lentils

AGENCY: Environmental Protection Agency (EPA), Office of Pesticide Programs.

ACTION: Issuance of specific exemptions.

SUMMARY: EPA has granted specific exemptions to the Idaho and Washington State Departments of Agriculture to use dinoseb for the control of various broadleaf weeds on 40,000 acres of lentils in the northern counties of Idaho and 70,000 acres of lentils in Spokane and Whitman Counties, Washington. The specific exemptions expire on June 15, 1979.

FOR FURTHER INFORMATION CONTACT: Emergency Response Section,

Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, S.W., Room: E-124, Washington, D.C. 20460, Telephone: 202/426-2601. It is suggested that interested persons telephone before visiting EPA Headquarters so that the appropriate files may be made conveniently available for review purposes.

SUPPLEMENTARY INFORMATION: According to Idaho and Washington, the broadleaf weeds, mustard, lambsquarter, borage, and nightshade are the major problems threatening lentil production. Lack of weed control in lentils not only reduces yield, but also increases weed problems in succeeding rotational crops. Idaho and Washington state that herbicide treatment must be made within a few days after planting and before crop emergence.

There are currently no EPA-registered herbicides for pre-emergence control of broadleaf weeds in lentils. Dinoseb (2-sec-butyl-4-6-dinitrophenol), alkanolamine salts of the ethanol series, is currently registered as a pre-emergence treatment for control of broadleaf weeds in peas, potatoes, strawberries, and other crops at rates of up to nine pounds active ingredient (a.i.) per acre. Idaho and Washington proposed to use one application of a product called Premerge 3 (EPA Reg. No. 464-490) at the rate of three pounds a.i. per acre in at least twenty gallons of water. This application will be made to 40,000 acres of lentils in the northern counties of Idaho and 70,000 acres in Whitman and Spokane Counties, Washington, by State-licensed commercial applicators or qualified growers.

The tolerance petition to establish residue levels for the use of dinoseb on lentils has not been granted pending resolution of the nitrosamine question. However, EPA has estimated that the maximum concentration for the nitrosamine impurity DENA available for public exposure from the proposed use is 0.028 part per billion based on the proposed tolerance of 0.1 part per million (ppm) and assuming that the impurity is absorbed and stored in the same ratio as dinoseb. This maximum quantity is an unmeasurable quantity which would not pose a quantifiable risk to human health. The maximum concentration for the nitrosamine impurity DENA available for applicator hazard is estimated to be an acceptable risk situation provided the applicators wear protective clothing.

No unreasonable adverse risk to the environment is expected to result from this use of dinoseb.

Idaho and Washington estimated that a potential loss in yield of twenty-five percent is expected if the weeds are not controlled; this amounts to a loss in yield of 350 pounds per acre. The dollar loss could be as high as $5,600,000 in Idaho and $9,800,000 in Washington, according to the two States.

After reviewing the application and other available information, EPA has determined that (a) pest outbreaks of various broadleaf weeds have occurred or are about to occur; (b) there is no pesticide presently registered and available for pre-emergence use to control these weeds in lentils in Idaho and Washington State; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the weeds are not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, Idaho and Washington have been granted specific exemptions to use the pesticide noted above until June 15, 1979 to the extent and in the manner set forth in the applications. The specific exemptions are also subject to the following conditions:

1. The product Premerge 3 Dinitro Amine Herbicide [dinoseb (2-sec-butyl-4,6-dinitrophenol) as the alkanol salts (of the ethanol series)], EPA Reg. No. 464-490, manufactured by Dow Chemical, is authorized;

2. Application shall be made by ground at a rate of one gallon Premerge 3 in at least twenty gallons of water per acre (three pounds a.i./acre);

3. A maximum of 40,000 acres of lentil crop in Idaho and 70,000 acres in Washington in the areas named above may be treated;

4. A maximum of 40,000 gallons Premerge 3 (120,000 lbs. a.i. dinoseb) may be applied in Idaho. In Washington, a maximum of 70,000 gallons Premerge 3 (210,000 lbs. a.i. dinoseb) may be applied;

5. One application of Premerge 3 shall be made after planting but before emergence of the lentils;

6. Application shall be made by State-licensed commercial applicators or State-certified growers. In Idaho, University of Idaho personnel, and in Washington, Washington State University Extension Service personnel shall make all recommendations of pesticide applications and apprise applicaters and growers of dosages and other program criteria;

7. A residue level of dinoseb not exceeding 0.1 ppm in or on lentils, lentil hay, or lentil forage has been evaluated as adequate to protect the public health;

8. Idaho and Washington are not to graze or feed treated crops to livestock unless at least 8 weeks have elapsed from the time of pesticide application;

9. All label precautions shall be followed;

10. The EPA shall be informed immediately of any adverse effects to man or the environment resulting from this program;

11. Idaho and Washington shall each be responsible for insuring that all provisions of its specific exemption are followed;

12. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action; and

13. Final reports summarizing the results of these programs shall be submitted to EPA by December 31, 1979.

(Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).)

Dated: June 4, 1979.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

[FRL 1243-2]

Pesticides and Toxic Substances Enforcement

On September 30, 1978, the President signed into law S. 1678, the Federal Pesticide Act of 1978 (Pub. L. 95-396, 92 Stat. 819; hereafter "FPA"), which amends the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (Pub. L. 92-516, 86 Stat. 973; Pub. L. 94-140, 89 Stat. 751; 7 USC 136 *et seq;* hereafter referred to as "FIFRA"). As a result of the new amendments, certain of the Pesticide Enforcement Policy Statements (PEPS), which established an administrative mechanism to permit certain pesticide uses which otherwise would have been in violation of FIFRA, are no longer necessary. The purpose of this Notice is to announce the rescission of the affected PEPS and to discuss some of the amendments in the FPA that affect pesticide enforcement policy.

(1) Rescission of Pesticide Enforcement Policy Statements (PEPS) Nos. 1, 2, 5, and 7

On May 5, 1975, the Environmental Protection Agency (EPA) published in the Federal Register a document entitled "Institution of Pesticide Enforcement

Policy Statements" (40 *Fed. Reg.* 19528 (1975)). It was the Agency's purpose in instituting this series of Pesticide Enforcement Policy Statements (PEPS) to inform the general public and persons engaged in the formulation, distribution, sale, application or other use of pesticides, of the policies adopted by the Agency in the enforcement of the provisions of the FIFRA. The PEPS were prepared and published by EPA's Office of Enforcement.

Federal regulation of the use of pesticides was established for the first time with the enactment of the 1972 amendments, specifically through the provisions of FIFRA section 3(d)(1), section 4 and section 12(a)(2)(G). Section 12(a)(2)(G) made it unlawful for any person to use a registered pesticide in a manner inconsistent with its labeling. However, as set forth in the legislative history, Congress intended that EPA enforce the prohibition of section 12(a)(2)(G) in a "common sense manner" and left open in many instances exactly what constituted a "use inconsistent with [a pesticide's] labeling."

The FPA broadens the construction of section 12(a)(2)(G) of FIFRA by adding a new subsection 2(ee) which for the first time defines the term "to use any registered pesticide in a manner inconsistent with its labeling." According to the language of the new subsection, it is a violation of section 12(a)(2)(G) to use a registered pesticide "in a manner not permitted by the labeling" with the exception of four specific areas. The areas specifically excluded from enforcement under § 12(a)(2)(G) include: (a) the use of a pesticide at less than label dosage (PEPS 1) [1]; (b) the use of a pesticide for the control of target pests not named on the labeling, if still consistent with site included on the labeling (PEPS 2 and 5); and, (c) the use of any application method not prohibited by labeling (PEPS 7).[2]

Thus, the new section 2(ee) defines by law certain uses which will not be considered inconsistent with labeling that previously were defined by PEPS. The new definition provides exemptions from the strict label language for users/applicators only. Persons who distribute or sell pesticides still may not make oral or written claims for a product which substantially differ from any claims made for the product as a part of the statement required in connection with its registration under section 3 of FIFRA (eg., claims for use not listed on the labeling), or they will be subject to enforcement action under section 12(a)(1)(B).

(2) Actions affecting pesticide users; rescission of PEPS No. 6

The Office of Enforcement issued a policy statement on March 25, 1976 which stated that pesticide applicators who supply and apply registered pesticides in the course of performing pest control services (hereafter "for hire applicators") were considered sellers and distributors of pesticides. Section 2(e)(1) of the FIFRA has been amended so as to generally exclude "for hire applicators" from being considered sellers or distributors of pesticides where they provide the service of controlling pests without delivering any unapplied pesticide to any person so served. "For hire applicators" are no longer considered sellers or distributors (and thus subject to the higher civil penalties in § 14(a)(1)) unless: (a) they hold or apply an unregistered pesticide, or (b) they deliver any unapplied pesticide to the customer. In either of the above situations a "for hire applicator" would be considered a seller or distributor for any violation of FIFRA, and subject to the higher penalties set forth in sections 14(a)(1) and 14(b)(1). Because of the Congressionally mandated change in the status of "for hire applicators," PEPS No. 6, "Use and Labeling of Service Containers for the Transportation or Temporary Storage of Pesticides" is no longer applicable to the activities of the "for hire applicator."

(3) Continuation of Pesticide Enforcement Policy Statements (PEPS) Nos. 3 and 4

Two of the existing PEPS are not affected by the amendments in the FPA and, therefore, are not rescinded by this Notice. They are PEPS No. 3, entitled "Certain Enforcement Policies To Be Followed During the Phased Implementation of FIFRA Section 3" (41 *Fed. Reg.* 13964 (1976)), and PEPS No. 4, entitled "Preventive Pest Control Treatments in the Absence of Target Pests" (41 FR 28005 (1976)).

(4) Commercial Applicators

The FPA also amends the definition of "commercial applicator" in section 2(e)(3) of FIFRA. The new definition provides that the term "commercial applicator" means any applicator (except a private applicator) who uses or supervises the use of a restricted use pesticide, whether or not that applicator is certified. Such persons who violate FIFRA while using *restricted* use pesticides are considered commercial applicators and subject to the higher penalties of section 14(a)(1) and 14(b)(1). On the other hand, any person (excluding those persons subject to the penalty provisions of section 14(a)(1)), as described in section 2 of this Notice) who holds or applies a pesticide registered for *general* use, or a dilution of a pesticide registered for general use and who violates FIFRA, would be subject to the lower penalties as set forth in sections 14(a)(2) and 14(b)(2) of FIFRA.

(5) Definition of "Producer"

The FPA amends the definition of "producer" to add the following:

The dilution by individuals of formulated pesticides for their own use and according to the directions on registered labels shall not of itself result in such individuals being included in the definition of "producer" for the purposes of this Act.

This amendment makes statutory the Agency's long-standing policy of not considering persons who dilute pesticides as producers unless they engage in the sale and/or distribution of the pesticide.

This notice hereby rescinds PEPS Nos. 1, 2, 5, 6, and 7.

Dated: June 4, 1979.

Jeffrey G. Miller,

Acting Assistant Administrator for Enforcement.

[FR Doc. 79-17970 Filed 6-7-79; 8:45 am]
BILLING CODE 6560-01-M

[1] While PEPS No. 1 excluded certain products which could not be used at less than label dosage—viz, rodenticides, termite control products, and sanitizer/disinfectants—the new definition of section 12(a)(2)(G) does not.

[2] It should be noted that while the FPA amends existing Federal law concerning pesticide misuse, it does not affect State laws. Therefore, before proceeding with any pesticide use in accordance with the exceptions now allowed by the new amendments, pesticide users and applicators should make certain that they will not be in violation of State law.

FEDERAL COMMUNICATIONS COMMISSION

Major Matters Report Available

The Federal Communications Commission prepares an annual report on "Major Matters Before the Commission" to help keep the Congress, the public, and members of the FCC staff apprised of pending proceedings which the Commission considers to be of major significance.

The FCC's 1978 report on major matters, sent to the Congress on April 11, 1979, has been reproduced for distribution to members of the public.

The 1978 report was prepared in a more "plain English" format to make the document more useful to Congress and the public. The report provides a discussion portion, a list of relevant references, and the names of staff

contact persons for each of 87 Commission proceedings.

Copies of the report may be picked up from the Commission's Press Distribution Room (Room 207), 1919 M Street, N.W., Washington, D.C. 20554. Copies may also be requested by writing to or telephoning the Commission's Office of Public Affairs, 1919 M Street, N.W., Room 202, telephone (202) 632-7260.

Federal Communications Commission.
William J. Tricarico,
Secretary.

National Industry Advisory Committee, Amateur Radio Services Subcommittee; Meeting

Pursuant to the provisions of Public Law 92-463, announcement is made of a public meeting of the Amateur Radio Services Subcommittee of the National Industry Advisory Committee to be held Monday, June 25, 1979. The Subcommittee will meet at the Federal Communications Commission Annex Building, Room A-110, 1229 20th Street, N.W., Washington, D.C. at 9:00 AM.

Purpose: To consider emergency communications matters.

Agenda: As follows:

Items:

1. Chairman's opening remarks.
2. Consideration of prototype Amateur Radio Service communications plan for assistance to local government during emergencies.
   a. Review.
   b. Recommendation to the Commission.
3. Consideration of the Connecticut Emergency Broadcast System Amateur Radio Service Interface Plan as a prototype for use by other states.
   a. Review.
   b. Recommendation to the Commission.
4. Objectives, organization and structure of the Amateur Radio Services Subcommittee.
5. Old business.
6. New business.
7. Adjournment.

Any member of the general public may attend or file a written statement with the Committee either before or after the meeting. Any member of the public wishing to make an oral statement must consult with the Committee prior to the meeting. Those desiring more specific information about the meeting may telephone the Emergency Communications Division, FCC, (202) 632-7232.

Federal Communications Commission.
William J. Tricarico,
Secretary.

1980 Composite Week Dates for AM and FM Licensees for Program Log Analysis

June 4, 1979.

The following date will constitute the composite week for use in the preparation of: (1) program log analysis submitted with renewal applications for commercial AM and FM station licenses which have expiration dates in calendar year 1980; and (2) assignment of license and transfer of control applications for AM and FM stations which are filed in calendar year 1980.

Sunday July 2, 1978
Monday April 23, 1979
Tuesday September 26, 1978
Wednesday February 7, 1979
Thursday November 9, 1978
Friday January 26, 1979
Saturday March 24, 1979

Commercial television licensees and permittees with license expiraton dates of February 1 and April 1, 1980 will use, in answering Questions 5, 11 and 12 of revised Section IV of FCC Form 303, the composite week dates previously used in preparing the 1978 Annual Programming Report. Stations whose licenses expire on June 1 and thereafter during calendar year 1980 will use a composite week that will be issued in November, 1979. The composite week dates to be used in the preperation of the 1979 Annual Programming Report (FCC Form 303-A), required to be filed February 1, 1980 will also be issued in November, 1979.

Action by the Commission May 29, 1979. Commissioners Ferris (Chairman), Lee, Quello, Washburn, Fogarty, Brown and Jones.

Federal Communications Commission.
William J. Tricarico,
Secretary.

Food and Drug Administration

[79-332]

Consumer Participation; Open Meeting

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces a forthcoming consumer exchange meeting to be chaired by Frederick R. Carlson, District Director, Newark District Office, East Orange, New Jersey.

DATE: The meeting will be held 1:30 p.m., Wednesday, June 27, 1979.

ADDRESS: The meeting will be held at the Food and Drug Administration, 20 Evergreen Place, 2nd Floor, East Orange, NJ 07018.

FOR FURTHER INFORMATION CONTACT: Lillie Dortch-Wright, Consumer Affairs Officer, Food and Drug Administration, 20 Evergreen Place, East Orange, NJ 07018, 201-645-3285 or 201-645-6365.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to encourage dialogue between consumers and FDA officials to identify and set priorities for current and future health concerns, to enhance relationships between local consumers and FDA's Newark District Office, and to contribute to the agency's policymaking decisions on vital issues.

Dated: May 31, 1979.

Office of the Assistant Secretary for Health

University of Arizona; Notice of Intent To Grant Exclusive Patent License

Pursuant to section 6.3, 45 CFR, Part 6, and 41 CFR 101-4, notice is hereby given of an intent to grant to The University of Arizona an exclusive license to manufacture, use, and sell an invention of Thomas C. Cetas, Ph.D., entitled "Birefringent Crystal Thermometer." A copy of U.S. patent application Serial Number 794,142, which was filed on the invention on May 5, 1977, may be obtained upon written request to the Acting Chief, Patent Branch, Department of Health, Education, and Welfare, 5A03 Westwood Building, National Institutes of Health, Bethesda, Maryland 20205.

The proposed license will have a duration of five (5) years, will not be royalty-bearing, and will contain other terms and conditions to be negotiated by the parties in accordance with Department of Health, Education, and Welfare (HEW) patent regulations. HEW will grant the license unless, within sixty (60) days of this Notice, the Acting Chief of the Patent Branch, named hereinabove, receives in writing any of the following, together with supporting documents:

(1) A statement from any person setting forth reasons why it would not be in the best interest of the United States to grant the proposed license; or

(2) An application for a nonexclusive license to manufacture, use, or sell the invention in the United States is submitted in accordance with 41 CFR 101-4-104-2, and the applicant states that he has already brought the invention to practical application or is likely to bring the invention to practical application expeditiously.

The Assistant Secretary for Health of the Department of Health, Education, and Welfare will review all written responses to this Notice.

Authority: 45 CFR 6.3 and 41 CFR 101-4.

Dated: June 1, 1979.

Charles Miller,

Acting Assistant Secretary for Health.

Office of the Secretary

Office of the General Counsel; Delegation of Authority To Certify True Copies

Under the authority delegated by the Secretary to the Assistant Secretary for Management and Budget (43 FR 58670) and redelegated to me by the Assistant Secretary for Management and Budget (44 FR 1473):

1. I hereby redelegate to the following the authority to certify true copies of any books, records, papers or other documents on file within the Department, or extracts from such, to certify that true copies are true copies of the entire file of the Department, to certify the complete original record, or to certify the nonexistence of records on file within the Department, and to cause the Seal of the Department to be affixed to such certifications.

These same officials are authorized to cause the Seal to be affixed to agreements, awards, citations, diplomas, and similar documents.

To whom delegated:

Deputy General Counsel.

Assistant General Counsel, Division of Business and Administrative Law.

Executive Assistant to the General Counsel.

The Regional Attorneys.

Secretary to the General Counsel.

Secretary to the Deputy General Counsel

Legal Administrative Aide, Immediate Office of the General Counsel.

2. The above redelegations supersede the redelegations made under previous authority (35 FR 822 dated 1/22/70 and 38 FR 22967 dated 8/23/73).

These authorities may not be redelegated.

Dated: May 31, 1979.

F. Peter Libassi,

General Counsel.

Alaska; Proposed Withdrawal of Lands

Notice of proposed withdrawal and reservation of lands, appearing in the Federal Register of December 5, 1978, at pages 57134 through 57137, F.R. Doc. No. 34051, is hereby amended as follows:

1. The following described lands are hereby added to the Department of Agriculture's Notice of Proposed Withdrawal of Lands:

College Fiord—Prince William Sound—Nellie Juan Area

Seward Meridian

T. 2 N., R. 3 W., all lands within the national forest boundary,
T. 9 N., R. 13 E.,
T. 10 N., Rs. 13 and 14 E.

Copper River Meridian

T. 5 S., R. 7 W., all lands south of the hydrographic divide,
T. 11 S., R. 9 W.,

Russell Fiord—Yakutat Forelands Area

Copper River Meridian

T. 24 S., R. 30 E., all land in Nunatak Fiord Drainage.

Admiralty Island Area

Copper River Meridian

T. 40 S., R. 64 E., all land southwest of Saginaw Channel.

West Chichagof—Yakobi

Copper River Meridian

T. 45 S., R. 55 E.

Admiralty Island Area

Copper River Meridian

T. 49 S., Rs. 67 through 70 E.

Stikine—Leconte Area

Copper River Meridian

T. 61 S., Rs. 62 and 63 E., all land except Kadin and Rynda Islands.

Tebenkof Bay Area

Copper River Meridian

T. 62 S., Rs. 71 and 72 E.
T. 62 S., R. 73 E., all land in Tebenkof Bay drainage.

Coronation Island—Warren Island—Maurille Island Area

Copper River Meridian

T. 69 S., Rs. 72 through 75 E.

Copper River Area

Copper River Meridian

T. 13 S., R. 1 W., all lands within the national forest south of the hydrographic divide,
T. 14 S., R. 1 W.,
T. 14 S., R. 2 W., all land south and east of hydrographic divide between Mt. Kelly and the ridgetop north of Humpback Creek and extending into Saltwater,
T. 15 S., Rs. 1 and 2 W.,
T. 15 S., R. 3 W., all land south and east of the hydrographic divide in Orca Inlet,
T. 16 S., Rs. 1 through 3 W.,
T. 16 S., R. 4 W., all land on the mainland including land on Mummy Island,
T. 17 S., Rs. 1 through 4 W.,
T. 18 S., Rs. 1 and 2 W.,
T. 19 S., R. 1 W.,
T. 13 S., R. 1 E., all land within the national forest boundary,
T. 14 S., Rs. 1 and 2 E., all lands within the national forest boundary,
T. 15 S., Rs. 1 through 9 E., all lands within the national forest boundary,
T. 16 S., Rs. 1 through 8 E.,
T. 16 S., R. 9 E., all land within the national forest boundary,
T. 17 S., Rs. 1 through 8 E.,
T. 17 S., R. 9 E., all land within the national forest boundary,
T. 18 S., Rs. 1 through 8 E.,
T. 18 S., R. 9 E., all land within the national forest boundary,
T. 19 S., Rs. 1 through 8 E.,
T. 19 S., R. 9 E., all land within the national forest boundary,
T. 20 S., Rs. 4 through 8 E.,
T. 20 S., R. 9 E., all land within the national forest boundary,
T. 21 S., Rs. 6 through 8 E.,
T. 21 S., R. 9 E., all land within the national forest boundary,
T. 22 S., Rs. 5 through 9 E.,
T. 23 S., Rs. 5 and 6 E.,
T. 24 S., Rs. 4 and 5 E.,

South Baranof Area

Copper River Meridian

T. 57 S., R. 65 E., all land located south of the hydrographic divide south of Lake Irina,
T. 57 S., R. 66 E., all land south of the hydrographic divide just north of Lake Diana,
T. 57 S., R. 67 E., all land south of the hydrographic divide extending southerly to Mt. Race, thence northeasterly,
T. 57 S., R. 68 E., all land south of the hydrographic divide just north of Long Lake and easterly from that hydrographic divide to saltwater,
T. 58 S., R. 64 E., all land east of a line beginning at a point on the south line of T. 58 S., R. 64 E., midway between President Bay and Seven Fathom Bay, thence northeasterly to Mt. Sharp, thence easterly along the hydrographic divide to the east line of T. 58 S., R. 64 E.,
T. 58 S., R. 65 E., all land east of hydrographic divide west of West Crawfish Inlet,
T. 58 S., Rs. 66 through 68 E.,
T. 59 S., R. 64 E., all land except the islands west of the main channel leading into West Crawfish Inlet,
T. 59 S., Rs. 65 through 68 E.,
T. 60 S., Rs. 64 through 68 E.,
T. 61 S., Rs. 66 and 67 E.,
T. 61 S., R. 68 E., all land west and north of the hydrographic divide dividing the Rezanof Lake and Deep Cover watersheds and all land east of the hydrographic divide dividing the Deep Cove and Banner Lake Watersheds,
T. 61 S., R. 69 E., all land north of the hydrographic divide between the Deep Cove and Patterson Bay drainages,
T. 62 S., R. 66 E.,
T. 62 S., R. 67 E., all land west of the hydrographic divide just west of Snipe Bay,
T. 62 S., R. 68 E., all land west of the hydrographic divide northwest of Antipatr Lake.

Petersburg Creek-Duncan Canal Area

Copper River Meridian

T. 57 S., R. 76 E., S½, all lands in Duncan Canal drainage.
T. 57 S., R. 77 E., S½,
T. 57 S., R. 78 E., all land in Petersburg Creek drainage,
T. 58 S., R. 76 E., all lands in Duncan Canal drainage,
T. 58 S., R. 77 E.,
T. 58 S., Rs. 78 and 79 E., all land in Petersburg Creek drainage,
T. 59 S., R. 76 E., all land in Duncan Canal drainage,
T. 59 S., R. 77 E.,
T. 59 S., R. 78 E., all land west of Radio Tower Peak,
T. 60 S., R. 76 E., all lands in Duncan Canal drainage,
T. 60 S., R. 77 E.,
T. 60 S., R. 78 E., Sections 30 and 31,
T. 61 S., Rs. 77 and 78 E., all lands in Duncan Canal drainage.

Boundary Spires Area

Copper River Meridian

T. 52 S., Rs. 79 through 81 E., all lands south of the hydrographic divide,
T. 53 S., R. 79 E., all lands east of the hydrographic divide north of North Beird Glacier,
T. 53 S., Rs. 80 through 83 E.,
T. 54 S., R. 79 E., all lands east of the hydrographic divide,
T. 54 S., Rs. 80 through 83 E.,
T. 55 S., Rs. 79 and 80 E., all lands in Scenery Cove drainage,
T. 55 S., R. 81 E.,
T. 55 S., R. 82 E., all lands west of a protracted line drawn between Devils Thumb on the international divide and the national forest boundary and the south boundary of T. 56 S., R. 82 E.,
T. 56 S., Rs. 79 through 81 E., except those lands in Thomas Bay drainage,
T. 56 S., R. 82 E., all lands west of a protracted line drawn between Devils Thumb on the international boundary and the point of the intersection of the national forest boundary and the south boundary of this township,
T. 57 S., R. 81 E., all land east of a line beginning on a ridge running south from Patterson Peak approximately 2 miles east of the west boundary of the township; thence southerly to a prominent point in the approximate center of said township; thence southeasterly to a ridge extending west from Rogers Peak; thence along said ridge to Rogers Peak,
T. 57 S., R. 82 E., W½,
T. 58 S., R. 82 E., W½, all land north of the hydrographic divide north of Le Conte Bay.

Devilpaw-Tonki Cape Areas

Seward Meridian

T. 20 S., R. 17 W.,
T. 20 S., R. 20 W., Sections 21, 22, 27, 28, 29, 31, 32, 33, and 34,
T. 20 S., R. 21 W., Sections 35 and 36, and all land on Devilpaw Mountain peninsula including Teck, Hogg, Bear, and Grassy Islands and all lands west except Alligator Island,
T. 20 S., R. 22 W., all land except unnamed island approximately three miles off shore,
T. 21 S., Rs. 16 and 17 W., all land except Sealion Rks.,
T. 21 S., R. 18 W., all land in Tonki Bay drainage,
T. 21 S., R. 20 W., Section 4, W½, Secs. 5 through 8, Sec. 9 W½, Sec. 16 NW¼, Secs. 17 through 20, 30, 31, and 32,
T. 21 S., Rs. 21 and 22 W.,
T. 22 S., R. 16 W., all land west of Marmot Strait,
T. 22 S., R. 17 W.,
T. 22 S., R. 18 W., all land in Tonki Bay drainage and unnamed drainage in SW¼ draining into Izhut Bay,
T. 23 S., R. 17 W.,
T. 23 S., R. 18 W., all land east of Izhut Bay.

Corrections

The title "TRACY ARM—FIORDS TERROR" is corrected to read "TRACY ARM—FORD'S TERROR".

3. Areas described in F.R. Doc. No. 34051 appearing at pages 57134 through 57136 in the issue for Tuesday, December 5, 1978, are more clearly redescribed as follows:

Russell Fiord—Yakutat Forelands Area

Copper River Meridian

T. 22 S., R. 34 E., description should read: T. 22 S., R. 34 E., all lands southeast of Disenchantment Bay,

T. 22 S., R. 37 E., description should read: T. 22 S., R.37 E., all lands in S½ west of the hydrographic divide,

T. 24 S., R. 38 E., description should read: T. 24 S., R. 38 E., all land in Nunatak Fiord drainage,

T. 25 S., Rs. 37 through 39 E., description should read: T. 25 S., Rs. 37 through 39 E., all land in Russell and Nunatak Fiord drainages,

T. 26 S., R. 39 E., description should read: T. 26 S., R. 39 E., Sections 6, 7, 18, 19, 30, and 31,

T. 29 S., R. 41 E., description should read: T. 29 S., R. 41 E., Section 31,

T. 31 S., R. 43 E., description should read: T. 31 S., R. 43 E., Sections 29 through 32,

T. 32 S., R. 41 E., description should read: T. 32 S., R. 41 E., all land on the north side of Dry Bay,

T. 43 S., R. 58 E., description should read: T. 43 S., R. 58 E., all land northwest of the hydrographic divide between Mud Bay and Neka River.

West Chichagof—Yakobi

Copper River Meridian

T. 52 S., R. 60 E., description should read: T. 52 S., R. 60 E., all land north of the line through the center of Salisbury Sound and Kakul Narrows,

Kaku Strait (Rocky Pass) Area

Copper River Meridian

T. 58 S., R. 75 E., description should read: T. 58 S., R. 75 E., all land west of a line running from Hamilton Creek in Section 6 to a high point in the SE corner of Section 32,

T. 60 S., R. 75 E., description should read: T. 60 S., R. 75 E., all lands west of a line running from the north boundary southerly through the forks of Kaku Creek to a prominent point in Section 20, thence easterly, through prominent points in Sections 22 and 28, thence south to the SE corner of Section 33.

Stikine—Leconte

Copper River Meridian

T. 62 S., R. 86 E., description should read: T. 62 S., R. 86 E., Sections 1 through 6,

T. 62 S., R. 87 E., description should read: T. 62 S., R. 87 E., Sections 3 through 9.

Coronation Island-Warren Island-Maurille Island

Copper River Meridian

T. 68 S., Rs. 72 through 75 E., description should read: T. 68 S., Rs. 72 through 75 E., all land except Spanish Islands and Kosciusko Island.

4. The following described lands are deleted from the Notice of Proposed Withdrawal of Lands appearing in the December 5, 1978, Federal Register at pages 57134 and 57136 under:

Russell Fjord-Yakutat Forelands Area

Copper River Meridian

T. 24 S., R. 39 E., W½SW¼.

T. 32 S., R. 42 E., a one-mile-strip along the north boundary of the township.

T. 32 S., R. 43 E., NW¼NW¼.

Stikine-Leconte

Copper River Meridian

T. 60 S., R. 83 E., all land on Kadin Island and Rynda Island.

South Prince of Wales Area

Copper River Meridian

Tps. 78, 79, 80 S., R. 85 E.

Tps. 81 and 82 S., Rs. 84 and 85 E.

T. 83 S., Rs. 86 and 87 E.

5. Areas described in F.R. Doc. 34051 at page 57136 in the issue for Tuesday, December 5, 1978, under "South Prince of Wales Area," are deleted and redescribed as follows:

South Prince of Wales Area

Copper River Meridian

Tps. 78 and 79 S., Rs. 86 and 87 E., all lands in Klakas Inlet drainage.

T. 80 S., Rs. 86 through 88 E., all lands in Klakas Inlet drainage and west of Prince of Wales hydrographic divide.

Tps. 81 and 82 S., R. 86 E., all lands on the east side of Cordova Bay.

T. 81 S., Rs. 87 through 89 E., all lands west of the hydrographic divide between Cordova Bay and Clarence Strait.

T. 82 S., R. 87 E.

T. 82 S., Rs. 88 and 89 E., all lands west of the hydrographic divide west of Nichols Bay.

T. 83 S., R. 88 E.

T. 83 S., R. 89 E., all lands west of the major hydrographic divide west of Nichols Bay.

6. Lands added, corrected, or more clearly redescribed by this amendment are subject to the terms and conditions specified in the Notice of Proposed Withdrawal published in the Federal Register of December 5, 1978, at pages 57134 through 57137, F.R. Doc. 34051.

By letter dated April 9, 1979, the U.S. Department of Agriculture requested the addition, correction, and redescription of certain land described in the December 5, 1978, Federal Register. The deleted lands will be relieved of their segregative effect by this amendment upon publication in the Federal Register. However, these lands remain subject to any other existing withdrawals or reservations.

Arnold E. Petty,

Acting Associate Director.

May 31, 1979.

BILLING CODE 4310-84

[AA-6660-A through AA-6660-G]

Alaska Native Claims Selections

On December 24, 1968, the State filed general purposes grant selection applications pursuant to section 6(b) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 340; 48 U.S.C. Ch. 2, section 6(b) (1970)) for certain lands in the Bristol Bay area. Applications AA-5148,

AA–5150, AA–5153 and AA–5154 selected lands in Ts. 24 and 25 S., Rs. 49 and 50 W., Seward Meridian. On January 12 and June 16, 1972, each application was amended to include all lands in the townships, excluding patented lands.

The Bureau of Indian Affairs filed an application on December 12, 1968, to withdraw all unreserved public lands in Alaska for the determination and protection of the rights of the Alaska Natives. Subsequently, on January 17, 1969, Public Land Order 4582 was issued to affirm the withdrawal of all unreserved lands in Alaska from all forms of appropriation and disposition under the public land laws except locations for metalliferous minerals. Public Land Order 4582 further provided that applications filed by the State of Alaska after December 12, 1968, and prior to January 4, 1969, must be embraced in leases, licenses, permits, or contracts issued pursuant to the Mineral Leasing Act of 1920 or the Coal Leasing Act of 1914 in order to be a valid selection application.

Since the lands selected in State selection applications AA–5149, AA–5150, AA–5153 and AA–5154 filed on December 24, 1968 were not entirely within lands embraced in leases, etc., these applications must be and are hereby rejected as to the following described lands:

Seward Meridian, Alaska (Unsurveyed)

State Selection AA–5149

T. 25 S., R. 50 W.
Secs. 10 to 15, inclusive, all;
Secs. 22 to 27, inclusive, all;
Secs. 34, 35 and 36, all.
Containing approximately 9,735 acres.

State Selection AA–5150

T. 25 S., R. 49 W.
Sec. 7, all;
Secs. 18 and 19, all;
Secs. 30 and 31, all.
Containing approximately 3,066 acres.

State Selection AA–5153

T. 24 S., R. 50 W.
Secs. 1, 2 and 3, all;
Secs. 10 to 15, inclusive, all;
Secs. 22 to 28, inclusive, all;
Secs. 33 to 36, inclusive, all.
Containing approximately 12,800 acres.

State Selection AA–5154

T. 24 S., R. 49 W.
Secs. 6 and 7, all;
Secs. 18 and 19, all;
Secs. 30 and 31, all.
Containing approximately 3,812 acres.
Aggregating approximately 29,433 acres.

The State selected lands rejected above were not valid selections and will not be charged against the village corporation as State selected lands.

Section 11(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 696; 43 U.S.C. 1601, 1610(a) (1976)] (ANCSA), withdrew the lands surrounding the Native village of Egegik, including lands in the subject State selection applications for Native selection. Becharof Corporation filed selection applications AA–6660–A on January 15, 1974 and AA–6660–B through AA–6660–G on November 1, 1974, under the provisions of Sec. 12 of the Alaska Native Claims Settlement Act for lands within the subject State selections.

Section 12(a)(1) of the Alaska Native Claims Settlement Act provides that village selections shall be made from lands withdrawn by Sec. 11(a).

Section 11(a)(2) further withdrew for possible selection by the Native corporation those lands within the townships described in Sec. 11(a)(1) that have been selected by, or tentatively approved to, but not yet patented to the State under the Alaska Statehood Act.

Section 12(a) further provided, however, that no village corporation may select more than 69,120 acres from lands withdrawn by Sec. 11(a)(2).

The lands described below were properly selected by Becharof Corporation in village selection application AA–6660–C; accordingly, State selection application AA–5149, is hereby rejected, as to the following described lands:

Seward Meridian, Alaska (Unsurveyed)

State Selection AA–5149

T. 25 S., R. 50 W.,
Sec. 9, all;
Secs. 16 and 17, all;
Secs. 20 and 21, all;
Secs. 28 and 29, all;
Secs. 32 and 33, all.
Containing approximately 5,805 acres.

The total amount of State selected lands rejected to permit the conveyance hereafter given totals approximately 5,805 acres, which is less than the 69,120 acres permitted by Sec. 12(a)(1) of the Alaska Native Claims Settlement Act. Further action on the subject State selection applications as to those lands not rejected herein will be taken at a later date.

As to the lands described below, the applications submitted by Becharof Corporation, as amended, are properly filed, and meet the requirements of the Alaska Native Claims Settlement Act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquistion of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 12(a), aggregating approximately 88,649 acres, is considered proper for acquisition by Becharof Corporation and is hereby approved for conveyance pursuant to Sec. 14(a) of the Alaska Native Claims Settlement Act:

Seward Meridian, Alaska (Unsurveyed)

T. 24 S., R. 47 W.,
Secs. 1 and 2, all;
Secs. 3 to 11, inclusive, excluding Egegik River;
Sec. 12, all;
Secs. 13 and 14, excluding Egegik River;
Sec. 16, excluding Egegik River;
Secs. 17 to 20, inclusive, all;
Secs. 21 to 24, inclusive, excluding Egegik River;
Sec. 25, excluding Native allotment A–054671 and Egegik River;
Secs. 26 and 27, excluding Egegik River;
Secs. 28 to 35, inclusive, all;
Sec. 36, excluding Egegik River;
Containing approximately 17,947 acres.

T. 25 S., R. 47 W.,
Secs. 11 to 14, inclusive, all;
Secs. 23, 24 and 25, all.
Containing approximately 4,570 acres.

T. 23 S., R. 49 W.,
Sec. 1, inclusive, excluding Egegik River;
Sec. 2, excluding U.S. Survey 554 and Egegik River;
Secs. 3 and 4, excluding Egegik River;
Sec. 5, excluding U.S. Survey 548 and Egegik River;
Sec. 6, excluding U.S. Survey 485, U.S. Survey 551, U.S. Survey 2367, U.S. Survey 4900, U.S. Survey 4941 and Egegik River;
Sec. 7, excluding U.S. Survey 4900;
Sec. 8, all;
Secs. 9 to 12, inclusive, excluding Egegik River;
Sec. 13, all;
Secs. 14 and 15, excluding Egegik River;
Secs. 16 to 36, inclusive, all.
Containing approximately 19,992 acres.

T. 24 S., R. 49 W.,
Secs. 6 and 7, all;
Secs. 18 and 19, all;
Secs. 30 and 31, all.
Containing approximately 3,812 acres.

T. 25 S., R. 49 W.,
Secs. 7 and 18, all;
Sec. 19, all;
Secs. 30 and 31, all.
Containing approximately 3,066 acres.

T. 23 S., R. 50 W.,
Sec. 1 (fractional), excluding U.S. Survey 485, U.S. Survey 551, U.S. Survey 892, U.S. Survey 2822, U.S. Survey 2366, U.S. Survey 4900, U.S. Survey 4941 and Native allotment A–051875;
Sec. 2 (fractional), excluding U.S. Survey 5305 Lot 1 and Native allotment A–058973;
Sec. 3 (fractional), excluding U.S. Survey 549, U.S. Survey 550, U.S. Survey 4907, U.S. Survey 5246 Lots 1 and 2, and Native allotment A–058973;
Sec. 4 (fractional), excluding U.S. Survey 550 and U.S. Survey 5246 Lot 2;
Sec. 7 (fractional), all;
Sec. 12 (fractional), excluding U.S. Survey 2482 and U.S. Survey 4900;
Secs. 13 and 14 (fractional), all;

Secs. 18 and 19 (fractional), all;
Secs. 21, 22 and 23 (fractional), all;
Secs. 24 to 36, inclusive, all.
Containing approximately 10,902 acres.
T. 24 S., R. 50 W.,
Secs. 1, 2 and 3, all;
Secs. 10 to 15, inclusive, all;
Secs. 22 to 26, inclusive, all;
Secs. 35 to 36, inclusive, all.
Containing approximately 12,800 acres.
T. 25 S., R. 50 W.,
Secs. 9 to 17, inclusive, all;
Secs. 20 to 29, inclusive, all;
Secs. 32 to 36, inclusive, all.
Containing approximately 15,540 acres.
Aggregating approximately 88,849 acres.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. The subsurface estate therein, and all rights, privileges, immunities and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 704; 43 U.S.C. 1601, 1613(f) (1976)); and

2. Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 706; 43 U.S.C. 1601, 1616(b) (1976)), the following public easements, referenced by easement maps attached to this document, copies of which will be found in case file AA-6660-EE, are reserved to the United States. All easements are subject to applicable Federal, State, or municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a 25 foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, and small all-terrain vehicles (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

50 Foot Trail—The uses allowed on a 50 foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, small and large all-terrain vehicles, track vehicles and four-wheel drive vehicles.

a. (EIN 1 C3, D1, D9) An easement for an existing access trail twenty-five (25) feet in width from Egegik Bay parallel to the shoreline of Bristol Bay and Egegik Bay in Sec. 1, T. 23 S., R. 50 W., Seward Meridian, southwesterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

b. (EIN 1a C3, D1) An easement for an existing access trail fifty (50) feet in width from Egegik in Sec. 1, T. 23 S., R. 50 W., Seward Meridian, southeasterly roughly parallel to the left bank of the Egegik River to Becharof Lake. The uses allowed are those listed above for a fifty (50) foot wide trail easement.

The grant of lands shall be subject to:

1. Issuance of a patent confirming the boundary description of the lands hereinabove granted after approval and filing by the Bureau of Land Management of the official plat of survey covering such lands;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 341; 48 U.S.C. Ch. 2, Sec. 6(g) (1970))), contract, permit, right-of-way or easement, and the right of the lessee, contractee, permittee or grantee to the complete enjoyment of all rights, privileges and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of ANCSA, any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law;

3. Those rights for water pipeline purposes as have been granted to the New England Fish Company, its successors or assigns, by right-of-way, A-012179, located in Secs. 1 and 12, T. 23 S., R. 50 W., Seward Meridian, under the Act of February 15, 1901 (31 Stat. 790; 43 U.S.C. 959); and

4. Requirements of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 703; 43 U.S.C. 1601, 1613(c) (1976)), that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section.

Becharof Corporation is entitled to conveyance of 92,160 acres of land selcted pursuant to Sec. 12(a) of the Alaska Native Claims Settlement Act. To date, approximately 88,649 acres of this entitlement have been approved for conveyance; the remaining entitlement of approximately 3,511 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of the Alaska Native Claims Settlement Act, conveyance to the subsurface estate of the lands described above shall be granted to Bristol Bay Native Corporation when conveyance is granted to Becharof Corporation for the surface estate, and shall be subject to the ame conditons as the surface conveyance.

Only the following inland water body, within the described lands, is considered to be navigable:

Egegik River.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the Federal Register and once a week, for four (4) consecutive weeks in the ANCHORAGE TIMES. Any party claiming a property interest in lands affected by this decision may appeal the decision to the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510 with a copy served upon both the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513 and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501, also:

1. Any party receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

2. Any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate, and any parties who failed or refused to sign the return receipt shall have until July 9, 1979 to file an appeal.

3. Any party known or unknown who may claim a property interest which is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the adverse parties to be served are:

Becharof Corporation, Egegik, Alaska 99579.
Bristol Bay Native Corporation, P. O. Box 198, Dillingham, Alaska 99576.

BILLING CODE 4310-84-M

[F-14858-A]

Alaska Native Claims Selection; Correction

The purpose of this Notice is to correct the language in paragraph 2 of the decision dated April 6, 1979, as published in the Federal Register issue for Friday, April 6, 1979 (FR Vol. 44, at page 20802, column 2), which now reads as follows:

2. "Pursuant to section 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688), temporary camping, loading, or unloading shall be limited to 24 hours." Paragraph 2 is hereby corrected to read as follows:

2. Pursuant to section 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 706; 43 U.S.C. 1601, 1616(b) (Supp. V, 1975)), the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F–14856–EE, are reserved to the United States. All easements are subject to applicable Federal, State, or municipal corporation regulation. The following is a listing of uses allowed for each type of easement identified. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, and small all-terrain vehicles (less than 3,000 lbs. Gross Vehicle Weight (GVW).

One Acre Site—The uses allowed for a site easement are: vehicle parking (e.g., aircraft, boats, ATV's, snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading, or unloading shall be limited to 24 hours.

All other terms and conditions of the April 6, 1979 decision remain unchanged.

Arnold E. Petty,

Acting Associate Director.

May 31, 1979.

BILLING CODE 4310–84–M

Las Cruces District Grazing Advisory Board; Meeting

Notice is hereby given in accordance with Pub. L. 94–579, that a meeting of the Las Cruces District Grazing Advisory Board will be held on Thursday, July 12, 1979.

The meeting will begin at 10 a.m. in the Varsity Room of Howard Johnson's Los Pueblos Motel at 2600 S. Valley Drive, in Las Cruces, New Mexico.

The agenda for the meeting will include: (1) Election of board members. (2) Scope and responsibilities of the Board, (3) Policy regarding use of range improvement funds, (4) Current and proposed use of range improvement funds, (5) Arrangements for the next meeting.

The meeting will be open to the public and interested persons may make oral statements to the Board during the allotted time period between 2 and 2:30 p.m., or file written statements for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 1705 N. Valley, Las Cruces, New Mexico 88001, by July 10, 1979. The district manager may establish a time limit for oral statements depending on the number of persons wishing to make statements.

Summary minutes of the Board meeting will be maintained in the Las Cruces BLM District Office and be available for public inspection and reproduction (during regular business hours) for 30 days following the meeting.

Dated: June 1, 1979.

Daniel C. B. Rathbun,

District Manager.

BILLING CODE 4310–84–M

Fish and Wildlife Service

[INT–FES–79–22]

Canaan Valley National Wildlife Refuge, Tucker County, W. Va.; Availability of Final Environmental Statement

Correction

In FR Doc. 79–17256, appearing on page 32047 in the issue for Monday, June 4, 1979, the docket number given, "INT–DES–79–22," is incorrect. The correct docket number appears in the heading above.

BILLING CODE 1505–01–M

Categorical Exclusions

AGENCY: Fish and Wildlife Service, Department of the Interior.

ACTION: Notice.

SUMMARY: This notice establishes interim categorical exclusions for compliance with the National Envionmental Policy Act (NEPA) and the regulations issued by the Council on Environmental Quality (CEQ) on November 29, 1978 (43 FR 55978). These exclusions are limited to the determination of project activities under the Federal Aid in Fish and Wildlife Restoration programs.

EFFECTIVE DATE: June 8, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Charles K. Phenicie, Chief, Division of Federal Aid, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone 703–235–1526.

SUPPLEMENTARY INFORMATION: In the Federal Register of March 22, 1979 (44 FR 17598), a notice of proposed categorical exclusions was published and pulic comment was requested. A total of 50 responses were received during the period allowed for comment. All comments were given due consideration. As a result of comments received, the following changes are made:

1. The general statement is revised to:

(a). Clarify that the exclusions are applicable to projects or project components.

(b). Provide Regional Directors the latitude to require preparation of environmental assessments or statements for otherwise excluded actions when considered necessary or desirable.

2. Routine maintenance is revised to clarify that the exclusion is limited to activities which do not alter or expand existing capacity, use or purpose, or result in changes in the vegetative community. also, project activities which are designed to maintain existing habitat or vegetative communities are not excluded.

3. The exclusion for planning projects was rewritten to clarify that no statement or assessment was required to approve a planning activity but that the NEPA process would be followed in plan development and approval.

AUTHORSHIP: The author of the original proposal was Mr. William H. Massmann, Division of Federal Aid, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone 703–235–1526. The revisions were authored by Dr. Robert J. Sousa at the same address and telephone.

Categorical Exclusions

Notice is hereby given that the following actions conducted by the States under the Federal Aid in Fish and Wildlife Restoration programs individually or cumulatively have no significant impact on the quality of the human environment. Therefore, under provisions of Sections 1507.3 and 1508.4 of the regulations for implementing the procedural provisions of the National Environmental Policy Act (40 CFR Parts 1500–1508), the following actions are excluded from the requirement for preparation of an environmental assessment or statement. These exclusions will apply until superseded.

The classes of actions excluded are applicable to projects or components of projects carried out under the Federal Aid in Fish Restoration Act (16 U.S.C. 777 et seq.) and the Federal Aid in Wildlife Restoration Act (16 U.S.C. 669 et seq.). However, Regional Directors of the U.S. Fish and Wildlife Service may require environmental assessments or statements on excluded actions if, in their view, environmental review and analysis prior to decision is in the best

interests of the Service in carrying out the National Environmental Policy Act.

1. Surveys and Inventories

The purpose of surveys and inventories is to determine periodically the numbers and conditions of fish and wildlife and their habitats, or the harvest or other uses of these resources. Surveys range from direct observation of animals or measures of habitat conditions to indirect determinations relying on sampling procedures. Surveys of wildlife users determine their desires and needs, and may further show economic, sociological, esthetic, or scientific values.

While most surveys rely on direct or indirect counts of fish or wildlife, some may require their capture for more complete identification or examination for age, condition, productivity, health, and general fitness. Population estimates may require the tagging of some animals. Where fish or wildlife are taken into possession for the purposes stated above, and either released into the wild or killed, individual animals are affected. The numbers affected are so small that there is no effect on the population or species, either in the contiguous area or broader areas of the range; therefore, the effect is not major or significant in terms of NEPA.

Habitat surveys may require sampling plots of vegetation, brose plants, soils, minerals, or the ground surface for animal signs. In streams or lakes, the physical or chemical constituents of the water are measures. The identification of detrimental conditions in habitats is often a vital element in habitat surveys. For economic reasons, sample sizes and numbers are kept small and to a minimum by statistical means and have no major or significant effects on the environment.

The data acquired from surveys and inventories generally form the basis for management recommendations. Depending on the purpose and nature of the surveys, recommendations may pertain to programs which provide public recreation or other benefits, or they may specify measures to provide needed stimulation or restraint of population growth for the benefit of the habitat or of other species. Deteriorating or adverse habitat conditions may be alleviated or corrected, and lethal conditions may be eliminated. User surveys may suggest that a redirection of efforts between species or habitats would be helpful.

2. Routine Maintenance

Routine maintenace is the repair, renovation, and upkeep of facilities and improvements at the same location for the same purpose. Excluded activities include work on existing drainage ditches, roads, bridges, small dams, dikes, and levees unless such activities would alter or expand the existing capacity, use, or purpose or result in changes in the existing vegetative community. Also excluded are maintenance of parking lots, buildings target ranges, picnic and camping areas, fences, signs, trails, boat ramps, nesting structures and major equipment items.

Routine maintenance does not include "maintenance" of a habitat type or vegetative community requiring activities such as forestry and farming operations, grazing, or land treatment activities to control natural plant succession.

3. Hunter Education

The purpose of the hunter education program is to provide public instruction for the safe and ethical conduct of fish and wildlife recreation. This includes developing a respect for and understanding of property (both public and private), wildlife management, legal and moral obligations in the harvest of wildlife, and training in the safe and proficient use of sporting firearms and archery equipment. Hunter education is performed either in the classroom or at indoor and outdoor target ranges.

As discussed in the Environmental Impact Statement for the Federal Aid Program (page III–44), target ranges are subject to occupational Safety and Health Administration regulations to protect public health and safety. Neither classroom nor target range instruction affects the quality of the human environment.

Acquisition of land, target range construction, and construction of auxiliary structures are not covered by this exclusion.

4. Coordination

Coordination projects provide for administrative and clerical services over the States' Federal Aid projects. This administrative function involves the development of work plans and provisions for technical direction of program employees, correlating Federal Aid financed activities with other State operations, and maintaining records essential to the program. Coordination activities do not affect the quality of the human environment since they are administrative projects.

5. Research Studies

With the exception of developmental technologies, animal sacrifice, environmental disruption, and public health or safety, research studies are not major Federal actions and will not significantly affect the quality of the human environment.

Research—the acquisition of facts needed for most effective conservation and management of fish and wildlife—covers a broad spectrum of activities. For example, one project may monitor the intercontinental migrations of birds while another may examine the intracellular effects of a virus on fish. Under the Federal Aid program, research and surveys are often treated together since they are so similar in many respects. A major distinction is that research seeks new knowledge concerning an objective which is generally obtainable in a single study. In contrast, surveys apply established methodologies in a routine manner, often repeated at intervals, to fill a recurring need for information. Research provides data on fish or wildlife concerning ecological needs, nutritional problems, diseases and parasites, effects of land management practices, population dynamics, behavioral activities, movements, and information on a host of other subjects.

The research studies that may affect the quality of the human environment and which, therefore, will require an environmental assessment or statement are:

(a) Studies aimed at developing new technologies which, if applied, could significantly affect the environment. Examples of such studies would be the development of specific farm cultural practices for wide application to benefit wildlife. The development of water management practices for wide application in the conservation or augmentation of stream flows is another;

(b) Studies which involve significant mortality of animals or the introduction of nonindigenous animals on an experimental basis. Examples of such studies include investigations of animal diseases in which the pathological effects of the illness must be studied on a large number of wild specimens in order to understand the diseases and to develop treatments. The experimental introduction of African Nile perch into heated reservoirs to determine their ability to control overpopulations of carp and gizzard shad is another example;

(c) Studies that would require a significant disruption of the physical environment or the introduction of toxicants into the environment. Examples of such studies would include the experimental plantings of loblolly pines to determine the most desirable

habitat for the red-cockaded woodpecker or the experimental treatment of portion of a reservoir with fish toxicant to obtain an estimate of the total fish population; and

(d) Studies which could affect public health or safety. The use of radioisotopes to mark animals or trace a certain food item could create a health problem if not carefully done, and the use of certain animal traps or snares would require special precautions to prevent human accidents. Such studies would require environmental assessments or statements.

The four exceptions to the exclusion do not include fish or wildlife taken into possession for banding, radio tagging, marking, aging, or other types of examination before releasing them into the wild. They also do not include minor sacrifice of animals essential to research. Minor as used here means that the sacrifice will have no measurable effect on any wild population from which the individual(s) is taken or on the population of any associated species.

6. Technical Guidance

Some projects are for the purpose of providing consultation or guidance to other agencies, corporations, political entities, or to individuals for the purpose of improving fish or wildlife resources. Such consultations often involve assisting others in planning future developments in ways to minimize destruction of wildlife habitat or to benefit fish or wildlife. The consultations would not affect the human environment. In those cases where a substantial development is planned, the project itself would be the subject of an environmental assessment or statement.

7. Migratory Bird Banding Projects

Under their Federal Aid programs, many of the States cooperate with the Fish and Wildlife Service in obtaining vital information on waterfowl and other migratory birds. Some of this information is obtained by banding predetermined quotas of birds. Although occasional mortalities may occur during bird banding operations, these are not significant in that the mortalities will have no effect on overall populations.

8. Planning Projects

A project designed to authorize Federal assistance for planning does not affect the quality of the human environment. States may participate in the Federal Aid programs on the basis of an approved comprehensive fish and wildlife management plan. Plans of lesser scope are also prepared which range from groups of animals and users such as fish and fishermen to management plans for individual fish or wildlife areas. The latter group does not serve the legislated option for program participation but serves to facilitate program administration.

The NEPA process shall be integrated early into the planning process, including public involvement in decisions which affect the quality of the human environment, and identification and assessment of reasonable alternatives to proposed actions. As a plan is submitted for adoption by State decisionmakers and for approval by Federal officials, the program proposed by the plan must be accompanied by an appropriate NEPA document.

Dated: June 4, 1979.

Lynn A. Greenwalt,

Director, Fish and Wildlife Service.

Heritage Conservation and Recreation Service

National Register of Historic Places; Notification of Pending Nominations

Nominations for the following properties being considered for listing in the National Register were received by the Heritage Conservation and Recreation Service before June 8, 1979. Pursuant to § 60.13(a) of 36 CFR Part 60, published in final form on January 9, 1976, written comments concerning the significance of these properties under the National Register criteria for evaluation may be forwarded to the Keeper of the National Register, Office of Archeology and Historic Preservation, U.S. Department of the Interior, Washington, DC 20243. Written comments or a request for additional time to prepare comments should be submitted by June 18, 1979.

BILLING CODE 4310-70-M

Bureau of Reclamation

Negotiation of a Coordinated Operations Agreement With the State of California; Intent to Initiate Negotiations for a Coordinated Operations Agreement, Central Valley Project, Calif.

The Department of the Interior, through the Bureau of Reclamation, and the State of California, through the Department of Water Resources, intend to initiate negotiations of a new coordinated operations agreement for the Federal Central Valley Project (CVP) and the State Water Project (SWP). The coordinated operations agreement will be entered into pursuant to the Reclamation Act of 1902 (32 Stat. 388).

The initial features of the CVP were authorized under the provisions of the Reclamation Act of December 5, 1924, which was approved on December 2, 1935, by the President of the United States. Congressional reauthorization of the project under Reclamation law was provided in section 2 of the Rivers and Harbors Act of August 26, 1937 (50 Stat. 859), and by the Rivers and Harbors Act of October 17, 1940 (54 Stat. 1198). Congress further reauthorized the project by the Act of October 14, 1949 (63 Stat. 852) and the Act of September 26, 1950 (64 Stat. 1036). Additional units were authorized by the Congress as integral parts of the project by the Acts of August 12, 1955 (69 Stat. 719); June 3, 1960 (74 Stat. 156); September 2, 1965 (79 Stat. 615); August 19, 1967 (81 Stat. 167); and August 27, 1967 (81 Stat. 173). The SWP was authorized for construction by passage of the Porter-Cologne Act in the State general election of 1960.

In 1959, the Bureau of Reclamation and the Department of Water Resources entered into negotiations for an agreement concerning coordinated operations of the two projects in an attempt to resolve CVP-SWP Sacramento Valley and Sacramento-San Joaquin Delta water right issues. These negotiations resulted in an agreement dated May 16, 1960, entitled "Agreement Between the United States of America and the Department of Water Resources of the State of California for the Coordinated Operation of the Federal Central Valley Project and the State Feather River and Delta Diversion Projects." The objective of this agreement was for the Department of Water Resources and the United States to dedicate and utilize their respective existing and future water conservation facilities to provide the maximum benefits to the people of California and the Nation. The coordinated and cooperative operation of the SWP and the CVP facilities is essential to maximizing these benefits.

Between 1960 and 1971, additional negotiating sessions where held with exchanges of proposals and counterproposals being made which led to a draft of the Supplemental Coordinated Operating Agreement in 1971. This agreement, as yet unsigned, was prompted by article 16 of the May 16, 1960, Agreement, which specifically recognized the need for additional criteria for the actual operation of the two projects on a coordinated basis.

Because there have been many changes in critical areas since 1960 which affect the operations of the two projects, there is a need to renegotiate the previous agreements. Meetings for this purpose are expected to begin in June 1979. The public is invited to attend these meetings as observers. Written comments on the form of a proposed agreement may be submitted not later than 30 days after the draft is declared available to the public.

For further information about scheduled meetings and copies of the proposed coordinated operations agreement, please contact Mr. James N. Moore, Repayment Branch, Division of Water and Power Resources Management, Bureau of Reclamation, 2800 Cottage Way, Sacramento, California 95825, telephone No. (916) 484-4660. All meetings scheduled by the Bureau of Reclamation with the State of California for the purpose of negotiating terms and conditions of a proposed coordinated operations agreement shall be open to the public as observers. Advance notice of such meetings shall be furnished only to those parties having

previously furnished a written request for such notice to the office identified above at least one week prior to any meeting. All written correspondence concerning the proposed coordinated operations agreement shall be made available to the general public pursuant to the terms and procedures of the Freedom of Information Act (80 Stat. 383), as amended.

Dated: June 6, 1979.

R. Keith Higginson,

Commissioner of Reclamation.

BILLING CODE 4310-09-M

DEPARTMENT OF LABOR

Employment and Training Administration

Job Corps; Proposed Expansion of Job Corps Center at Turner Air Force Base, Albany, Ga.; Determination of Negative Environmental Impact

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice-Finding of Negative Environmental Impact.

SUMMARY: The purpose of this notice is to announce a determination by the Department under the National Environmental Policy Act and 40 CFR Part 1500 that the proposed expansion of the Job Corps center at Turner Air Force Base, Albany, Georgia, with the addition of 57 acres and 34 buildings, does not constitute a major Federal action which will significantly affect the environment.

FOR FURTHER INFORMATION CONTACT: Raymond E. Young, Director, Job Corps, Room 6100, Patrick Henry Building, 601 D Street, N.W., Washington, D.C. 20213, Telephone: (202) 376-6905.

SUPPLEMENTARY INFORMATION: Title IV, Part B of the Comprehensive Employment and Training Act (CETA), as amended, 29 U.S.C. § 923 *et seq.*, directs the Secretary of Labor to establish Job Corps centers to provide occupational training to disadvantaged youths 16 through 21 years of age. Regulations pertaining to the Job Corps program are published at 29 CFR Part 97a. Pursuant to his authority the Secretary is expanding the Job Corps center at the Turner Air Force Base Complex.

Pursuant to 40 CFR Part 1500, the Department of Labor has conducted an environmental assessment as part of a site utilization study and has determined that preparation of an environmental impact statement is not required since the establishment of this Job Corps center is not a major Federal action which will significantly effect the quality of the human environment within the meaning of 40 CFR Section 1500.6(c). The established Turner Job Corps center, a training center with residential, nonresidential and educational facilities for approximately 700 disadvantaged youth, men, and women, ages 16 through 21, who need and can benefit from intensive employment-related services will be expanded to 1200. The function of the center and the expanded staff of approximately 350 will be to provide skill training in selected vocational courses and continuing and/or remedial education in academic subjects.

It is intended that the additional facilities be used for essentially the same purposes as used by the previous occupant, specifically residential living and instruction.

The center will remain a self-contained facility located off of Turner Field Road, approximately 4½ miles northwest of downtown Albany, Georgia. The additional property to be utilized consists of approximately 57 acres of land consisting of 34 buildings, of which approximately 20 buildings will be occupied for the program.

Domestic water and sewage collection systems to all existing buildings are provided through the base utility systmes. These utility systems, provided by the City of Albany, to the site, are adequate to meet the load capacity and standards for the proposed site utilization.

The proposed Job Corps center will be operated in compliance with the Job Corps Environmental Standards published at 29 CFR 97a.116, and with applicable Federal, State and local regulations concerning environmental health.

The established Job Corps center and the proposed expansion will be compliance with the water quality and related standards of the State and local government, and with the standards established pursuant to the Federal Water Pollution Control Act, 33 U.S.C. § 1251 *et seq.*, with Executive Order 11752, and with regulations and guidelines of the United States Environmental Protection Agency.

The center installation will be maintained so as to conform to Federal air quality standards, including those found in Executive Order 11752.

My determination is that the continued operation of the center with the addition of 34 buildings will have no adverse impact upon traffic, transportation systems, pedestrian or vehicular congestion, police protection services, fire protection services, public safety, legal services, or upon the aesthetics or residential quality of the nearby area. I further determine that the aforementioned expansion of the Center will have no adverse effects upon ecological systems, population distribution, air or water pollution, municipal services, or health or life support systems. Accordingly, I hereby determine that the expansion of such Job Corps center will not have a significant adverse impact upon the quality of the human environment of the nearby area, or the greater Albany community.

The Job Corps center will be operated with the pass-leave procedures required by Job Corps Regulations and operational procedures. I find that in light of the increase in enrollment level and utilization of the pass-leave procedures, that congestion in the area will not increase.

There will be no material impact upon transportation or traffic within the area.

It is further determined that the expansion of the Center is not likely to have a significant adverse impact upon use of police services or the public safety. Adequate provisions are planned to carefully screen prospective enrollees so as to minimize the possibility of disciplinary problems or Center related public safety problems.

Adequate staffing personnel and protection will be provided at the Albany Job Corps center in accordance with Job Corps' operating procedures and regulations.

I further find that fire protection services in the area will not be adversely affected and that systems in the facilities will be upgraded to further reduce risk of fire from the present risk level.

Additionally, local health services will not be adversely affected because basic dental, medical and other health related services will be provided on site with Job Corps' own facilities and personnel.

In conclusion, it is my determination, after careful review and consideration of the nature of Job Corps' proposed action, in light of Job Corps' purposes, objectives and operational procedures, that the impact upon the surrounding community, of the establishment of the Center at the site will not be significant. It is my careful determination that the environmental assessment conducted by the Department of Labor, pursuant to 40 CFR Part 1500, clearly indicates that preparation of an environmental impact statement is not required since the expansion of the Job Corps center is not a mjaor Federal action which will

significantly affect the quality of the human environment within the meaning of 40 CFR Section 1500.6(c).

Signed at Washington, D.C. this 17th day of April 1979.

Raymond E. Young,
Director, Office of Job Corps and Young Adult Conservation Corps.

BILLING CODE 4510-30-M

Reallocation of Funds Under the Comprehensive Employment and Training Act

AGENCY: Employment and Training Administration, Labor.

ACTION: Thirty-Day Notice of Intent to Reallocate Funds Under Title II–D of the Comprehensive Employment and Training Act (CETA).

SUMMARY: Pursuant to 20 CFR 676.47, the Secretary announces the intent of the Department to reallocate $913,618 in CETA Title II–D funds from the Lafayette Parish, Louisiana, CETA prime sponsor. The Secretary invites all interested parties to submit comments regarding this proposed action. Comments are due on or before July 9, 1979.

COMMENTS SHOULD BE SUBMITTED TO: Mr. Robert Anderson, Administrator, Office of Comprehensive Employment Development, Employment and Training Administration, U.S. Department of Labor, 601 D Street, N.W., Washington, D.C. 20213, Attention: TDCR.

SUPPLEMENTARY INFORMATION: The Department has determined that the prime sponsor has not utilized the available funds and that it does not have current plans which call for the effective use of these funds within a reasonable period of time.

Robert Anderson,
Administrator, Office of Comprehensive Employment Development.

[FR Doc. 79-17040 Filed 6-7-79; 8:45 am]
BILLING CODE 4510-30-M

Extended Benefits; Ending of Extended Benefit Period in the State of Idaho

This notice announces the ending of the Extended Benefit Period in the State of Idaho, effective on June 9, 1979.

Background

The Federal-State Extended Unemployment Compensation Act of 1970 (Title II of the Employment Security Amendments of 1970, Public Law 91–373; 26 U.S.C. 3304 note) established the Extended Benefit Program as a part of the Federal-State Unemployment Compensation Program. The Extended Benefit Program takes effect during periods of high unemployment in a State or the nation, to furnish up to 13 weeks of extended unemployment benefits to eligible individuals who have exhausted their rights to regular unemployment benefits under permanent State and Federal unemployment compensation laws. This Act is impelemtned by Part 615 of Title 20 of the Code of Federal Regulations (20 CFR Part 615).

Extended Benefits are payable in a State during an Extended Benefit Period, which is triggered "on" when unemployment in the State or in all States collectively reaches the high levels set in the Act. During an Extended Benefit Period individuals are eligible for a maximum of up to 13 weeks of benefits, but the total of Extended Benefits and regular benefits together may not exceed 39 weeks.

The Act and the State unemployment compensation laws also provide that an Extended Benefit Period in a State will trigger "off" when unemployment in the State is no longer at the high levels set in the Act. A benefit period actually terminates at the end of the third week after the week for which there is an off indicator.

An Extended Benefit Period commended in the State of Idaho on February 25, 1979, and has now triggered off.

Determination of "Off" Indicator

The head of the employment security agency of the State of Idaho has determined, in accordance with the State law and 20 CFR § 615.12(e), that the average rate of insured unemployment in the State for the period consisting of the week ending on May 19, 1979, and the immediately preceding twelve weeks, has decreased so that for that week there was an "off" indicator in that State. Therefore, the Extended Benefit Period in that State terminates with the week ending on June 9, 1979.

Information for Claimants

Persons who wish information about their rights to Extended Benefits in the State of Idaho should contact the nearest local office of the Idaho Department of Employment.

Signed at Washington, D.C., on June 5, 1979.

Ernest G. Green,
Assistant Secretary for Employment and Training.

[FR Doc. 79-17045 Filed 6-7-79; 8:45 am]
BILLING CODE 4510-30-M

Extended Benefits; Ending of Extended Benefit Period in the State of Pennsylvania

This notice announces the ending of the Extended Benefit Period in the State of Pennsylvania, effective on June 9, 1979.

Background

The Federal-State Extended Unemployment Compensation Act of 1970 (Title II of the Employment Security Amendments of 1970, Public Law 91–373; 26 U.S.C. 3304 note) established the Extended Benefit Program as a part of the Federal-State Unemployment Compensation Program. The Extended Benefit Program takes effect during periods of high unemployment in a State or the nation, to furnish up to 13 weeks of extended unemployment benefits to eligible individuals who have exhausted their rights to regular unemployment benefits under permanent State and Federal unemployment compensation laws. This Act is implemented by Part 615 of Title 20 of the Code of Federal Regulations (20 CFR Part 615).

Extended Benefits are payable in a State during an Extended Benefit Period, which is triggered "on" when unemployment in the State or in all States collectively reaches the high levels set in the Act. During an Extended Benefit Period individuals are eligible for a maximum of up to 13 weeks of benefits, but the total of Extended Benefits and regular benefits together may not exceed 39 weeks.

The Act and the State unemployment compensation laws also provide that an Extended Benefit Period in a State will trigger "Off" when unemployment in the State is no longer at the high levels set in the Act. A benefit period actually terminates at the end of the third week after the week for which there is an off indicator.

An Extended Benefit Period commenced in the State of Pennsylvania on March 11, 1979, and has now triggered off.

Determination of "off" Indicator

The head of the employment security agency of the State of Pennsylvania has determined, in accordance with the State law and 20 CFR § 615.12(e), that the average rate of insured

unemployment in the State for the period consisting of the week ending on May 19, 1979, and the immediately preceding twelve weeks, has decreased so that for that week there was an "off" indicator in that State. Therefore, the Extended Benefit Period in that State terminates with the week ending on June 9, 1979.

Information for Claimants

Persons who wish information about their rights to Extended Benefits in the State of Pennsylvania should contact the nearest local office of the State Department of Labor and Industry.

Signed at Washington, D.C., on June 5, 1979.

Ernest G. Green,

Assistant Secretary for Employment and Training.

BILLING CODE 4510-30-M

Occupational Safety and Health Administration

Hawaii State Standards; Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called Regional Administrator-OSHA) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On January 4, 1974, notice was published in the Federal Register (39 FR 1010) of the approval of the Hawaii plan and the adoption of Subpart Y to Part 1952 containing the decision.

The Hawaii plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under section 6 of the Act. State standards comparable to Federal standard changes and State initiated standards continue to be adopted. Accordingly Hawaii has revised these standards and promulgated them in accordance with applicable State procedures.

Section 1952.310(a) of Subpart Y sets forth the State's procedure for the adoption of at least as effective state standards. By a letter dated January 19, 1979 from Joshua C. Agsalud, Director—Department of Industrial Relations, to Gabriel J. Gillotti, Regional Administrator—OSHA Region IX; and a letter dated April 3, 1979 from Harold W. Barka, Manager Technical and Office Services—Hawaii DOSH, to W. E. (Bill) Stock, Senior Technical Specialist—OSHA Region IX, and incorporated as part of the Plan, the State submitted proof documents concerning the adoption of Federal standard changes, and State initiated changes to 29 CFR Part 1910. These changes include a group of standard revocations, and the promulgation of the permanent standard for 1,2-Dibromo-3-Chloropropane (DBCP).

These standard changes, which are contained in Hawaii Occupational Safety and Health Standards—Rules and Regulations—Revision #4, were promulgated by the State after public hearings.

2. *Decision.* The State submission has been reviewed with the comparable Federal standards. It has been determined that the State standards are at least as effective as the related Federal standards. The detailed standards comparison is available for review at the locations indicated below.

3. *Location of Supplement for Inspection and Copying.* A copy of the standard supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, 450 Golden Gate Avenue, Room 9470, San Francisco 94102; and the offices of the Department of Labor and Industrial Relations, Room 306, 825 Mililani Street, Honolulu, Hawaii 96813; and the Technical Data Center, Room N2439R; 3rd and Constitution Avenue N.W., Washington, D.C. 20210.

4. *Public Participation.* Under § 1953.2(c) of this chapter, the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Hawaii plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reason.

The standards were adopted in accordance with the procedural requirements of State law which included public comment and further public participation would be repetitious.

This decision is effective June 8, 1979.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at San Francisco, California this 11th day of May, 1979.

Gabriel J. Gillotti,

Regional Administrator.

[FR Doc. 79-17507 Filed 6-7-79; 8:45 am]

BILLING CODE 4510-26-M

Iowa State Standards; Approval

1. Background. Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On July 20, 1973, notice was published in the Federal Register (38 FR 19363) of the approval of the Iowa plan and the adoption of Subpart J to Part 1952 containing the decision.

The Iowa plan provides for the adoption of Federal standards as State standards (by reference or after comments and public hearing). Section 1952.183 of Subpart J sets forth the State's schedule for the adoption of Federal standards. By letter dated November 29, 1978, from Walter Johnson, Deputy Commissioner of Labor, to Vernon A. Strahm, Regional Administrator for Occupational Safety and Health Administration and incorporated as part of the plan, the State submitted State standards comparable to 1) 29 CFR 1910.401, 402, 410, 411, 420, 421, 422, 423, 424, 425, 426, 427, 430, 440, and 441 as published in Federal Register (42 FR 37668) dated July 22, 1977; 2) 29 CFR 1910.1044 as published in Federal Register (43 FR 11527) dated March 17, 1978; 3) 29 CFR 1910.19(e), 1910.1000, and 1910.1018 as published in the Federal Register (43 FR 19624) dated May 5, 1978; 4) 29 CFR 1910.1046(a) as published in Federal Register (43 FR 27434) dated June 23, 1978; 5) 29 CFR 1910.19(f), 1910.1000, and 1910.1043 as published in the Federal Register (43 FR 27394) dated June 23, 1978; 6) 29 CFR 1910.1018, 1910.19, 1910.1043, and 1910.1046 as published in Federal Register (43 FR 28472–28473) dated June 30, 1978; 7) 29 CFR 1910.20 as published in Federal Register (43 FR

31330) dated July 21, 1978; 8) Miscellaneous Corrections as published in Federal Register (43 FR 53032) dated August 8, 1978; 9) 29 CFR 1928.605(e) as published in Federal Register (43 FR 37668) dated July 22, 1977; 10) 29 CFR 1928.21(b) as published in Federal Register (42 FR 37668) dated July 22, 1977; 11) 29 CFR 1928.21(b) as published in Federal Register (42 FR 38569) dated July 29, 1977; 12) 29 CFR 1928.21(a)(5) as published in Federal Register (43 FR 27463) dated June 23, 1978; 13) 29 CFR 1928.21 and 1928.113 as published in Federal Register (43 FR 28474) dated June 30, 1978; 14) Miscellaneous Corrections as published in Federal Register (43 FR 35036) dated August 8, 1978. These standards, which are contained in Chapter 88 of the Code of Iowa (1975), were promulgated after public comment requested on September 1, 1978, hearings held on October 25, 1978, resolution adopted by Iowa Bureau of Labor on November 3, 1978, pursuant to Chapter 17a of the Code. The standards will be effective on January 18, 1978, and were published by the State on November 29, 1978.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards it has been determined that the State standards are identical to the Federal standards.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Associate Assistant Secretary for Regional Programs, OSHA, Room N3606, 200 Constitution Avenue NW., Washington, D.C. 20210; Technical Data Center, OSHA, Room N2439, 200 Constitution Avenue, NW., Washington, D.C. 20210; Office of the Regional Administrator, OSHA, Room 3000 Federal Office Building, 911 Walnut Street, Kansas City, Missouri 64106; and Iowa Bureau of Labor, 307 E. Seventh Street, Second Floor, Des Moines, Iowa 50319.

4. *Public participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Iowa State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

1. The standards are identical to the Federal standards and are therefore deemed to be at least as effective.

2. The standards were adopted in accordance with the procedural requirements of State law and further participation would be unnecessary.

This decision is effective June 8, 1979. (Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667)).

Signed at Kansas City, Missouri this 14th day of May 1979.

Vernon A. Strahm,

Regional Administrator.

[FR Doc. 79-17880 Filed 6-7-79; 8:45 am]

BILLING CODE 4510-26-M

Utah State Standards; Approval

1. *Background.* Part 1953 of title 29, Code of Federal Regulations, prescribes procedures under Section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (Hereinafter called the Regional Administrator) under the delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with Section 18(c) of the Act and 29 CFR Part 1902. On January 10, 1973, notice was published in the Federal Register (38 FR 1178) of the approval of the Utah Plan and the adoption of Subpart E to Part 1952 containing the decision.

The Utah Plan provides for the adoption of Federal Standards as State Standards by:

1. Advisory Committee recommendation.

2. Publication in newspapers of general/major circulation with a 30-day waiting period for public comment and hearing(s).

3. Commission order adopting the standards and designating an effective date.

4. Providing certified copies of Rules and Regulations or Standards to the Office of the State Archivist.

Section 1952.113 of Subpart E sets forth the State's schedule for adoption of Federal Standards. By letter dated March 3, 1979, from Ronald L. Joseph, Administrator, Utah Occupational Safety and Health Division, to Curtis A. Foster, Regional Administrator, and incorporated as part of the Plan, the State submitted rules and regulations concering 29 CFR 1910.1045 Occupational Exposure to Acrylonitrile (Vinyl Cyanide); 29 CFR 1910.19, Special Provisions for Air Contaminants; Paragraph (c) Acrylonitrile Section 1910.1045 and 29 CFR 1910.1000, Air Contaminants, Table Z-1, deleting the line "Acrylonitrile—20—60 from table Z-1, (43 FR 45510) Tuesday, October 3, 1978. These standards, which are contained in the Utah Occupational Safety and Health Rules and Regulations for General Industry, were promulgated per the requirements of Utah Code annontated 1953, Title 63-46-1, and in addition, published in newspapers of general/major circulation throughtout the State. No public comment was received and no hearings held.

The Standards for 29 CFR 1910.1045 Occupational Exposure to Acrylonitrile (Vinyl Cyanide); 29 CFR 1910.19, Special Provisions for Air Contaminants; Paragraph (c) Acrylonitrile Section 1910.1045 and 29 CFR 1910.1000, Air Contaminants, Table Z-1, deleting the line "Acrylonitrile—20—50 from table Z-1, were adopted by the Industrial Commission of Utah, Archives File Nuber 3137 on January 26, 1979, pursuant to Title 35-9-6 Utah code annotated 1953.

2. *Decision.* The State submission having been reviewed in comparison with the Federal Standards, it has been determined that the State Standards are idential to the Federal Standards and accordingly should be approved.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Room 1554, Federal Office Building, 1961 Stout Street, Denver, Colorado 80294; Utah State Industrial Commission, UOSHA Offices at 448 South 400 East, Salt Lake City, Utah 84111; and the Technical Data Center, Room N2439R, 3rd Constitution Avenue, NW., Washington, D.C. 20210.

4. *Public participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Utah State Plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

The Standards were adopted in accordance with the procedural requirements of State law which permitted public comments, and further public participation would be repetitious.

This decision is effective June 8, 1979.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at Denver, Colorado, this 26th day of March 1979.

Curtis A. Foster,

Regional Administrator.

[FR Doc. 79-17881 Filed 6-7-79; 8:45 am]

BILLING CODE 4510-28-M

Office of the Secretary

Steel Tripartite Committee; Meeting

The Steel Tripartite Committee was established under the Federal Advisory Committee Act, 5 U.S.C. App. (1976) to advise the Secretary of Labor and Secretary of Commerce on international and domestic issues affecting the U.S. Steel industry and labor.

Notice is hereby given that the Steel Tripartite Committee will meet at 2:00 p.m. on June 25, 1979, in the Secretary's Conference Room S-2508, U.S. Department of Labor, 200 Constitution Avenue, Washington, D.C. 20210.

Items to be discussed are the impact of the Multilateral Trade Negotiations on the U.S. steel industry and labor, the status of the recommendations of the Interagency Steel Task Force, and the future work of the Steel Tripartite Committee. The public is invited to attend. A limited number of seats will be available to the public on a first-come basis.

For additional information contact: Mr. David L. Mallino, Executive Secretary, Steel Tripartite Committee, Labor Management Services Administration, U.S. Department of Labor, Washington, D.C. 20210, Telephone (202) 523-7461 or Mr. A. M. Brueckmann, Director, Iron and Steel Division, Office of Basic Industries and Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, Telephone (202) 377-4412.

Official records of the meeting will be available for public inspection at N5653, U.S. Department of Labor, Washington, D.C., 20210.

Signed at Washington, D.C., this 8th day of June 1979.

Howard D. Samuel,

Deputy Under Secretary For International Affairs, U.S. Department of Labor.

[TA-W-3994]

American Heat Reclaiming Corp., Lykins, Pa.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on March 30, 1979 in response to a worker petition received on March 30, 1979 which was filed by the International Union of Electrical, Radio, and Machine Workers on behalf of workers and former workers producing spiral heat exchangers, place heat exchangers and welding sheet steel. The investigation revealed that the plant produces welding sheet steel for internal use only. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The ratio of imports to shipments of all heat exchangers has remained under 1 percent since 1974. Imports of spiral heat exchangers were negligible during that time.

Since American heat and its parent company hold the patent on the design and sale of spiral heat exchangers, decreases in company sales of this type of exchanger are attributable to customer demand declines.

Following the transfer of production of plate heat exchangers from American Heat to a corporate affiliate in March 1978, quantity of corporate sales of this type of exchanger increased during the period March 1978 through February 1979 as compared to the period March 1977 through February 1978.

As a result of this transfer of production, employment at American Heat is on the decline, while employment at the corporate affiliate is currently increasing.

Conclusion

After careful review, I determine that all workers of American Heat Reclaiming Corporation, Lykins, Pennsylvania are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 29th day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

[FR Doc. 79-17882 Filed 6-7-79; 8:45 am]

BILLING CODE 4510-28-M

Appalachian Resources Co.; Charleston, W. Va.; Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to

begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 18, 1979.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 18, 1979.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 4th day of June 1979.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-28-M

[TA-W-5303]

Arco Auto Carriers, Inc., Little Ferry-Ridgefield, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on April 26, 1979, in response to a worker petition received on April 12, 1979, which was filed by the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America on behalf of workers and former workers of Arco Auto Carriers, Ridgefield, New Jersey, engaged in delivering cars to the metropolitan areas. The investigation revealed that the legal title of the firm is Arco Auto Carriers, Incorporated, and that the proper location of the firm is Little Ferry-Ridgefield, New Jersey.

Arco Auto Carriers, Incorporated, Little Ferry-Ridgefield, New Jersey is engaged primarily in providing the service of transporting automobiles and utility vehicles from railheads to nearby automobile dealers.

Thus, workers of Arco Auto Carriers, Incorporated, Little Ferry-Ridgefield, New Jersey do not produce an article within the meaning of section 222(3) of the Act. Therefore, they may be certified only if their separation was caused importantly by a reduced demand for their services from a parent firm, a firm otherwise related to Arco Auto Carriers, Incorporated by ownership, or a firm related by control. In any case, the reduction in demand for services must originate at a production facility whose workers independently meet the statutory criteria for certification and that reduction must directly relate to the product impacted by imports.

Arco Auto Carriers, Incorporated and its customers have no controlling interest in one another. The subject firm, although affiliated with the Troyler Corporation, a producer of trailers, rarely transports the products of that company.

All workers engaged in transporting automobiles and utility vehicles at Arco Auto Carriers, Incorporated, Little Ferry-Ridgefield, New Jersey are employed by that firm. All personnel actions and payroll transactions are controlled by Arco Auto Carriers, Incorporated. All employee benefits, are provided and maintained by Arco Auto Carriers, Incorporated. Workers are not, at any time, under employment or supervision by customers of Arco Auto Carriers, Incorporated. Thus, Arco Auto Carriers, Incorporated, and not any of its customers, must be considered to be the "workers' firm".

Conclusion

After careful review, I determine that all workers of Arco Auto Carriers, Incorporated, Little Ferry-Ridgefield, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

BILLING CODE 4510-28-M

[TA-W-5145]

Avtex Fibers, Inc., Aston, Pa.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment

assistance, each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on April 5, 1979 in response to a worker petition received on April 3, 1979 which was filed by the Amalgamated Clothing and Textile Workers Union on behalf of workers and former workers producing rayon fibers at the Aston, Pennsylvania plant of Avtex Fibers, Incorporated. The investigation revealed that the plant produces predominantly fabricated glass tubing and metal spinnerettes used in the production of rayon staple fiber and yarn. The investigation also revealed that the intention of the petitioner is to confine the investigation to workers employed in the glass department. It is concluded that all of the requirements have been met with respect to fabricated glass tubing.

There are two production departments at the Aston, Pennsylvania plant of Avtex Fibers, one producing fabricated glass tubing, and the other producing spinnerettes. There have not been any employment declines in the spinnerette department.

Imports of rayon and acetate staple fibers and yarns increased in 1977 to 82 million compared to 69 million pounds in 1976.

All of the glass tubing produced at the Aston plant is transferred to the Front Royal, Virginia or Nitro, West Virginia plants of Avtex Fibers. Most of the fabricated glass tubing produced at the Aston plant is used in the production of rayon tire yarn at the Front Royal, Virginia plant.

Workers at the Nitro, West Virginia and Front Royal, Virginia plants of Avtex Fibers, Incorporated have been certified eligible to apply for adjustment assistance: Nitro, West Virginia (TA-W-2845) on May 10, 1978 and Front Royal, Virginia (TA-W-4184) on January 12, 1979.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with rayon staple fiber and yarn produced at the Nitro, West Virginia and Front Royal, Virginia plants of Avtex Fibers, Incorporated contributed importantly to the decline in sales or production and to the total or partial separation of workers engaged in employment related to the production of fabricated glass tubing at the Aston, Pennsylvania plant of Avtex Fibers, Incorporated. In accordance with the provisions of the Act, I make the following certification:

"All workers of the Aston, Pennsylvania plant of Avtex Fibers, Incorporated engaged in the production of fabricated glass tubing who became totally or partially separated from employment on or after September 1, 1978 and before December 31, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974. All workers who became separated after December 31, 1978 are denied eligibility to apply for adjustment assistance."

Signed at Washington, D.C. this 31st day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

BILLING CODE 4510-28-M

[TA-W-5113]

BBC Coal Co., McDowell County, W. Va.; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974 (19 U.S.C. 2273), an investigation was initiated on April 5, 1979 in response to a worker petition received on April 2, 1979 which was filed by the United Mine Workers of America on behalf of workers and former workers mining coal at the BBC Coal Company, BBC Truck Mine, McDowell County, West Virginia.

During the course of the investigation, it was revealed that the correct name of the company is the BBC Coal Company and that it mines metallurgical coal.

The Notice of Investigation was published in the Federal Register on April 13, 1979 (44 FR 22206). No public hearing was requested and none was held.

The BBC Coal Company began mining coal during July, 1978. Due to the short term of BBC Coal's operation and to the difficulties associated with starting up a new mine, there is not sufficient information in this case upon which to base a determination. In addition, worker qualifying requirements in section 231 of the Act may not be met at this time. Consequently, the investigation has been terminated.

Signed at Washington, D.C. this 1st day of June, 1979.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Bellmore Coats, Lindenhurst, N.Y.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on March 28, 1979 in response to a worker petition received on March 22, 1979 which was filed on behalf of workers and former workers producing women's sportswear, raincoats and coats at Bellmore Coats, Lindenhurst, New York. The investigation revealed that the plant produces ladies' jackets and coats. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivisions have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

A Departmental survey was conducted with manufacturers for whom Bellmore Coats produced ladies' coats and jackets. The survey revealed that only one of Bellmore's manufacturers increased its purchases of ladies' coats and jackets from foreign sources. This manufacturer, however, also increased its contract work with Bellmore during 1978 and in the first quarter of 1979 as compared to the first quarter of 1978. Several manufacturers, who ceased doing business with Bellmore Coats in 1978, indicated that they will be meeting their needs for coat and jacket production from domestic sources.

Conclusion

After careful review, I determine that all workers of Bellmore Coats, Lindenhurst, New York are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 25th day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

[TA-W-4540]

Bergen Knitting Mills, Inc., Union City, N.J.; Revised Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor issued a Certification of Eligibility to Apply for Adjustment Assistance on Februry 22, 1979, applicable to workers and former workers of Bergen Knitting Mills, Inc., Union City, New Jersey. The Notice of Certification was published in the Federal Register on March 2, 1979, (44 FR 11864).

On the basis of additional information, the Office of Trade Adjustment Assistance, on its own motion, reviewed the Department's determination with regard to the petition filed on behalf of workers and former workers at Bergen Knitting Mills, Inc. The original certification applies to the workers producing men's, ladies' and children's sweaters at Bergen Knitting Mills. The eligibility to apply for adjustment assistance of the workers of William Two Sweaters, Ltd., Union City, New Jersey, a direct selling office of Bergen Knitting Mills, was not specifically addressed in the Department's Notice of Determination. William Two Sweaters is affiliated with Bergen Knitting Mills by virtue of common ownership, and the fact that sales and employment at William Two are closely tied to production at Bergen. It is concluded that the two entities constitute a single firm for purposes of section 222 of the Trade Act of 1974 and 29 CFR 90.2.

The certification is revised to cover all workers at Bergen Knitting Mills and William Two Sweaters who were adversely affected by the decline in sales and employment resulting from increased import competition.

The revised certification applicable to TA-W-4540 is hereby issued as follows:

All workers of Bergen Knitting Mills, Inc., Union City, New Jersey, and William Two Sweaters, Ltd., New York, New York, who became totally or partially separated from employment on or after August 19, 1978, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 31st day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

BILLING CODE 4510-28-M

[TA-W-5196]

Berkshire Leather Corp., Gloversville, N.Y.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on April 10, 1979 in response to a worker petition received on April 6, 1979 which was filed on behalf of workers and former workers inspecting, packaging and shipping sport gloves at the Berkshire Leather Corporation, Gloversville, New York. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Berkshire Leather Corporation is in the business of inspecting, packaging and shipping leather gloves imported from a Philippine company of which Berkshire owns 100 percent stock. The workers at Berkshire have never been engaged in producing these gloves. Some workers are involved in cut and sew operations of glove samples; however, activity at Gloversville is related primarily to the final stages of processing the imported gloves. Therefore, increasing imports of gloves are not a factor in any declines in employment at Berkshire.

Conclusion

After careful review, I determine that all workers of Berkshire Leather Corporation, Gloversville, New York are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 30th day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

[TA-W-5066]

Bethlehem Steel Corp., Bethlehem, Pa.; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974 (19 U.S.C. 2273), an investigation was initiated on March 30, 1979 in response to a worker petition received on March 28, 1979 which was filed on behalf of a group of workers and former workers at the general offices of Bethlehem Steel Corporation in Bethlehem, Pennsylvania.

During the course of the investigation, it was established that all workers at the general offices of Bethlehem Steel Corporation in Bethlehem, Pennsylvania and New York, New York were previously certified as eligible to apply for adjustment assistance under TA-W-4275. The notice of revised certification was issued on May 29, 1979.

Since all workers separated, totally or partially, from the general offices of Bethlehem Steel Corporation on or after October 10, 1977 (impact date) and before May 29, 1981 (expiration date of the revised certification) are covered, a new investigation would serve no purpose. Consequently, the investigation has been terminated.

Signed at Washington, D.C. this 30th day of May 1979.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-28-M

[TA-W-5117 and TA-W-5131]

Blue Mt. Mining Co., Inc., and Kencoal Mining Corp., McDowell County, W. Va.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on April 5, 1979 in response to a worker petition received on April 2, 1979 which was filed by the United Mine Workers of America on behalf of workers and former workers mining coal at the Blue Mt. Mine of Blue Mt. Mining Company, Incorporated, McDowell County, West Virginia and the Kencoal Mine of Kencoal Mining Corporation, McDowell County, West Virginia. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Evidence developed during the course of the investigation revealed that Blue Mt. Mining Company, Inc. which closed in June 1978 was, and Kencoal Mining Corporation which succeeded it in July 1978 is an exclusive contractor for Hawley Coal Mining Corporation. All metallurgical coal mined by and for Hawley Coal Mining Corporation is exported to France. Hawley Coal Mining Corporation has not domestic customers.

Conclusion

After careful review, I determine that all workers of Blue Mt. Mining Company, Incorporated, McDowell County, West Virginia and Kencoal Mining Corporation, McDowell County, West Virginia are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 21st day of May 1979.

James F. Taylor,
Director, Office of Management, Administration, and Planning.

BILLING CODE 4510-28-M

[TA-W-5206-5207]

Burroughs Corp., Plymouth, Mich., et. al.; Negative Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on April 10, 1979 in response to a worker petition received on April 9, 1979 which was filed by the United Automobile, Aerospace and Agricultural Implement Workers on behalf of workers and former workers producing computers at the Plymouth, Michigan plant, printers at the Detroit (Tireman Avenue), Michigan plant and sorters at the Wayne, Michigan plant of Burroughs Corporation. The investigation revealed that the Plymouth plant producers mini-computers, the Tireman Avenue plant produces printers and sorters and the Wayne plant produces encoders. In the following determinations, without regard to whether any of the other criteria have been met for workers at the Plymouth, Michigan plant (TA-W-5206) the Detroit (Tireman Avenue), Michigan plant (TA-W-5206) and the Wayne, Michigan plant (TA-W-5207), the following criterion was not met.

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The petitions allege that imports by the Burroughs Corporation of wire harnesses, PC cards and other parts contributed importantly to employment and production declines at the Plymouth and Wayne plants. The Burroughs Corporation transferred wire harness production from the petitioning plants to an offshore corporate facility during the period from 1969 to 1975; all production transfers occurred by 1975.

Section 223 (b)(1) of the Trade Act of 1974 states that a certification under this section shall not apply to any worker whose last total or partial separation from the subject firm occurred more than twelve months prior to the date of filing under Title II, Chapter 2 of the Trade Act of 1974. The date of the petition is April 5, 1979. Therefore, workers laid off prior to April 5, 1978 are not eligible for program benefits under Title II, Chapter 2, Subchapter B of the Trade Act of 1974.

Burroughs Corporation does not import any other component parts which are or have been produced at the Plymouth or Wayne plants nor does Burroughs import any minicomputers, encoders, sorters or printers.

Employment declines at the Plymouth plant occurred as a result of labor-saving technological developments in the company's minicomputer designs. Plant production of minicomputers increased from 1977 to 1978 and increased in the first quarter of 1979 compared to the first quarter of 1978.

Employment declines at the Wayne plant are attributable to labor-saving technological developments in the company's encoder designs and to product line problems with new model encoder production. Plant production of encoders increased from 1977 to 1978. Scheduled production for the first quarter of 1979 was substantially higher than actual production in the first quarter of 1978.

Production and sales of printers and sorters at the Tireman Avenue plant increased from 1977 to 1978 and increased in the first quarter of 1979 compared to the first quarter of 1978. Production worker employment levels increased over this same period of time. Any declines in production at the plant were from quarter to quarter and were the result of normal business fluctuations.

Conclusion

After careful review, I determine that all workers of the Plymouth, Michigan plant, the Detroit (Tireman Avenue), Michigan plant and the Wayne, Michigan plant of the Burroughs Corporation are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 30th day of May 1979.

James F. Taylor,
Director, Office of Management, Administration, and Planning.

BILLING CODE 4510-28-M

[TA-W-4825]

Chein Industries, Inc., Burlington, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on March 13, 1979 in response to a worker petition received on March 8, 1979 which was filed by the United Steelworkers of America on behalf of workers and former workers producing

pressed and stamped metal products such as housewares at Chein Industries, Incorporated, Burlington, New Jersey. The investigation revealed that the corporate title is Chein Industries, Incorporated. The investigation further revealed that the plant primarily produces housewares (cannister sets, bread boxes, straight-sided wastebaskets, nostalgia tins, and step-on cans), and toy trap drum sets. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Sales of all housewares by Chein Industries, Incorporated increased in 1978 compared with 1977. Customers who were surveyed indicated that they did not purchase imported housewares in 1977, 1978, or during the first two months of 1979.

Customers who were surveyed indicated that they did not purchase imported toy trap drum sets in 1977, 1978, or during the first quarter of 1979.

Conclusion

After careful review, I determine that all workers of Chein Industries, Incorporated, Burlington, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

BILLING CODE 4510-28-M

[TA-W-5121]

Eleets Development Corp., Raleigh County, W. Va.; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was inititated on April 5, 1979, in response to a worker petition received on April 2, 1979, which was filed by the United Mine Workers of America on behalf of workers and former workers mining coal at the Eleets Development Corporation, Raleigh County, West Virginia.

Due to the short term of operation of Eleets Development Corporation, there is not sufficient information in this case upon which to base a determination. In addition, worker qualfying requirements in section 231 of the Act may not be met by any employee of Eleets Development Corporation. Consequently, the inviestigation has been terminated.

Signed at Washington, D.C. this 30th day of May 1979.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[TA-W-5066 and TA-W-5067]

The Great Six Co., Minneapolis, Minn., et al.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on March 29, 1979 in response to a worker petition received on March 22, 1979 which was filed on behalf of workers and former workers producing women's dress coats at The Great Six Company, Minneapolis, Minnesota and North Country Outerwear, Brainerd, Minnesota. The investigation revealed that the plants produced women's coats, raincoats and jackets. It is concluded that all of the requirements have been met.

U.S. imports of women's, misses' and children's coats and jackets increased absolutely and relative to domestic production in each year from 1974 through 1977. U.S. imports increased absolutely in 1978 compared to 1977.

U.S. imports of women's, girls' and infants' raincoats increased absolutely in 1977 compared to 1976 and in 1978 compared to 1977.

A Department of Commerce survey of the customers of The Great Six Company and North Country Outerwear indicated that several customers increased their reliance on imported women's coats, raincoats and jackets and decreased their purchases from The Great Six Company and North Country Outerwear.

All production employees of The Great Six Company, Minneapolis, Minnesota were permanently dismissed by March 31, 1978.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with women's coats, raincoats and jackets produced at The Great Six Company, Minneapolis, Minnesota and North Country Outerwear, Brainerd, Minnesota contributed importantly to the decline in sales or production and to the total or partial separation of workers of those firms. In accordance with the provisions of the Act, I make the following certification:

All workers of The Great Six Company, Minneapolis, Minnesota who became totally or partially separated from employment on or after March 19, 1978 and before April 30, 1978 and all workers of North Country Outerwear, Brainerd, Minnesota who became totally or partially separated from employment on or after March 19, 1978 and before January 20, 1979 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 25th day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

Gulton Industries, Inc., Piezo Products Division, Metuchen, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on March 29, 1979 in response to a worker petition received on March 28, 1979 which was filed by the International Union of Electrical, Radio and Machine Workers on behalf of workers and former workers producing miniature chassis used in watches, and elements used in phonographs, citizens band radios and burglar alarms at Gulton Industries, Inc., Piezo Products Division, Metuchen, New Jersey. Without regard to whether any of the other criteria have

been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the abeolute decline in sales or production.

Evidence developed during the course of the investigation revealed that sales, which are based on orders received, and employment within the Piezoelectric Ceramic Element and Hybrid Microcircuit Departments increased in 1978 compared to 1977 and in the first quarter of 1979 compared to the same period in 1978.

The petition was filed on behalf of workers producing miniature chassis used in watches (produced by the Hybrid Microcircuit Department) and elements used in phonographs, CB radios and burglar alarms (produced by the Piezoelectric Ceramic Element Department).

Production of watch chassis by the Hybrid Microcircuit Department was discontinued by December 1977 (more than one year prior to the date of the petition). Since that time the Department has produced printheads. Compared to the same quarter of the previous year, sales and employment within the Hybrid Microcircuit Department increased in three consecutive quarters from the third quarter of 1978 through the first quarter of 1979.

Compared to the same quarter of the previous year, sales and employment within the Piezoelectric Ceramic Element Department increased in four consecutive quarters from the second quarter of 1978 through the first quarter of 1979.

Conclusion

After careful review, I determine that all workers of the Piezo Products Division of Gul'on Industries, Inc., Metuchen, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 25th day of May 1979.

James F. Taylor,

Director, Office of Management, Administraton, and Planning.

Hawley Coal Mining Corp. et al., McDowell County, W. Va., Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on April 5, 1979 in response to a worker petition received on April 2, 1979 which was filed by the United Mine Workers of America on behalf of workers and former workers mining coal at the Pocahontas Empire Bottom Creek Mine (TA-W-5123), Blue Boy No. 6 Mine (TA-W-5125), and No. 10 Bradshaw Mine (TA-W-5126), and cleaning coal at the Pocahontas Empire Preparation Plant (TA-W-5124) of Hawley Coal Mining Corporation, McDowell County, West Virginia. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Evidence developed in the course of the investigation revealed that Hawley Coal Mining Corporation was sold by Belco Petroleum Corporation in 1976. Since that time, all metallurgical coal mined by the three mines of Hawley Coal Mining Corporation and its four contractors has been exported to France. Hawley Coal Mining Corporation has no domestic customers.

Conclusion

After careful review, I determine that all workers of the Pocahontas Empire (Bottom Creek) Mine and Preparation Plant, the Blue Boy No. 6 Mine and No. 10 Bradshaw Mine of Hawley Coal Mining Corporation, McDowell County, West Virginia are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

Irving Tanning Co., Leather Division of the Seagrave Corp., Hartland, Maine; Certification Regarding Eligibility To Apply for Worker Adjusement Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjstment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on April 4, 1979 in response to a worker petition received on April 2, 1979 which was filed on behalf of workers and former workers tanning leather for shoes and accessories at the Irving Tanning Company, Leather Division of the Seagrave Corporation, Hartland, Maine. It is concluded that all of the requirements have been met.

U.S. Imports of tanned cattle hides decreased both absolutely and relatively in 1977 compared to 1976 and increased both absolutely and relatively in 1978 compared to 1977.

The Department conducted a survey of customers who decreased purchases from the Irving Tanning Company. Customers responding to the survey accounted for a marjority of the subject firm's decline in sales from 1977 to 1978. Customers representing a significant proportion of the subject firm's sales decline increased purchases of imported leather.

In the first quarter of 1979 customers continued to decrease purchases from the subject firm while increasing purchases of imports.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with leather for shoes and accessories produced at the Irving Tanning Company, Leather Division of the Seagrave Corporation, Hartland, Maine contributed importantly to the decline in sales or

production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the Irving Tanning Company, Leather Division of the Seagrave Corportation, Hartland, Maine who became totally or partially separated from employment on or after March 28, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 30th day of May 1979.

James F. Taylor,
Director, Office of Management, Administration, and Planning.

Jacobs Brothers Industries, Inc., Moonachie, N.J.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on May 8, 1979 in response to a worker petition received on May 3, 1979 which was filed by the Amalgamated Clothing and Textile Workers' Union on behalf of workers and former workers producing children's and women's outerwear at Jacobs Brothers Industries, Incorporated, Moonachie, New Jersey. It is concluded that all of the requirements have been met.

U.S. imports of women's, misses' and children's coats and jackets increased from 2,252 thousand dozen in 1976 to 2,723 thousand dozen in 1977. Imports increased again in 1978 to 3,036 thousand dozen. The ratio of imports to domestic production increased from 48.3 percent in 1976 to 54.9 percent in 1977.

U.S. imports of women's, girls' and infants' raincoats increased from 242 thousand dozen in 1977 to 465 thousand dozen in 1978.

A survey of some of the customers purchasing children's and women's ski jackets, pants coats and raincoats from Jacobs Brothers Industries, Incorporated revealed that several of the customers had reduced purchases from Jacobs Brothers and increased purchases of imports from 1977 to 1978.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with women's and children's outerwear including ski jackets, pants coats and raincoats produced at Jacobs Brothers Industries, Incorporated, Moonachie New Jersey contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Jacobs Brothers Industris, Incorporated, Moonachie, New Jersey who became totally or partially separated from employment on or after June 1, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 30th day of May 1979.

Jay Lind Veal Corp.; New York, N.Y.; Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the addres shown below, not later than June 18, 1979.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 18, 1979.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 29th day of May 1979.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

Lannom Manufacturing Co., Inc., Ball Division, Tullahoma, Tenn.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

The investigtion was initiated on March 30, 1979 in response to a worker petition received on March 29, 1979 which was filed on behalf of workers and former workers producing baseballs and softballs at Worth Sports Company, Tullahoma, Tennessee. The investigation revealed that Worth Sports Company is the sales and marketing division of Lannom Manufacturing Company and that the petition was filed on behalf of workers and former workers producing baseballs and softballs at the Ball Division of Lannom Manufacturing Company, Incorporated, Tullahoma, Tennessee. It is concluded that all of the requirements have been met.

U.S. imports of baseballs and softballs increased in absolute terms each year from 1975 through 1978. Imports exceeded domestic production by sevenfold in 1977.

Lannom Manufacturing Company is one of the few baseball and softball manufacturers which continues to maintain some domestic production operations (cores, slugs, and covers). A customer survey revealed several major customes who increased purchases of baseballs and softballs manufactured entirely offshore while decreasing purchases from the subject firm.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the baseballs and softballs produced at the Ball Division of Lannom Manufacturing Company, Incorporated, Tullahoma, Tennessee contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act I make the following certification:

All workers of the Ball Division, Lannom Manufacturing Company, Incorporated, Tullahoma, Tennessee who became totally or partially separated from employment on or after March 4, 1979 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 29th day of May 1979.

James F. Taylor,
Director, Office of Management, Administration, and Planning.

Long-Airdox Co., Inc., Oak Hill, W. Va.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on April 10, 1979 in response to a worker petition received on April 9, 1979 which was filed by Local 772 of the United Auto Workers Union on behalf of workers and former workers producing underground mining machinery at the Long-Airdox Company, Incorporated, Oak Hill, West Virginia. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Mining machinery cannot be considered to be like or directly competitive with coke as alleged on the petition. Imports of mining machinery must be considered in determining import injury to workers producing mining machinery at the Long-Airdox Company, Oak Hill, West Virginia.

United States imports of mining machinery declined both absolutely and relative to domestic production in 1978 compared to 1977. In 1978, the value of exports exceeded that of imports by over four and one half times. Sales and production also increased in 1978 compared to 1977 and in the first quarter of 1979 compared to the first quarter of 1978.

Conclusion

After careful review, I determine that all workers of the Long-Airdox Company, Incorporated, Oak Hill, West Virginia are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 21st day of May 1979.

Mirando Manufacturing Co., Inc., Elizabeth, N.J.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on April 25, 1979 in response to a worker petition received on April 23, 1979 which was filed by the Amalgamated Clothing and Textile Workers' Union on behalf of workers and former workers producing men's leather jackets at Mirando Manufacturing Company, Incorporated, Elizabeth, New Jersey. It is concluded that all of the requirements have been met.

Imports of men's, boys', women's, misses', juniors', and children's leather coats and jackets increased absolutely and relative to domestic production in 1978 compared to 1977.

Mirando's only customer (manufacturer) increased purchases of imports during 1978 compared to 1977 and in the first quarter of 1979 compared to the same period of 1978.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's leather jackets produced at Mirando Manufacturing Company, Incorporated, Elizabeth, New Jersey contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Mirando Manufacturing Company, Incorporated, Elizabeth, New Jersey who became totally or partially separated from employment on or after April 16, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

Mr. J's Sportswear, Ltd., Brooklyn, N.Y.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on March 28, 1979 in response to a worker petition received on March 7, 1979 which was filed on behalf of workers and former workers producing women's sportswear, coats and suits at Mr. J's Sportswear, Limited, Brooklyn, New York. The investigation revealed that the company produced women's coats, jackets and women's suit jackets. It is concluded that all of the requirements have been met.

U.S. imports of women's, misses', and children's coats and jackets increased absolutely and relative to domestic production each year from 1974 through 1977. U.S. imports increased absolutely in 1978 compared to 1977.

U.S. imports of women's, misses', and children's suits increased absolutely in 1978 compared to 1977.

A Departmental survey of the customers of Mr. J's Sportswear, Limited indicated that several customers increased their reliance on imported women's, misses' and children's coats and jackets and decreased their purchases from Mr. J's Sportswear, Limited in 1978 compared to 1977.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with women's coats, jackets and suit jackets produced at Mr. J's Sportswear, Limited, Brooklyn, New York contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Mr. J's Sportswear, Limited, Brooklyn, New York who became totally or partially separated from employment on or after September 28, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 25th day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

The Paul Yates Mining Co., Nancy Key Mine, Mercer County, W. Va.; Termination of Investigation

Pursuant to section 223 of the Trade Act of 1974, an investigaton was initiated on April 5, 1979, in response to a worker petition received on April 2, 1979, which was filed by the United Mine Workers of America on behalf of workers and former workers mining coal at the Nancy Key Mine of the Paul Yates Mining Company, Mercer County, West Virginia.

The Paul Yates Mining Company had been in actual operation less than ten months, and the company's Nancy Key Mine had been in operation less than five months at the time of the investigation. Due to the short term of operation of the Paul Yates Mining Company and of its Nancy Key Mine, it is not possible to determine trends of sales and production and to statistically measure the impact of imports. Consequently, the investigation has been terminated.

Signed at Washington, D.C. this 31st day of May 1979.

Marvin M. Fooks,

Director, Office of Adjustment Assistance.

Schick, Inc., Lancaster, Pa., et al.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on March 29, 1979, in response to worker petitions which were filed on behalf of workers and former workers engaged in employment related to the production of hair dryers, curling irons, hair curlers sets, facial saunas and electric shavers at locations of Schick, Incorporated listed in the Appendix to this document.

The investigation revealed that the plant produces primarily hair dryers, curling irons, and hair curlers sets. It is concluded that all of the requirements have been met.

U.S. imports of electric hair setters increased absolutely and relatively from 1976 to 1977 and from 1977 to 1978.

U.S. imports of electric hair dryers increased absolutely and relatively from 1976 to 1977 and from 1977 to 1978.

U.S. imports of electric hair appliances, which includes curling irons, increased absolutely and relatively from 1976 to 1977 and then declined absolutely and relatively from 1977 to 1978.

A Department survey of Schick Incorporated customers indicated increasing reliance on imported hair dryers, curling irons and hair curler sets by respondents. The survey revealed that customers representing a significant proportion of Schick's sales of hair dryers, curling irons and hair curler sets in 1977 and 1978 decreased purchases from the subject firm from 1977 to 1978 and in the first quarter of 1979 compared to the first quarter of 1978 and increased purchases of imported hair dryers, curling irons and hair curler sets during the same time period.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with hair dryers, curling irons and hair curler sets produced by Schick, Incorporated contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the locations of Schick, Incorporated listed in the Appendix, who became totally or partially separated from employment on or after March 28, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 29th day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

Sugar Corp. of Puerto Rico, Central Aguirre, Aguirre, P.R.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on April 6, 1979 in response to a worker petition received on April 3, 1979 which was filed by three workers on behalf of workers and former workers producing raw sugar at Central Aguirre, Puerto Rico. The investigation is expanded to include Taller Aguirre. Taller Aguirre (tractor maintenance shop) is part of the Central Aguirre and together with Taller Reunion, Deseada, Isidora and Destino form part of a unit of support equipment for the mill. It is concluded that all of the requirements have been met.

Imports of cane and beet sugar increased in 1977 from 1976 decreased in 1978 from 1977 and increased in the first 5 months of 1979 compared with similar period in 1978.

During 1978 the Sugar Corporaton of Puerto Rico sold raw sugar at the going U.S. Market price, which is lower than the Corporation's cost of production.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with raw sugar produced at the Sugar Corporation of Puerto Rico, Central Aguirre, Aguirre, Puerto Rico, contributed importantly to the decline in sales or production and to the total or partial separation of workers of that mill. In accordance with the provisions of the Act, I make the following certification:

All workers of the Sugar Corporation of Puerto Rico, Central Aguirre, and Taller Aguirre, Aguirre, Puerto Rico, who become totally or partially separated from employment on or after March 23, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of May 1979.

James S. Taylor,

Director, Office of Management, Administration, and Planning.

Sunday's Workclothes, Inc. et al.; Hauppauge, N.Y.; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974 (19 U.S.C. 2273), investigations were initiated on April 18, 1979 in response to worker petitions received on April 11, 1979 and April 16, 1979 which were filed on behalf of workers and former workers producing ladies' and juniors' sportswear at the Hauppauge, New York facility of Sundays's Workclothes, Inc. (TA-W-5265); Headline Sportswear, Inc. (TA-W-5269); and Arrived Sportswear, Inc. (TA-W-5267)

The Department's investigation revealed that Sunday's Workclothes, Headline Sportswear, and Arrived Sportswear were established in the fourth quarter of 1977 as subsidiaries of Going On Sportswear, an apparel manufacturer. These subsidiaries were established for the purpose of importing ladies' sportswear. Sunday's Workclothes, Headline Sportswear and Arrived Sportswear have no employees. In essence, employees of the three subsidiaries (Sunday's Workclothes, Headline Sportswear, and Arrived Sportswear) and Going On Sportswear were identical. Only the names of the firms were different. Workers at Going On Sportswear are covered under an existing investigation (TA-W-5268) which was instituted in response to a petition received on April 10, 1979. Since Sunday's Workclothes, Headline Sportswear and Arrived Sportswear have no employees, and utilize workers of Going On Sportswear who are covered by an existing petition, these investigations have been terminated.

Signed at Washington, D.C. this 1st day of June 1979.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

T & R Auto Handling Corp., Mahwah, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on April 23, 1979, in response to a worker petition received on April 12, 1979, which was filed by the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America on behalf of workers and former workers of T & R Auto Handling Corporation, Mahwah, New Jersey, engaged in loading cars on railcars.

T & R Auto Handling Corporation, Mahwah, New Jersey is engaged in providing the service of loading and unloading motor vehicles on and off railroad cars. The company is partially owned by Freight Consolidation Services, Incorporated.

Thus, workers of T & R Auto Handling Corporation, Mahwah, New Jersey do not produce an article within the meaning of Section 222(3) of the Act. Therefore, they may be certified only if their separation was caused importantly by a reduced demand for their services from a parent firm, a firm otherwise related to T & R Auto Handling Corporation by ownership, or a firm related by control. In any case, the reduction in demand for services must originate at a production facility whose workers independently meet the statutory criteria for certification and

that reduction must directly relate to the product impacted by imports.

T & R Auto Handling Corporation and its customers have no controlling interest in one another. Freight Consolidation Services, Incorporated, with which T & R Auto Handling Corporation, is affiliated, does not produce an article.

All workers engaged in loading and unloading motor vehicles on and off railroad cars at T & R Auto Handling Corporation, Mahwah, New Jersey are employed by that firm. All personnel actions and payroll transactions are controlled by T & R Auto Handling Corporation. All employee benefits are provided and maintained by T & R Auto Handling Corporation. Workers are not, at any time, under employment or supervision by customers of T & R Auto Handling Corporation. Thus, T & R Auto Handling Corporation, and not any of its customers, must be considered to be the "workers' firm".

Conclusion

After careful review, I determine that all workers of T & R Auto Handling Corporation, Mahwah, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

T & R Auto Handling Corp., Newark, N.J.; Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on April 30, 1979, in response to a worker petition received on April 12, 1979, which was filed by the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America on behalf of workers and former workers of T & R Handling Corporation, Newark, New Jersey, engaged in the unloading of motor vehicles. The investigation revealed that the legal title of the company is T & R Auto Handling Corporation.

T & R Auto Handling Corporation, Newark, New Jersey is engaged in unloading motor vehicles from railroad cars. The subject firm is partially owned by Freight Consolidated Services, Incorporated.

Thus, workers of T & R Auto Handling Corporation, Newark, New Jersey do not produce an article within the meaning of section 222(3) of the Act. Therefore, they may be certified only if their separation was caused importantly by a reduced demand for their services from a parent firm, a firm otherwise related to T & R Auto Handling Corporation by ownership, or a firm related by control. In any case, the reduction in demand for services must originate at a production facility whose workers independently meet the statutory criteria for certification and that reduction must directly relate to the product impacted by imports.

T & R Auto Handling Corporation and its customers have no controlling interest in one another. Freight Consolidation Services, Incorporated, with which T & R Auto Handling Corporation is affiliated, does not produce an article.

All workers engaged in unloading motor vehicles from railroad cars at T & R Auto Handling Corporation, Newark, New Jersey are employed by that firm. All personnel actions and payroll transactions are controlled by T & R Auto Handling Corporation. All employee benefits are provided and maintained by T & R Auto Handling Corporation. Workers are not, at any time, under employment or supervision by customers of T & R Auto Handling Corporation. Thus, T & R Auto Handling Corporation, and not any of its customers, must be considered to be the "workers' firm".

Conclusion

After careful review, I determine that all workers of T & R Auto Handling Corporation, Newark, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of May 1979.

BILLING CODE 4510-28-M

[TA-W-2329, et al.]

United States Steel Corp., Canisteo District, Coleraine, Minn., et al.; Negative Determination Regarding Application for Reconsideration

By letters of September 14, 1978, and February 2, 1979, the petitioning union requested administrative reconsideration of the Department of Labor's Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance in the case of all workers engaged in the mining and beneficiation of iron ore at the U.S. Steel Corporation's Minnesota Ore Operations at the Canisteo District, Coleraine, Minnesota; Virginia-Eveleth District, Virginia, Minnesota; and the Hibbing-Chisholm District, Hibbing, Minnesota. The determination was published in the Federal Register on August 25, 1978, (43 FR 38134).

Pursuant to 29 CFR 90.18(c), reconsideration may be granted under the following circumstances:

(1) if it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) if it appears that the determination complained of was based on a mistake in the determination of facts previously considered; or

(3) if, in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justifies reconsideration of the decision.

The petitioning union supported by their local U.S. Congressmen from Minnesota claims that imports of iron ore from Canada increased at U.S. Steel facilities at Chicago's South Works, Gary, Indiana, and Lorain, Ohio, in 1977 and especially in the first quarter of 1978 thereby preventing the recall of its workers after the strike ended in December 1977. The affected workers were not called back to work until the Canadian iron ore strike which began in March 1978. The petitioner also claimed that the denial is inconsistent with the Department's certification of Erie Mining Company workers (TA-W-2794 and 2795). Lastly, the petitioning union claims that the Department's use of the ore depletion rationale in its denial notice is specious since U.S. Steel has every intention of utilizing the natural ore mines in the future.

The Department's review of its original determination revealed that the import criterion of the Trade Act of 1974 was not met by the workers. While imports of iron ore, pellets and sinter declined absolutely in 1977 compared to 1976, they increased relative to domestic production. However, this was primarily

due to a strike within the domestic mining industry in 1977 which seriously affected domestic production. Declines in employment and production at the petitioning mining districts were found to have come about as a result of the depletion of the ore in these mines. As the production of natural ore at these mines decreased, U.S. Steel has increased employment in taconite production at its nearby Minntac facility.

The Department does not consider as valid the petitioning union's claim of increased Canadian exports of iron ore to U.S. Steel facilities especially during 1977 and the first quarter of 1978 thereby preventing the miners from returning to work after their strike (August 1, 1977, to December 16, 1977). Canadian iron ore shipments to the U.S. Steel plants in question have actually decreased each year since 1976. There were no Canadian ore exports to the South Works in Chicago, Gary and Lorain facilities in the first quarter of 1978.

The Department's further investigation has shown that in those U.S. Steel works using Minnesota natural ore, there has been an increasing switch to pellets from U.S. Steel's Minntac pellet plant. Pellets from Minntac in 1978 were replacing Minnesota natural ore at U.S. Steel facilities in Illinois, Ohio and Indiana and also in the Monogahela Valley.

The Department's negative determination in the subject case in not inconsistent with the one made in the case of a petition filed on behalf of workers at the Erie Mining Company, Hoyt Lakes, Minnesota, TA-W-2794 and 2795. The Department's review revealed that the Erie Mining Company's declines in employment and in the production and sales of iron ore pellets in 1976 and 1977 were the result of increased imports of iron ore pellets by a major customer which reduced the need for iron ore pellets produced by the Erie Mining Company. In the subject case, there is no element of a switch to imports but rather a switch to iron ore pellets from the natural ore which supports the Department's basis for its initial denial because of the increasing economic exhaustion of the natural ore.

The Department does not agree with the petitioning union's claim that the ore depletion rationale, mentioned in the Department's initial denial, is specious since the combined iron ore shipments from the three natural ore districts have decreased from 1975 through 1978 while the taconite pellet shipments from Mintac have increased. Similarly, average annual employment at the three petitioning mining districts declined each year since 1976, even excluding the strike period, while it increased each year at Minntac. Officials from the company and the U.S. Bureau of Mines have also indicated that most of the high grade natural ore has been extracted from the Mesabi Iron Ore Range.

Conclusion

After review of the application and the investigative file, I conclude that there has been no error or misinterpretation of fact or misinterpretation of the law which would justify reconsideration of the Department of Labor's prior decision. The application is, therefore, denied.

Signed at Washington, D.C., this 31st day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

BILLING CODE 4510-28-M

[TA-W-5137—5140B]

Mining Division Vecillio and Grogan, Inc., Beckley, W. Va.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

Whitby Strip Mine, Raleigh County, West Virginia (TA-W-5137)
Whitby Auger Mine, Raleigh County, West Virginia (TA-W-5138)
Sullivan Mine #1, Raleigh County, West Virginia (TA-W-5139)
Sullivan Mine #2, Raleigh County, West Virginia (TA-W-5140)
Mining Division Office, Beckley, West Virginia (TA-W-5140A)
Mining Division Field Office, Stoco, West Virginia (TA-W-5140B)

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on April 5, 1979 in response to a worker petition received on April 2, 1979 which was filed by the United Mine Workers of America on behalf of workers and former workers producing metallurgical coal at the following facilities of Vecillio and Grogan, Incorporated Mining Division: Whitby Strip Mine, Whitby Auger Mine, Sullivan Mine #1, and Sullivan Mine #2, all located in Raleigh County, West Virginia. The investigation was expanded to include the Mining Division's main office in Beckley, West Virginia and field office in Stoco, West Virginia. It is concluded that all of the requirements have been met.

U.S. imports of metallurgical coal are negligible. However, coke is metallurgical coal in a later stage of processing, and is therefore "directly competitive" with metallurgical coal. U.S. imports of coke increased on an absolute basis and relative to domestic production in 1977 as compared to 1976 and in 1978 as compared to 1977.

The Department of Labor conducted a survey of customers of the major coal distributor which bought and resold Vecillio and Grogan's metallurgical coal. From 1977 to 1978 some major customers surveyed decreased purchases of metallurgical coal from that distributor and increased purchases of imported coke.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with metallurgical coal produced at Vecillio and Grogan, Incorporated, Mining Division contributed importantly to the decline in sales or production and to the total or partial separation of workers of that division. In accordance with the provisions of the Act, I make the following certification:

All workers of the Whitby Strip Mine, Raleigh County, West Virginia; the Whitby Auger Mine, Raleigh County, West Virginia; the Sullivan Mine #1, Raleigh County, West Virginia; the Sullivan Mine #2, Raleigh County, West Virginia, and the Beckley and Stoco, West Virginia offices of the Mining Division of Vecillio and Grogan, Incorporated who became totally or partially separated from employment on or after March 28, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31th day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

BILLING CODE 4510-28-M

[TA-W-4718]

Westforth Manufacturing Co., Inc., Williamsport, Pa.; Revised Notice of Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

On May 17, 1979, the Department made an Affirmative Determination Regarding Application for Reconsideration for workers and former workers of Westforth Manufacturing Company, Inc., Williamsport, Pennsylvania. This determination was published in the Federal Register on May —, 1979, (44 FR——

On the basis of new information supplied by the management of Peters Sportswear Company, Inc., Philadelphia, Pennsylvania, a further investigation was made by the Director of the Office of Trade Adjustment Assistance. The investigation revealed that a worker group included in the Department's denial of Westforth Manufacturing in fact performed function separate from those of the remainder of the plant.

Westforth Manufacturing is a wholly-owned subsidiary of Peters Sportswear. On March 16, 1979, the Department denied eligibility to apply for adjustment assistance to the workers of Westforth Manufacturing and certified the workers of Peters Sportswear. The basis for the denial of Westforth Manufacturing was that sales and production at the firm had increased absolutely from 1976 through 1978.

The workers in the shipping and contract inspection departments in the warehouse of Westforth Manufacturing produced exclusively for Peters Sportswear. They did not participate in contracts Westforth Manufacturing had with companies other than Peters Sportswear. Production and employment in these two departments were dependent upon conditions at Peters Sportswear.

Conclusion

In view of the above, it is concluded that imports of articles like or directly competitive with men's and boys' outercoats and jackets and leather coats and jackets produced by Peters Sportswear Company, Inc., contributed importantly to the separations of workers and to the decline in sales in the shipping and contract inspection departments of Westforth Manufacturing Company, Inc., Williamsport, Pennsylvania.

The revised notice of determination applicable to TA-W-4718 is hereby issued as follows:

All workers engaged in shipping and contract inspection at the Westforth Manufacturing Company, Inc., Williamsport Pennsylvania, who became totally or partially separated from employment on or after August 18, 1978, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 30th day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

[FR Doc 79-17892 Filed 6-7-79; 8:45 am]

BILLING CODE 4510-28-M

[TA-W-5119]

Weyenberg Shoe Manufacturing Co., Waterloo, Wis.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on April 4, 1979 in response to a worker petition received on April 3, 1979 which was filed by the Boot and Shoe Workers Union on behalf of workers and former workers producing men's shoes at the Waterloo, Wisconsin plant of the Weyenberg Shoe Manufacturing Company. It is concluded that all of the requirements have been met.

U.S. imports of men's dress and casual footwear increased absolutely and relative to domestic production in 1977 compared to 1976 and increased relative to domestic production in 1978 compared to 1977. Imports as a percentage of production exceeded 75 percent in 1976, 1977, and 1978.

Weyenberg owns and operates two men's footwear plants abroad in Ireland. Weyenberg increased imports of men's footwear in 1978 compared to 1977 and in the first quarter of 1979 compared to the first quarter of 1978.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's shoes produced at the Waterloo, Wisconsin plant of the Weyenberg Shoe Manufacturing Company contribute importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the Waterloo, Wisconsin plant of the Weyenberg Shoe Manufacturing Company who became totally or partially separated from employment on or after March 9, 1979 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31th day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

BILLING CODE 4510-28-M

[TA-W-5161]

Whitehall Manufacturing Corp., Whitehall, N.Y.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on April 5, 1979 in response to a worker petition received on March 28, 1979 which was filed on behalf of workers and former workers producing men's shirts at the Whitehall, New York plant of Whitehall Manufacturing Corporation. The investigation revealed that the correct name of the subject firm is Whitehall Manufacturing Corporation and that the plant is located in Whitehall, New York. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have

contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The Department of Labor conducted a survey of the manufacturer for whom Whitehall Manufacturing performed contract sewing of shirts and of most of Whitehall Manufacturing's own customers. The survey revealed that the manufacturer did not employ foreign contractors or purchase imported men's shirts, and that most of Whitehall Manufacturing's own customers who were surveyed did not increase purchases of imported men's shirts during a period in which they decreased purchases from Whitehall. Those customers that did reduce purchases from Whitehall and increase purchases of imports represented an insignificant proportion of total company sales.

Conclusion

After careful review, I determine that all workers at the Whitehall, New York plant of Whitehall Manufacturing Corporation are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

BILLING CODE 4510-28-M

[TA-W-5191]

Winston Coal Co., Davy, W. Va.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on April 6, 1979 in response to a worker petition received on April 2, 1979 which was filed by the United Mine Workers of America on behalf of workers and former workers mining coal at the Winston Coal Company, Davy, West Virginia. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Winston Coal Company produces metallurgical coal exclusively for its parent company. The parent company's total sales of metallurgical coal increased in terms of quantity in 1978 compared with 1977 and in the first quarter of 1979 compared with the like quarter of 1977. A United Mine Worker's Mine Worker's strike in the first quarter of 1978 precludes the use of this period for comparison. The parent company's production of metallurgical coal at company-operated mines increased in terms of quantity in 1978 compared with 1977 and in the first two months of 1979 compared with the like period of 1977.

Most of the coal sold by the parent company in 1978 and the first quarter of 1979 was exported.

Conclusion

After careful review, I determine that all workers of Winston Coal Company, Davy, West Virginia are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of May 1979.

James F. Taylor,

Director, Office of Management, Administration, and Planning.

BILLING CODE 4510-28-M

LEGAL SERVICES CORPORATION

Grants and Contracts

June 6, 1979.

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355, 88 Stat. 378, 42 U.S.C. 2996-2996*l*, as amended, Pub. L. 95-222 (December 28, 1977). Section 1007(f) provides: "At least 30 days prior to the approval of any grant application or prior to entering into a contract or prior to the initiation of any other project, the Corporation shall announce publicly . . . such grant, contract or project."

The Legal Services Corporation hereby announces publicly that it is considering the grant application submitted by:

Southern Arizona Legal Aid in Tucson, Arizona to serve Native Americans on or near the Ak-Chin, Fort McDowell, Gila River and Salt River Reservations.

Interested persons are hereby invited to submit written comments or recommendations concerning the above application to the Regional Office of the Legal Services Corporation at:

Legal Services Corporation, Denver Regional Office, 1726 Champa Street, Suite 500, Denver, CO 80202.

Dan J. Bradley,

President.

BILLING CODE 6820-35-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (79-68)]

NASA Advisory Council (NAC)-Space and Terrestrial Applications Advisory Committee (STAAC) Meeting

The ad hoc Informal Advisory Subcommittee on Materials Processing in Space (MPS) of the NAC-STAAC will meet in Room 226A of NASA Headquarters, 600 Independence Avenue, SW., Washington, D.C., from 9:00 a.m. to 3:00 p.m. on June 22, 1979. The morning session of the meeting is open to the public. Members of the public will be admitted to the meeting on a first-come, first-served basis up to the room's seating capacity of 15 persons, and will be required to sign a visitors' register.

From 9:00 a.m. to 12:00 noon, the Subcommittee will review plans and progress in the MPS program's Floating Zone Experiment System project and will discuss the program's Five Year Plan for 1981-85. The approved agenda for this part of the meeting is as follows:

June 22, 1979

Time and Topic

9:00 a.m.—Introductory Remarks.
9:30 a.m.—Presentation on the Floating Zone Experiment System.
10:30 a.m.—Presentation of MPS Program Five Year Plan.
11:30 a.m.—Discussion.
12:00 noon—Adjourn.

At 1:00 p.m., the Subcommittee will reconvene to recommend candidates for membership on an ad hoc peer review panel to perform scientific evaluations of technical proposals received by the MPS program, taking account of the discipline areas covered in the program's plans, the areas of expertise of the candidates considered, and the need to avoid conflicts of interest on the part of investigators who are known to be preparing proposals. Public

discussion of the professional qualifications of candidates for membership in the panel would invade the privacy of these scientists and other individuals associated with their research. Since the afternoon session of the Subcommittee meeting will be concerned throughout with matters listed in 5 U.S.C. 552b(c)(6) as described above, it has been determined that this session should be closed to the public.

The STAAC ad hoc Informal Advisory Subcommittee was established to advise NASA on the Materials Processing in Space program's accomplishments, ongoing research and long range plans. The Subcommittee has six members representing the scientific and industrial communites and is chaired by Dr. Martin Glicksman. For further information, contact Dr. James H. Bredt, Executive Secretary of the NAC–STAAC ad hoc Informal Advisory Subcommittee on Materials Processing in Space, Code EM–7, NASA Headquarters, Washington, D.C., 20546 (202/755–8573).

Arnold W. Frutkin,

Associate Administrator for External Affairs.

June 5, 1979.

BILLING CODE 7510-01-M

NATIONAL CAPITAL PLANNING COMMISSION

Proposed Revised Policies and Procedures for the Protection and Enhancement of Environmental Quality in the National Capital Region

The National Capital Planning Commission will consider, at its June 28, 1979 meeting, the adoption of the following proposed revised Environmental Policies and Procedures.

Interested organizations, agencies, and citizens are requested to submit their views in writing to the Commission prior to June 26, 1979, addressed to:

Daniel H. Shear, Secretary, National Capital Planning Commission, Washington, D.C. 20576.

Sec. 1. Purpose

All Federal agencies must direct, to the fullest extent possible their policies, plans, and programs to protect and enhance environmental quality. In view of the unique Federal presence at the seat of government, a special effort should be made by the Federal and District of Columbia governments in the National Capital Region to implement the National Environmental Policy Act, as amended (NEPA). These procedures supplement the Council on Environmental Quality's regulations for implementing the procedural provisions of NEPA and describe the way the National Capital Planning Commission, beginning at the earliest possible point, considers the environmental aspects of proposed actions. The Commission's goal is to avoid or minimize adverse environmental effects.

Sec. 2. Definitions

Underlined words are defined as follows:

"Commission" means the National Capital Planning Commission created by the *Planning Act.*

"Comprehensive Plan" means the Comprehensive Plan for the National Capital prepared and adopted pursuant to the *Planning Act.*

"Council" means the Council of the District of Columbia, as defined in Section 103 of the *Home Rule Act.*

"EIS" means environmental impact statement prepared pursuant to Section 102(2)(C) of *NEPA.*

"Environmental assessment" means a document that briefly discusses the environmental consequences of a proposed action and alternatives prepared for the purposes set forth in 40 CFR 1508.9.

"Environs" means the territory surrounding the District of Columbia within the Region.

"EPA" means the United States Environmental Protection Agency.

"Executive Director" means the director employed by the *Commission* pursuant to Section 2(c) of the *Planning Act.*

"Home Rule Act" means the District of Columbia Self-Government and Governmental Reorganization Act (December 24, 1973, 87 Stat. 774).

"Mayor" means the Mayor of the District of Columbia, as defined in Section 103 of the *Home Rule Act.*

"NEPA" means the National Environmental Policy Act, as amended (42 U.S.C. 4321, et seq.).

"Planning Act" means the National Capital Planning Act of 1952, as amended (40 U.S.C. 71–71i, 72, 73, 74; D.C. Code, secs. 1–1001 to 1–1013).

"Redevelopment Act" means the District of Columbia Redevelopment Act of 1945, as amended (D.C. Code, secs. 5–701 to 5–719).

"Region" means the National Capital Region as defined in Section 1(b) of the *Planning Act.*

"Zoning Act" means the Act of June 20, 1938, 52 Stat. 797, as amended (D.C. Code, secs. 5–413 to 5–428).

"Zoning Commission" means the Zoning Commission created by Section 1 of the Act of March 1, 1920, 41 Stat. 500, as amended (D.C. Code, sec. 5–412).

"Zoning Regulations" means the regulations, including the maps, and amendments thereto, promulgated by the *Zoning Commission* pursuant to the *Zoning Act.*

Sec. 3. Principal Functions—Major Decision Points

This section describes the major decision points for the *Commission's* principal functions. It does not contain an exhaustive list of the *Commission's* functions.

A. Federal Elements of the Comprehensive Plan

The *Commission's* comprehensive planning process begins when the Commission staff starts to prepare a specific Federal element (e.g. Federal land use, Federal employment, foreign missions and international agencies). The *NEPA* process usually starts with the preparation of a study or planning report on the proposed element and a related environmental analysis. The degree of specificity of the report varies depending on the subject matter of the element and on the *Commission's* direction to the staff. The report is circulated for agency and public review and comment. Generally the major decision points on a Federal element of the *Comprehensive Plan* are:

1. *First major decision point.*—In the case of a study report, after analyzing alternative policies and comments, the *Commission* selects, from among the alternative policies, that alternative for which the staff should prepare a draft proposed element.

2. *Second major decision point.*—After the staff has prepared a draft proposed element and related planning report, the *Executive Director* determines the type of environmental document to be prepared on the proposed element.

3. *Third major decision point.*—When the staff has prepared the appropriate environmental document, the draft proposed element is presented to the *Commission.* When satisfactory to the Commission, it authorizes the proposed element (accompanied by the planning report and the environmental document) to be circulated for agency and public review and comment.

4. *Fourth major decision point.*— After the circulation period has ended and comments analyzed, the proposed element is presented to the *Commission* for adoption. If an *EIS* is required, the proposed element is presented to the *Commission* for adoption not earlier than thirty days after the filing with *EPA* of the final *EIS.*

B. *District Elements of the Comprehensive Plan*

The District of Columbia government shall submit to the *Commission* an *environmental assessment* on each District element. It should be submitted as early as possible in the District's planning process, not later than the submission by the *Mayor* of the proposed element to the *Council*.

1. *First major decision point.*—When the *Mayor* submits the proposed element and *environmental assessment*, the *Executive Director* shall determine the appropriate environmental document required for Commission action. If the *Executive Director* determines that an *EIS* is required for *Commission* action on the proposed element, the District government, with *Commission* cooperation, shall provide the information set forth in Appendix B necessary to assist the *Commission* in the preparation of an *EIS*.

2. *Second major decision point.*—After the element has been adopted by the *Council* and submitted to the *Commission* pursuant to Section 2(a)(3) of the *Planning Act*, the *Commission* reviews the element with regard to its impact on the interests or functions of the Federal Establishment in the National Capital and may take such action or actions as it deems appropriate pursuant to Section 2(a)(4) of the *Planning Act*. The environmental document submitted for the first major decision point may be used for the second major decision point if no substantial changes have been made in the element. If substantial changes have been made, the appropriate environmental information will be supplemented or amended by the District government. If an *EIS* is required, the *Commission* shall not take action pursuant to Section 2(a)(4) of the *Planning Act* earlier than thirty days after the filing with *EPA* of the final *EIS*. The element shall not be deemed to have been submitted to the *Commission* until thirty days after the filing with *EPA* of the final *EIS*.

C. *Federal, Federally Assisted, and District of Columbia Projects*

1. *Federal developments and projects requiring Commission approval.*—A Federal agency shall consult with the *Commission* at the earliest possible time with respect to a plan for a development or a project requiring *Commission* review and approval as set forth in Sec. 7 of these procedures and shall permit the *Commission* to participate with it in determining the appropriate environmental document for such development or project. For each action listed under Sec. 7, the sponsoring agency's submission to the *Commission* must include an *EIS* or an *environmental assessment*. Prior to *Commission* action on an agency's submission, the *Commission* shall take responsibility for the scope and contents of the environmental document.

For all actions listed under Sec. 7, the following are major decision points:

a. *First major decision point.*—At the time of initial consultation with the *Commission* by the sponsoring agency, the *Executive Director* and the sponsoring agency shall determine the appropriate environmental document required for *Commission* action. If the determination is made that an *EIS* is required, the sponsoring agency, with Commission cooperation, will be required to prepare an EIS.

b. *Other major decision points.*—The number and nature of other major decision points depend on the type of submission by the sponsoring agency (e.g., master plan, location and program, development concepts, preliminary site and building plans) in accordance with the *Commission's* Site and Building Plan Requirements. Some decisions can be accomplished in one step while others can only be accomplished in a series of steps. In each instance, the appropriate environmental document must be completed prior to *Commission* action. The environmental document submitted for the first major decision point may be used for other major decision points if sufficient for such other major decision points and no substantial changes have been made in the proposal. If substantial changes have been made, the appropriate environmental document will be supplemented or amended by the sponsoring agency.

2. *Non-Federal developments and projects requiring Commission approval.*—Non-Federal agencies shall consult with the *Commission* at the earliest possible time as to the environmental document necessary with respect to a plan for a development or a project requiring *Commission* review and approval as set forth in Sec. 7 of these procedures. For each action listed under Sec. 7, the sponsoring agency's submission to the *Commission* must include an *environmental assessment* generally in the format set forth in the "Outline for Preparation of Environmental Assessments" (Appendix A) or in the format set forth in the "Outline for Information Necessary for the Preparation of Environmental Impact Statements" (Appendix B), as determined by the *Commission*.

For all actions listed under Sec. 7, the following are decision points:

a. *First major decision point.*—At the time of the initial submission by the sponsoring agency, the *Executive Director* shall determine the appropriate environmental document required for *Commission* action. If the Executive Director determines that the environmental information submitted is not sufficient for the making of a determination, more information will be requested from the agency. If the *Executive Director* determines that an *EIS* is required for *Commission* action, the *Commission* will prepare an *EIS* based on the environmental document submitted by the agency.

b. *Other major decisions points.*—The number and nature of other major decision points depend on the type of submission by the sponsoring agency (e.g., master plan, location and program, development concepts, preliminary site and building plans, Capper-Cramton Act general development plans, urban renewal plans) in accordance with the *Commission's* Site and Building Plan Requirements or Urban Renewal Requirements, as the case may be. Some decisions can be accomplished in one step while others can only be accomplished in a series of steps. In each instance, the appropriate environmental document must be completed prior to *Commission* action. The environmental document submitted for the first major decision point may be used for other major decision points if sufficient for such other major decison points and no substantial changes have been made in the proposal. If substantial changes have been made, the appropriate environmental document will be supplemented or amended by the sponsoring agency.

3. *Federal and non-Federal developments and projects requiring Commission review and comment.*—The *Commission* shall require that the sponsoring agency include, as part of its submission, and *EIS* or *environmental assessment* of the development or project.

Sec. 4. Federal Involvement

The *Commission* shall consult with appropriate Federal and non-Federal agencies and with interested private persons and organizations when its involvement is reasonably foreseeable. Sponsoring agencies are urged to contact the *Commission* staff at the earliest possible time in the preparation of District elements of the *Comprehensive Plan* and in the siting and initial planning and design of proposed new developments within the *Region*. The *Commission* staff is available at all times to advise and

consult with sponsoring agencies prior to formal submission of plans for *Commission* review. The Environmental Affairs Office of the *Commission* is available to advise agencies of studies or other information foreseeably required for later *Commission* action.

Sec. 5. Delegations to Executive Director

In conjunction with carrying out these procedures, the *Commission* delegates to the *Executive Director* the functions of:

(1) Determining whether to prepare and *EIS* or make a "Finding of No Significant Impact";

(2) Obtaining the information required for the preparation of a draft *EIS* or an *environmental assessment;*

(3) Preparing a draft *EIS;*

(4) Circulating a draft *EIS* for review and comment to *EPA*, affected and interested public agencies, and the general public;

(5) Integrating agency and public comments, where appropriate, into and preparing the final *EIS;* and

(6) Distributing the final *EIS* to *EPA* and all agencies and individuals who commented on the draft *EIS.*

Sec. 6. Actions Which Normally Required Commission Preparation of Environmental Impact Statements

There are no actions which the Commission has determined always require an *EIS.* However, with respect to plans for developments or projects for which a Federal agency has determined always require an *EIS*, the *Commission* will take responsibility for the scope and contents of such EISs.

Sec. 7. Actions Which Normally Require Environmental Assessments But Not Necessarily Environmental Impact Statements

Based on a review of the typical classes of actions it undertakes, the Commission has determined those actions which will normally require an *environmental assessment* but not necessarily and *EIS* prior to its action. For the following actions, the Executive Director will use the environmental document prepared pursuant to Sec. 3C of these procedures to determine whether an *EIS* should be prepared:

a. certify to the *Council,* together with findings and recommendations, whether a District element of the *Comprehensive Plan,* or amendment thereto, adopted by the *Council* pursuant to Section 2(a)(3) of the *Planning Act,* has a negative impact on the interests or functions of the Federal Establishment in the National Capital pursuant to Section 2(a)(4)(A) of the *Planning Act;*

b. determine whether a modification, submitted by the *Council* pursuant to Section 2(a)(4)(B) of the *Planning Act,* to the District element of the *Comprehensive Plan,* or amendment thereto, as to which the *Commission* has certified a negative impact on the interests or functions of the Federal Establishment in the National Capital pursuant to Section 2 (a)(4)(A) of the *Planning Act,* has been made in accordance with the *Commission's* findings and recommendations;

c. determine whether a modified element of, or amendment to, the Comprehensive Plan, submitted by the Council pursuant to Section 2(a)(4)(C) of *Planning Act,* has a negative impact on the interests or functions of the Federal Establishment in the National Capital;

d. adopt Federal elements of the *Comprehensive Plan* and amendments thereto pursuant to Section 4(a) of the *Planning Act;*

e. approve the location, height, bulk, number of stories, and size, and the provision for open space in and around District of Columbia public buildings in the central area of the District as concurrently defined by the *Commission* and *Council,* pursuant to Section 5(c) of the *Planning Act;* [1]

f. acquire lands in the District of Columbia and adjacent areas in Maryland and Virginia for the National Capital park, parkway, and playground systems pursuant to Section 11 of the *Planning Act* and, in connection with acquisitions in Maryland and Virginia, make agreements with State officials as to the arrangements for such acquisitions;

g. make a comprehensive or general plan of the District of Columbia pursuant to Section 6(a) of the *Redevelopment Act;*

h. adopt the boundaries of urban renewal areas pursuant to Section 6(b)(1) of the *Redevelopment Act;*

i. adopt urban renewal plans for urban renewal areas pursuant to Section 6(b)(2) of the *Redevelopment Act;*

j. adopt modifications to urban renewal plans pursuant to Section 12 of the *Redevelopment Act;*

k. approve the location, height, bulk, number of stories, and size of Federal public buildings in the District of Columbia and the provision for open space in and around the same, pursuant to Section 10 of the *Zoning Act* (D.C. Code, sec. 5–426);

l. adopt, or alter and adopt, sections of the plan for the extension of a permanent system of highways prepared by the *Mayor,* pursuant to Section 2 of the Act of March 2, 1893, 27 Stat. 532 (D.C. Code, sec. 7–109);

m. approve plats adjusting the permanent system of highways to provide ground for educational, religious, or similar institutions, pursuant to Section 3 of the Act of June 28, 1898, 30 Stat. 520 (D.C. Code, sec. 7–113);

n. approve new highway plans for portions of the District of Columbia prepared by the *Mayor,* pursuant to the Act of March 4, 1913, 37 Stat. 949 (D.C. Code, sec. 7–122);

o. approve the sale of real estate owned in fee simple by the District of Columbia for municipal use which the *Council* and *Commission* find to be no longer required for public purposes, pursuant to Section 1 of the Act of August 5, 1939, 53 Stat. 1211 (40 U.S.C. 72c; D.C. Code, sec. 9–301);

p. approve the sale by the Secretary of the Interior of real estate held by the United States in the District of Columbia under the jurisdiction of the National Park Service which may be no longer needed for public purposes, pursuant to Section 4 of the Act of August 5, 1939, 53 Stat. 1211 (40 U.S.C. 74a; D.C. Code, sec. 9–304);

q. approve the exchange of District-owned land, or part thereof, for an abutting lot or parcel of land, or part thereof, pursuant to the Act of August 1, 1951, 65 Stat. 150 (D.C. Code, sec. 9–401);

r. approve plans for replatting and/or method of condemnation with respect to the acquisition of property under the District of Columbia Alley Dwelling Act (June 12, 1934, 48 Stat. 930, as amended; D.C. Code, secs. 5–103 to 5–112);

s. approve settlements for the purpose of establishing and making clear the title of the United States in lands and water in, under, and adjacent to the Potomac River, the Anacostia River, or Eastern Branch, and Rock Creek, pursuant to the Act of June 4, 1934, 48 Stat. 836 (D.C. Code, sec. 6–104);

t. approve the location and construction in the District of Columbia of bathing pools or beaches by the Director of the National Park Service, pursuant to the Act of May 4, 1926, 44 Stat. 394, as amended (D.C. Code, sec. 8–169);

u. approve harbor regulations made by the *Council* which affect the interests and rights of the *Commission,* pursuant to Section 805 of the Act of March 3, 1901, 31 Stat. 1335, as amended (D.C. Code, sec. 22–1701);

v. approve the location of court buildings on portions of Judiciary Square or within the area bounded by

[1] The central area has been concurrently defined by the *Commission* and *Council* pursuant to Section 5(c) of the *Planning Act* to include the Shaw School and Downtown Urban Renewal Areas.

4th and 5th Streets, D and G Streets, N.W., pursuant to Section 1 of the Act of June 25, 1934, 48 Stat. 1215, as amended (D.C. Code, sec. 9–204); and

w. approve plans showing the location, height, bulk, number of stories, and size of, and the provisions for open space and off street parking in and around, buildings for foreign governments and international organizations on land sold or leased by the Secretary of State in the northwest section of the District of Columbia bounded by Connecticut Avenue, Van Ness Street, Reno Road, and Tilden Street, pursuant to Section 4 of the Act of October 8, 1968 (Public Law 90–553); and

x. approve transfers of jurisdiction over properties within the District of Columbia owned by the United States or the District among or between Federal and District authorities, pursuant to Section 1 of the Act of May 20, 1932, 47 Stat. 161, as amended (40 U.S.C. 122; D.C. Code, sec. 9–115) except where such transfers of jurisdiction conform to master plans or site and building plans approved by the *Commission* pursuant to Section 5(a) of the *Planning Act* or to urban renewal plans and modifications thereof adopted by the *Commission* and approved by the *Council* pursuant to Sections 6 and 12 of the *Redevelopment Act*.

Sec. 8. Actions Which Normally Do Not Require Either Commission Preparation of Environment Impact Statements or Environmental Assessments

The *Commission* has determined that administrative, personnel, and procedural actions, and the following actions of an advisory nature only normally do not require *Commission* preparation of either an EIS or an *environmental assessment*:

a. make a preliminary report and recommendations to Federal agencies on plans and programs submitted to the Commission pursuant to Section 5(a) of the *Planning Act*;

b. submit a final report a Federal agency which does not concur in the *Commission's* preliminary report and recommendations and which has so advised the *Commission* with its reasons therefor, pursuant to Section 5(a) of the *Planning Act*;

c. recommend a six-year program of public works projects for the Federal government pursuant to Section 7(a) of the *Planning Act*; and

d. comment on capital budget estimates of Federal agencies pursuant to Office of Management and Budget Circular No. A–11.

Any of the actions listed above may, in extraordinary circumstances, have a significant environmental effect. If the *Executive Director* makes such a determination, the appropriate environmental document will be prepared and made available to the *Commission* prior to its taking action on the item.

Sec. 9. Categorical Exclusions

The Commission has determined that the following are categorical exclusions within the meaning of 40 CFR 1508.4:

a. make a preliminary report and recommendations to District of Columbia agencies on plans and programs submitted to the Commission pursuant to Section 5(a) of the *Planning Act*;

b. submit a final report to a District of Columbia agency which does not concur in the *Commission's* preliminary report and recommendations and which has so advised the *Commission* with its reasons therefor, pursuant to Section 5(a) of the *Planning Act*;

c. advise and consult with appropriate planning agencies having jurisdiction over the affected part of the *environs* with respect to general plans for proposed Federal and District developments and projects within the *environs* and with respect to plans for proposed developments or projects submitted pursuant to Section 5(a) of the *Planning Act* involving a major change in the character or intensity of an existing use in the *environs*, pursuant to Section 5(d) of the *Planning Act*;

d. comment upon the multi-year capital improvements plan for the District developed by the *Mayor* under Section 444 of the *Home Rule Act*, pursuant to Section 7(b) of the *Planning Act*;

e. make a report and recommendation, including a final report, to the *Council* on any proposed change in or addition to the regulations or general orders regulating the platting and subdividing of lands and grounds in the District of Columbia, pursuant to Section 8(d) of the *Planning Act*;

f. make recommendations to the *Mayor* concerning the acquisition of areas for, or the establishment upon property not acquired under the authority of the Act of, public parking facilities pursuant to Section 3 of the District of Columbia Motor Vehicle Parking Facility Act of 1942 (February 16, 1942, 56 Stat. 91, as amended; D.C. Code, sec. 40–304);

g. consult with the *Mayor* on the development plan for the Pennsylvania Avenue development area submitted for approval to the *Mayor* by the Pennsylvania Avenue Development Corporation pursuant to Section 5 of the Pennsylvania Avenue Development Corporation Act of 1972 (October 27, 1972, 86 Stat. 1266; 40 U.S.C. 874);

h. submit to the *Zoning Commission* proposed amendments or general revisions to the *Zoning Regulations*, pursuant to Section 8(a) of the *Planning Act*;

i. make recommendations to the *Council* on proposed closings of streets, roads, highways, and alleys, or parts thereof, pursuant to Section 1 of the Street Readjustment Act of the District of Columbia (December 15, 1932, 47 Stat. 747, as amended; D.C. Code, sec. 7–401);

j. make a report and recommendations to the *Zoning Commission*, as provided in Section 5 of the *Zoning Act*, on proposed amendment to the *Zoning Regulations*, pursuant to Section 8(a) of the *Planning Act*; and

k. comment on state and local undertakings reviewed pursuant to Attachment A to Office of Management and Budget Circular No. A–95 (Revised).

Sec. 10. Environmental Data and Analysis Available to Commission

The alternatives considered by the *Commission* shall be encompassed by the range of alternatives discussed in the relevant environmental documents. All relevant environmental documents, comments, and responses shall accompany the proposal through the *Commission's* approval process.

Sec. 11. Public Information

Interested persons can obtain information or status reports on *EISs* and other elements of the NEPA process from the *Commission's* Office of Public Affairs, 1325 G Street NW., Washington, D.C. 20576, telephone (202) 724–0174.

Sec. 12. Supercession

The Commission's environmental policies and procedures published at 36 FR 23706, 37 FR 3010, 37 FR 4930, 37 FR 11196, and 37 FR 16039 are superceded.

Sec. 13. Authority

These procedures are adopted pursuant to the National Environmental Policy Act of 1969, as amended, 42 U.S.C. 4321 *et seq.*, and the Council on Environmental Quality's Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act (43 FR 55978–56007).

APPENDICES

Appendix A

Outline for Preparation of Environmental Assessments

The environmental assessment should contain *brief* discussions of the following:

I. Purpose of and need for the proposal.

II. Alternatives, including the *No Action* alternative.

III. Environmental effects of the proposed action and alternative.

The most important or significant environmental consequences of the areas listed below should be discussed. Only those areas which are relevant to the proposal should be addressed in as much detail as is necessary to allow an analysis of the alternatives and the proposal. The areas to be considered are the following:

1. Natural/ecological features (such as flood plains, wetlands, coastal zones, wildlife refuges and endangered species);
2. Air quality;
3. Sound levels;
4. Water supply, wastewater treatment and storm water runoff;
5. Energy requirements and conservation;
6. Solid waste;
7. Transportation;
8. Community facilities and services;
9. Social and economic; and
10. Historic and aesthetic.

IV. Listing of agencies and persons consulted in preparation of the assessment.

Appendix B

Outline of Information Necessary for Preparation of Environmental Impact Statements

I. Description of the Proposal

A. *Purpose of and Need for Action.* In discussing the purpose of and need for the action, this section should include a *brief* description of the proposal, its size and location, and any appropriate maps and/or diagrams. Where applicable, Comprehensive Plan modifications (as a related proposed action) should also be identified.

B. *Affected Environment.* Identification and succint description of the geographic area(s) affected by the proposed action and the alternatives considered including: other activities in the area affected by or related to the proposed action (if any). The CEQ Regulations advise that "the description shall no longer than is necessary to understand the effects of the alternatives. Data and analysis in a statement shall be commensurate with the importance of the impact with the less important material summarized, consolidated, or simply referenced". (Sec. 1502.15 of the CEQ Regulations.)

II. Environmental Consequences

This section should include discussions of the following:

A. *Environmental Effects of the Alternatives and the Proposed Action.*[1]

In this discussion, consideration should be given to the following factors where needed to reflect the most significant or important effects for analysis of the alternatives:

1. *Physical-Biological*

a. *Natural/Ecological Features*—This should include a discussion of effects on topographic, hydrology, soils, flora, fauna, floodplains, wetlands, coastal zones, endangered species, etc.

b. *Air Quality*—This discussion should focus on effects on the particular site/area affected by stationary, mobile and/or demolition/construction sources, if any, related to the proposed action and alternatives within the context of overall air quality goals/objectives.

c. *Sound Levels*—This discussion should focus on potential sound level effects associated with the proposed action and alternatives, such as demolition/construction, stationary (mechanical equipment) and mobile (transportation) sources on-site and in the surrounding areas, within the context of existing and relevant knowledge of noise effects, mitigation measures, and any existing or proposed noise standards/controls. Any unusual noise generation from the proposed action must be addressed.

d. *Site and Surrounding Area Land Uses, Plans, Policies and Controls*—This discussion should focus on the effects of the proposed action and alternatives on such things as street layouts and traffic movement/circulation patterns; setback and siting relationships; vehicular/pedestrian access; proposed Federal, State, local, and regional land use plans, policies and controls; etc.

2. *Urban Systems*

a. *Water Supply, Wastewater Treatment and Storm Water Runoff*—This discussion should focus on the effects on availability and capacity of the existing water supply, wastewater treatment and storm water systems (with any planned changes/expansions accounted for) to serve the proposed action(s), and alternatives based on documentation and evaluation of the anticipated water supply needs, and wastewater treatment and storm water demands, recognizing any unusual requirements, within the framework of applicable federal, regional and local regulations and standards. Any potential impacts on specific bodies of water (such as Rock Creek, the Potomac and Anacostia Rivers, etc.) should be addressed.

b. *Public Utilities, Energy Requirements and Conservation*—This discussion should focus on: (1) off-site effects of the proposed action, including anticipated insufficient capacity, delivery, and service level problems (Example: the inability of an off-site central heating facility to service a new project); (2) any on-site problems, such as effects on air quality from on-site plants; and (3) energy requirements and conservation measures related to proposed action and alternatives, and mitigation measures for each.

c. *Solid Waste*—This discussion should focus on the effects on the availability and capacity of disposal systems to serve the project and alternatives (with any timely changes or expansions accounted for), based on the anticipated amount and type of solid waste generation, including and unusual or special disposal requirements, methods for handling them, and recycling applicability.

d. *Community Facilities and Services*—This discussion should focus on the effects of the proposed action and alternatives on such facilities as police, fire, recreation/parks, schools, libraries, etc.

e. *Housing*—(Optional, depending upon the nature of the proposed action, as it may effect jurisdictional or regional housing markets and requirements (aggregate demand, type, location, size, etc.)).

f. *Transportation*—This discussion should focus on the effects on such things as transit systems capacities and constraints, vehicular congestion, safety considerations, mobile source levels, etc.

3. *Socio-Cultural and Economic Environments*

a. *Socio—cultural*—This discussion should fous on effects on the existing population patterns and characteristics, (number, age, sex, race, family structure, etc.) any relevant demographic trends, and any related changes in land use, water and public services of the area(s) involved. The scope of this discussion is dependant upon the nature and extent of the proposed action (i.e. a large-scale federal employment change could be expected to have a regional focus).

b. *Economic*—Effects on local and/or regional economic changes should be addressed, as available or able to be projected (employment changes, abeolute/relative income changes, expenditure patterns, property value and tax changes, and direct and induced changes in development/construction patterns, business relocation, etc.).

4. *Historic and Aesthetic Values*—Any effects on historic properties or districts, unique features (architectural styles, vistas), etc., should be discussed, as well as compliance with Section 106 of the National Historic Preservation Act of 1966.

B. *Probable Adverse Environmental Effects Which Cannot Be Avoided.*

This should be a brief section summarizing in one place those effects discussed above that are adverse and unavoidable under the proposed action.

C. *The Relationship Between Local Short-Term Uses of Man's Environment and the Maintanence and Enhancement of Long-Term Productivity*

This section should briefly discuss tradeoff involved between short-term environmental gains at the expense of long-term losses, or vice versa, if any of the proposed action.

D. *Irreversible and Irretrievable Commitment of Resources*

This section requires a discussion of the irreversible and irretrievable commitments of resources that would be involved in the implementation of the proposed action. These could include land, labor, finance, public services and facilities, cultural and natural resources, etc.

[1] Each of the factors listed should address *direct* and *indirect* effects and their significance and any appropriate means to mitigate adverse environmental impacts.

III. Alternatives Including Proposed Action

As advised by the CEQ Regulation, this section ". . . should present the environmental impacts of the proposed action and the alternatives in comparative form, thus sharply defining the issues and providing a clear basis for choice among options . . ." (sec. 1502.14)

All reasonable alternatives should be addressed, including ones not within the jurisdiction of the responsible agency, and the *no action* alternative. Also included should be a brief explanation of the reasons for eliminating other alternatives which were considered. This section should provide enough detail so that the comparative merits of each alternative can be evaluated.

IV. List of Preparers

According to the CEQ Regulations, this should include the "names and qualifications of persons primarily responsible for preparing the environmental impact statement or significant background papers, including basic components of the statement".

V. List of Agencies, Organizations, and Persons Receiving Copies of the Statement

VI. Index

VII. Appendix (if any)

According to section 1502.18 of the CEQ Regulations, the Appendix shall: "(a) consist of material prepared in connection with an environmental impact statement (as distinct from material which is incorporated by reference); (b) normally consist of material which substantiates any analysis fundamental to the impact statement; (c) normally be analytical and relevant to the decision to be made; and (d) be circulated with the environmental impact statement or be readily available on request.

Daniel H. Shear,

Secretary.

NATIONAL SCIENCE FOUNDATION

Subcommittee for Applied Social and Behavioral Sciences of the Advisory Committee for Applied Science and Research Applications Policy; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Science Foundation announces the following meeting:

Name: Subcommittee for Applied Social and Behavioral Sciences of the Advisory Committee for Applied Science and Research Applications Policy.

Date and time: June 25-26, 1979—9 a.m. to 5 p.m. each day.

Place: Room 540, National Science Foundation, 1800 G Street, NW, Washington, D.C. 20550.

Type of meeting: Closed.

Contact person: Dr. L. Vaughn Blankenship, Director, Division of Applied Research, Room 1126, National Science Foundation, Washington, D.C. 20550. Telephone: (202) 634-6260.

Purpose of subcommittee: To provide advice and recommendations concerning support for applied research in the social and behavioral sciences.

Agenda: To review and evaluate proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. Rebecca Winkler,

Committee Management Coordinator.

June 4, 1979.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-245]

Northeast Nuclear Energy Co. et al.; Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 61 to Provisional Operating License No. DPR-21, issued to Northeast Nuclear Energy Company, The Hartford Electric Light Company, Western Massachusetts Electric Company, and Connecticut Light and Power Company (the licensees), which revised the Technical Specifications for operation of the Millstone Nuclear Power Station, Unit No. 1 (the facility) located in Waterford, Connecticut. The amendment is effective as of its date of issuance.

The amendment revises the provisions of the Appendix A Technical Specifications to (1) authorize use of 148 8x8R type fuel assemblies, (2) change the safety limit Minimum Critical Power Ratio (MCPR) from 1.06 to 1.07, (3) change the Cycle 7 (Reload 6) operating limit MCPRs for various transients, (4) change the Maximum Average Planar Linear Heat Generation Rate Limits, (5) delete the dropped control rod reactivity worth in Specification 3.3.B.3, and (6) revise the stepoint, maintenance, and surveillance requirements on the safety-relief valves.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations 10 CFR Chapter I, which are set forth in the

license amendment. Notice of Proposed Issuance of Amendment to Provisional Operating License in connection with this action was published in the Federal Register on April 13, 1979 (44 FR 22229). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 5, 1979, (2) Amendment No. 61 to License No. DPR-21, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut 06385. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland this 29th day of May, 1979.

For the Nuclear Regulatory Commission.

Dennis L. Ziemann,

Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc. 79-17631 Filed 6-7-79; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. STN 50-485]

Stone & Webster Engineering Corp. Reference Safety Analysis Report, Issuance of Amendment To Preliminary Design Approval

Notice is hereby given that the staff of the Nuclear Regulatory Commission has issued Amendment No. 3 to Preliminary Design Approval No. PDA-4, dated June 1, 1979, for the reference system design of a balance-of-plant portion of a pressurized water reactor nuclear power plant utilizing the Westinghouse RESAR-41 nuclear steam supply system design, and as described in the application by Stone & Webster Engineering Corporation (SWESSAR-P1). Preliminary Design Approval No. PDA-4 was issued by the staff of the Nuclear Regulatory Commission on May 5, 1976.

The amendment extends the expiration date for Preliminary Design Approval No. PDA-4 from June 5, 1979 to August 18, 1979. This change was made as a result of the Nuclear Regulatory Commission's policy statement on standardization of nuclear power plants which provided for an extension to five years of the effective terms for preliminary design approvals for reference system designs issued prior to the August 1978 policy statement. The August 1978 policy statement identified certain types of safety matters that PDA holders would be required to address prior to the granting of PDA extensions. The policy statement requested prospective applicants for extension to submit their responses to the safety matters identified to them early enough ". . . so that staff review can be completed prior to the expiration date of the existing PDA or as soon thereafter as is practical."

The safety matters were identified in the NRC staff letter to the Stone & Webster Engineering Corporation, R. Boyd to W. J. L. Kennedy, dated January 24, 1979. By letter dated May 3, 1979, W. J. L. Kennedy to R. Boyd, the Stone & Webster Engineering Corporation submitted material addressing each of these matters. The staff concluded that the time required to conduct a completeness review of the applicant's submittal would exceed the remaining time to the then current PDA-4 expiration date of May 5, 1979. The staff issued an interim administrative extension (Amendment 2) of PDA-4 to June 5, 1979, in order to complete its initial review of the PDA extension matters prior to a decision on further extension of PDA-4 in accordance with the Commission's August 1978 policy statement.

As a result of the nuclear power reactor accident at the Three Mile Island power plant in Pennsylvania, unforeseen high priority demands on NRC staff resources have precluded completion of planned work on the extension review for PDA-4. The staff has concluded that a second interim administrative extension of PDA-4, to August 18, 1979, is appropriate and warranted.

Amendment No. 3 to PDA-4 is effective as of its date of issuance and shall expire on August 18, 1979 unless extended by the NRC staff. The expiration of PDA-4 as amended, should not affect use of PDA-4, Amendment No. 3 for reference in any construction permit application filed prior to such date.

A copy of Preliminary Design Approval No. PDA-4, Amendment No. 3 dated June 1, 1979 is available for public inspection at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. 20555.

Dated at Bethesda, Maryland, this 1st day of June 1979.

For the Nuclear Regulatory Commission.

C. J. Heltemes, Jr.,

Chief, Standardization Branch, Division of Project Management Office of Nuclear Reactor Regulation.

[FR Doc. 79-17632 Filed 6-7-79; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-327 and 50-328]

Tennessee Valley Authority (TVA), Sequoyah Nuclear Plant, Units 1 and 2; Issuance of Environmental Impact Appraisal and Negative Declaration

The U. S. Nuclear Regulatory Commission (the Commission), as required under the National Environmental Policy Act (NEPA) and the NRC licensing procedure, has assessed anticipated changes affecting environmental impact of the Sequoyah Nuclear Plant since issuance of the Final Environmental Statement in February 1974.

The Tennessee Valley Authority (permittee) presently holds provisional construction permits for the Sequoyah Nuclear Plant, Units 1 and 2 (CPPR-72 and CPPR-73) located near Daisy in Hamilton County, Tennessee and now seeks an operating license for these units.

The Commission's staff has reviewed and assessed changes of environmental consequence as submitted by TVA to the staff on October 30, 1978, and an environmental impact appraisal relative to the changes has been prepared. Based upon this appraisal, the staff has concluded that all previously unreviewed issues of potential environmental consequence are amenable to acceptable impact control and have been appropriately addressed by the EPA in their drafting of the NPDES permit for operation of the Sequoyah plant. The staff has worked closely with EPA, Region IV, in the development and preparation of the draft NPDES permit and presently views the conditions and requirements of the permit to be adequate to minimize environmental impact.

With incorporation of at least the conditions and limitations presently proposed by EPA for the NPDES permit and TVA's acceptance of those conditions and limitations, the staff has

determined based on its review that operation of the Sequoyah plant will have no significant adverse impact on the environment beyond that described in the Final Environmental Statement prepared by the TVA in July 1974. The staff therefore concludes that the appropriate action is issuance of the operating license for the Sequoyah Nuclear Plant, and that no additional environmental impact statement for the proposed acton need be prepared.

The environmental impact appraisal is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Chattanooga—Hamilton County Bicentennial Library, 1001 Broad Street, Chattanooga, TN 37402.

Dated at Bethesda, Maryland, this 31st day of May 1979.

For the Nuclear Regulatory Commission.

Ronald L. Ballard,

Chief, Environmental Projects Branch 1, Division of Site Safety and Environmental Analysis.

BILLING CODE 7590-01-M

[Docket No. 50-346]

Toledo Edison Co. and the Cleveland Electric Illuminating Co., Davis-Besse Nuclear Power Station, Unit No. 1; Request for Action Under 10 CFR 2.206

Notice is hereby given that by petition dated April 24, 1979, the Toledo Coalition for Safe Energy requested that an order be issued that the Davis-Besse Nuclear Power Station, Unit No. 1, not be restarted until certain actions are taken concerning emergency and evacuation procedures and public hearings have been held. This petition is being treated as a request for action under 10 CFR 2.206 of the Commission's regulations, and accordingly, action will be taken on the petition within a reasonable time.

Copies of the petition are available for inspection in the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. 20555 and in the local public document room at the Ida Rupp Public Library, 310 Madison Street, Port Clinton, Ohio 43452.

For the Nuclear Regulatory Commission.

Dated at Bethesda, Maryland, this 1st day of June 1979.

Harold R. Denton,

Director Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued a revision to two guides in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.84, Revision 15, "Design and Fabrication Code Case Acceptability—ASME Section III Division 1," and Regulatory Guide 1.85, Revision 15, "Materials Code Case Acceptability—ASME Section III Division 1," list those code cases that are generally acceptable to the NRC staff for implementation in the licensing of light-water-cooled nuclear power plants. These two guides were revised to update the listings of acceptable code cases and to reflect public comment and additional staff review.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of the latest revision of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C 552(a))

Dated at Rockville, Maryland this 30th day of May 1979.

For the Nuclear Regulatory Commission.

Robert B. Minogue,

Director, Office of Standards Development.

BILLING CODE 7590-01-M

OFFICE OF MANAGEMENT AND BUDGET

Privacy Act: Notice of New Systems

The purpose of this notice is to give members of the public an opportunity to comment on Federal agency proposals to establish or alter personal data systems subject to the Privacy Act of 1974.

The Act states that "each agency shall provide adequate advance notice to Congress and the Office of Management and Budget of any proposal to establish or alter any system of records in order to permit an evaluation of the probable or potential effect on such proposal on the privacy and other personal or property rights of individuals * * *."

OMB policies implementing this provision require agencies to submit reports on proposed new or altered systems to Congress and OMB 60 days prior to the issuance of any data collection forms or instructions, 60 days before entering any personal information into the new or altered systems, or 60 days prior to the issuance of any requests for proposals for computer and communications systems or services to support such systems—whichever is earlier.

The following reports on new or altered systems were received by OMB between May 14, 1979 and May 25, 1979. Inquiries or comments on the proposed new systems or changes to existing systems should be directed to the designated agency point-of-contact and a copy of any written comments provided to OMB. The 60 day advance notice period begins on the report date indicated.

Department of the Treasury

System Name: Document Delivery Control System.

Report Date: May 3, 1979.

Point-of-Contact: Mr. Floyd Sandlin, Office of Administrative Programs, Department of the Treasury, Washington, D.C. 20220.

Summary: This is the proposed revision of a system previously reported as "Library Circulation Control

Records." The system, maintained by the Office of the Secretary, is used to control the distribution of news publications and the loan of books and periodicals to library users. The addition of distribution control for current news publications is an addition of records and uses of the system.

Department of Agriculture

System Name: YCC Long-Term Benefit Evaluation

Report Date: May 16, 1979.

Point-of-Contact: Mr. Hoyt L. Abney, Room 0320 South Building, Forest Service, P.O. Box 2117, Washington, D.C. 20013.

Summary: The Forest Service proposes this new system of records as a means of identifying the possible long-term (five years) benefits of the Youth Conservation Corps. The study will be performed and funded in conjunction with the Department of the Interior, which runs the Youth Conservation Corps.

Office of Personnel Management

System Names: (1) *Internal System of Records:*

Defense Mobilization Emergency Cadre Records.
Confidential Statements of Employment and Financial Interest.
Negotiated Grievance Procedure Records.
Security Office Control Cards.
Employee Occupational Health Program Records.
Pay, Leave, and Travel Records.
Appeal and Administrative Review Records.
Complaints and Inquiries Records.
Applicants for Employment Records.
Pre-Employment Inquiry Records.
Intergovernmental Personnel Act Assignment Records.
Employee Incentive Award and Recognition Files.
Employee Assistance Program Records.
Federal Executive Development Program Records.
Employee Locator Card Files.
Employee Production Records.
Investigator Performance Records.
Speaker Resume and Clearance Records.
Motor Vehicle Operator and Accident Report Records.
Training Records.
Performance Evaluation/Rating Records.
Intern Program and Upward Mobility Program Records.

(2) *Central Systems of Records:*

Confidential Statements of Employment and Financial Interest.
Complaints and Position Classification or Retained Rate of Pay Appeals Records.
Personnel Research Test Validation Records.
Civil Service Retirement and Insurance Records.
Federal Executive Development Program Records.
Executive Assignment and Inventory Records.
Intergovernmental Personnel Act Assignment Records.
Administrative Law Judge Application Records.
Litigation and Claims Records.
Privacy Act/Freedom of Information Act Case Files.
Personnel Investigations Records.
Directory of Federal Executive Institution Alumni.
Presidential Management Intern Program Records.
Federal Automated Career System (FACS) Records.

(3) *Government-wide System of Records:*

General Personnel Records.
Records of Adverse Actions and Actions Based on Unacceptable Performance.
Ethics in Government Financial Disclosure Records.*
Recruiting, Examining and Placement Records.

Point-of-Contact: Mr. Robert J. Drummond, Assistant Director for Agency Compliance and Evaluation, Office of Personnel Management, Washington, D.C.

Summary: The Office of Personnel Management has completely revised its systems of records and descriptive notices in order to implement Reorganization Plans Nos. 1 and 2, February 23, and May 23, 1978, respectively. These plans transferred responsibility for Federal EEO programs from the Civil Service Commission to the Equal Employment opportunity Commission, and established the Office of Personnel management and the Merit Systems Protection Board. OPM also prepared and submitted for review proposed new Privacy Act regulations.

The systems of records reports include the same types of records which were maintained by the Civil Service Commission. They pertain to—

(1) CSC employees who have been transferred to OPM;

(20 Applicants for CSC positions and former CSC employees whose records have been transferred to OPM;

(3) Applicants for employment with OPM;

(4) Current and former employees of CSC, OPM, or other Federal agencies whose records are maintained only at OPM;

(5) Applicants for Federal employment where OPM maintains the records for all Federal agencies; and

(6) Current and former Federal employees whose records are maintained by all agencies for OPM and for which OPM has retained Privacy Act responsibilities.

OPM has categorized its systems as "internal", "central", and "government-wide". The records in (1)–(3) above are OPM internal, (4) and (5) are OPM central, and (6) are OPM government-wide.

Waiver Request: OMB procedures permit a waiver of the advance notice requirement when the agency can show that the delay caused by the 60 day advance notice would not be in the public interest. It should be noted that a waiver of the 60 day advance notice period does not relieve an agency of the obligation to publish notice describing the system and to allow 30 days for public comment on the proposed routine uses of the personal information to be collected. A waiver of the 60 day advance notice provision was requested by agencies for the following reports received between May 14, 1979 and May 25, 1979. Public inquiries or comments on the proposed new or altered systems should be directed to the designated agency point-of-contact and a copy of any written comments provided to OMB. Comments on the operation of the waiver procedure should be directed to OMB.

Department of Defense

System Name: Application for Pentagon Parking Permit; Pentagon Carpool Locator.

Report Date: May 18, 1979.

Point-of-Contact: Mr. William Cavaney, Department of Defense, Washington, D.C. 20301.

Summary: These systems of records, maintained by the Office of Secretary of Defense, will be expanded to include all DOD Pentagon employees and to reflect organizational changes. The changes are being made to carry out the President's directive to agencies, that they carry out energy conservation and pollution control programs.

Waiver Status: No action as of May 30.

Department of Health, Education, and Welfare

System Name: Epidemiological Research Studies of the Bureau of Radiological health.

*This system was the subject of a Report on New Systems and Federal Register notice earlier this year. It is listed here only to provide a full list of OPM systems of records.

Report Date: May 22, 1979.

Point-of-Contact: Mr. Gerald H. Deighton, FDA Privacy Act Coordinator, Department of Health, Education, and Welfare, Washington, D.C. 20201.

Summary: The Food and Drug Administration proposes this new system to provide a data base for determining and evaluating possible harmful effects of exposure to low-level radiation, including three previously unreported thyroid studies. The data base will include records of the three earlier studies, as well as persons exposed to radiation from medical, environmental, or environmental sources, patients with cancer, birth defects, or other diseases or conditions resulting from radiation exposure; and unexposed persons against whom comparisons can be made.

Waiver Status: No action as of May 29, 1979.

Department of the Treasury

System Name: Treasury Emergency Preparedness Information Program System.

Report Date: May 23, 1979.

Point-of-Contact: Mr. Floyd Sandlin, Office of Administrative Programs, Department of the Treasury, Washington, D.C. 20220.

Summary: The Office of the Secretary of the Treasury proposes to alter this existing system of records by computerizing the records. The system is used by "key Treasury officials" to assign personnel to Emergency Executive Teams.

Waiver Status: No action, as of May 29, 1979.

Velma N. Baldwin,

Assistant to the Director for Administration.

[FR Doc. 79-17909 Filed 6-7-79; 8:45 am]

BILLING CODE 3110-01-M

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

Reallocation of Specialty Steel Quotas

AGENCY: Office of the Special Representative for Trade Negotiations.

ACTION: Notice of Shortfall Reallocation for Specialty Steel Quotas.

SUMMARY: The Special Representative for Trade Negotiations hereby reallocates shortfalls of certain specialty steel quota categories as set forth below.

This action modifies certain quota quantities of the third restraint period, June 14, 1978–June 13, 1979. Quota quantities are reduced for certain suppliers who are not likely to export the quantity of steel which would fill the quotas assigned to them. The quota quantities for other suppliers who are able to supply additional steel are increased.

EFFECTIVE DATES: The reallocations which result in a reduction of a quota quantity shall be effective on June 8, 1979. Reallocations which increase a quota quantity shall be effective on June 11, 1979.

FOR FURTHER INFORMATION CONTACT: Karen Alleman, Office of the Special Representative for Trade Negotiations, Washington, D.C. 20506 (202–395–7203).

SUPPLEMENTARY INFORMATION: Pursuant to subparagraph (c) of headnote 2, subpart A, part 2 of the Appendix to the Tariff Schedules of the United States (TSUS) the Special Representative is authorized to modify the quota quantities to reallocate shortfalls as defined by subparagraph (c). I have determined that shortfalls are likely to occur in items 923.20 and 923.21, TSUS, in the third restraint period (June 14, 1978–June 13, 1979) as follows:

Item	Article	Supplier	Shortfall (in short tons)
923.20	Stainless Steel and Strip	Canada	1,174
923.21	Stainless Steel sheet Plate	Sweden	200

Accordingly, subpart A, part 2, of the Appendix to the TSUS is amended to substitute new quota quantities for the third restraint period (June 14, 1978–June 13, 1979) for articles provided for in items 923.20 and 923.21, TSUS, as set forth below:

A. For item 923.20 (stainless steel and strip):

1. By changing the quota quantity for the European Economic Community from "17,500" to "18,174";

2. By changing the quota quantity for Canada from "7,900" to "6,726";

3. By changing the quota quantity for Sweden from "7,600" to "7,850";

4. By changing the quota quantity for other countries entitled to the rate of duty in rates of duty column numbered 1 from "3,102.8365" to "3,352.8365";

B. For item 923.21 (stainless steel plate);

1. By changing the quota quantity for Sweden from "1,975" to "1,775";

2. By changing the quota quantity for other countries entitled to the rate of duty in rates of duty column numbered 1 from "800" to "1,000".

William B. Kelly, Jr.,

Chairman, Trade Policy Staff Committee.

BILLING CODE 3190-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-15894; File No. SR-NYSE-79-22]

New York Stock Exchange, Inc.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s (b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on May 15, 1979, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

Exchange's Statement of the Terms of Substance of the Proposed Rule Change

The amendment provides for the election by the Board of Directors of the New York Stock Exchange, Inc. of more than one vice chairman.

Purpose of Proposed Rule Change

The ability for the Board of Directors of the New York Stock Exchange, Inc. to elect more than one vice chairman would give the Board maximum flexibility in selecting its officers. The vice chairman plays a substantial role in the decision making process at the Exchange and the ability to elect more than one vice chairman would permit broader representation in that decision making process.

Basis Under the Act

The proposed constitutional amendments are consistent with Section 6(b)(1) of the Act as follows:

(i) The proposed constitutional amendments relate to the organization of the Exchange and the capacity of the Exchange to be able to carry out the purposes of the Securities Exchange Act of 1934 as amended.

(ii) Inapplicable

(iii) Inapplicable

(iv) Inapplicable

(v) Inapplicable
(vi) Inapplicable
(vii) Inapplicable
(viii) Inapplicable

Comments Received From Members, Participants or Others

No comments were solicited or received with respect to the proposed constitutional amendments.

Burden on Competition

There will be no burden on competition.

Basis for Rule Change Being Put Into Effect Pursuant to Section 19)b)(3)

In accordance with Section 19(b)(3)(A)(iii) the proposed amendments take effect immediately, as they are concerned solely with the administration of the New York Stock Exchange, Inc.

At any time within sixty days of the date of filing of these proposed rule changes, the Commission summarily may abrogate the change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purpose of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments covering the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal offices of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted within 21 days of the date of this publication.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

Article III

The Board of Directors

Sec. 3. At its annual meeting the Board of Directors, by the affirmative vote of a majority of the Directors then in office, shall elect the Chairman of the Board and, from among its members [who are members or allied members of the Exchange], [the] *one or more* Vice [Chairman] *Chairmen* of the Board, *as the Board may deem appropriate* [each] *such Chairman and Vice Chairmen* to serve until the next annual meeting of the Board and until [his] *their* successors [has] *have* been elected and take[s] office. *At least one Vice Chairman shall be a Director who is a member or allied member of the Exchange.*

* * * * *

Sec. 9. In the event of the refusal or failure of the Chairman of the Board, [the] *any* Vice Chairman of the Board, any other officer of the Exchange, a Director of the Exchange, or a Trustee of the Gratuity Fund to discharge [his] *their* duties, or for any cause deemed sufficient by the Board of Directors, the Board may, by the affirmative vote of a majority of the entire Board, (1) remove any such officer or Director and declare [his] *that* office or position to be vacant, (2) remove any such Trustee who shall have been elected by the Board and declare [his] *that* office to be vacant, or (3) suspend any such Trustee who shall have been elected by the members of the Exchange from authority to act as such Trustee.

* * * * *

Article IV

Chairman of the Board of Directors

Sec. 2. Subject to the approval of the Board of Directors, the Chairman of the Board may appoint a President, one or more Vice Presidents, a Treasurer, a Secretary and such other officers of the Exchange, other than [the] *any* Vice Chairman of the Board, as [he] *the Chairman* from time to time may determine are required for the efficient management and operation of the Exchange and fix the duties, responsibilities, terms and conditions of employment of such officers and, subject to like approval, [he] *the Chairman* may terminate their employment at any time. All such officers shall be responsible to the Chairman of the Board for the proper performance of their duties.

* * * * *

Sec. 8. In case of the absence or inability to act of the Chairman of the Board, such other person as the Board of Directors may designate shall assume all the functions and discharge all the duties of the Chairman of the Board, other than those which shall devolve upon [the] *any* Vice Chairman of the Board as provided in Article V. In the absence of such designation by the Board, the President, if there be one, or, if there is no President or in [his] *the* absence or inability to act of *the President*, the senior available Vice President shall assume all such functions and discharge all such duties of the Chairman of the Board.

* * * * *

Article V

Vice Chairmen of the Board of Directors

Sec. 1. The Vice Chairman of the Board *and, if there are two or more Vice Chairmen of the Board, the Vice Chairman designated by the Board of Directors, shall* in case of the absence or inability to act of the Chairman of the Board, or in case of a vacancy in the office of Chairman of the Board, [shall] exercise the powers and discharge the duties of the Chairman of the Board in calling and presiding at meetings of the Board of Directors and of members of the Exchange. [The] *Any* Vice Chairman of the Board shall have such other functions and responsibilities as the Board of Directors may from time to time assign. [to him.]

Sec. 2. In case of the absence or inability to act of both the Chairman of the Board and the Vice Chairmen of the Board *who is authorized to exercise the powers and discharge the duties of the Chairman of the Board as provided in Section 1 of this Article, the other Vice Chairman of the Board if there be one and if there be more than one other Vice Chairman, then the other Vice Chairmen in such order or priority as the Board may designate, and, if there is no other Vice Chairman of the Board,* the members of the Board of Directors who are members or allied members of the Exchange, and in such order of priority as the Board may designate, or, in the absence of such designation, the senior available member of the Board of Directors who is a member or allied member of the Exchange, shall exercise the powers and discharge the duties of the Chairman of the Board in calling and presiding at meetings of the Board of Directors and of members of the Exchange.

Sec. 3. In case a vacancy shall occur in the office of *any* Vice Chairman of the Board, the Board, by the affirmative vote of a majority of the Directors then in office, shall fill such vacancy by the election to such office of a Director who [is a member or allied member of the Exchange] *meets the qualifications of the Vice Chairman whose office has become vacant.*

* * * * *

Article VII

Elections—Exchange Meetings

Sec. 13. At any meeting of the members of the Exchange, if neither the Chairman of the Board nor [the] *any* Vice Chairman of the Board nor a member of the Board of Directors authorized to act for the Chairman of the Board under Section 2 of Article V shall be present, the members present, in person and by proxy, shall appoint a presiding officer for the meeting.

* * * * *

Article XVIII

Emergency Committee

Sec. 2. The Emergency Committee shall, at the inception of the Period of Emergency, be composed of the following five Directors who are available and able to meet together—the Chairman of the Board of Director, [the] *each* Vice Chairman of the Board [of Directors and] *then in office and, if there is one Vice Chairman then in office,* the three *senior* members of the Board of Directors who are members or allied members of the Exchange *and if there are two or more Vice Chairmen then in office, such number of the senior members of the Board who are members or allied members of the Exchange as are necessary to bring the Committee up to its full complement of five. . . .*

BILLING CODE 8010-01-M

[Release No. 34-15828; File No. SR-Amex-79-5]

American Stock Exchange, Inc.; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on May 7, 1979 the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

Exchange's Statement of Terms of Substance of the Proposed Rule Change

Proposed amendments to Rules 234 and 235 provide that, subject to specified dollar limitations, the Exchange will assume responsibility for losses incurred by members resulting from certain errors or omissions of Exchange employees responsible for processing and handling orders transmitted through the Exchange's ITS facility.

Statement of Basis and Purpose

The basis and purpose of the foregoing proposed rule change is as follows:

ITS is an electronic communications facility which enables a member physically located on the floor of one exchange to execute an order in another market center by means of an intermarket "commitment to trade".

ITS is a key element in the formulation of the national market system, and, as such, it is important that the system attract sufficient member participation to ensure its continued growth and success.

The purpose of the amendments is to enable the Exchange to assume liability to its members, subject to certain specified limits and conditions, for those losses incurred by members in their use of the ITS system which result from errors or omissions of Exchange employees responsible for operating ITS transmission stations.

The proposed rule is authorized under Article IV, Section 1(e) of the Exchange Constitution, which provides that the Exchange shall not be liable to any member for losses arising out of use of Exchange facilities for the conduct of business, except as may be specifically provided by rule with regard to Exchange facilities for the electronic transmission of orders.

The proposed rule change is designed to provide for an equitable allocation of losses arising out of members' use of ITS and thereby to encourage the use of this facility, which will tend to enhance competition and facilitate development of a national market system. Therefore, the proposed amendments are consistent with Section 6(b) of the Act.

Comments Received From Members, Participants or Others on Proposed Rule Change

No comments were solicited or received from members, participants or others on the proposed amendments.

Burden on Competition

The Amex has determined that no burden on competition will be imposed by the proposed rule change.

The foregoing rule change has become effective, pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before July 2, 1979.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.
May 15, 1979.

Exhibit A.—American Stock Exchange, Inc.

1. Rule 234 is redesignated as Rule 235, and is amended to read as follows:

Rule [234] *235* Transmission and Reception of System Messages;

Exchange Liability

(a) For the convenience of members on the Floor, the Exchange shall furnish employees ("ITS Clerks") who shall, on behalf of such members, send and receive through the System commitments and obligations to trade, pre-opening notifications and responses thereto. The Exchange shall not be liable for any loss, expense or damage resulting from or claimed to have resulted from the errors or omissions of its ITS Clerks *except in accordance with the provisions of and subject to the limitations set forth in this Rule 235.*

(b) All errors and omissions made by one or more ITS Clerks with respect to any single System trade or proposed System trade shall give rise to a single claim against the Exchange by the on-Floor member who instructed the ITS Clerk or Clerks who made the errors or omissions for all loss, cost, damage or expense (hereinafter called "loss") suffered by such member, or any other member organization for which he acted, as a result of such errors and omissions, but only to the extent and as provided in this Rule 235, and the Exchange shall be free to assert any defense to such claim it may have.

(c) *(i)* A member is responsible for communicating instructions to the ITS Clerk as to the message he desires to have transmitted through the System in a clear and accurate manner, on such forms as the Exchange may provide for that purpose. Such member (the "instructing member") shall be responsible for ensuring that his message is entered into the System correctly and for discovering and correcting any error or omission in entry of the message. *No claim shall arise as to errors or omissions which are found to have resulted from any failure by a member (whether or not such member is a party to the claim against the Exchange pursuant to this Rule 235) to place or cancel a message clearly and accurately with the ITS Clerk on a timely basis, in writing on such form or forms as the Exchange may provide for such purpose, and containing such information as may be required by the Exchange from time to time in connection with such message.*

Note.—*Italics* indicate material to be added; [Brackets] indicate material to be deleted.

(ii) It shall be the responsibility of the instructing member to keep abreast of the status of the message. The ITS Clerk shall not be responsible for keeping the instructing member advised as to the status of his message, except that the

ITS Clerk shall be responsible for responding as promptly as possible to the instructing member's inquiry concerning his message.

(iii) No claim shall be allowed if, in the opinion of the arbitration panel provided for in subparagraph (e) of this Rule 235, the member making such claim did not, promptly on discovery of the error or omission, take all proper steps to correct such error or omission and to establish and mitigate the loss resulting therefrom.

(d) Any claim for loss arising from errors or omissions of an ITS Clerk or Clerks shall be presented in writing to the Exchange no later than the opening of trading on the next business day following the day on which the error or omission giving rise to the loss occurred or within such longer period as the Exchange shall consider equitable under the circumstances.

(e) All disputed claims shall be referred for binding arbitration to an arbitration panel and the decision of a majority of the arbitrators selected to hear and determine the controversy shall be final and there shall be no appeal to the Board of Governors from the decision of such panel. The arbitration panel shall be composed of an odd number of panelists. Each of the parties to the dispute shall select one member or allied member to serve as panelist on the arbitration panel. The panelists so selected shall then select one or more additional panelist(s); provided that the additional panelist(s) so selected are either members or allied members of the Exchange, and provided further that no member of the arbitration panel may have any direct or indirect financial interest in the claim. In the event that the initial panelists selected by the parties to the dispute cannot agree on the selection of the additional panelist(s), such additional panelist(s) shall be appointed by a Floor Official, selected by lot from a roster of Floor officials having no direct or indirect financial interest in the claim. Each party to the dispute may make oral and written submissions and present witnesses to the arbitration panel. To the extent not inconsistent with the provisions of this Rule 235 the provisions governing arbitration contained in Article VIII of the Constitution and Rules 600 through 610 shall apply to proceedings under this subparagraph (e).

(f) The Exchange shall not be liable for any loss, resulting from or claimed to have resulted from the errors or omissions of its ITS Clerks *except with respect to claims against it under this Rule and to the extent provided in this subparagraph (f).*

(i) As to any single claim, the Exchange shall not be liable in excess of the larger of $10,000 or the amount of the recovery obtained by the Exchange as a result of the errors or omissions giving rise to such claim under any applicable insurance maintained by the Exchange; or

(ii) As to any number of single claims by any one or more members growing out of errors or omissions made by any one or more, or all, ITS Clerks, in the aggregate, on a single trading day, the Exchange shall not be liable in excess of the larger of $50,000 or the amount of the recovery obtained by the Exchange as a result of the errors or omissions giving rise to all such claims under any applicable insurance maintained by the Exchange.

(iii) As to any number of single claims by any one or more members growing out of errors or omissions made by any one or more, or all, ITS Clerks, in the aggregate, during a single calendar month, the Exchange shall not be liable in excess of the larger of $100,000 or the amount of the recovery obtained by the Exchange as a result of the errors or omissions giving rise to such claim under any applicable insurance maintained by the Exchange.

If the number of claims growing out of errors or omissions made by any one or more, or all, ITS Clerks, in the aggregate, during a single calendar month, cannot be fully satisfied because any single claim or all such claims in the aggregate exceed the maximum amount of liability provided for in subparagraph (iii) above, then such maximum amount shall be allocated among all such claims based upon the proportion that each such claim bears to the sum of all such claims. Thereafter, if all claims arising on a single trading day (reduced to reflect any allocation made in accordance with the preceding sentence) cannot be fully satisfied because any single claim or all such claims in the aggregate exceed the maximum amount of liability provided for in subparagraph (ii) above, then such maximum amount shall be allocated among all such claims based upon the proportion that each such claim bears to the sum of all such claims.

2. Rule 235 is redesignated Rule 234, and is amended to read as follows:

Rule [235] *234* Clearing of System Transactions

(a) *As used in this Rule 234 and Rule 235* the term "System trade" shall mean any purchase or sale of a security which results from the acceptance of a commitment or obligation to trade received on the Floor through ITS or the Pre-Opening Application or from the acceptance in another market of a commitment or obligation to trade sent from the Floor through ITS or the Pre-Opening Application.

(b) Each System trade shall be reported on the clearing tape generated by the System at the end of each trading day. Such tape shall also identify one or more clearing members who will clear and settle each System trade. The *member on the Floor who instructed the ITS Clerk (defined in Rule 235) to issue or accept the commitment or obligation to trade which resulted in the System trade reported on the clearing tape* ("instructing member") [(as defined in Rule 234) for each System trade] shall *also* be identified in Exchange records.

(c) Clearing members shall report each day's System trades to the agency through which they clear, along with all other trade input for that trade date. The participating market center which supplied the contra side of the System trade shall be designated by the clearing member as the contra party to the trade.

(d)(1) Whenever any System trade as reported by the clearing tape continues to be unresolved at the close of the second business day following the trade date, notwithstanding the routine comparison procedures employed by the clearing agency to which such system trade was reported, the Exchange shall be notified of the uncompared System trade so as to be able to conduct appropriate inquires on the Floor. The instructing member shall cooperate with the Exchange in the course of its on-Floor inquires and shall comply with such procedures as the Exchange may from time to time prescribe in an attempt to identify the member or member organization who knows the uncompared System trade. If the on-Floor inquiries conducted by the Exchange fail to identify the member or member organization who knows the uncompared System trade, but the inquires confirm to the satisfaction of the Exchange that Exchange records were accurate in their identification of the instructing member, and that the instructing member did instruct the [Exchange employee referred to in Rule 234 ("] ITS Clerk [")] to issue or accept the commitment or obligation to trade which resulted in the uncompared System trade as included on the clearing tape, then the instructing member shall accept and honor the trade or shall cause a member organization to do so in his behalf.

(2) If the on-Floor inquiries conducted by the Exchange identify to the satisfaction of the Exchange a member, other than the member indicated on Exchange records as the instructing member, as the person who instructed the ITS Clerk to issue or accept the commitment *or obligation* to trade which resulted in the uncompared System trade as included on the clearing tape, then such other member shall accept and honor the trade or shall cause a member organization to do so in his behalf.

(3) If the on-Floor inquiries conducted by the Exchange fail to identify the member or member organization who knows the uncompared System trade, and also fail to satisfy the Exchange as to the identify of the member who instructed the [Exchange employee] *ITS Clerk* to issue or accept the commitment or obligation to trade which resulted in the uncompared System trade as included on the clearing tape, then the Exchange shall, for its own account, accept and honor the uncompared System trade and may take such action in the market to close out or offset its position as it may deem appropriate.

(e) Whenever a clearing agency to which a System trade has been reported excludes such System trade from the clearance procedures conducted by such agency, either because such agency ceases to act (either with respect to transactions generally or as to a particular transaction) for a member or member organization, or because of the insolvency of such member or member organization, the Exchange may, but shall not be obligated to, assume and honor any one or more or all of such excluded System trades for the account of and on behalf of the member or member organization for which the clearing agency ceased to act or which is insolvent and the Exchange may take such action in the market to close out or offset its position as it may deem appropriate. In any such case, the Exchange shall have a claim against such member or member organization in the amount of the loss incurred by the Exchange as a result of such assumption of such excluded System trades. The Exchange may assert such claim against such member or member organization in any appropriate forum and, without limiting the generality of the foregoing, in connection with the transfer or any membership by such member, or by any member who is associated with such member organization, such claim shall be entitled to priority in payment as a sum due the Exchange under the provisions of Section 4(e) of Article IV of the Constitution.

BILLING CODE 8010-01-M

[Release No. 15882]

Bradford National Clearing Corp., et al.; Extension of Comment Period

May 30, 1979.

The Commission today announced that it has extended until July 27, 1979 the comment period on the two issues remanded for further study and explication by the United States Court of Appeals for the District of Columbia Circuit in the *Bradford* case. [1] Those issues were National Securities Clearing Corporation's ("NSCC") use of the pricing policy known as geographic price mutualization ("GPM") and NSCC's selection, without competitive bidding, of the Securities Industry Automation Corporation ("SIAC") as facilities manager of its consolidated system. The Commission had requested comment on those two issues in Securities Exchange Act Release No. 15640 (March 14, 1979).

In Release No. 15640, the Commission also included the text of a letter to Jack Nelson, President of NSCC, requesting (i) that NSCC submit written statements of its views and arguments concerning the two issues remanded by the court and (ii) that NSCC respond to certain other specific questions set forth in that letter relating to those two issues. The Commission also indicated that NSCC's two reports would be placed in a public file and that interested persons were encouraged to examine those reports and to comment on them. Finally, the release indicated that the comment period would be open for 45 days. [2]

On April 20, 1979, the Commission received a letter from NSCC containing a report on one of those issues, geographic price mutualization. That report was placed in Public File No. 600–15 and also issued as a Commission release. [3] Subsequent to that letter, NSCC orally requested that the Commission extend the time for submission by NSCC of its report on competitive bidding until June 15, 1979.

The Commission also has received a written request from the National Association of Securities Dealers, Inc. (the "NASD") and oral requests from Stock Clearing Corporation of Philadelphia ("SCCP"), Midwest Clearing Corporation ("MCC") and Bradford Securities Processing Services, Inc. ("BSPS") that the comment period on the two issues remanded in the *Bradford* litigation be extended.

The Commission believes it is important that interested persons have a meaningful opportunity to examine and comment upon NSCC's two reports. Accordingly, the Commission has extended the comment period on the two issues remanded in the *Bradford* litigation until July 27, 1979, which is approximately 30 days after the anticipated receipt and publication of NSCC's report on competitive bidding.

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 21078; (70-6320)]

Central & South West Fuels, Inc. et al.; Proposed Indemnity Agreements With Insurance Company Concerning Fuels Subsidiary's Mining Activities

June 1, 1979.

In the matter of Central and South West Fuels, Inc., P.O. Box 10773, Golden, Colorado 80401; Central Power and Light Company, P.O. Box 2121, Corpus Christi, Texas 78403; Public Service Company of Oklahoma, 212 East 6th Street, Tulsa, Oklahoma 74119; Southwestern Electric Power Company, P.O. Box 21106, Shreveport, Louisiana 71156; and West Texas Utilities Company, P.O. Box 841, Abilene, Texas 79604.

Notice is hereby given that Central Power and Light Company ("CPL"), Public Service Company of Oklahoma ("PSO"), Southwestern Electric Power Company ("SWEPCO"), and West Texas Utilities Company ("WTU"), each an electric utility subsidiary of Central and South West Corporation, a registered holding company, together with Central and South West Fuels, Inc. ("CSWF"), a fuel subsidiary of CPL, PSO, SWEPCO and WTU, have filed with this Commission a declaration pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Section 12(b) of the Act and Rules 45(b), 90 and 91 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

---

[1] *Bradford National Clearing Corporation et al.* v. *Securities and Exchange Commission et al.*, 590 F. 2d 1085 (D.C. Cir. 1978).

[2] To date, the Commission has received written comments from The Depository Trust Company, Pershing & Company and Merrill Lynch, Pierce, Fenner & Smith, Inc.

[3] Securities Exchange Act Release No. 15760 (April 24, 1979).

By order dated August 2, 1978 (HCAR No. 20658), this Commission authorized the creation of CSWF, with CPL, PSO and SWEPCO each owning 30% of CSWF's Common stock and WTU owning the remaining 10%. CSWF conducts nonpetroleum fuel exploration, acquisition and development activities as agent for its owners pursuant to orders issued in File No. 70-6235. As part of this fuel exploration and development program, CSWF contemplates engaging in mining activity in a number of States which require, as a prerequisite to the commencement of such activity, the posting by CSWF of a bond indemnifying the State against potential losses due to CSWF's failure to restore any mined property to its original condition. To avoid the unnecessary expense involved in obtaining a separate bond for each property it plans to develop, CSWF plans to procure a master bond which will cover mining operations in multiple locations.

CSWF has negotiated the terms of such a master bond with St. Paul Fire and Marine Insurance Company ("St. Paul"). As a condition to its acting as surety thereon, St. Paul requires that each of CSWF's owners indemnify it against any default on CSWF's obligations under the bond. Such indemnification would be in proportion to each company's ownership interest in CSWF. CPL, PSO, SWEPCO and WTU seek authorization to enter into separate general agreements indemnifying St. Paul for 30%, 30%, 30% and 10%, respectively, of the total of any liability incurred by St. Paul in its position as surety for CSWF under the master bond.

The authorization given in connection with the fuel exploration, acquisition and development activities in File No. 70-6235 provides that the costs incurred by CSWF in the development of a given property be apportioned among its owners not on the basis of their ownership interest in CSWF, but rather on the basis of their ownership interests in that one property. Accordingly, should the owners be called upon to fulfill their obligations under the proposed general indemnity agreements with St. Paul (under which agreements their liability would be proportionate to their ownership interests in CSWF), CPL, PSO, SWEPCO and WTU would reimburse each other as necessary to render each company's loss in connection with a particular mining operation proportionate to its ownership interest in that mining operation.

The fees and expenses to be incurred in connection with the proposed transaction are estimated at $2,700, including legal fees of $500. It is stated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than June 22, 1979, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

BILLING CODE 8010-01-M

[Release No. 15992; (SR-CBOE-79-3)]

Chicago Board Options Exchange, Inc.; Order Approving Proposed Rule Change

June 1, 1979.

On April 16, 1979, the Chicago Board Options Exchange, Incorporated filed with the Commission, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act") and Rule 19b-4 thereunder, copies of a proposed rule change which establishes the basis for the determination of maximum bid/ask differentials for market makers as the last preceding bid for an option contract, rather than the last sale.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 34-15754, April 23, 1979) and by publication in the Federal Register (44 FR 25547, May 1, 1979). All written statements with respect to the proposed rule change which were filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person were considered and (with the exception of those statements or communications which may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552) were made available to the public at the Commission's Public Reference Room.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of Section 6, and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

[Release No. 21072 (70-6186)]

Connecticut Yankee Atomic Power Co.; Post-Effective Amendment Regarding Issuance and Sale of Short-Term Notes to Banks and a Dealer in Commercial Paper and Exception From Competitive Bidding

June 1, 1979.

In the matter of Connecticut Yankee Atomic Power Company, P.O. Box 270, Hartford, Connecticut 06101.

NOTICE IS HEREBY GIVEN that Connecticut Yankee Atomic Power Company ("Connecticut Yankee"), an electric utility subsidiary company of Northeast Utilities and New England Electric System, both of which are registered holding companies, has filed with this Commission a post-effective amendment to the declaration in this proceeding pursuant to Sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50(a)(5) promulgated thereunder regarding the following proposed transactions. All

interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

By order in this proceeding dated June 28, 1978 (HCAR No. 20607), Connecticut Yankee was authorized, during the period ending June 30, 1979, to issue and sell short-term notes to banks and commercial paper to a commercial paper dealer in an aggregate amount at any time outstanding not to exceed $30,000,000. The notes and commercial paper were to be issued and renewed from time to time as funds were required prior to June 30, 1979, provided no such notes or commercial paper would nature after March 31, 1981.

Connecticut Yankee now proposes to (a) extend the period for the short-term borrowings to June 30, 1980, (b) provide for the latest maturity for the borrowings to be March 31, 1981, and (c) revise the list of banks which will participate in the company's short-term borrowing program. The aggregate amount of short-term borrowings to be outstanding at any one time, whether issued to banks or to a dealer in commercial paper, will not exceed $30,000,000.

As of March 31, 1979, Connecticut Yankee's outstanding short-term debt was $17,525,000, all of which was represented by commercial paper. The short-term debt at June 30, 1979, is estimated to be $13,000,000. It is stated that the funds to be derived from the issuance and sale of the bank notes and commercial paper will be applied by the company (i) to repay $13,000,000 of commercial paper outstanding at June 30, 1979, (ii) to provide funds for construction, and (iii) to provide a portion of the funds required for the purchase of additional nuclear fuel through June 30, 1980. The company's estimated construction and nuclear fuel programs for 1979 are $8,900,000 and $25,000,000, respectively, and for 1980 are $16,000,000 and $18,700,000, respectively.

The bank notes to be issued by Connecticut Yankee will each be dated the date of issue, will have maximum naturity dates of nine months, and will bear interest at the prime rate. The bank notes will be issued no later than June 30, 1980, and will be subject to prepayment at any time at the company's option without premium. Connecticut Yankee proposes to make such borrowings from The Chase Manhattan Bank, New York, N.Y., and Bankers Trust Company, New York, N.Y., in a maximum principal amount at any one time outstanding from each bank of $15,000,000 and $5,000,000, respectively. Compensating balance requirements will be 5% of the credit line plus 15% on any funds borrowed. Connecticut Yankee calculates that the effective cost of such borrowings will be 14.69% per annum based on a prime interest rate of 11¾%. No closing costs are required in connection with the proposed bank borrowings.

The commercial paper will be issued in the form of short-term promissory notes in denominations of not less than $50,000 and not more than $1,000,000, of varying maturities, with no maturity more than 270 days after the date of issue, and will not be repayable prior to maturity. The commercial paper will be sold directly to a commercial paper dealer at the discount rate per annum prevailing at the date of issuance for commercial paper of comparable quality and of the particular maturity. No commercial paper shall be issued having a maturity of more than 90 days at an effective interest cost to the company in excess of the effective bank interest rate at which the company could obtain loans from banks in an amount at least equal to the principal amount of such commercial paper. No commission or fee will be payable in connection with the issuance and sale of the commercial paper. The purchasing dealer, as principal, will reoffer the commercial paper to institutional investors at a discount of not more than ⅛ of 1% per annum less than the prevailing discount rate to Connecticut Yankee.

The commercial paper will be reoffered to not more than 200 identified and designated customers in a list (nonpublic) prepared for Connecticut Yankee in advance by the purchasing dealer. No additions will be made to this customer list. It is anticipated that the commercial paper will be held by customers to maturity, but if such customers desire to resell prior to maturity, the purchasing dealer, pursuant to a verbal repurchase agreement, will repurchase the commercial paper and reoffer the same to others in the group of 200 customers.

Expenses to be incurred in connection with the proposed transactions are estimated at $500. It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Connecticut Yankee has requested that the issuance and sale of commercial paper be excepted from the competitive bidding requirements of Rule 50 pursuant to paragraph (a)(5)(B) thereof on the ground that it is not practicable to invite competitive bids for commercial paper and that current rates for commercial paper of prime borrowers such as Connecticut Yankee are published daily in financial publications. Connecticut Yankee has also requested that time for filing certificates of notification pursuant to Rule 24 be extended to allow for filing on a quarterly basis.

NOTICE IS FURTHER GIVEN that any interested person may, not later than June 28, 1979, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact of law raised by the post-effective amendment which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as now amended or as it may be further amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

BILLING CODE 8010-01-M

[Release No. 21673; (70-6226)]

Louisiana Power & Light Co.; Post-Effective Amendment Regarding Increase of Short-Term Borrowing

June 1, 1979.

In the matter of Louisiana Power & Light Co., 142 Delaronde Street, New Orleans, Louisiana 70174.

Notice is hereby given that Louisiana Power and Light Company ("Louisiana"), a wholly-owned subsidiary of Middle South Utilities, Inc., a registered holding company, has filed

with this Commission a first post-effective amendment to the declaration in this proceeding pursuant to Sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") regarding the following proposed transactions. All interested persons are referred to the amended declaration, which is summarized below, for a complete statement of the proposed transactions.

By orders in this proceeding dated December 15, 1978 and January 5, 1979 (HCAR Nos. 20832 and 20873), Louisiana was authorized to issue and sell, from time to time until December 31, 1979, notes to banks and commercial paper to a dealer in an aggregate principal amount of all such borrowings at any one time outstanding not exceeding $120,000,000, the presently effective loan commitments from such banks terminating on December 31, 1979, with loans thereunder maturing not later than December 31, 1979, and proposing further that no bank loans under any extensions or renewals of such loan commitments and no sales of Louisiana's commercial paper would be made after June 30, 1980 or having a maturity date after June 30, 1980 without further authorization from the Commission on the basis of a further filing by Louisiana. As of May 18, 1979, the aggregate principal amount of short-term borrowings by means of bank loans and the sale of its commercial paper which Louisiana has outstanding, as authorized by this proceeding, is $93,007,500.

Louisiana now proposes that the maximum aggregate principal amount of all such borrowings that it is permitted to have outstanding at any one time through December 31, 1979, be increased to $130,000,000; and in such connection it has obtained from a new and additional participant, Jefferson Bank and Trust Company, Metairie, Louisiana, a loan commitment terminating on and providing for loan maturities not later than December 31, 1979, under which the maximum principal amount at any one time outstanding which may be borrowed by Louisiana from such new participant during such period is $1,000,000, and has obtained increases in the presently effective loan commitments from three of the presently participating banks, whereby the respective maximum principal amounts at any one time outstanding which may be borrowed by Louisiana from these three banks has been increased as follows: The Chase Manhattan Bank, increased from $54,000,000 to $59,000,000, Irving Trust Company, increased from $12,000,000 to $15,000,000, and Manufacturers Hanover Trust Company, increased from $8,000,000 to $10,000,000.

All of the other statements previously set forth in the amende declaration in this proceeding with respect to the Louisiana banks and the loans to be made therefrom and the non-Louisiana banks and the loans to be made therefrom, remain unchanged and apply, respectively, to the Louisiana bank and to the three non-Louisiana banks mentioned above.

Louisiana's construction program contemplates expenditures of approximately $268,600,000 in 1979. Louisiana estimates that it will require approximately $145,000,000 of additional funds from external sources in order to finance the balance of this 1979 construction program. As part of its financing program, Louisiana is presently contemplating the sale in July of 1979 of not to exceed $60,000,000 in aggregate per values of preferred stock. However, in the event that this preferred stock sale is not effected and completed before the end of July, Louisiana believes that it will become necesary for it to make and have outstanding by or before the end of July 1979 short term borrowings of the nature aforesaid aggregating more than the $120,000,000 principal amount presently authorized in this proceeding.

It is stated that no special or separate expenses are anticipated in connection with the proposed transactions and that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than June 29, 1979, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the post-effective amendment which he desires to controvert; or he may request that he be notified in the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as amended or as it may be further amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

BILLING CODE 8010-01-M

[Release No. 15690; SR-MSE-79-6]

Midwest Stock Exchange, Inc.; Order Approving Proposed Rule Change

May 31, 1979

In the matter of Midwest Stock Exchange, Inc., 120 South LaSalle Street, Chicago, Illinois 60603.

On April 2, 1979, the Midwest Stock Exchange, Inc. (the "MSE") filed with the Commission, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act") and Rule 19b-4 thereunder, copies of a proposed rule change which amended Article XX, Rule 25 of the MSE Rules, and added a new Rule 13 to Article IX of the MSE Rules. The purpose of the proposal is to conform the MSE rules to the requirements of Section 11(a)(1) of the Act. On March 26, 1979, the MSE filed with the Commission Amendment No. 1 to SR-MSE-79-6. As amended, the proposal would require that MSE members clearly announce to the trading crowd that they are representing orders to be executed pursuant to Section 11(a)(1)(G) of the Act and Rule 11a1-1(T) thereunder, and that such orders yield priority, parity, and precedence to any order which is not for the account of a member, member organization or associated person thereof. Additionally, orders to be executed pursuant to Section 11(a)(1)(G) of the Act and Rule 11a1-1(T) thereunder must be marked in such a manner as to alert the executing member that the order is subject to those provisions.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission release (Securities Exchange Act Release No. 34-15690, April 2, 1979) and by publication in the Federal Register (44 FR 21102, April 9, 1979). No comments

were received with respect to the proposed rule filing.[2]

The Commission finds that the proposed rule change is consistent with the requirements of the act and the rules and regulations thereunder applicable to a national securities exchange, and in particular, the requirements of Sections 6 and 11(a), and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 15889; SR-MSE-79-6]

Midwest Stock Exchange, Inc.; Order Approving Proposal Rule Change

May 31, 1979.

In the matter of Midwest Stock Exchange, Inc., 120 South La Salle Street, Chicago, Illinois 60603.

On April 2, 1979, the Midwest Stock Exchange, Inc. (the "MSE") filed with the Commission, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act") and Rule 19b-4 thereunder, copies of a proposed change to Article XXI, Rule 19 of the MSE Rules. On April 13, 1979 the MSE filed with the Commission Amendment No. 1 to SR-MSE-79-6. As amended, the proposal would require that members effecting on-floor proprietary transactions pursuant to Section 11(a)(1)(G) of the Act and Rule 11a1-1(T) thereunder, yield priority, parity and precedence to all orders originating off the floor, other than off floor orders to be executed pursuant to Section 11(a)(1)(G) of the Act and Rule 11a1-1(T) thereunder.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 34-15745, April 18, 1979) and by publication in the Federal Register (44 FR 24670, April 26, 1979). No comments were received with respect to the proposed rule filing.[1]

[1] On April 30, 1979, the MSE filed with the Commission Amendment No. 2 to SR-MSE-79-6, indicating final approval of the proposal by the MSE Board of Governors on April 19, 1979.

[1] On April 30, 1979, the MSE filed with the Commission Amendment No. 2 to SR-MSE-79-6, indicating final approval of the proposal by the MSE Board of Governors on April 19, 1979.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and in particular, the requirements of Sections 6 and 11(a), and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

BILLING CODE 8010-01-M

[Release No. 34-15893; File No. SR-MSE-79-14]

Midwest Stock Exchange, Inc.; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975) (the "Act"), notice is hereby given that on May 29, 1979, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

Statement of the Terms of Substance of the Proposed Rule Change

Article XXXI, Rules 6 and 10 of the Midwest Stock Exchange, Incorporated (the "MSE") are hereby amended as follows:

Additions Italicized—[Deletions Bracketed]

ARTICLE XXXI

Dealer Required to Purcahse All Odd Lots Offered

Rule 6. In any security in which he or it is registered as such, an odd-lot dealer shall be required to purchase all odd lots offered to him or it by any member or member organization of the Exchange and he or it shall be required to sell to any member or member organization of the Exchange any odd lots bid for by such member or member organization.

[A market order shall be executed at the next proper full-lot transaction, plus if a sale or minus if a purchase, the designated odd-lot differential, except where an order exceeds a full lot or a multiple of a full lot, such excess portion shall be filled on the execution of the first full lot.

Stop orders to buy shall become market orders when a round-lot transaction takes place at or above the stop price. The order shall be filled at the price of the next transaction plus the designated odd-lot differential.

Stop orders to sell shall become market orders when a round lot transaction takes place at or below the stop price. The order shall be filled at the price of the next transaction minus the odd-lot differential.

Odd-lot executions shall not be made on "seller" or "cash" trades. Odd-lot "seller" orders shall be executed on the regular designated differential up to an including "seller 7 days"; for longer periods, an additional one-quarter (¼) of a point shall be charged by the odd-lot dealer.]

ARTICLE XXXI

Execution of Odd Lot Orders

Rule 10. (a) No change in text.

(b) No change in text.

(c) General. A market order shall be executed at the proper full lot transaction, plus or minus a differential, if one is to be charged, except where an order exceeds a full lot or a multiple of a full lot, such excess portion shall be filled on the execution of the first full lot.

(i) Stop orders to buy shall become market orders when a round-lot transaction takes place at or above the stop price. The order shall be filled at the price of the next transaction plus an odd-lot differential if one is to be charged.

(ii) Stop orders to sell shall become market orders when a round-lot transaction takes place at or below the stop price. The order shall be filled at the price of the next transaction minus an odd-lot differential if one is to be charged.

(iii) Odd-lot transactions shall not be made on "seller" or "cash" trades.

(iv) Buy Limited Orders. The effective transaction for a limited order to buy shall be the first round-lot transaction which is below the specified limit by the amount of any differential or by a greater amount. The order shall be filled at the price of the effective transaction, plus any differential.

(v) Sell Limited Orders, Marked "Long". The effective transaction for a limited order to sell marked "long" shall be the first round-lot transaction which is above the specified limit by the amount of any differential or by a greater amount. The order shall be filled at the price of the effective transaction, minus any differential.

Statement of Basis and Purpose

The MSE states that the purposes of the proposed changes in Rule 6 of Article XXXI are to delete duplicate provisions also reflected in Rule 10 of Article XXXI, and to delete the provision of Rule 6 of Article XXXI that was revised by the previous adoption of the provisions of paragraph (b) of Rule 10 of Article XXXI.

Further, the MSE states that the purpose of the additions to Rule 10 of Article XXXI is to reflect the fact that odd-lost limit orders must be filled at a price that is better than the limited price at least by the amount of any differential charged.

The basis under the Act for this proposed rule change is Section 6(b)(5) which requires, among other things, that the rules of the exchange be designed to promote just and equitable principles of trade.

Comments Received From Members, Participants or Others on the Proposed Rule Change

The MSE has neither solicited nor recieved any comments on this proposed rule change.

Burden on Competition

The MSE believes that no burdens will be imposed on competition as a consequence of the effectiveness of this proposed rule change.

The foregoing proposed rule change has become effective, pursuant to Section 19(b)(3) of the Act. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be availble for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before June 25, 1979.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

June 1, 1979.

[FR Doc. 79-17788 Filed 6-7-79; 8:45 am]
BILLING CODE 8010-01-M

[Release No. 15883; File No. SR-NASD-78-16]

National Association of Securities Dealers, Inc., Order Approving Proposed Rule Change

May 30, 1979.

In the matter of National Association of Securities Dealers, Inc., 1735 K Street, N.W., Washington, D.C. 20006.

On October 11, 1978, the National Association of Securities Dealers, Inc. (the "NASD") filed with the Commission, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), and Rule 19b-4 thereunder, copies of a proposal to amend Schedule C under Article I, Section 2 of its By-Laws to revise its requirements for registration and qualification of principals associated with member broker-dealer firms.[1] In particular, the proposal would create several new categories of "limited principal" registration [2] and would establish specialized qualification examinations for certain of those categories to be administered in connection with a pilot computerized examination program.

Notice of the filing, together with its terms of substance, was given by publication of a Commission Release (Securities Exchange Act Release No. 15263, October 27, 1978) and by publication in the Federal Register (43 FR 51154, November 2, 1978). On December 27, 1978, the initial proposal was revised to redefine one limited principal category, to incorporate into this proposal certain provisions governing registered options principals, and to add certain administrative and technical provisions. Notice of the filing of this amendment was given by publication of a Commission Release (Securities Exchange Act Release No. 15498, January 16, 1979) and by publication in the Federal Register (44 FR 5036, January 24, 1979). Although public comments were solicited on the proposed rule change as initially submitted and as amended in December, none were received. A final clarifying amendment to the proposal was submitted on May 8, 1979.

Currently, Schedule C of the NASD By-Laws specifies three categories of principal registration: Principal, Registered Options Principal, and Financial Principal. The proposed amendment to Schedule C would retain these categories, with the modifications discussed below, and would create two totally new limited principal categories: Limited Principal—Investment Company and Variable Contracts Products, and Limited Principal—Direct Participation Programs.

Under the proposed rule change, the existing "Principal" category would be recaptioned "General Securities Principal." Qualification requirements would remain the same, and all existing Principals would be redesignated General Securities Principals. The "Registered Options Principal" qualification requirements similarly would be unchanged, except for certain technical provisions.[3]

A category of "Limited Principal—Financial and Operations," which defines in detail the types of responsibilities requiring principal registration, would replace the existing Financial Principal category. Persons seeking qualification in this category would be required only to complete a specialized financial and operations examination and would not also need to qualify as General Securities Principals. As a result, unlike existing Financial Principals, persons qualifying only in the new limited category could not function as principals beyond the financial and operations areas.

The new "Limited Principal—Investment Company and Variable Contracts Products" category would permit, but would not require, persons whose supervisory activities are limited solely to transactions involving these products and insurance premium refunding programs to qualify as limited principals by passing a specialized examination relating primarily to these areas of business. Similarly, under the new "Limited Principal—Direct Participation Programs" category, persons could take a specialized examination and qualify as limited

---

[1] A "principal" is an individual actively engaged in the management of a member firm's investment banking or securities business, including the supervision, solicitation or conduct of business, or training of persons associated with the firm.

[2] A "limited principal" is an individual whose supervisory activities would be restricted to certain specialized types of business and who registers to function as a principal in these areas alone. A limited principal could qualify as such by passing an examination dealing primarily with the specialized area of business.

[3] The provisions in Schedule C of the NASD By-Laws for Registered Options Principals became effective on February 1, 1979, as part of the NASD's rules to regulate options activities of member firms. *See* Securities Exchange Act Release No. 15332 (November 15, 1978).

principals if their activities are restricted solely to such programs.[4]

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations applicable to registered national securities associations, and in particular, with the requirements of Sections 15(b) and 15A of the Act and the rules and regulations thereunder.[5] The Commission believes the activities of limited principals in the proposed categories are sufficiently specialized to make it unnecessary for them to qualify as principals in unrelated areas of the securities industry. By providing for the registration of limited principals, the Commission believes that the NASD may provide greater opportunities for persons to register as brokers and dealers and become members of the NASD or to become associated with a member firm. In addition, the Commission believes the NASD proposal accomplishes these results in a manner which is not designed to permit unfair discrimination between brokers and dealers and which will assist the NASD in enforcing compliance by its members, and persons associated with its members, with the provisions of the Act, rules thereunder, and the rules of the NASD.

The proposed rule change also would amend the following provisions in Schedule C, which are incidental to the creation of categories of limited principal registration.

Schedule C currently requires firms applying for NASD membership to have two persons qualified to become registered as principals. The purpose of this provision is to ensure that a firm losing one principal can continue to have another associated person qualified to manage it. To eliminate any ambiguities arising from the creation of categories of limited principal registration, this provision has been amended to require applicants to have two persons qualified to be registered as principals "with respect to each aspect of the applicant's investment banking and securities business." Exceptions to this general provision would permit a firm to have only one qualified Limited Principal—Financial and Operations,[6] and if the firm engages in option transactions, one qualified Registered Options Principal. These exceptions reflect current requirements in Schedule C.

Schedule C currently provides that a registered representative whose duties are changed so as to require registration as a principal will be allowed "a reasonable period of time" to pass a qualification examination for principals. The proposed rule change, as amended, would require a registered representative to pass the appropriate principal qualification examination within 90 calendar days following the change in his duties. Similarly, an individual new to the industry or new to a firm would have 90 days to qualify as a principal, after first satisfying any necessary prerequisites. If an applicant fails the examination or does not take it within the 90 days, a new application form and examination fee would be required.[7] The Commission believes this provision is reasonable as a means of assuring the timely qualification of individuals as principals and as an aid to efficient administration of the qualification examinations.

In addition to the examination fee, the proposed rule change would provide for the assessment of a $10 "service charge" as to each individual who, having made an appointment for an examination administered by computer, failed timely to appear for the examination or cancel the appointment. This provision would simply pass through a charge assessed against the NASD for persons failing to appear for scheduled examinations.

Copies of the proposed rule change, all subsequent amendments, all written statements with respect to the proposed rule change, as amended, which were filed with the Commission, and of all written communications relating to the proposed rule change as amended between the Commission and any person were considered and are available for inspection and copying at the Commission's Public Reference Room, 1100 L Street, N.W., Washington, D.C. (File No. SR–NASD–78–16).[8]

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

By the Commission.

George A. Fitzsimmons,

Secretary.

[FR Doc. 79-17708 Filed 6-7-79; 8:45 am]

BILLING CODE 8010-01-M

---

[4] The Commission has also approved a proposed rule change (SR–NASD–79–3) by the NASD containing the plans and specifications for the two new categories of limited principal registration: Limited Principal—Investment Company and Variable Contracts Products, and Limited Principal—Direct Participation Programs. The NASD intends to administer these limited principal examinations through its pilot computerized examination system. Securities Exchange Act Release No. 15894 (May 30, 1979).

[5] The Commission currently is considering issues relating to the qualification of principals in connection with its review of proposed Securities Exchange Act Rule 15b7–1, which was published for comment in Securities Exchange Act Release No. 13679 (June 27, 1977), 43 FR 34338 (July 8, 1977). This rule, as proposed, includes the same categories of limited principals approved today by the Commission as part of the NASD's rule change proposal.

[6] To codify an existing policy of the NASD, another provision of the proposed rule change would provide that firms exempt from certain provisions of Securities Exchange Act Rule 15c3–1 could, upon written request to the NASD, also be exempted from the requirement to have a Limited Principal—Financial and Operations.

[7] As originally filed, the proposed rule change, by its terms, applied only to registered representatives seeking elevation to principal status as a result of changed duties. The NASD filed an amendment on May 8, 1979, to clarify that the provision applied to all applicants for principal status.

[8] The Commission also considered public comments on proposed Securities Exchange Act Rule 15b7–1 (File No. S7–709) and public information submitted in connection with a pending rule change proposal of the NASD to amend Schedule C of its By-Laws (File No. SR–NASD–78–6). Both of these proposals included the limited principal categories being approved by the Commission.

[Release No. 15884; SR–NASD–79–3]

National Association of Securities Dealers, Inc.; Filing of Proposed Rule Change and Order Approving Proposed Rule Change

May 30, 1979.

In the matter of National Association of Securities Dealers, Inc., 1735 K Street, N.W., Washington, DC 20006.

On May 4, 1979, the National Association of Securities Dealers, Inc. (the "NASD") filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act"), and Rule 19b–4 thereunder, copies of a proposal to adopt plans and specifications[1] for two limited principal examinations which were pending approval by the Commission in a related proposed rule change (File No. SR–NASD–78–16).[2] That proposed rule change would, among other things, authorize the establishment of the categories of Limited Principal—Investment Company and Variable Contracts Products, and Limited Principal—Direct Participation Programs. According to the NASD, the purpose of the proposed rule change is

---

[1] The filing received from the NASD included the following materials: copies of two letters from Frank J. McAuliffe, Director of the NASD's Qualifications Department, to Janet R. Zimmer, Chief of the Branch of Over-the-Counter Regulation of the Division of Market Regulation, dated May 4, 1979, concerning the two proposed limited principal examinations; study outlines prepared by the NASD for each of the limited principal examinations; specifications describing the examinations' area and sectional weightings; and relevant portions of an agreement between the NASD and Control Data Corporation, the organization providing the computer facilities which will be used by the NASD for the administration of the qualification examinations.

[2] Proposed NASD Rule 3B–NASD–79–29 was also today approved by the Commission. See Securities Exchange Act Release No. 15883 (May 30, 1979).

to provide question banks for those limited principal examinations.

Interested persons are invited to submit written data, views and arguments concerning the submission within 30 days from the date of this publication. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, DC 20549. Reference should be made to File No. SR–NASD–79–3.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and of all written communications relating to the proposed rule change between the Commission and any person, will be available for inspection and copying at the Commission's Public Reference Room, 1100 L Street, N.W., Washington, D.C.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, the requirements of Section 15A of the Act and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change before the thirtieth day after the publication of notice of filing thereof. The proposed rule and change imposes no additional restrictions on brokers and dealers or their associated persons. Further, by enabling such persons, to the extent their activities are limited solely to transactions involving securities in a limited category, to take a limited principal examination in lieu of the General Securities Principal examination, the proposed rule change may relieve a substantive regulatory burden. The proposed limited principal examinations will be administered by the NASD through a pilot automated test administration system. Permitting these new limited principal examinations to become effective without delay will permit further experimentation with this pilot system. The Commission believes that the public interest would be served by the NASD's prompt implementation of the proposed new limited principal qualification examinations.

It therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.[8]

[8] Although the individual questions which comprise the question banks for the two proposed limited principal qualification examinations have not been specifically approved by the Commission, the NASD has represented that the question banks, and each examination drawn from the question banks, will conform to the plans and specifications herein approved. The NASD has further represented that it will update the question banks periodically in accordance with the outlines and procedures specified in its submission and that the question banks, and each examination drawn from the question banks, will continue to conform to the plans and specifications herein approved notwithstanding the revision or replacement of individual questions. New or revised questions will not necessarily be provided to the Commission for its review prior to their use. The NASD could not, however, revise the plans and specifications for either of the proposed limited principal qualification examinations without prior Commission approval.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-15900; File No. SR-NASD-79-4]

National Association of Securities Dealers, Inc.; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on May 14, 1979, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

The NASD's Statment of the Terms of Substance of the Proposed Rule Change

Text of Proposed Rule Change

The following is the full text of the proposed amendment to Paragraph B of Part II of Schedule D under Article XVI of the By-Laws of the National Association of Securities Dealers, Inc. (Deleted material is bracketed, proposed new material is in italics.)

[2. A new issue shall be eligible to be an authorized security on the day that its registration statement is effective with the Securities and Exchange Commission provided that the total assets of the issuer shall reach or are expected to reach as a result of the offering, $1,000,000 and provided that all other applicable criteria contained herein are met. An authorization under this paragraph 2. shall automatically terminate 120 days after the last day of the issuer's fiscal year during which the registration statement became effective.]

2. Notwithstanding the provisions of Section B. 1. above, a new issue shall be eligible to be an authorized security, if:

a. i. the issue is being publicly offered pursuant to a registration statement declared effective by the Securities and Exchange Commission, or

ii. the issue is being publicly offered pursuant to an exemption from registration under Regulation A of Securities Act of 1933 and the issuer has provided the Corporation with financial statements which comply with the applicable minimum requirements for registration under the Securities Act of 1933 and has undertaken to file with the Corporation the same quarterly and annual reports required to be filed by issuers registered with the Securities and Exchange Commission; and

b. as a result of the offering, the issuer expects to comply with the criteria for securities not yet authorized contained in Section B.3. below.

c. This authorization shall terminate 120 days after the last day of the issuer's fiscal year during which the offering was made.

The NASD's Statement on the Purpose of the Proposed Rule Change

The proposed change to Schedule D will permit the inclusion in the NASDAQ System of certain companies engaged in offerings exempt from registration under the Securities Act of 1933 pursuant to Regulation A. The proposed amendment would permit inclusion of such companies on the condition that they provide the Association with certified financial statements consistent with those that would be required had the company registered with the Commission pursuant to the Securities Act of 1933. In addition, the proposed rule requires these companies to undertake to provide the NASD with quarterly and annual financial statements equivalent to those required to be filed by issuers registered with the Commission.

The NASD's Statment on the Basis Under the Act for the Proposed Rule Change

Section 15A(b)(11) provides that an association of brokers and dealers shall not be registered as a national securities association unless the Commission determines that the rules of the Association contain provisions governing the form and content of quotations relating to securities sold otherwise than on a national securities exchange, which may be distributed or published by any member or other persons associated with a member, and the persons to whom such quotations may be supplied. Such rules relating to quotations shall be designed to produce fair and informative quotations to prevent fictitious or misleading quotations and to promote orderly

procedures for collecting, distributing and publishing quotations.

The NASD's Statement on the Comments Received From Members, Participants or Others on the Proposed Rule Change

Article XVI of the NASD By-Laws provides that the Board of Governors may amend Schedule D without recourse to the membership. Comments of the membership were neither solicited nor received.

The NASD's Statement on the Burden on Competition

Since the proposed rule change would permit access to the NASDAQ System by companies that have not previously been authorized securities, it is believed that the proposed rule change will enhance competition among dealers in these securities and provide better markets for investors in these securities. Any burdens on competition caused by the reporting requirements contained in the rule change are consistent with the purposes of the Act in that these reports shall insure that issuers continue to comply with the NASDAQ qualification requirements.

On or before July 16, 1979, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(a) by order approve such proposed rule change, or

(b) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before June 25, 1979.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

June 1, 1979.

[FR Doc. 79-17[illegible] Filed 6-7-79; 8:45 am]

BILLING CODE [illegible]

[Release 34-15891; File No. SR-NASD-79-5]

National Association of Securities Dealers, Inc.; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 19 (June 4, 1975) notice is hereby given that on May 14, 1979, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

The NASD's Statement of the Terms of Substance of the Proposed Rule Change

Text of Proposed Rule Change

The following is the full text of proposed Section 37 of Article III, of the Rules of Fair Practice of the National Association of Securities Dealers, Inc. Brackets ([ ]) indicate deletions; italics indicate new material.

RULES OF FAIR PRACTICE

Article III

Section 1

(The Interpretation of the Board of Governors entitled "Advertising Interpretation (Advertising, Sales Literature, Market Letters and Recruiting of Sales Personnel)" is deleted in its entirety.)

* * * * *

Section 33

(Section 23 of Appendix E to Article III, Section 33 of the Rules of Fair Practice, entitled "Advertisements and Sales Literature" is deleted in its entirety.)

* * * * *

Section 37

Communications With the Public

(a) Definitions. (1) Advertisement—For purposes of this Section 37 and any interpretation thereof, the term "advertisement" means material published, or designed for use in, a newspaper, magazine or other periodical, radio, television, telephone or tape recording videotape display, signs or billboards, motion pictures, telephone directories (other than routine listings), or other public media.

(2) Sales Literature—For purposes of this Section 37 and any interpretation thereof, sales literature means any notice, circular, report (including research reports), newsletter (including market letters), form letter, or reprint or excerpt of the foregoing or of any published article, or any other promotional literature designed for use with the public, which material does not meet the foregoing definition of "advertisement." For purposes of this subsection, a form letter shall include one of a series of identical letters, or individually typed or prepared letters which contain essentially identical statements or repeat the same basic theme and which are sent to 25 or more persons.

(b) Approval and Recordkeeping. (1) Each item of advertising and sales literature shall be approved by signature or initial, prior to use, by a registered principal (or his designee) of the member. In the case of advertising or sales literature pertaining to options, the approval must be by the senior registered options principal or his designee.

(2) A separate file of all advertisements and sales literature, including the name(s) of the person(s) who prepared them and/or approved their use shall be maintained for a period of three years from the date of each use.

(c) Filing Requirements and Review Procedures. (1) Advertisements and sales literature concerning registered investment companies (including mutual funds, variable contracts and unit investment trusts) shall be filed with the Association's Advertising Department by any member preparing it, or who has such material prepared, within three business days after first use or publication. Dealers need not file material prepared and filed by sponsors or underwriters unless a change in content or format is contemplated. Filing of such material in advance of use is permitted and encouraged but is not required.

(2) Advertisements pertaining to options shall be submitted to the Association's Advertising Department for review at least ten days prior to use (or such shorter period as the Department may allow in exceptional circumstances), unless such advertisement is submitted to and approved by a registered securities exchange or other regulatory body having substantially the same standards with respect to options advertising as set forth in this Section 37.

(3)(A) Each member of the Association which has not previously filed advertisements with the Association for with a registered securities exchange having standards comparable to those contained in this Section 37) shall file its initial advertisement with the Association's Advertising Department at least ten days prior to use and shall continue to file its advertisements at least ten days prior to use for a period of one year.

(B) Each member which, on the effective date of this Section 37, had been filing advertisements with the Association (or with a registered securities exchange having standards comparable to those contained in this Section 37) for a period of less than one year shall continue to file its advertisements, at least ten days prior to use, until the completion of one year from the date the first advertisement was filed with the Association or such exchange.

(C) Except for advertisements related to direct participation programs or to investment company securities, members subject to the requirements of subsection (a) or (b) above may, in lieu of filing with the Association, file advertisements on the same basis, and for the same time periods specified in those subsections, with any registered securities exchange having standards comparable to those contained in this Section 37.

(4) Notwithstanding the foregoing provisions, any District Business Conduct Committee of the Association, upon review of a member's advertising and/or sales literature, and after determining that the member has departed and there is a reasonable likelihood that the member will again depart from the standards of this Section 37, may require that such member file all advertising and/or sales literature, or the portion of such member's material which is related to any specific types or classes of securities or services, with the Association's Advertising Department and/or the District Committee, at least ten days prior to use.

The Committee shall notify the member in writing of the types of material to be filed and the length of time such requirement is to be in effect. The requirement shall not exceed one year, however, and shall not take effect until 30 days after the member receives the written notice, during which time the member may request a hearing before the District Business Conduct Committee, and any such hearing shall be held in reasonable conformity with the hearing and appeal procedures of the Code of Procedure for Handling Trade Practice Complaints.

(5) In addition to the foregoing requirements, every member's advertising and sales literature shall be subject to a routine spot-check procedure. Upon written request from the Association's Advertising Department, each member shall promptly submit the material requested. Members will not be required to submit material under this procedure which has been previously submitted pursuant to one of the foregoing requirements and the procedure will not be applied to members who have been, within the preceding calendar year, subjected to a spot-check by a registered securities exchange or other self-regulatory organization utilizing comparable procedures.

Explanation: While the procedures may vary with experience, it is the Association's current intention to request a one month's sample of material from each member annually.

(6) The following types of material are excluded from the foregoing filing requirements and spot-check procedures:

(A) advertisements or sales literature solely related to changes in a member's name, personnel, location, ownership, offices, business structure, officers or partners, telephone or teletype numbers, or concerning a merger with, or acquisition by, another member;

(B) advertisements or sales literature which do not more than identify the NASDAQ symbol of the member and/or of a security in which the member is a NASDAQ registered market maker;

(C) advertisements or sales literature which do not more than identify the member and/or offer a specific security at a stated price;

(D) material sent to branch offices or other internal material that is not distributed to the public;

(E) prospectuses, preliminary prospectuses, offering circulars and similar documents used in connection with an offering of securities which has been registered or filed with the Securities and Exchange Commission or any state, or which is exempt from such registration;

(F) advertisements prepared in accordance with Section 2(10)(b) of the Securities Act of 1933, as amended, or any rule thereunder, such as Rule 134, unless such advertisements are related to options, direct participation programs or securities issued by registered investment companies.

(d) Standards Applicable to Communications with the Public. All member communications with the public shall be based on principles of fair dealing and good faith and should provide a sound basis for evaluating the facts in regard to any particular security or securities or type of security, industry discussed, or service offered. No material fact or qualification may be omitted if the omission, in the light of the context of the material presented, would cause the advertising or sales literature to be misleading.

Exaggerated, unwarranted or misleading statements or claims are prohibited in all public communications of members. In preparing such literature, members must bear in mind that inherent in investment are the risks of fluctuating prices and the uncertainty of dividends, rates of return and yield, and no member shall, directly or indirectly, publish, circulate or distribute any public communication that the member knows or has reason to know contains any untrue statement of a material fact or is otherwise false or misleading.

When sponsoring or participating in a seminar, forum, radio or television interview, or when otherwise engaged in public appearances or speaking activities which may not constitute advertisements, members and persons associated with members shall nevertheless follow the standards of this subsection 37(d).

In addition to the foregoing general standard, the following specific standards apply:

(1) Necessary Data: Advertisements and sales literature shall contain the name of the member, the person or firm preparing the material, if other than the member, and the date on which it is first published, circulated or distributed (except, that in advertisements, only the name of the member need be stated; and except also that in any so-called "blind" advertisement used for recruiting personnel, the name of the member may be omitted). If the information in the material is not current, this fact should be stated.

(2) Recommendations: In making a recommendation, whether or not labeled as such, a member must have a reasonable basis for the recommendation and must disclose the price at the time the recommendation is made, as well as any of the following situations which are applicable:

(A) that the member usually makes a market in the securities being recommended;

(B) that the member and/or its officers or partners own options, rights or warrants to purchase any of the securities of the issuer whose securities

are recommended, unless the extent of such ownership in nominal;

(C) that that member was manager or co-manager of a public offering of any securities of the recommended issuer within the last 3 years.

The member shall also provide, or offer to furnish upon request, available investment information supporting the recommendations.

A member may use material referring to past recommendations if it sets forth all recommendations as to the same type, kind, grade, or classification of securities made by a member within the last year. Longer periods of years may be covered if they are consecutive and include the most recent year. Such material must also name each security recommended, and give the date and nature of each recommendation (e.g., whether to buy or sell), the price at the time of the recommendation, the price at which or the price range within which the recommendation was to be acted upon, and the fact that the period was one of generally rising markets, if such was the case.

Also permitted is material which does not make any specific recomendation but which offers to furnish a list of all recommendations made by a member within the past year or over longer periods of consecutive years, including the most recent year, if this list contains all the information specified in the previous paragraph.

(3) Claims and Opinions: Communications with the public must not contain promises of specific results, exaggerated or unwarranted claims or unwarranted superlatives, opinions for which there is no reasonable basis, or forecasts of future events which are unwarranted, or which are not clearly labeled as forecasts. Nor may references to past specific recommendations state or imply that the recommendations were or would have been profitable to any person and that they are indicative of the general quality of a member's recommendations.

(4) Testimonials: Testimonial material concerning the member or concerning any advice, analysis, report or other investment or related service rendered by the member must make clear that such experience is not necessarily indicative of future performance or results obtained by others. Testimonials must also disclose that compensation has been paid to the maker directly or indirectly, if applicable, and if they imply an experienced or specialized opinion, the qualifications of the maker of the testimonial should be given.

(5) Offers of Free Service: Any statement to the effect that any report, analysis, or other service will be furnished free or without any charge must not be made unless such report, analysis or other service actually is or will be furnished entirely free an without condition or obligation.

(6) Claims for Research Facilities: No claim or implication may be made for research or other facilities beyond those which the member dctually possese or has reasonable capacity to provide.

(7) Hedge Clauses: No cautionary statements or caveats, often called hedge clauses, may be used if they are misleading or are inconsistent with the content of the material.

(8) Recruiting Advertising: Advertisements in connection with the recruitment of sales personnel must not contain exaggerated or unwarranted claims or statements about opportunities in the investment banking or securities business and should not refer to specific earnings figures or ranges which are not reasonable under the circumstances.

(9) Periodic Investment Plans: Communications with the public should not discuss or portray any type of continuous or periodic investment plan without disclosing that such a plan does not assure a profit and does not protect against loss indeclining markets. In addition, if the material deals specifically with the principles of dollar-cost-averaging, it should point out that since such a plan involves continuous investment in securities regardless of fluctuating price levels of such securities, the investor should consider his financial ability to continue his purchases through periods of low price levels.

(10) References to Regulatory Organizations: Communications with the public shall not make any reference to membership in the Association or to registration or regulation of the securities being offered, or of the underwriter, sponsor, or any member or associated person, which reference could imply endorsement or approval by the Association or any federal or state regulatory body.

Reference to membership in the Association or Securities Investors Protection Corporation shall comply with all applicable By-Laws and Rules pertaining thereto.

(11) Identification of Sources: Statistical tables, charts, graphs or other illustrations used by members in advertising or sales literature should disclose the source of the information if not prepared by the member.

(e) Standards Applicable to Investment Company-Related Communications

In addition to the provisions of Paragraph D of this Section, members' public communications concerning investment company securities shall conform to all applicable rules of the SEC, as in effect at the time the material is used.

(f) Standards Applicable to Options-Related Communications

In addition to the provisions of Paragraph D of this Section, members' public communications concerning options shall conform to the following provisions:

(1) As there may be special risks attendant to some options transactions and certain options transactions involve complex investment strategies, these factors should be reflected in any communication which includes any discussion of the uses or advantages of options. Therefore, any statement referring to the opportunities or advantages presented by options should be balanced by a statement of the corresponding risks. The risk statement should reflect the same degree of specificity as the statement of opportunities, and board generalities should be avoided. Thus, a statement such as, "by purchasing options, an investor has an opportunity to earn profits while limiting his risk of loss," should be balanced by a statement such as, "Of course, an options investor may lose the entire amount committed to options in a relatively short period of time."

(2) It should not be suggested that speculative option strategies are suitable for most investors, or for small investors.

(3) Options issued by the Options Clearing Corporation (OCC Options) are securities registered under the Securities Act of 1933, and they are the subject of a currently effective registration statement. Section 5 of the Securities Act prohibits the use of any written material or radio or television advertisements (or other material constituting a "prospectus" as defined in the Act) relating to a registered security unless certain conditions are met. With respect to communications concerning OCC Options, the following rules shall apply:

(A) except as provided in paragraph (b) below, no written material with respect to OCC Options may be sent to any person unless prior to or at the same time with the written material a current OCC Options Prospectus is sent to such person.

(B) advertisements may be used (and copies of the advertisements may be sent to persons who have not received a Prospectus) if the material meets the requirements of Rule 134 under the Securities Act of 1933, as that Rule has been interpreted as applying to OCC Options. Under Rule 134, advertisements are limited to general descriptions of the security being offered and of its issuer. In the case of OCC Options, advertisements under this Rule must have the following characteristics: (i) The advertisement should state the name and address of the person from whom a current OCC Options Prospectus may be obtained (this would usually be the member sponsoring the advertisement); (ii) The text of the advertisement may contain a brief description of OCC options, including a statement that the issuer of every OCC Option is the Options Clearing Corporation. The text may also contain a brief description of the general attributes and method of operation of the Options Clearing Corporation and/or a description of any of the options traded in different markets, including a discussion of how the price of an option is determined; (iii) The advertisement may include any statement or legend required by any state law or administrative authority; (iv) Advertising designs and devices including borders, scrolls, arrows, pointers, multiple combined logos and unusual type faces and lettering as well as attention-getting headlines and photographs and other graphics may be used, provided such material is not misleading.

* * * * *

Paragraph 8301 of the NASD Manual is amended as follows:

Investment Company Securities

Introduction

This section of the Association Manual is devoted to standards governing preparation and use of sales literature and advertising about investment company securities, together with some of the important ethical requirements relating specifically to sales practices of underwriters and dealers in offering such securities to the public.

It must be read in conjunction with and as supplemental to Sections 1, 2, 10, 19(a), 25, 26, [and] 27, and *37* of Article III of the Rules of Fair Practice.

[Members should feel free to submit proposed sales literature or questions regarding its preparation and use to the Advertising Department of the National Association of Securities Dealers, Inc., in Washington, D.C.]

Sales Literature

[All of paragraph 8302 is deleted in order to remove all reference to the Commission's Statement of Policy which has been withdrawn and to remove the reference to the sales literature filing requirement which has been incorporated in § 37.]

The NASD's Statement on the Purpose of Proposed Rule Change

The Association has reviewed the action taken by the New York Stock Exchange to eliminate its requirements for prior approval of member advertising, and the American Stock Exchange's similar action with respect to advertising for all securities other than options. After careful consideration, the Board of Governors decided to eliminate its general after-the-fact requirement and adopt a new spot-check procedure similar to that used by some of the exchanges. In addition, however, the Board believed that the separate requirements for investment company material should be retained and that new advance filing requirements should be instituted in certain limited areas. The Board has also taken this opportunity to codify some of its existing interpretations into rule form, and to consolidate various requirements into one place which are now contained in different sections of the NASD Manual. The rule also applies advance filing requirements to all new members for one year and, in addition, District Business Conduct Committees are specifically authorized to direct a member to file advertising or sales literature in advance for a period not exceeding one year. This latter provision is designed to provide District Committees with added flexibility to deal with situations where a member appears to be having difficulty in designing advertising or sales literature in accordance with applicable standards, but the Committee does not feel that the situation warrants formal disciplinary proceedings. The procedure would not displace the Formal Complaint procedure or the Admission, Waiver and Consent Procedure and the District Committees could still utilize these procedures where appropriate. A member who desired further consideration of the requirement imposed by the District Committee could request a hearing on the matter.

Both of these latter two new provisions result from the Association's belief that, except for the special product areas mentioned, difficulties experienced with the content of members' advertising tend to be concentrated in a relatively small number of firms. Often the members experiencing difficulties are new members or members who have not advertised in the past. Occasionally, however, problems are experienced by other than new members, due to a change in personnel or other factors. These two new provisions are intended to focus the Association's regulatory effort on the likely problem areas, while lifting a substantial compliance burden from the majority of members. This consideration has resulted in an expansion of the types of material exempted from our filing requirements and spot-check procedures. The Association will, of course, continue to review and comment on members' material which is voluntarily submitted.

The NASD's Statement on the Basis Under the Act for Proposed Rule Change

The NASD has the authority to enact this new rule under § 15A(b)(6) of the Securities Exchange Act of 1934, as amended (15 USC § 78o-3(b)(6)), and Article VII of the Association's By-Laws.

the Association believes that this new rule will better effectuate the role of the NASD in regulating and monitoring its members' advertising and sales literature. Such monitoring is necessary "to remove impediments to and perfect the mechanism of a free and open market . . . and, in general, to protect investors and the public interest. . . ." Article VII of the NASD's By-Laws is the Association's enabling provision which allows it to adopt necessary rules to carry out its purposes.

The NASD's Statement on the Comments Received From Members, Participants, or Others on Proposed Rule Change

Comments were received from members of the NASD and other industry organizations, both in the initial request for comments on the appropriate course the Association should take with respect to existing filing requirements (March 31, 1977), and on the proposed rule (October 6, 1977).

As to the initial for comments, one response suggested replacing the mandatory filing requirement with a spot check enforcement mechanism. Two commentators suggested that the NASD should refrain from any filing requirement that creates dual requirements on members of exchanges.

The Securities Industry Association agreed with pre-publication filing requirements concerning investment company securities. It also suggested

that the NASD coordinate its rules with those of the NYSE and AMEX.

As to the request for comments on the actual proposed rule, one commentator suggested that "the whole section be abolished and replaced with the statement that no false or misleading advertising may be done, and that spot checks will be made to control the use of advertising." The same comment suggested that "if the heavy verbiage is retained, then . . . surely there should be a difference in advertising individual issues over mutal funds and variable annuities . . . " Another commentator suggested that certain subsections of the rule were unclear as written and suggested clearer language.

The SIA submitted a letter enthusiastically endorsing most of the proposed changes. Another comment was in "wholehearted agreement" with the changes. Another commentator suggested that the definition of public or non-public, and "exempt from registration" should be clarified. He also made certain suggestions as to the standards applicable to advertising and sales literature.

Finally, another comment agreed with the proposed changes, except it disagreed "with the Association's apparent position that, solely with respect to registered investment company products, increased procedures are necessary and no reduction in compliance is warranted." The letter then addressed particular areas of the rule wherein it believed an unnecessary requirement was placed on members selling investment company securities.

The proposed rule reflects most of the favorable comments on the elimination of the after-the-fact filing requirement and the adoption of a new spot-check procedure similar to that used by some of the exchanges. However, the rule does retain separate requirements for investment company material. As to those comments regarding the clarity of particular sections of the rule, they have been incorporated herein where deemed appropriate.

The NASD's Statment on the Burden on Competition

The purpose of the proposed rule is to better enable the Association to regulate all of its members' advertising. The substitution of a spot check for filing requirements eliminates the immediate filing burden previously imposed on most members. The retention of the filing requirements for investment company advertising and options advertising, the one-year advance filing requirement for new members, and those directed to do so by a District Business Conduct Committee, do impose a burden on certain members. These special requirements reflect the experience of the NASD that difficulties experienced with the content of members' advertising tend to be concentrated in a relatively small number of firms. Thus, these new provisions are intended to focus the Association's regulatory effort on the likely problem areas, while lifting a substantial compliance burden from the majority of members. The Association believes that the proposed rule change does not impose burdens on competition not necessary or appropriate in furtherance of the purposes of the Act.

On or before July 16, 1979, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(a) by order approve such proposed rule change, or

(b) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of the filing will also be available for inspection ad copying at the principal office of the above-mentioned self-regulatory organization.

All submissions should refer to the file number referenced in the caption above and should be submitted on or before July 9, 1979.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[Release No. 21079; 70-6317]

New England Power Co., et al.; Proposed Contribution by Holding Company to Subsidiary

May 31, 1979.

In the matter of New England Power Company, New England Electric System, 20 Turnpike Road, Westborough, Mass. 01581.

Notice is hereby given that New England Electric System ("NEES"), a registered holding company, and New England Power Company ("NEPCO"), one of NEES' electric utility subsidiary companies, have filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating Sections 9(a), 10 and 12 of the Act and Rules 42(a) and 45 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transaction.

NEES proposes to make a capital contribution to NEPCO of $20,000,000. NEPCO will use such contribution towards the payment of a like amount of its short-term promissory notes issued to pay for capitalizable expenditures, or to reimburse the treasury therefor. As of March 31, 1979, NEPCO has no outstanding short-term indebtedness, but it is anticipated that at the time of the proposed capital contribution, such indebtedness will aggregate $37,000,000.

The fees and expenses to be incurred in connection with the proposed transaction are estimated at $2,500, including $500 of incidental services to be performed at cost by New England Power Service Company, an affiliate of NEES. It is stated that no state commission, and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than June 26, 1979, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission,

Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated address and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 21074; 70617]

Northeast Utilities, Western Massachusetts Electric Co., et al.; Post-Effective Amendment Regarding Issuance and Sale of Short-Term Notes to Banks and Commercial Paper to Dealer, Exception From Competitive Bidding, and Capital Contributions and Open Account Advances by Holding Company to Subsidiaries

June 1, 1979.

In the matter of Northeast Utilities, Western Massachusetts Electric Company, 174 Brush Hill Avenue, West Springfield, Massachusetts 01089; The Connecticut Light and Power Company, The Hartford Electric Light Company, Selden Street, Berlin, Connecticut 06037; Holyoke Water Power Company, One Canal Street, Holyoke, Massachusetts.

Notice is hereby given that Northeast Utilities ("NU"), a registered holding company, and The Connecticut Light and Power Company ("CL&P"), The Hartford Electric Light Company ("HELCO"), Western Massachusetts Electric Company ("WMECO"), and Holyoke Water Power Company ("HWP"), public-utility subsidiary companies of NU, have filed with this Commission a post-effective amendment to the declaration in this proceeding pursuant to Sections 6(a), 7, and 12(b) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 45 and 50(a)(5) promulgated thereunder regarding the following proposed transactions. All interested persons are referred to the amended declaration, which is summarized below, for a complete statement of the proposed transactions.

By order in this proceeding dated June 28, 1978 (HCAR No. 20601), the declarants were authorized, during the period ending June 30, 1979, to issue and sell short-term notes to banks and commercial paper to a commercial paper dealer in aggregate amounts outstanding at any one time not to exceed $15,000,000 in the case of NU and in the cases of CL&P, HELCO, WMECO, and HWP, $150,000,000, $35,000,000, $40,000,000, and $6,000,000, respectively. The notes and commercial paper were to be issued and renewed from time to time as funds were required prior to June 30, 1979, provided no such notes or commercial paper would mature after March 31, 1980.

It is now proposed (a) to extend the period for the short-term borrowings to June 30, 1980, (b) to provide for the latest maturity date for the borrowings to be March 31, 1981, and (c) to revise the maximum amount of bank notes and commercial paper outstanding at any one time to $20,000,000 in the case of NU and $150,000,000, $70,000,000, $55,000,000, and $6,000,000, respectively, in the case of CL&P, HELCO, WMECO, and HWP. CL&P, HELCO, and WMECO each have authorization from the holders of their respective preferred shares to issue securities representing unsecured indebtedness up to a maximum of 20% of their respective capitalizations not later than March 31, 1984, in the case of CL&P and HELCO and February 10, 1984, in the case of WMECO.

The outstanding short-term debt of the applicants as of March 31, 1979, the amount anticipated to be outstanding as of June 30, 1979, and the maximum aggregate amount of such short-term borrowings to be outstanding at any one time at or prior to June 30, 1980, are as follows:

[In thousands]

	Commercial paper (3/31/79)	Bank notes (3/31/79)	Total (3/31/79)	Anticipated 6/30/79	Proposed maximum outstanding at any one time 7/1/79–6/30/80
NU	0	0	0	$1,000	$20,000
CL&P	$18,900	$900	$19,400	$5,000	150,000
HELCO	5,000	0	5,000	22,000	70,000
WMECO	14,250	600	14,850	32,000	55,000
HWP	0	0	0	1,000	6,000

The notes issued to banks by the declarants will each be dated the date of issue, will have maximum maturity dates of nine months with right of renewal, will bear interest at the prime rate or at the prime rate plus a fraction thereof, will be issed no later than June 30, 1980, and will be subject to prepayment at any time at the applicant's option without premium. The companies have credit lines with a number of banks subject in some cases to commitment fees and/or compensating balance requirements. The bank credit lines expire at various times in 1979 and 1980 and their continued availability is subject to continuing review by the banks involved. The effective rate of interest on the bank note ranges from 13.18% to 14.09% per annum, assuming a prime rate of 11¾%.

Commercial paper will be issued by the declarants in the form of short-term promissory notes in denominations of not less than $50,000 and not more than $1,000,000, of varying maturities, with no maturity more than 270 days after the date of issue, and will not be repayable prior to maturity. The commercial paper will be sold directly to a dealer in commercial paper at the discount rate per annum prevailing at the date of issuance for commercial paper of comparable quality and of the particular maturity. No commercial paper shall be issued having a maturity of more than 90 days at an effective interest cost to the declarant in excess of the effective bank interest rate at which the company could obtain loans from banks in an amount at least equal to the principal amount of such commercial paper. No commission or fee will be payable in connection with the issuance and sale of the commercial paper. The purchasing dealer, as principal, will reoffer the commercial paper to institutional

investors at a discount of not more than ⅛ of 1% per annum less than the prevailing discount rate to the applicant.

The commercial paper will be reoffered to not more than 200 identified and designated customers in a list (nonpublic) prepared for each applicant in advance by the purchasing dealer. No additions will be made to this customer list. It is anticipated that the commercial paper will be held by customers to maturity, but if such customers desire to resell prior to maturity, the purchasing dealer, pursuant to a verbal repurchase agreement, will repurchase the commercial paper and reoffer the same to others in the group of 200 customers.

The new funds to be derived by NU from the issuance and sale of the bank notes and the commercial paper will be applied during the period from July 1, 1979, to June 30, 1980, (1) to make a capital contribution and/or open account advances to WMECO and HWP in an amount not to exceed $10,000,000 and $3,000,000, respectively, (2) to make open account advances to The Quinnehtuk Company, a wholly-owned subsidiary of NU, in an amount not to exceed in the aggregate $1,000,000, and (3) to supply funds as needed to other subsidiary companies as heretofore or hereafter authorized by this Commission. All capital contributions to subsidiaries will be credited to their capital surplus accounts. The funds to be derived by CL&P, HELCO, WMECO, and HWP from the issuance and sale of the bank notes and the commercial paper will be applied, together with other funds available to these companies, to finance their respective 1979 and 1980 construction and nuclear fuel programs.

Declarants request exception from the competitive bidding requirements of Rule 50 for the proposed issue and sale of the commercial paper pursuant to paragraph (a)(5) thereof on the grounds that it is not practicable to invite competitive bids for commercial paper and that current rates for commercial paper for borrowers such as declarants are published daily in financial publications. Declarants also request authority to file certificates of notification under Rule 24 with respect to the issuance and sale of commercial paper within 30 days after the end of each calendar quarter.

It is stated that no state or federal commission, other than this Commission, has jurisdiction over the proposed transactions. There are no fees or expenses other than the filing fee paid to this Commission, to be incurred in connection with the proposed transactions except charges for incidental services estimated at $500 in the case of each declarant to be performed at cost by Northeast Utilities Service Company, the system service company.

Notice is further given that any interested person may, not later than June 26, 1979, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the post-effective amendment which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarants at the above-stated addresses, and proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as now amended or as it may be further amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

Georgel A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 21077; Administrative Proceeding, File No. 3-5749; 70-6111; 31-606]

Northern States Power Co.; Notice of and Order for Hearing Regarding Acquisition by Exempt Holding Company of Common Stock of Nonassociate Company

June 1, 1979.

In the matter of Northern States Power Co., 414 Nicollet Mall, Minneapolis, Minnesota 55401.

On January 19, 1978, Northern States Power Company ("Northern States"), filed an application with this Commission pursuant to Section 10 of the Public Utility Holding Company Act of 1935 ("Act") regarding a proposed offer to exchange shares of its common stock for the outstanding shares of the common stock of Lake Superior District Power Company ("Lake Superior"), a nonassociate public-utility company.

Northern States, a Minnesota corporation, is a utility company and also a holding company. Northern States is presently an exempt holding company pursuant to an order of this Commission under Section 3(a)(2) of the Act. *In the Matter of Northern States Power Company*, 36 S.E.C. 1 (1954).

Northern States is engaged predominantly in the generation, transmission, distribution and sale of electricity in the States of Minnesota, North Dakota and South Dakota and in the distribution and sale at retail of natural gas in the States of Minnesota and North Dakota. Its wholly-owned subsidiary which is incorporated in the State of Wisconsin and which has the same name as the parent, Northern States Power Company ("Northern States Wisconsin"), provides similar utility services in the State of Wisconsin. In addition Northern States has two wholly-owned nonutility subsidiaries, Cormorant Corporation, a Montana corporation, which holds interests in fuel resources, and United Power and Land Company, a Minnesota corporation, which holds nonutility properties of a relatively nominal value. Together, Northern States and Northern States Wisconsin furnish electric service in a 40,000 square mile service area to approximately 900,000 customers in 631 communities, and gas service to 248,000 customers in 78 communities located in the same general territory. Their consolidated assets at December 31, 1978, were $2.4 billion and utility revenues were $980 million.

Lake Superior, a Wisconsin corporation, is engaged primarily in the generation, transmission, distribution and sale of electric energy and in the distribution and sale at retail of natural gas in northern Wisconsin and the Upper Peninsula of Michigan. Lake Superior serves a territory with a population of about 125,000 in an 8,000 square mile area. It furnishes electric service to 37,000 customers in 15 counties in Wisconsin and Michigan, gas service to about 8,000 customers in 22 communities in the same area, and water service in one community in Wisconsin. Its assets at December 31, 1978, were $54.4 million and revenues were $31.8 million.

Lake Superior and Northern States, along with 21 other electric utilities, including two public power districts, eight cooperatives and one Federal

system are parties to the Mid-Continent Area Power Pool Agreement ("MAPP Agreement"). Parties to the MAPP Agreement may exchange power and energy for various purposes, including improved operations, emergency and economy. The MAPP Agreement was filed with the Federal Power Commission, now the Federal Energy Regulatory Commission, in July 1972.

At the present time, Lake Superior's major source of bulk electric power supply, in addition to its own generation facilities, is Minnesota Power and Light Company, under an agreement which expires in November 1980. Lake Superior is contemplating the construction of transmission facilities for additional interconnections with major bulk transmission facilities in northern and central Wisconsin. Lake Superior also has plans to participate in certain jointly-owned generation units. One such undertaking involves the agreement dated June 30, 1977, as subsequently amended, (the "Tyrone Agreement") between Lake Superior, Northern States Wisconsin, Cooperative Power Association ("CPA"), a Minnesota corporation, and Dairyland Power Cooperative, a Wisconsin corporation with a service area which includes portions of Illinois, (collectively, the "Tyrone Participants") to construct a jointly-owned 1100 MW nuclear power plant (the "Tyrone Project") in Dunn County, Wisconsin. The Tyrone Agreement provides, among other things, for the joint ownership, licensing, construction and operation of the Tyrone Project. On June 14, 1978, the Tyrone Participants filed an application with the Public Service Commission of Wisconsin ("Wisconsin Commission") seeking a certificate of convenience and necessity to commence construction of the Tyrone Project. On March 6, 1979, the Wisconsin Commission issued an order denying the application, finding that applicants failed to show the need for the facility. On April 5, 1979, the Tyrone Participants filed an appeal of this order in the Eau Claire County Circuit Court. That appeal is still pending.

Northern States and Lake Superior have entered into an agreement dated December 28, 1977, (the "Acquisition Agreement") which provides for an offer to exchange 0.46 shares of Northern States common stock, for each share of Lake Superior common stock. Under the terms of the Acquisition Agreement, the exchange offer will be made during an initial period of approximately 20 days, subject to extension by Northern States for an additional period or periods. Northern States will not extend the exchange offer beyond 80 days from the initial date without approval of the Commission. The deposits of shares of Lake Superior Common Stock will be irrevocable during the initial period and any authorized extension or extensions thereof. Northern States will declare the exchange offer effective when shares of Lake Superior Common Stock equal to 80% of all of the voting securities of all Lake Superior stock outstanding are tendered prior to the expiration of the offer period and if all other conditions of the proposed exchange have been met. The offer is also subject to other conditions, among them, a favorable tax ruling and all necessary regulatory approvals.

Northern States recognizes that if it does not acquire all of the outstanding common stock of Lake Superior the resulting publicly-held minority interest in such stock will create an unduly or unnecessarily complicated corporate structure or an inequitable distribution of voting power, contrary to the standards of Section 11(b)(2) of the Act. If less than all shares of Lake Superior common stock are acquired pursuant to the exchange offer, Northern States will register with the Commission in accordance with Section 5(a) of the Act for the limited purpose of promptly submitting a plan to eliminate the minority publicly-held shares of Lake Superior common stock.

Northern States represents that it intends to operate Lake Superior as a separate unit, and that its present intention is to retain all personnel currently employed by Lake Superior. Northern States expects that substantially all officers and all but one of the directors of Lake Superior will remain in their current positions. The application states that the acquisition of Lake Superior will permit improved coordination of planning, construction, operation and maintenance of electric facilities and a reduction in administrative costs associated with generation and transmission facilities.

The proposed acquisition of Lake Superior was duly noticed on May 1, 1978, (HCAR No. 20527). In response to the notice of filing, a joint request for hearing was filed by Citizens for Tomorrow, Inc. ("Citizens") and Northern Thunder, Inc. ("Thunder"), nonprofit Wisconsin corporations organized for the purposes of protecting the environment and opposing construction of the Tyrone Project. Subsequent to the expiration of the comment period specified in the notice, Badger Safe Energy Alliance, Inc. ("Badger") filed its "intervention" in the joint request for hearing previously filed by Citizens and Thunder. Badger is also a nonprofit Wisconsin corporation organized for the purposes of protecting the environment, promoting safe alternatives to nuclear energy, opposing construction of Tyrone and the high voltage transmission lines associated therewith and opposing radioactive waste storage facilities. Among the members of Thunder and Badger are stockholders of Northern States and Lake Superior and consumers of Lake Superior, Northern States and Northern States Wisconsin.

Citizens, Thunder and Badger ("Petitioners") request that Northern States' application to acquire the common stock of Lake Superior be denied and that Northern States' exemption under Section 3(a)(2) of the Act be terminated regardless of whether we approve or disapprove the proposed acquisition. In opposing the proposed acquisition, Petitioners allege failure to comply with the requirements of Section 10 of the Act stating, among other things, that the acquisition would tend toward interlocking relations and concentration of control of public utility companies; would unduly complicate the holding company system and would be detrimental to the interests of investors and consumers and to the proper functioning of the system; would not be based upon a reasonable or fair consideration; would tend toward the uneconomical and inefficient over extension of the system; and would not comply with applicable State law. Petitioners also assert that the proposed acquisition will tend to reduce competition in bulk electric power supply to several small privately-owned utilities in northwest Wisconsin and several municipally-owned utilities in northwest Wisconsin and the Upper Peninsula of Michigan, and that the acquisition will have other anticompetitive effects and will violate the Sherman and Clayton Acts. In addition, Petitioners allege that the application before us cannot be approved without the preparation by the Commission of an Environmental Impact Statement ("EIS").

In objecting to Northern States' exemption, Petitioners state that upon acquisition of Lake Superior, Northern States will no longer meet the requirements for exemption under Section 3(a)(2) because the Northern States system would extend into Michigan, a State which is not contiguous to Minnesota, the State in which Northern States is incorporated and because the system would become more complex and far-flung, less economically sound and less susceptible

to effective State regulation. They conclude the exemption would no longer be in the interests of the public, investors or consumers. They contend that even if the proposed acquisition is not approved, Northern States' present exemption should be revoked because continuation is detrimental to the interests of the public, investors, or consumers. They also assert that the MAPP and Tyrone Agreements create a holding company relationship between Northern States and other parties to those agreements and that the resulting enlarged system does not qualify for the exemption provided by the Act.

It appears that an evidentiary hearing will be required to consider certain of the objections raised by the Petitioners. But that hearing must be limited to matters which are both relevant to the issues raised under the Act by the proposed acquisition, and whose resolution involves material factual disputes. During the hearing, the following matters and questions should be considered:

(1) Whether the proposed acquisition will serve the public interest by tending towards the economical and efficient development of an integrated public utility system;

(2) Whether the proposed acquisition is detrimental to the carrying out of the provisions of Section 11;

(3) Whether the proposed acquisition will tend towards the concentration of control of public-utility companies, of a kind or to an extent detrimental to the public interest or the interest of investors or consumers;

(4) Whether the proposed acquisition will be based upon a consideration which is reasonable and bears a fair relation to the utility assets underlying the securities to be acquired;

(5) Whether the proposed acquisition will unduly complicate the captial structure of the system or will be detrimental to the public interest or the interest of investors or consumers;

(6) If the acquisition is authorized, whether Northern States continues to be entitled to exemption under Section 3(a)(2) of the Act and what conditions, if any, would be required;

(7) Whether there has been compliance with applicable state laws.

The Nuclear Regulatory Commission and the Wisconsin Public Service Commission have primary jurisdiction over the proposed Tyrone plant. If authorized by those Commissions, its construction by the parties to the Tyrone Agreement is not conditioned on the stock acquisition which is the subject of this proceeding. Evidence as to the Tyrone plant shall not be introduced or considered except that the Tyrone Agreement itself, as an existing contractual relationship, shall be included in the record. With respect to the plans of Northern States, Lake Superior and other parties to the MAPP Agreement for construction or interconnections, the hearing shall be limited to the examination of such plans insofar as they relate to the issues as heretofore specified. It shall not extend to alternatives for supplying regional energy requirements and the environmental impact of these plans. After the hearing, briefs that will or may be filed may be directed, in accordance with the Rules of Practice, to the issues specified above as well as to the relevance of any matter raised by petitioners in their requests for a hearing but excluded from hearing as directed by this order.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a public hearing he held with respect to the proposed transactions; that all interested persons be afforded an opportunity to be heard; and that the pending proposal should not be authorized or approved except pursuant to further order of the Commission.

It is ordered, accordingly, that a hearing be held at a time and place to be designated by further order in accordance with the Rules of Practice.

It is further ordered that jurisdiction be, and hereby is, reserved to separate, in whole or in part, either for hearing or for disposition, any issues or questions which may arise in these proceedings and to take such other action as may appear conducive to an orderly, prompt, and ecnonmical disposition of the matters involved.

It is further ordered that an Administrative Law Judge, hereafter to be designated, shall preside at said hearing. The officer so designated is hereby authorized to exercise all powers granted to the Commission under Section 18(c) of the Act and to the hearing officer under the Commission's Rules of Practice.

It is further ordered that the Secretary of the Commission shall serve a copy of this order by certified mail upon the applicants herein, and upon those who have filed requests for a hearing. Notification to all other interested persons shall be given by the general release of the Commission and by publication of this order in the Federal Register.

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 21092; 70-6310]

Piedmont-Forrest Corp.; Proposed Transactions Related to Construction of New Office Building Complex

May 31, 1979.

In the matter of Piedmont-Forrest Corporation, 270 Peachtree Street NW., Atlanta, Georgia 30302.

Notice is hereby given that Piedmont-Forrest Corporation ("Property Company"), a wholly-owned subsidiary of Georgia Power Company ("Georgia"), which, itself, is a wholly-owned electric utility subsidiary of The Southern Company, a registered holding company, has filed an application with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 9(a) and 10 of the Act as applicable to the following proposed transactions. All interested persons are referred the application, which is summarized below, for a complete statement of the proposed transactions.

Property Company is engaged in the acquisition, ownership, maintenance, and disposition of property in connection with and incidental to the utility operations of Georgia. In order to provide for the construction of a new office building complex ("Improvements") for Georgia in the Bedford-Pine Urban Redevelopment Area ("Area") of downtown Atlanta, Georgia (see File No. 70-6135), Property Company proposes to enter into a Construction Loan Commitment pursuant to which Property Company will be committed to make a construction loan ("Construction Loan") in a currently estimated amount of $57,019,340, to One Atlanta Associates, a special-purpose limited partnership ("Improvements Owner"), which is to own the Improvements and lease them to Georgia under a long-term net lease ("Prime Lease"). Improvements Owner will use the proceeds of such loan to purchase the partially completed Improvements from Property Company and complete construction thereof. In exchange for the Construction Loan, Property Company proposes to acquire a note ("Construction Note") from Improvements Owner to evidence the indebtedness under the Construction Loan.

The Construction Loan will comprise 98% of the presently budgeted cost

($58,183,000) of constructing the Improvements, the remaining 2% to be contributed by the Improvements Owner as disbursements are made for construction. The principal amount of the Construction Loan is subject to increase or decrease by a maximum of 5% but will not exceed $59,870,307. Disbursements will be made by Property Company from time to time as needed and as requested by the borrower until substantial completion of the Improvements, presently expected to be on or before November 1, 1980, but not later than March 31, 1981. The Construction Loan will bear interest at a variable rate equal to the greater of the cost of money to Property Company or 9.75% per annum, payable as each disbursement is made thereunder, each such disbursement to include an amount equal to 98% of each such interest payment.

The Construction Note will be without recourse against Improvements Owner and will be secured by a first priority lien and security title in the Improvements, express assignments of the Improvements Owner's positions as lessee under a Ground Lease and as lessor under the Prime Lease, and a collateral assignment to Property Company of certain construction and architectural contracts. No payment of principal will be required under the Construction Note during the period of construction.

Pursuant to Commission authorization (see File No. 70-6135), Georgia will make advances from time to time as needed to Property Company to enable it to fund the Construction Loan. The Trustees of the General Electric Pension Trust ("GEPT") have issued a commitment to provide permanent financing for the Improvements by purchasing the Construction Note upon the earlier of substantial completion of the Improvements or March 1, 1981, at which time the Property Company will repay such advances to Georgia.

The proposed Construction Loan and acquisition of the Construction Note are part of a contemplated overall series of transactions to provide for the construction, financing, sale and leaseback of the Improvements, the real property (approximately 5.87 acres) which comprises the building site, and certain rights with respect to parking and other facilities (such real property and such rights are hereinafter collectively referred to as the "Land"). Such contemplated transactions are outlined in a "Letter Agreement" with attached "New Outline", dated April 17, 1979, among Georgia, Property Company, and Winthrop Financial Company, Inc. (acting on behalf of itself, GEPT, R.H. Cashman Associates, Inc., Damon Raike & Company and Wells Fargo Mortgage Company, all of which are hereinafter collectively referred to as the "Winthrop Group").

The Letter Agreement and New Outline contemplate that on or before August 31, 1979 ("First Closing"), Property Company will grant an option to Improvements Owner to purchase the Land ("Land Option") for $8,600,000 ("Land Cost"), which represents Property Company's cost for the Land. On or before the First Closing, Improvements Owner will assign the Land Option to GEPT which, at the First Closing, will exercise the Land Option and purchase the Land from Property Company. Simultaneously, GEPT will enter into a "Ground Lease" with Improvements Owner pursuant to which the Improvements Owner will lease the Land. The Ground Lease will have an initial term of forty years at an annual rental of 9.75% per annum of the Land Cost, three renewal terms of ten years each at an annual rental of 14.625% per annum of the Land Cost, and one renewal term of twenty-five years at an annual rental of 14.625% per annum of the greater of the Land Cost or the then appraised fair market value of the Land.

Also, at the First Closing, GEPT will enter into a "Buy-Sell Agreement" with Property Company, Georgia, and Improvements Owner, which will be a binding obligation on the part of GEPT to purchase the Construction Note from the Property Company, in the amount of the Construction Loan, upon the earlier of substantial completion of the Improvements or March 1, 1981.

At the First Closing, Georgia will enter into the Prime Lease with Improvements Owner pursuant to which Georgia will lease the Improvements and sublease the Land. The Prime Lease will have an initial term of forty years with three renewal terms of ten years each. Base rent payments under the Prime Lease will commence upon substantial completion of construction of the Improvements and issuance of certain certificates of completion or March 1, 1981, whichever is earlier, provided that Improvements Owner is not in material default under the Construction Loan. During the initial term of the Prime Lease, base rent will be a function of the "Completion Cost" which is defined as the total of the amount budgeted at the First Closing for construction of the Improvements (subject to a variance, plus or minus, of 5%) and Land Cost. Completion Cost is currently estimated to be $68,760,000.

The base rent will be calculated over the entire forty-year initial term to a rent cost constant to Georgia of 9.75% per annum of Completion Cost. In the early years of the initial term, base rent payments will be substantially smaller than in the later years of such term and will be payable monthly in arrears, with each installment to be in an amount equal to 1/12 of: (i) 1.226271% of Completion Cost (exclusive of Land Cost) and 9.75% of Land Cost during the first three years of the initial term; (ii) 5.559641% of Completion Cost (exclusive of Land Cost) and 9.75% of Land Cost during the fourth year of the initial term; (iii) 6.75000% of Completion Cost (exclusive of Land Cost) and 9.75% of Land Cost during the fifth and sixth years of the initial term; (iv) 12.122230% of Completion Cost (exclusive of Land Cost) and 9.75% of Land Cost during the next fourteen years of the initial term; and (v) 14.151697% of Completion Cost (exclusive of Land Cost) and 9.75% of Land Cost for the balance of the initial term. Based on the above percentages, it is estimated that the annual rental cost to Georgia during the initial term will be as follows: $100,600 for year 1–3; $4,073,200 for year 4; $4,765,683 for year 5–6; $7,891,594 for year 7–20; and $9,672,220 for year 21–40. During any renewal term of the Prime Lease, annual base rent will be 7.5% of Completion Cost.

The Prime Lease will be absolutely net, and Georgia will be required to pay the base rent without offset or diminution and will be responsible for all costs and expenses associated with the use and occupancy of the Improvements and Land. In the event that the amount required to complete construction of the Improvements exceeds the maximum Completion Cost contemplated by the documents ($61,082,150, exclusive of Land Cost), Georgia will thereupon be required to take possession of the Improvements and complete construction thereof, with such additional expenditures to be at Georgia's own expense and for its own account. Under the Prime Lease, it is contemplated that Georgia will be treated as the purchaser of "new Section 38 property" pursuant to Internal Revenue Code Section 48(d) in order that the investment tax credit be available to Georgia.

At all times during the initial term and any renewal term of the Prime Lease, Georgia will have a right of first refusal to Purchase the Land and/or the Improvements. At the end of the initial term of the Prime Lease or any renewal term, Georgia will have the right to purchase the Land and Improvements at

their then appraised fair market value. If at any time during or after the twentieth year of the Prime Lease, Georgia is required by regulatory authorities to account for the Prime Lease for rate making purposes in a manner adverse to Georgia's ability to take lease costs into account in its asset or expense base, Georgia will have the continuing right to offer to purchase the Improvements.

The application states that Georgia distributed bid request for both mortgage debt and sale/leaseback financing proposals to twenty-nine major real estate lenders and approximately fifty financial intermediaries, that it received over forty responses, and that after analyzing such responses (with lowest effective interest cost being the primary consideration) Georgia determined that the proposal submitted by the Winthrop Group was the most attractive. Georgia estimates that the effective interest cost of the Prime Lease will be 8.27% per annum and that the effective interest cost of the next-most-attractive proposal would have been 8.76% per annum.

On December 12, 1978, Georgia applied to the Georgia Public Service Commission ("GPSC") for authority to enter into the Prime Lease and to account for the Prime Lease for retail ratemaking purposes by capitalizing it in accordance with Financial Accounting Standards Board Statement No. 13 and expensing interest and depreciation expenses as they accrue, which would be on a levelized basis throughout the term of the Prime Lease, rather than on the staggered basis that the actual lease payments will be made. After hearings, GPSC authorized Georgia, by order effective February 23, 1979, to enter into the Prime Lease, but ordered that for such ratemaking purposes, Georgia should not capitalize the Prime Lease and should charge to expense the actual lease payments. Over the initial term of the Prime Lease, Georgia will expense the entire amount of lease payments to be made during such term to lease expense.

The fees and expenses to be incurred in connection with the proposed transactions are to be filed by amendment. It is stated that Property Company's issuance of the Construction Loan and acquisition of the Construction Note are not subject to the jurisdiction of any state or federal commission other than this Commission; that Georgia's entry into the Prime Lease may be subject to the jurisdiction of the Georgia Public Service Commission, and that the Land Owner and Improvements Owner will require the approval of the Housing Authority of the City of Atlanta and its governing authority, the United States Department of Housing and Urban Development, as "redevelopers" in order to effect the proposed transactions. It is represented that no other state or federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than June 26, 1979, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as filed or as it may be amended, may be granted as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 21075; 70-5912]

Western Massachusetts Electric Co.; Post-Effective Amendment Regarding the Issuance and Sale of Unsecured Promissory Notes to Banks

June 1, 1979.

In the matter of Western Massachusetts Electric Company, 174 brush Hill Avenue, West Springfield, Massachusetts 01089.

Notice is hereby given that Western Massachusetts Electric Company ("WMECO"), an electric utility subsidiary company of Northeast Utilities, a registered holding company, has filed with this Commission a post-effective amendment to the application-declaration in this proceeding pursuant to Section 6(b) of the Public Utility Holding Company Act of 1935 ("Act") regarding the following proposed transactions. All interested persons are referred to the amended application-declaration, which is summarized below, for a complete statement of the proposed transactions.

By order in this proceeding dated November 9, 1978 (HCAR No. 19750), WMECO was authorized to issue and sell its unsecured promissory notes equally to Chemical Bank and Citibank, N.A. in the aggregate principal amount of $20,000,000, maturing in four equal semiannual installments commencing in 1980, the final installment being payable November 10, 1981, and bearing interest at a rate per annum of (i) 116% of the prevailing prime rate of Chemical Bank during the first year, (ii) 120% of the prime rate during the second year, (iii) 122% of the prime rate during the third year and (iv) 124% of the prime rate thereafter. Subsequently, the interest rate was changed to 114% of the prime rate effective one year from the date of the notes and continuing thereafter. The proceeds of the notes were used to repay a portion of WMECO's short-term borrowings outstanding at that time.

In view of current high interest rates and dividend rates on mortgage bonds and preferred stock, WMECO has negotiated and requests authorization of an amendment to its bank loan agreement to provide for (i) an extension of the maturity of the notes to March 30, 1984, (ii) elimination of the installment pay back, (iii) changing the interest rate to 105% of the prime rate effective April 1, 1979, and (iv) substitution of new notes to the banks to reflect the changes in terms.

WMECO's short-term borrowings were $14,650,000 at February 28, 1979, and are estimated to be about $40,000,000 at December 31, 1979. The company's construction and nuclear fuel program is expected to total about $41,500,000 in 1979. WMECO states that it will require additional long-term financing (first mortgage bonds and/or preferred stock) in 1980.

It is stated that the amendment to the bank loan agreement will require the approval of the Department of Public Utilities of the Commonwealth of Massachusetts and of the Connecticut Division of Public Utility Control.

Notice is further given that any interested person may, not later than June 25, 1979, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for

such request, and the issues of fact or law raised by said post-effective amendment to the application-declaration which he desires to controvert; or he may request that he be notified should the Commission order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant-declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application declaration, as now amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regualtions promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M.

[Rel. No. 21079; 70-6319]

New England Electric System; Proposed Issue and Sale of Unissued Common Stock Pursuant to a Proposed Employee Share Ownership Plan and Request for Exemption From Competitive Bidding

June 4, 1979.

Notice is hereby given that New England Electric System ("NEES"), a registered holding company, 20 Turnpike Road, Westborough, Massachusetts 01581, has filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating Sections 6(a) and 7 of the Act and Rule 50(a)(5) promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transaction.

By order dated September 14, 1977 (HCAR No. 20173), NEES was authorized to issue and sell through December 31, 1979 a maximum of 300,000 shares of its authorized but unissued common shares, $1 par value through a NEES Companies' Employees' Share Ownership Plan. NEES now proposes to issue and sell from time to time through December 31, 1983, up to 675,000 shares of its authorized but unissued common stock, $1 par value, through NEES' amended Companies' Employees' Share Ownership Plan ("Plan"). The proceeds of the sale will be used for investment in NEES' subsidiaries, for payment of NEES' indebtedness or for general purposes.

Each employee of NEES and its direct and indirect subsidiaries, Granite State Electric Company, Massachusetts Electric Company, Narragansett Electric Company, New England Energy Incorporated, New England Power Company and New England Power Service Company ("Employers") who has completed at least one year of service as of January 1, 1979, will participate in the Plan as of that date. Each other employee will become a participant on the first day of the Plan year in which he completes one year of service. Participation in the Plan will terminate when employment terminates.

The Employers will contribute to a trust ("Trust") in each year an amount equal to the additional one percent investment tax credit allowed for the Plan year under Section 46(a)(2)(E)(i) of the Internal Revenue Code ("Code"). In addition, if an appropriate election is made on the consolidated federal income tax return and to the extent matched by participant contributions, the Employers will contribute to the Trust in each Plan year an amount not in excess of an additional one-half of one percent investment tax credit under Section 46(a)(2)(E)(ii) of the Code. Contributions to the Trust by the Employers will be made for each Plan year on the due date (unless extended) for filing the consolidated federal income tax return for the corresponding tax year. The trustee, The First National Bank of Boston, will purchase common shares of NEES on or before the thirtieth day following the date of the contribution. However, if the full amount of the investment credit is not utilized for a plan year because the credit limited on the basis of the tax payable for the year, that portion of the additional credit not so utilized shall be contributed to the Trust at the time when such portion is so utilized.

Participants shall not be required to make contributions to the Trust. However, if elected by NEES on its consolidated federal income tax return, participants may make contributions in an aggregate amount not in excess of an additional one-half of one percent investment credit, which contributions will be matched on a like amount by the Employers. The amount of the contributions to be made by a participant for a Plan year will be based on the ratio of his compensation for the Plan year to the total compensation of all participants making matching contributions. Participant contributions shall be invested by the trustee in NEES' common shares within thirty days of payment.

Shares purchased under the Plan will normally come from the authorized but unissued common shares. However, NEES proposes that it shall reserve the right to instruct the trustee for the Plan to purchase shares for participants on the open market. Such market purchases may be made on such terms as to price, delivery and other matters as the trustee may determine. NEES states that the decision to purchase shares on the open market will take into account NEES' need for common equity, general market conditions and the relationship between the purchase price and the book value per share.

The value of common shares purchased from NEES with Employer contributions will be based on the average of the closing prices on the New York Stock Exchange—composite transactions as reported in *The Wall Street Journal* for the twenty consecutive trading days immediately preceding the purchase date. The value of common shares purchased from NEES with participants' contributions and reinvested dividends wil be based on the average of the high and low sale prices on the New York Stock Exchange—composite transactions as reported in *The Wall Street Journal* for each of the last 5 trading days preceding the purchase date. When shares are purchased on the open market, shares will be priced for each participant's account at the average purchase price of all shares purchased.

A separate account for each participant, reflecting the number of common shares credited thereto, will be established and maintained by the trustee. If participant contributions are made to the trust, two accounts shall be maintained for each participant, one for Employer contributions and the other for participant contributions. Contributions to the Trust by the Employers of an amount determined pursuant to Section 46(a)(2)(E)(i) of the Code, less an amount equal to the expenses of the Plan but not

in excess of statutory limitations, shall be combined and allocated to the account for each participant based on the ratio of the participant's compensation for the Plan year for which the contribution is made to the total compensation of all participants for such Plan year. Contributions to the Trust by the Employers of an amount determined pursuant to Section 46(a)(2)(E)(ii) of the Code shall be combined and allocated to the contributions of each participant.

Cash dividends received on common shares held by the trustee, less an amount necessary to pay expenses of administering the Plan but not in excess of statutory limitations, will be invested by the trustee in common shares as soon as practicable. Common shares so purchased will be allocated to each participant's account or accounts based on the ratio of the common shares in each account to the total common shares in all participant's accounts.

As soon as practicable after the end of each Plan year, each participant will be furnished with a statement showing the status of his account or accounts at the beginning and end of each Plan year, any changes in his account or accounts during the Plan year, and other information that may be pertinent.

A participant's account or accounts shall become distributable to him (or, in the event of his death, to the beneficiary designated by him) upon the termination of his participation. A participant may, subject to certain restrictions, prior to termination of employment apply for a distribution of a portion or all of the balance in his account or accounts, if such portion or balance has been allocated to his account or accounts for a period of at least eighty-four months beginning after the month in which the allocation was made.

Distributions shall be made in cash or in whole common shares, at the participant's option. Any fraction of a common share allocated to a participant's account shall be paid in cash. A participant shall at all times have a fully vested and nonforfeitable right to the common shares credited or creditable to his account or accounts.

The Board of Directors of New England Power Service Company shall have the sole authority to appoint and remove the trustee. The trustee shall have the sole responsibility for administration of the Trust and the management of Plan assets held under the Trust, as and to the extent set forth in the Trust. The trustee will accept and hold in the Trust contributions made by the Employers or participants pursuant to the Plan.

Pending the purchase of common shares pursuant to the Plan, the trustee may temporarily retain uninvested cash or may invest all or any part thereof in short-term investments, if such action is prudent under all the facts and circumstances then prevailing.

A committee ("ESOP Committee") shall be the named fiduciary, which shall have authority to control and manage the operation and administration of the Plan. Among other duties, the ESOP Committee will deliver or cause to be delivered to each participant proxy statements and other communications which are distributed to owners of NEES common shares. Each participant shall have the right to direct the trustee to exercise the voting rights with respect to all the whole and fractions of common shares allocated to his account.

No amendment of the Plan may be made which will (1) deprive any participant or beneficiary of any part of an account existing on the date of such amendment; (2) result in the reversion to an Employer of any part of the funds contrary to the provisions of the Plan; or (3) increase the duties or liabilities of the trustee without its written consent. Any Employer, with the written consent or vote of the board of directors of each other Employer, may terminate the Plan at any time.

NEES requests an exemption from the competitive bidding requirements of Rule 50 under Rule 50(a)(5) for the proposed issuance and sale of common stock to the Plan.

The fees and expenses to be incurred in connection with the proposed sale of the common shares are estimated at $130,000 through 1983. Pursuant to Internal Revenue Service regulations, these fees and expenses will be paid from the Trust. Included in such estimate are fees, in an amount to be specified by amendment, for services to be performed, at cost, by New England Power Service Company (an affiliate of NEES). It is stated that no state commisson and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than June 29, 1979, request in writing that a hearing be held on such matters, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant-declarant at the above-stated address and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[FHWA Docket No. 79-23]

Study of Factors Affecting Transportation Operations; Request for Public Comments

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice.

SUMMARY: Section 166 of the Surface Transportation Assistance Act of 1978 requires the Department of Transportation to conduct a study of the factors affecting the safe and efficient operation of bridges, tunnels, and roads within the United States. The purpose of this notice is to advise the public of this study and to invite comments from interested parties for use in designing the format and content of the study.

DATES: Comments must be received on or before August 7, 1979.

ADDRESS: FHWA Docket No. 79-23, Federal Highway Administration, HCC-10, Room 4205, 400 Seventh Street, SW., Washington, D.C. 20590. All responses to this notice will be available for examination at the above address between 7:45 a.m. and 4:15 p.m., eastern time, Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Harry Caldwell, Office of Program and Policy Planning, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590, 202-426-0228. Office hours are Monday through Friday, 7:45 a.m. to 4:15 p.m., eastern time.

SUPPLEMENTARY INFORMATION: Section 166 of the Surface Transportation Assistance Act of 1978 (Pub. L. 95-599, 92 Stat. 2722) reads as follows:

"The Secretary of Transportation shall make a full and complete investigation and study of all those factors affecting the safe and efficient operation of bridges, tunnels, and roads within the United States, including, but not limited to, structural, operational, environmental, and civil disturbance factors."

The August 11, 1978 report of the House Committee on Public Works and Transportation indicates that the study "should be aimed primarily at toll facilities and should include an identification, analysis, and evaluation of the risk factors, risk control programs, and risk transfer and financing programs." Both the House Report and the Joint Explanatory Statement of the Committee on Conference dated October 14, 1978, indicate that the study is to concentrate on the insurance problems affecting the operation of these transportation facilities. Accordingly, the study will address questions of risk management of toll facilities and their financial capacities.

A study design will be prepared by September 30, 1979, and the study will be conducted in fiscal year 1980. The results of the study will form the basis for a report to Congress.

The purpose of this notice is to advise the public of this study and to invite suggestions on the format and content of the study design from all interested groups and individuals. All responses to this notice will be available for examination by any interested person at the above address both before and after the closing date for comments.

Issued on: June 4, 1979.

John S. Hassell, Jr.,

Deputy Administrator.

[Finance Docket Nos. 28482 and 28483 (Sub-No. 2)]

Auto-Train Corp.; Petition for Modification

Auto-Train Corporation, operation rail passenger and automobile transport service between Alexandria, VA, and Sanford, FL. Petitioner Auto-Train Corporation, 1801 K Street, N.W., Washington, DC 20006, represented by Robert G. Seaks, 1729 H Street, N.W., Washington, DC 20006, holds authority as a railroad (1) for combined rail passenger-automobile transport service between Alexandria, Virginia, and Sanford, Florida, and (2) for the transportation between the same points of automobiles only, unaccompanied by their owner or driver, when the transportation is performed under a point booking whereby Auto-Train transports an automobile and an airline transports its owner or driver between substantially the same points at substantially the same time.

Petitioner seeks modification of its authority under (2) above to permit it to

transport unaccompanied automobiles tendered to it by Central Florida Coach Lines, Inc. (d/b/a Auto-Bus) when the tendering carrier is transporting at substantially the same time the owners or drivers of such automobiles between Florida points and northern points.

Any interested person or persons desiring to participate may file an original and six copies of his written representations, views or arguments in support of or against the petition on or before July 9, 1979.

H. G. Homme, Jr.,
Secretary.

[Exception No. 2 To Corrected Second Revised S.O. No. 1301]

Burlington Northern Inc.

To: Burlington Northern Inc.

Pursuant to the authority vested in me by Section (a)(4) of Corrected Second Revised Service Order No. 1301, Burlington Northern Inc. is authorized to use forty-foot narrow-door plain boxcars owned by Canadian National Railways or by CP Rail from stations in the State of Montana destined to Seattle, Washington, subject to the following conditions.

1. Cars must be used in compliance with United States Customs regulations.

2. Cars must be used in compliance with Car Service Rules 1 and 2 adopted by the Commission in Docket Ex Parte No. 241.

3. Car Relocation Directives and Car Assistance Directives issued by the Car Service Division, Association of American Railroads, applicale to such cars remain fully in effect.

Effective May 24, 1979.
Expires August 31, 1979.
Issued at Washington, D.C., May 24, 1979.

Joel E. Burns,
Director, Bureau of Operations.

BILLING CODE 7035-01-M

[Finance Docket No. 29057 F]

Brillion & Forest Junction Railroad Co., Inc.—Operation Over a Line of Railroad Between Brillion and Forest Junction in Calumet County, Wis.

Brillion & Forest Junction Railroad Company, Inc., P.O. Box 111, Algoma, WI 54201, represented by Clinton Jones, Jr., Chief Executive Officer, Brillion & Forest Junction Railroad Company, P.O. Box 111, Algoma, WI 54201, hereby give notice that on the 22nd day of May, 1979, it filed with the Interstate Commerce Commission at Washington, DC, an application pursuant to 49 U.S.C. § 10901 (formerly Section 1(18) of the Interstate Commerce Act), for a decision approving and authorizing the operation of a line of railroad extending from milepost 98.5 to milepost 105.2, between Brillion and Forest Junction, WI.

The line is located in Calumet County, WI. Approximately 300 feet of spur or industry trackage is in Manitowoc County, WI. The line Applicant operates extends from milepost 98.5 at Brillion westerly to milepost 105.2 at Forest Junction, approximately 6.7 miles of route. The line Applicant operates includes a 6.7 mile main line with an additional 1.3 miles of spurs, sidings, etc., for a total of approximately 8 track miles of line.

The line of railroad was formerly owned and operated by the Chicago and North Western Transportation Company (C&NW) as a portion of a branch line of C&NW, which was authorized for abandonment and/or sale by the Commission in docket No. AB-1 (Sub-No. 52), decided May 9, 1978. A private organization composed of freight shippers accordingly purchased the line of railroad from C&NW.

In accordance with the Commission's requirements (49 CFR 1108.8) in Ex Parte No. 55 (Sub-No. 4), *Implementation—National Environmental Policy Act, 1969*, 352 I.C.C. 451 (1976), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall indicate with specific data the exact nature and degree of the anticipated impact. See *Implementation—National Environmental Policy Act, 1969, supra* at p. 487.

Pursuant to the provisions of the Interstate Commerce Act, as amended, the proceeding will be handled without public hearings unless comments in support or opposition on such application are filed with the Secretary, Interstate Commerce Commission, 12th and Constitution Avenue, N.W., Washington, DC 20423, and the aforementioned counsel for Applicant, within 30 days after the date of first publication in a newspaper of general circulation. Any interested person is entitled to recommend to the Commission that it approve, disapprove, or take any other specified action with respect to such application.

H. G. Homme, Jr.,
Secretary.

BILLING CODE 7035-01-M

[Docket No. AB-204 (Sub-No. 3)]

Cape Fear Railways, Inc., Abandonment Between Skibo and Fort Junction in Cumberland County, N.C.; Findings

Notice is hereby given pursuant to 49 U.S.C. § 10903 (formerly Section 1a of the Interstate Commerce Act) that by a Certificate and Decision decided May 17, 1979, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that, the present and future public convenience and necessity permits abandonment of 4.290 miles of track owned and operated by Cape Fear and cessation of operations over 5.910 miles of track under lease from the United States Government and operated by Cape Fear, Cumberland County, NC, the total line extending from Skibo, NC, milepost 10, to Fort Junction, NC, milepost 0, a distance of 10 miles, provided, however, that Cape Fear shall keep intact all of its righ-of-way underlying the track, including all of the bridges and culverts for a period of 120 days from the effective date of this certificate and decision to permit any state or local government agency or other interested party to negotiate the acquisition for public use of all or any portion of the right-of-way. A certificate of public convenience and necessity permitting the abandonment was issued to Cape Fear Railways, Inc. Since no investigation was instituted, the requirement of § 1121.38(a) of the Regulations that publication of notice of abandonment decisions in the Federal Register be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I [§ 1121.45 of the Regulations]. Such documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed and served on or before June 25, 1979. The offer, as filed, shall contain information required pursuant to § 1121.38(b) (2) and (3) of the Regulations. If no such offer is received, the certificate of public convenience and

necessity authorizing abandonment shall become effective on July 23, 1979.

H. G. Homme, Jr.,
Secretary.

BILLING CODE 7035-01-M

[Ex Parte No. 241, Rule 19, Exemption No. 157]

Mandatory Car Service Rules Exemption

To all railroads:

The railroads named below own numerous open hopper cars for the purpose of transporting substantial volumes of coal and other bulk freight originating on their lines and destined to points on other lines. There are no significant volumes of traffic transported in similar cars originating on other lines and terminating on these lines which would provide a source of empty hopper cars for return loading. These lines have agreed to refrain from loading hopper cars owned by other lines without the express consent of the car owners even though such use might otherwise be authorized by Car Service Rules 1 and 2. Under these conditions it is imperative that open hopper cars owned by these railroads be returned to the owning railroad empty unless their use is authorized by the car owner.

It is ordered, That pursuant to the authority vested in my by Car Service Rule 19:

(a) Hopper cars listed under the heading "Class 'H' Hopper Car Type" in the Official Railway Equipment Register, ICC RER 6410–A, issued by W. J. Trezise, or successive issues thereof, and owned by the railroads named in section (c) below, are exempt from the provisions of Car Service Rules 1(a), 2(a) and 2(b). These cars must be returned empty to the car owner unless their use has been authorized by the car owner.

(b) Railroads named in section (c) below are prohibited from using hopper cars foreign to their line unless their use has been authorized by the car owner.

(c) List of railroads and car reporting marks:

The Baltimore and Ohio Railroad Company
Reporting Marks: B&O
Bessemer and Lake Erie Railroad Company
Reporting Marks: B&LE
Carolina, Clinchfield and Ohio Railway
Reporting Marks: CRR
The Chesapeake and Ohio Railway Company
Reporting Marks: C&O
Consolidated Rail Corporation
Reporting Marks: BA–BWC–CNJ–CR–DLAW–EL–ERIE–LV–NH–NYC–PC–P&E–PRR–RDG–TOC
Illinois Central Gulf Railroad Company
Reporting Marks: GM&O–IC–ICG
Louisville and Nashville Railroad Company
Reporting Marks: L&N–NC–MON
*Montour Railroad Company
Reporting Marks: MTR
Norfolk and Western Railroad Company
Reporting Marks: ACY–N&W–NKP–P&WV–VGN–WAB
St. Louis-San Francisco Railway Company
Reporting Marks: SLSF
Southern Railway System
Reporting Marks: CG–INT–NS–SOU
The Pittsburgh and Lake Erie Railroad Company
Reporting Marks: P&LE
Western Maryland Railway Company
Reporting Marks: WM

(d) For the purpose of improving car utilization and the efficiency of railroad operations, or alleviating inequities or hardships, modifications may be authorized by the Chief Transportation Officer of the car owner, or by the Director or Assistant Director of the Bureau of Operations, Interstate Commerce Commission. Modifications authorized by the car owner must be confirmed in writing to W. H. Van Slyke, Chairman, Car Service Division, Association of American Railroads, Washington, D.C., for submission to the Director or Assistant Director.

(e) No common carrier by railroad subject to the Interstate Commerce Act shall accept from shipper any loaded hopper car, described in this exemption, contrary to the provisions of the exemption.

(f) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

Effective May 22, 1979, and continuing in effect until further order of this Commission.

Issued at Washington, D.C., May 18, 1979.

Interstate Commerce Commission.

BILLING CODE 7035-01

[Ex Parte No. 241, Rule 19, Exemption No. 166]

Mandatory Car Service Rules Exemption

There is an emergency movement of military supplies from Crane, Indiana, to Savanna, Oklahoma. The originating carrier has insufficient system cars of suitable dimensions immediately available for loading with this traffic. Sufficient cars of other ownerships having suitable dimensions are available on the lines of the originating carrier and on its connections, and compliance with Car Service Rules 1 and 2 would prevent the timely assembly and use of such cars.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, the Car Service Division of the Association of American Railroads is authorized to direct the movement to the Chicago, Milwaukee, St. Paul and Pacific Railroad Company (Milwaukee), the railroads designated by the Car Service Division are authorized to move to, and the Milwaukee is authorized to accept, assemble, and load not to exceed 100 empty plain boxcars with military supplies from Crane, Indiana, to Savanna, Oklahoma, regardless of the provisions of Car Service Rules 1 and 2.

Effective May 25, 1979.
Expires August 31, 1979.

Interstate Commerce Commission.

Joel E. Burns,

Agent.

[FR Doc. 79-17885 Filed 6-7-79; 8:45 am]

BILLING CODE 7035-01-M

Motor Carrier Board Transfer Proceedings

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include request for oral hearing, must be filed with the Commission on or before July 9, 1979. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

H. G. Homme, Jr.,

Secretary.

MC-FC-78029, filed February 2, 1979. Transferee: CHRISTIE & LARRY HILL, doing business as ST. MARIES BUS LINE, 487 Fourth St. Milltown, St. Maries, ID 83861. Transferor: JOHN FRANKLIN CURTIS, doing business as INLAND EMPIRE COURIER, 1808 Hastings, Coeur d'Alene, ID 83861. Representative: Christie & Larry Hill, 487 Fourth St. Milltown, St. Maries, ID 83861. By decision of June 1, 1979, the Commission, Motor Carrier Board, granted authority for the transfer to transferee of the operating rights of transferor as set forth in Certificate No. MC-111480, issued August 27, 1976, as follows: (A) *Passengers and their baggage, and express, mail, and newspapers* in the same vehicle with passengers, over specified regular routes serving all intermediate points, (1) between Spokane and Tekoa, WA, and (2) between junction U.S. Hwy 95 and unnumbered highway northwest of Worley, ID, and Moscow, ID. (B) *Passengers and their baggage, and express* in the same vehicle with passengers, over specified regular routes, serving all intermediate points, (1) between Spokane, WA and Worley, ID, and (2) between Plumber and St. Maries, ID., and (C) *passengers and their baggage, express, and newspapers* in the same vehicle with passengers, over specified regular routes serving all intermediate points, between Tekoa, WA and Tensed, ID. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349. Petitions for reconsideration may be filed by any interested person on or before June 28, 1979.

By the Commission.

H. G. Homme, Jr.,

Secretary.

[FR Doc. 79-17825 Filed 6-7-79; 8:45 am]

BILLING CODE 7035-01-M

[Permanent Authority Decisions Vol. No. 54]

Permanent Authority Applications; Decision-Notice

Decided: May 11, 1979.

The following applications filed on or before February 28, 1979, are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR § 1100.247). For applications filed before March 1, 1979, these rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the Federal Register. Failure to file a protest, within 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with Rule 247(e)(3) of the Rules of Practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations

phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

On cases filed on or after March 1, 1979, petitions for intervention either with or without leave are appropriate.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

If applicant has introduced rates as an issue it is noted. Upon request an applicant must provide a copy of the tentative rate schedule to any protestant.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the transportation policy of 49 U.S.C. § 10101. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a protestant, that the proposed dual operations are consistent with the public interest and the transportation policy of 49 U.S.C. § 10101 subject to the right of the Commission, which is expressly reserved, to impose such conditions as it finds necessary to insure that applicant's operations shall conform to the provisions of 49 U.S.C. § 10930(a) [formerly section 210 of the Interstate Commerce Act].

In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board Number 2, Members Boyle, Eaton, and Liberman.

H. G. Homme, Jr.,
Secretary.

MC 340 (Sub-55F), filed February 22, 1979. Applicant: QUERNER TRUCK LINES, INC., 1131-33 Austin Street, San Antonio, TX 78296. Representative: M. MC 143331 (Sub-6F), filed February 22, 1979. Applicant: FREIGHT TRAIN TRUCKING, INC., 4906 E. Compton Blvd., P.O. Box 817, Paramount, CA 90723. Representative: William J. Monheim, P.O. Box 1756, Whittier, CA 90609. To operate as a *contract carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *dried noodles and dehydrated soups*, from Gardena, CA, to Phoenix, AZ, Denver, CO, Kansas City, MO, Oklahoma City, OK, Dallas, Houston, and San Antonio, TX, and Salt Lake City, UT, under continuing contract(s) with Nissin Foods (USA) Co., Inc., of Gardena, CA. (Hearing site: Los Angeles, CA.)

MC 144740 (Sub-7F), filed February 23, 1979. Applicant: L. G. DEWITT, INC., P.O. Box 70, Ellerbe, NC 28338. Representative: Terrence D. Jones, 2033 K Street, N.W., Suite 300, Washington, DC 20006. To operate as a *contract carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *foodstuffs* from the facilities of or used by Foodways National, Inc., at (a) Wethersfield and Hartford, CT, and (b) New Paltz, NY, to points in CA, FL, GA, ID, IL, KS, PA, NY, MI, MN, MO, OH, OR, TX, and WI, under continuing contract(s) with Foodways National, Inc., of Wethersfield, CT. (Hearing site: Washington, DC.)

MC 145340 (Sub-2F), filed January 16, 1979. Applicant: BILLY R. BURGESS, Rt. 1, Box 250, Shirley, AR 72153. Representative: Thomas J. Presson, Lot 27, Riverbend Estates, Redfield, AR 72132. To operate as a *contract carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *wood pallets, pallet parts, and wooden packaging products*, from Concord, AR, to points in IA, IL, MO, NE, OH, TN, and TX, under continuing contract(s) with Martin Lumber Company, Inc., of Concord, AR. (Hearing site: Little Rock, AR, or Memphis, TN.)

MC 145560 (Sub-6F), filed February 21, 1979. Applicant: NORTH ALABAMA TRANSPORTATION, INC., P.O. Box 38, Ider, AL 35981. Representative: William P. Jackson, Jr., 3426 N. Washington Blvd., P.O. Box 1240, Arlington, VA 22210. To operate as a *contract carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *carpeting and flooring*, from Dalton and Calhoun, GA, Nashville, TN, and Center, TX, to points in ID, MT, OR, UT, and WA, under continuing contract(s) with Wanke Panel Company, of Portland, OR. (Hearing site: Washington, DC.)

MC 145900 (Sub-2F), filed February 23, 1979. Applicant: THREE RIVERS TRUCKING, INC., Legionville Road, Ambridge, PA 15003. Representative: John A. Pillar, 1500 Bank Tower, 307 Fourth Avenue, Pittsburgh, PA 15222. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *iron and steel articles*, (except commodities in bulk), between the facilities of The Levinson Steel Company, at Pittsburgh and Ambridge, PA, on the one hand, and, on the other, those points in WV on and north of U.S. Hwy 50, and those points in OH on and east of a line beginning at the OH-KY State line and extending along U.S. Hwy 23 to junction OH Hwy 4, then along OH Hwy 4 to Sandusky, OH. (Hearing site: Pittsburgh, PA, or Washington, DC.)

MC 146091 (Sub-2F), filed February 22, 1979. Applicant: JOHN E. HOTH and BOBBIE J. HOTH, d.b.a. W. I. EXPRESS, Box 43, Garnavillo, IA 52049. Representative: Carl E. Munson, 469 Fisher Bldg., Dubuque, IA 52001. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *meats, meat products and meat byproducts, and articles distributed by meat-packing houses*, as defined in sections A and C to Appendix I to the Report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from the facilities of Wilson Foods Corporation, at (a) Cedar Rapids, IA, and (b) Albert Lea, MN, to points in AL, AR, GA, KY, and TN, restricted to the transportation of traffic originating at the named origin facilities and destined to the indicated destinations. NOTE: The person or persons who appear to be engaged in common control of applicant and another carrier subject to regulation by this Commission must either file an application under 49 U.S.C. 11343(a) (formerly section 5(2) of the Interstate Commerce Act), or submit an affidavit indicating why such approval is unnecessary. (Hearing site: Oklahoma City, OK, or Chicago, IL.)

MC 146290 (Sub-1F), filed February 16, 1979. Applicant: DON THREDE, an individual doing business as DON THREDE TRUCKING COMPANY, 1777 Arnold Industrial Highway, Concord, CA 94520. Representative: Eldon M. Johnson, 650 California Street, Suite 2808, San Francisco, CA 94108. To operate as a *contract carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *flat glass*, from the facilities of PPG Industries, Inc., at Fresno, CA, to points in AZ and NV, under continuing contract(s) with PPG Industries, Inc., of Pittsburgh, PA. (Hearing site: San Francisco or Fresno, CA.)

MC 146341F, filed February 8, 1979. Applicant: RIGHT-O-WAY, INC., 566 Valley Street, Orange, NJ 07050. Representative: Ronald I. Shapss, 450 Seventh Avenue, New York, NY 10001. To operate as a *contract carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Rouses Point, NY, on the one hand, and, on the other, points in AL, AZ, AR, CA, CO, FL, GA, ID, IL, IN, IA, KS, KY, LA, MI, MN, MS, MO, MT, NE, NV, NM, NC, ND, OH, OK, OR, SC, SD, TN, TX, UT, VA, WA, WV, WI, and WY, under continuing contract(s) with the Champlain Valley International Shippers and Receivers Inc., of Rouses Point, NY. (Hearing site: New York or Rouses Point, NY.)

Broker Authority

MC 130281 (Sub-3F), filed February 8, 1979. Applicant: HOLIDAY TRAVEL, INC., 2842 London Square Mall, Eau Claire, WI 54701. Representative: Douglas P. Stoffers (same address as applicant). To engage in operations, in interstate or foreign commerce, as a *broker*, at Eau Claire, WI, and Davenport, IA, in arranging for the transportation, by motor vehicle, of *passengers and their baggage*, in special and charter operations, in one-way and round-trip tours, between points in the United States (including AK and HI). (Hearing site: Eau Claire, WI.)

MC 130561F, filed January 12, 1979. Applicant: WORLD TRAVEL SERVICE, INC., 30 West Church Ave., Roanoke, VA 24011. Representative: L. C. Major, Jr., Suite 400, Overlook Bldg., 6121 Lincolnia Rd., P.O. Box 11278, Alexandria, VA 22312. To engage in operations, in interstate or foreign commerce, as a *broker*, at Roanoke and Blacksburg, VA, in arranging for the transportation, by motor vehicle of *passengers and their baggage*, in the same vehicle with passengers, in round-trip special and charter operations, beginning and ending at points in

Roanoke and Franklin Counties, VA, and extending to points in the United States (including AK, but excluding HI). (Hearing site: Roanoke, VA.)

Note.—Applicant is cautioned that arrangements for charter parties or groups should be made in conformity with the requirements set forth in *Tauck Tours, Inc., Extension—New York, N.Y.* 54 M.C.C. 291 (1952).

[Docket No. AB-32 (Sub-No. 3F)]

Robert W. Meserve and Benjamin H. Lacy, Trustees of the Property of Boston & Maine Corp., Debtor, Abandonment Near Bennington and Hillsborough in Hillsborough County, N.H.; Findings

Notice is hereby pursuant to 49 U.S.C. § 10903 (formerly Section 1a of the Interstate Commerce Act) that by a Certificate and Decision decided May 21, 1979, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in AB-36 (Sub-No. 2), *Oregon Short Line R. Co.—Abandonment Goshen,* —— I.C.C. ——, decided February 9, 1979, and further that B&M shall keep intact all of the right-of-way underlying the track, including all of the bridges and culverts for a period of 120 days from the effective date of this certificate and decision to permit any state or local government agency or other interested party to negotiate the acquisition for public use of all or any portion of the right-of-way, the present and future public convenience and necessity permit the abandonment by Robert W. Meserve and Benjamin H. Lacy, Trustees of the Property of Boston and Maine Corporation of a segment of a line of railroad known as the Hillsboro Branch extending from railroad milepost W 62.0 in Bennington to the end at railroad milepost W 70.4 in Hillsborough, a distance of 8.40 miles in Hillsborough County, NH. A certificate of public convenience and necessity permitting the abandonment was issued to Robert W. Meserve and Benjamin H. Lacy, Trustees of the Property of Boston and Maine Corporation. Since no investigation was instituted, the requirement of § 1121.38(a) of the Regulations that publication of notice of abandonment decisions in the Federal Register be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (Section 1121.45 of the Regulations). Such documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed and served no later than June 25, 1979. The offer, as filed, shall contain information required pursuant to § 1121.38(b) (2) and (3) of the Regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective on July 23, 1979.

BILLING CODE 7035-01-M

[Decision Ex Parte No. 311]

Expedited Procedures for Recovery of Fuel Costs

Decided: June 1, 1979.

In a decision served April 20, 1979, in the above-entitled proceeding, the Commission implemented Special Permission No. 76-350 to provide a mechanism whereby regulated carriers could attempt to reflect rapidly increasing fuel costs in the rate structure as quickly as possible. (44 FR 25664, May 1, 1979).

In addition, comments were requested as to possible modifications of the X-311 procedures, and to the question of the authorization of a fuel-based surcharge and guaranteed pass-through provision to those actually incurring increased fuel charges. On the question of the surcharge, several petitions were held in abeyance pending comments. Comments were also requested on possible modification of the 10-working day notice requirement, and the use of the one-percent rate increase triggering mechanism, absent special justification.

Since the April 20 decision there have been a number of X-311 rate increase filings including industry-wide requests by the railroads, bus, and household goods' carriers. There are indications, however, that the fuel situation with regard to owner-operators is deteriorating. Whether this is due to certain motor common carriers which use owner-operators not filing for increases, or that the owner-operators are not receiving adequate compensation for increased fuel expenses despite X-311 increases is not clear. However, there have been reports of job slowdowns, and the possibility of major walkouts appears to exist.

The requested comments have been received. All contentions have been evaluated and considered in leading to our conclusions discussed below.

The nature of the emergency dictates that a fuel-based surcharge be the appropriate method of implementing future X-311 rate increases as of the date of this decision. It appears that, as a general rule, this would be the best and most efficient manner for carriers, owner-operators and/or other parties bearing the increased fuel charges, and the shipping public to determine how

much of any given shipment is attributable to added fuel expense. It would facilitate tariff publication, and would clearly show especially with regard to owner-operators and/or other parties bearing increased fuel charges, how much such parties are entitled to be reimbursed. Carriers whose earlier surcharges have been rejected under the prior rule are invited to refile immediately.

Several other parties suggested various types of surcharges (mileage, weight, revenue-based, etc.). Given the urgency of the energy emergency for all modes, and the myriad types of rate structures, especially among motor carriers, we are not recommending that a proposed fuel surcharge be in any particular form. Thus, a carrier, in its discretion, could choose a mileage surcharge or any other surcharge method it deemed appropriate for its circumstances. However, the following conditions are to be attached to the use of a surcharge: each surcharge must have a provision for a 100 percent pass-through [1] to those parties actually incurring the increased fuel charges; and, the surcharge must have an expiration date of no later than October 31, 1979, which may not be extended or canceled except upon specific authorization of the Commission. Extension of the expiration date for the surcharge will be dependent upon the continuation of the fuel emergency. We state strongly that any surcharges approved should be replaced at the earliest opportunity by general increase proposals or other appropriate tariff adjustments on statutory notice in order that the Commission can consider whether the person actually responsible for the payment of the fuel costs will continue to receive the benefit of the fuel adjustment.

The possible use of a "Fuel Increase Schedule", such as that proposed in Appendix A of the April 20 decision, or the future use of any specific Commission-imposed surcharge formula is not being discarded. The Commission will closely monitor fuel price increases with the various monitoring systems available to it. If the emergency worsens, or the Commission deems it warranted, a specific schedule or formula could be implemented.

In addition, increases already granted or pending under the provisions of Ex Parte No. 311 implemented in the April 20 decision would remain as changes in the rate structure. Subsequent to the date of the present decision, all fuel-related increases filed under the provisions of Ex Parte No. 311 will be in the form of a surcharge, except where special justification to deviate is shown.

It should be stressed that the overall issue of revenue need is not being considered in Ex Parte No. 311 increases. However, revenue increases as a result of escalating fuel prices will of necessity be reflected in revenue/cost relationships in subsequent general increase proceedings. Such comparisons will be evaluated in future general rate increase proposals where the issue of overall revenue need will be considered.

In the April 20 decision, the Commission established the base period as January, 1979. Many comments were received requesting that the base period be changed to September, 1978. Several other base period dates were also suggested in individual proceedings. Most of the comments stated that fuel price increases were occurring prior to January, 1979, and should be included in any X–311 requests. The September, 1978, base period was also suggested so as to be in conformity with the program year of the Council of Wage and Price Stability (COWPS) which began October 1, 1978.

We find that the January, 1979 base period should be retained. Based on the best evidence of record, it appears that the extremely rapid rise in fuel prices began during this month. Any increased fuel expenses not covered by an X–311 increase could be examined in future general rate increase proposals.

In addition, some comments posed the question of whether the Commission's change to a January, 1979 base period eliminated the "floating base period" established in the decision served February 24, 1978. In that decision, the Commission modified the original X–311 procedures to insure that carriers seeking a first or second X–311 increase have not duplicated increased fuel costs used as justification in prior general rate increase proceedings. We find that while the January, 1979 base period will be retained, those carriers seeking a second X–311 increase can use the floating base period concept outlined in the February 24, 1978 decision. It should be emphasized again, however, that a second surcharge must have an expiration date of October 31, 1979, and that any subsequent surcharge should be replaced by general rate increase proposals at the earliest opportunity.

The present procedures require that X–311 increases be published on not less than 10 working days' notice, with protests due no later than 5 days before the effective date. Some shippers complained that this period is not long enough, while a few carriers wanted less notice. We find that the 10-day notice should not be reduced. However, in individual situations, this period can be shortened if absolutely necessary.

Under the present procedures, in the absence of special justification, increases of less than 1 percent shall not be requested. Several comments requested that this trigger mechanism be lowered. We agree, and find that, in the absence of special justification, increases of less than .5 percent shall not be requested.

The freight forwarders have filed a petition asking for implementation of Special Permission No. 76–280 which set out the special procedures for this mode in seeking fuel-based rate increases. This was also included in the original X–311 decision, 330 I.C.C. 583, 592 (1975). However, the Commission decision of April 20 did not take any action with regard to forwarders. We find that Special Permission No. 76–280 should be activated, and that freight forwarders also be authorized to use the surcharge method.

COWPS submitted a statement contending that fuel prices should not be considered as an isolated element in setting rate increases. It is stated that such a policy encourages inefficiency, will allow unjustified revenue to accrue to certain carriers which could otherwise absorb some fuel cost increases, and will contribute to the nation's high inflation rate.

Given the nature of the emergency, the Commission feels there is a strong basis for the existence of expedited procedures for the recovery of rapid fuel price increases. We assure the Council that the Commission will exercise its duty in determining that any surcharge is fully cost justified.

At the same time, we repeat that it is our intention to consider inflationary effects when determining the lawfulness of the surcharges to be filed. If possible, the carriers, when filing X–311 increases, should also submit data that the Commission can place into the Council's current price guideline formulas.[2] The Council should also be aware that we are reviewing its proposals to increase efficiency of the transportation system, such as eliminating backhaul restrictions.

Finally, the question was raised of how to protect owner-operators and/or the person bearing the increased fuel charges when the carriers they work for refuse to file a surcharge. The

[1] Overhead and other expenses associated with the pass-through requirement may be recouped by the certificated carrier by normal tariff procedures.

[2] We urge the carriers and their representatives to discuss their proposals for fuel cost increases with the Council prior to filing the tariff publications with the Commission.

Commission does not have a solution to this potential problem, and invites comments from interested parties on this issue no later than 20 days from the date of service of this decision.

Special Permission No. 79–2620 Emergency Fuel Surcharge for Line-Haul Transportation Charges and Other Charges-Expedited Procedure

In a decision served April 20, 1979, the Commission implemented Special Permission No. 76–350 to provide a mechanism where regulated carriers could attempt to reflect rapidly increasing fuel costs in the rate structure as quickly as possible. Because of the increasing fuel emergency, and because the prior authority does not entirely meet the immediate need of certain carriers and/or persons bearing the increased fuel charges, further relief is warranted.

It is ordered: 1. All regulated carriers, including freight forwarders, or their authorized publishing agents that have tariffs or schedules on file with this Commission, or those carriers or agents that may in the future file tariffs or schedules with this Commission, are authorized to depart from the terms of the governing tariff circulars to file and post on not less than 10 working days' notice to this Commission and the public, an increase in passenger fares and freight charges for line-haul transportation and charges for other services which consume fuel, such as pickup and delivery, which must be specified in the tariffs, by means of a percentage surcharge. Increases already granted or pending under Special Permission No. 76–350 would remain as changes in the rate structure. As of the date of this decision, all fuel-related increases must be filed under the terms of Special Permission No. 79–2620 using the surcharge method, except where special justification to deviate is shown and approved by the Commission.

2. The Commission shall analyze the impact of fuel expenses on a month-to-month basis to determine whether there is justification for modifications of this decision; if conditions warrant, this decision will be amended accordingly.

3. The surcharge filed and posted under the authority of this permission may take the form of master tariff of increase, or as a supplement to the affected tariffs. If the master tariff form of publication is to be employed, reference will be made by connecting link supplement to each tariff (to be made subject to the master tariff), connecting such tariff with the master. Such supplements may be blanket supplements (a common supplement issued to two or more tariffs), provided each copy officially filed is hand marked in the tariff it supplements.

4. The person actually responsible for the payment of fuel charges, by contract or otherwise, is to receive the full increase in revenue derived from surcharges published hereunder. Each publication containing the surcharge shall contain whichever of the following certifications is appropriate:

This is to certify that each carrier party to this publication has been notified that:

Special Permission No. 79–2620 requires that the person actually responsible, by contract or otherwise, for the payment of fuel charges is to receive the full increase in revenue derived from surcharges published thereunder, and that a carrier's participation in a publication filed thereunder constitutes an undertaking to comply with that requirement.

or

This is to certify that the person actually responsible, by contract or otherwise, for the payment of fuel charges will receive the full increase in freight revenue to be derived from the proposed surcharge.

5. All surcharges filed under this special permission must have an expiration date of no later than October 31, 1979. Special Permission No. 79–2620 will remain in effect until October 31, 1979, unless extended by further order of the Commission.

6. Publications issued and filed hereunder shall be exempt from the supplemental and volume limitations of the tariff circulars, shall contain no other matter and shall bear the following notation:

"Issued on ten days' notice, I.C.C. permission No. 79–2620"

7. The carriers, individually, or by tariff publishing bureaus, as appropriate, shall submit with the schedules of proposed surcharges based on fuel costs, an original and 2 copies of an executed "Verified Statement of Fuel Expenses and Data in Support of Requested Fuel Rate Increase" in the form and manner provided for in Appendix II to the report in Ex Parte No. 311, 350 I.C.C. 563, 575–76 (1975), as amended by decisions served February 24, 1976 and April 20, 1979. Railroads when filing jointly and motor carrier rate bureaus subject to Ex Parte No. MC–82 when filing on behalf of substantially all their members, should submit 20 copies of the Appendix II data.

8. Indicate the percent (to 1 decimal) of the requested fuel surcharge based on the increase in fuel expenses, including taxes, current period over base period. This percent should not exceed the percent shown on line 15 of Appendix II. In the absence of special justification, increases of less than .5 percent shall not be requested.

9. Only one surcharge as to a tariff may be in effect at one time, and any surcharge filed under authority of this special permission shall not provide for any exceptions (non-application) with respect to any particular traffic.

10. The surcharge provisions must include a rule for disposition of fractions of one cent or other stated amounts, or refer to a conversion table of increased charges or fares.

11. In the situation where a proposed surcharge is on a mileage basis, the carrier or agent must include in the tariff a clear method of determination of mileage. Also, there must be included in the tariff a method of pro-rating any mileage surcharge on a per truck basis for situations where LTL or truckload shipments involve more than one shipper.

12. All outstanding orders of the Commission are modified to the extent necessary to permit the filing of the tariffs authorized herein. Increases filed under this Special Permission shall not be deemed general increases or general adjustments as defined in section 1102.1 and 1104.1(a) of Chapter X of Title 49 of the Code of Federal Regulations.

13. The requirement of following rate bureau procedures provided in agreements approved by this Commission under section 10706 of the Act (formerly sections 5a and 5b) is waived to the extent necessary to permit the filing of the tariffs authorized herein.

14. Protests are due no later than 5 days before the effective date of the tariff.

15. All carriers are hereby notified that they are expected to update their tariff by incorporating the increase published under authority of this Special Permission as soon as practicable, and that the surcharges be replaced at the earliest opportunity by general increase proposals.

16. Notice of this Special Permission shall be given to the general public by mailing a copy of this decision to the Governor of each State and to the Public Utilities Commissions or Boards of each State having jurisdiction over transportation, by depositing a copy in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection, and by delivering a copy to the Director, Office of the Federal Register, for publication therein.

It is further ordered: Special Permission No. 79–360 is implemented for use by freight forwarders. However, the forwarders are advised that in publishing proposals they are to use the surcharge method in Special Permission No. 79–2620 based on all the requirements therein, unless special justification is granted to use another form.

Interested parties may file comments no later than 20 days from the date of service of this decision to the question of how to protect the person actually bearing the increased fuel charges when the carriers they work for refuse to file a surcharge under this Special Permission.

By the Commission, Chairman O'Neal, Vice-Chairman Brown, Commissioners Stafford, Gresham, Clapp and Christian. Commissioner Christian absent and not participating.

H. G. Homme, Jr.,
Secretary.

COMMISSION ON CIVIL RIGHTS.

DATE AND TIME: Monday, June 11, 1979, 10:30 a.m.–12:30 p.m.—1:30 p.m.–3:30 p.m.

PLACE: Marina Conference Center, Holiday Inn, 801 Calhoun Street, Houston, Texas.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

I. Approval of Agenda.
II. Approval of Minutes of Last Meeting.
III. Staff Director's Report:
A. Status of Funds.
B. Personnel Report.
C. Office Directors' Reports.
D. Correspondence:
1. Letter from OMB Director McIntyre on Housing Report.
2. Letter from Delores Young.
IV. Report on Civil Rights Developments in the Rocky Mountain Region.
V. State Advisory Committee Re Charters:
A. Alabama.
B. California.
C. Indiana.
D. Florida (Interim Appointment).
VI. Title IX Recommendation.
VII. Battered Women Study Contract.
VIII. Review of Health Insurance Research Design.
IX. Status Report on SBA Set-Aside Provision.
X. Recommendation Re Policy on SAC Chairperson Criteria.
XI. Follow-up Re Kansas Committee Statement on School Desegregation in Topeka.
XII. Action Re Race Relations in Cooper County, Missouri—1978.

CONTACT PERSON FOR MORE INFORMATION: Barbara Brooks, Office of Congressional and Public Liaison, (202) 254–6697.

2

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION.

TIME AND DATE: 9:30 a.m. (Eastern Time), Tuesday, June 12, 1979.

PLACE: Commission Conference Room, No. 5240, on the fifth floor of the Columbia Plaza Office Building, 2401 E Street N.W., Washington, DC 20506.

STATUS: Part will be open to the public and part will be closed to the public.

Open to the Public

1. Proposed Modifications of Various State and Local Agency fiscal year 1979 Charge Resolution Contracts.
2. Proposed Annual Report to President and Congress on Implementation of Executive Order 12067.
3. Report on Status of Consultation with Office of Federal Contract Compliance Programs on its Compliance Manual.
4. Proposed Revised Regulations Establishing Time Limits for Federal Sector Appeals.
5. Report by Vice Chair Leach on Religious Accommodation and the Postal Service.
6. Report on Court Decision in EDOC v. St. Louis Diecasting Corp.
7. Report on the Commission operations by the Executive Director.

Closed to the Public

1. Litigation Authorization; General Counsel Recommendations
2. Proposed Decision in Charge TN03–1711
3. Proposed Reconsideration of Decision in Charge 052–77–0749.

This matter, consideration of which was postponed from the meeting of June 5, was incorrectly identified as Charge 052–77–1668 in the original announcement.

Note.—Any matter not discussed or concluded may be carried over to a later meeting.

CONTACT PERSON FOR MORE INFORMATION: Marie D. Wilson, Executive Officer, Executive Secretariat, at (202) 634–6748.

This Notice Issued June 5, 1979.

4

FEDERAL DEPOSIT INSURANCE CORPORATION.

Notice of Change in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 2:00 p.m. on Monday, June 4, 1979, the Corporation's Board of directors determined, on motion of Chairman Irvine H. Sprague, seconded by director John G. Heimann (Comptroller of the Currency), concurred in by Director William M. Isaac (Appointive), that Corporation business required the withdrawal of the following matter from the agenda for consideration at the meeting, on less than seven days' notice to the public:

Memorandum proposing a sublease of space for the New York Regional Office.

The Board further determined, by the same majority vote, that no earlier notice of the change in the subject matter of the meeting was practicable.

Dated: June 4, 1979.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

5

FEDERAL DEPOSIT INSURANCE CORPORATION.

Notice of Change in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)),

notice is hereby given that at its closed meeting held at 2:30 p.m. on Monday, June 4, 1979, the Corporation's Board of Directors determined, on motion of Chairman Irvine H. Sprague, seconded by Director John G. Heimann (Comptroller of the Currency), concurred in by Director William M. Isaac (Appointive), that Corporation business required its addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of a recommendation regarding the liquidation of assets acquired by the Corporation from United States National Bank, San Diego, California (Case No. 43,941–NR).

The Board further determined, by the same majority vote, that no earlier notice of the change in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the matter was eligible for consideration in a closed meeting by authority of subsections (c)(4), (c)(6), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), and (c)(9)(B)).

Dated: June 4, 1979.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

6

FEDERAL MARITIME COMMISSION.

TIME AND DATE: June 12, 1979, 10 a.m.

PLACE: Room 12126, 1100 L Street, NW., Washington, D.C. 20573.

STATUS: Parts of the meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions Open to the Public

1. Agreement No. 10230–1: Modification of a cargo revenue pooling and sailing arrangement in the trade from Brazil to the United States Gulf to provide for participation of nonnational flag lines.

2. Proposal to initiate a nonadjudicatory fact-finding investigation into neutral container leasing systems.

3. ACE Lines, Limited—Section 19 Petition concerning the New Zealand Wool Board's Circular No. 58 governing the movement of wool from New Zealand to U.S. East and West Coast ports.

4. Application of United States Cruises, Inc. for a Certificate of Financial Responsibility for Idemnification of Passengers for Nonperformance of Transportation Covering the SS UNITED STATES.

5. Workpaper availability in domestic offshore rate proceedings.

6. Docket No. 79–67: Sea-Land Service, Inc.—Proposed Five Percent General Rate Increase in Six Puerto Rico and Virgin Islands Trades—Petition of Government of Virgin Islands for reconsideration of order of investigation.

7. Docket No. 79–48: Trailer Marine Transport Corporation—Proposed General Increase in Rates—Petition of Government of Virgin Islands for reconsideration of order of investigation.

8. Docket No. 76–63: Filing of Agreements by Common Carriers and Other Persons; supporting Statements and Evidence—Proposed rules.

Portion Closed to the Public

1. Activities of Richmond Transfer and Storage Company.

CONTACT PERSON FOR MORE INFORMATION: Francis C. Hurney, Secretary, (202) 523–5725.

7

FEDERAL RESERVE SYSTEM, (BOARD OF GOVERNORS.)

TIME AND DATE: 10 a.m., Wednesday, June 13, 1979.

PLACE: 20th Street Constitution Avenue, NW., Washington, D.C. 20551.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Summary Agenda

Because of its routine nature, no substantive discussion of the following item is anticipated. This matter will be voted on without discussion unless a member of the Board requests that the item be moved to the discussion agenda.

1. Proposed purchase of a communication system for the Federal Reserve Bank of Philadelphia.

Discussion Agenda

1. Proposed recommendations to the Congress on whether Edge Corporations should be permitted to become members of the Federal Reserve System.

2. Proposed revised amendments to Regulation H (Membership of State Banking Institutions in the Federal Reserve System) to require that State member banks that effect certain securities transactions for customers provide confirmation and maintain certain records with respect to such transactions. (Proposed earlier for public comment; docket no. R–0142).

3. Proposed statement to be presented to the Senate Governmental Affairs Committee regarding S. 445, the "Regulatory Reform Act of 1979".

4. Proposal to conduct a Special Survey of Deposits Held by U.S. Residents in Caribbean Branches (FR 3010).

5. Proposed 1980 budget objective for the Federal Reserve Banks.

6. (Tentative) Board statement before the Senate Committee on Banking, Housing, and Urban Affairs on legislation dealing with interest on deposits.

7. Any agenda items carried forward from a previously announced meeting.

Note.—This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452–3684 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board, (202) 452–3204.

Dated: June 6, 1979.

Griffith L. Garwood,

Deputy Secretary of the Board.

[USITC SE–79–22B/22C]

INTERNATIONAL TRADE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 44 FR 31367 (May 31, 1979).

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10 a.m., Thursday, June 7, 1979.

CHANGES IN THE MEETING: The following item, previously scheduled for the meeting of Thursday, June 7, 1979, has been rescheduled and added to the agenda for the meeting on Tuesday, June 12, 1979:

4. Petitions and complaints, if necessary:
c. Coke (Docket No. 554)—discussion (partially closed; partially open) and vote on institution (in open session).

By action jacket approved June 5, 1979, Commissioners Parker, Alberger, Moore, Bedell, and Stern determined that Commission business requires the change in subject matter and affirmed that no earlier announcement of the changes to the agenda was possible, and directed the issuance of this notice at the earliest practicable time.

Pursuant to the specific exemptions of 5 U.S.C. 552b(c)(4) and in conformity with 19 C.F.R. 201.36(b)(4), Commissioners Parker, Alberger, Moore, Bedell, and Stern voted, by action jacket approved June 4, 1979, to close only that portion of the discussion which involved confidential business information.

A majority of the entire membership of the Commission felt that this portion of the meeting should be closed to the public since the information discussed in such portion would be likely to disclose confidential business information.

CONTACT PERSON FOR MORE INFORMATION: Kenneth R. Mason, Secretary, (202) 523–0161.

RAILROAD RETIREMENT BOARD.

TIME AND DATE: 1 p.m., June 15, 1979.

PLACE: Board's meeting room on the 8th floor of its headquarters building at 844 Rush Street, Chicago, Illinois 60611.

STATUS: Part of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portion Open to the Public

(1) Questionnaire on employer status of certain companies.

Portions Closed to the Public

(2) Appeal from referee's denial of application for "period of disability", Billie L. Brown.

(3) Appeal from referee's denial of disability annuity application, Ira L. Crain.

(4) Appeal from referee's denial of application for "period of disability", Eduardo R. Tovar.

(5) Appeal from referee's denial of disability annuity application, William A. Huffman, Sr.

(6) Appeal from referee's denial of disability annuity application, Alfonso M. Reynoso.

(7) Appeal of Robert D. Sunden under the Railroad Unemployment Insurance Act.

(8) Appeal from referee's denial of annuity application, Esther H. Bechtel.

CONTACT PERSON FOR MORE INFORMATION: R. F. Butler, Secretary of the Board, COM No. 312–751–4920, FTS No. 387–4920.

11

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of June 11, 1979, in Room 825, 500 North Capitol Street, Washington, D.C.

Closed meetings will be held on Tuesday, June 12, 1979, at 10 a.m. and on Wednesday, June 13, 1979, immediately following the 10 a.m. and 2:45 p.m. open meeting. Open meetings will be held on Wednesday, June 13, 1979, at 10 a.m. and 2:45 p.m.

The Commissioners, their legal assistant, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendered matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meetings may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4)(8)(9)(A) and (10) and 17 CFR 200.402 (a)(8)(9)(i) and (10).

Chairman Williams and Commissioners Loomis, Evans, Pollack and Karmel determined to hold the aforesaid meetings in closed session.

The subject matter of the closed meeting scheduled for Tuesday, June 12, 1979, at 10 a.m., will be:

Formal orders of investigation.

Settlement of administrative proceedings of an enforcement nature.

Settlement of injunctive action.

Institution of injunctive action.

The subject matter of the closed meeting scheduled for Wednesday, June 13, 1979, immediately following the 10 a.m. open meeting, will be:

Settlement of administrative proceedings of an enforcement nature.

The subject matter of the closed meeting scheduled for Wednesday, June 13, 1979, immediately following the 2:45 p.m. open meeting, will be:

Post oral argument discussion.

The subject matter of the open meeting scheduled for Wednesday, June 13, 1979, at 10 a.m., will be:

1. Consideration of a release for the purpose of stating the Commission's views concerning certain factors which should be considered (i) by independent accountants, both individuals and firms, in assessing the possible effects of performing certain nonaudit services for audit clients on accountants' independence, in fact or in appearance, or on their professional image, and thus on the credibility and usefulness of their reports, and (ii) by audit committees, boards of directors and managements in determining whether to engage their independent accountants to perform nonaudit services. For further information, please contact Clarence M. Staubs at (202) 755–0222 or Edmund Coulson at (202) 472–2782.

2. Consideration of a report proposed to be sent to Congress on the accounting profession and the Commission's oversight role. For further information, please contact Clarence M. Staubs at (202) 755–0222 or Edmund Coulson at (202) 472–2782.

3. Consideration of whether to amend Rule 10f–3 and Form N–1Q under the Investment Company Act of 1940 to modify the conditions pursuant to which an investment company may purchase securities from an underwriting syndicate in which certain affiliated persons participate as syndicate members. For further information, please contact Mark B. Goldfus at (202) 755–0260.

4. Consideration of whether to propose for comment a rule under the Investment Advisers Act of 1940 ("Advisers Act") which would permit certain registered investment advisers to business development companies to be compensated based on a share of net capital gains upon, or net capital appreciation of, the funds, or any portion of the funds, of a business development company. Such means of compensation is currently prohibited by the Advisers Act. For further information, please contact Kathleen McGann at (202) 755–0214.

5. Consideration of the Eighth Annual Report of the Securities Investor Protection Corporation ("SIPC"). Pursuant to the Securities Investor Protection Act of 1970, SIPC has submitted its Annual Report to the Commission which, in turn, is required to transmit the report to the President and Congress with such comment as the Commission deems appropriate. For further information, please contact Michael J. Simon at (202) 755–8767.

The subject matter of the open meeting scheduled for Wednesday, June 13, 1979, at 2:45 p.m., will be:

Oral argument on appeals by Raymond L. Dirks, a security analyst, and the Division of Enforcement from the initial decision of an administrative law judge. The law judge concluded that Dirks should be suspended from association with any broker or dealer for sixty days. For further information, please contact R. Mosche Simon at (202) 755–1800.

FOR FURTHER INFORMATION AND TO ASCERTAIN WHAT, IF ANY, MATTERS HAVE BEEN ADDED, DELETED OR POSTPONED, PLEASE CONTACT: Mike Rogan at (202) 755–1638.

June 4, 1979.

Part II

Department of Health, Education, and Welfare

Food and Drug Administration

Current Good Manufacturing Practice in Manufacturing, Processing, Packing, or Holding Human Food

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Parts 20 and 110]

[Docket No. 78N-0296]

Current Good Manufacturing Practice in Manufacturing, Processing, Packing, or Holding Human Food

AGENCY: Food and Drug Administration.

ACTION: Proposal

SUMMARY: The Food and Drug Administration is proposing to revise the current good manufacturing practice (CGMP) regulations for the manufacturing, processing, packing, and holding of human foods. this document would establish new, updated, or more detailed CGMP provisions concerning food industry personnel; plants and grounds; sanitary facilities, controls and operations; equipment and utensils; processes and controls; product coding; warehousing and distribution; recordkeeping; and natural or unavoidable defect levels. As revised by this proposal, the CGTMP regulations would be more directly applicable to the problems associated with foods for which specific CGMP regulations have not been promulgated, and thus would better ensure the production of save and sanitary food. The agency is planning to hold public hearings on this proposal in the fall of 1979. A notice giving specific information about these hearings will be published in the Federal Register on or about June 15, 1979.

DATES: Comments by December 31, 1979; the agency proposes that the final regulation based on this proposal be effective on or before December 5, 1979.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: F. Leo Kauffman, Bureau of Foods (HFF–414), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202–245–1164.

SUPPLEMENTARY INFORMATION: Passage of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.) in 1938 gave the Food and Drug Administration (FDA) for the first time the authority to establish and impose reasonable sanitation standards on the production of foods, drugs, and cosmetics. For foods, these applicable statutory provisions are found in section 402(a) (3) and (4) of the act (21 U.S.C. 342(a) (3) and (4)), which, among other concerns, defines conditions under which a food is deemed to be adulterated. The legislative history of the act explains that these new provisions were added to expand the agency's bases for initiating enforcement proceedings conducted under the Pure Food and Drug Act of 1906 and, more specifically, to provide control mechanisms against insanitary and otherwise contaminated foods (Ref. 1). Furthermore, Congress granted FDA authority in section 704 of the act (21 U.S.C. 374) to inspect factories, warehouses, and other establishments in which foods are manufactured, processed, packed, or held, and to inspect their facilities, equipment, and materials.

Historically, FDA has used its inspection authority to trigger the legal sanctions provided by the act (1) to prevent the introduction or delivery for introduction into interstate commerce of adulterated food or (2) to prevent adulteration of food while it is being held for sale after shipment in interstate commerce. Under section 402(a)(3) of the act, the food is adulterated if it actually consists in whole or in part of any filthy, putrid, or decomposed substance, or if it is otherwise unfit for food. Moreover, under section 402(a)(4) of the act, food is adulterated if it has been prepared, packed, or held under insanitary conditions whereby it may have become contaminated with filth, or whereby it may have been rendered injurious to health. In sum, then, food need not be shown to contain filth or other contaminants to be adulterated; a showing that the food is prepared, packed, or held under conditions whereby it may become so is legally sufficient to prove adulteration.

On the basis of evidence gathered during inspections, FDA then uses its legal authority to go to court to seize the adulterated food, to seek to enjoin its shipment or sale, or to have the persons adulterating the food criminally prosecuted. The number of inspections and court actions instituted by FDA has varied over the years, in part because of the vast number of products and parties regulated by FDA. For example, FDA's 1977 annual report estimates the overall number of food processing, manufacturing, and warehouse facilities regulated by the agency at 77,000, and FDA conducts approximately 19,000 food establishment inspections annually (Ref. 9). As a result of the vast industry that the agency must regulate, FDA ceased relying exclusively on case-by-case litigation in the late 1960's and adopted a combined policy of promulgating regulations, relying on self-regulation by the industry, and, within the limits of available resources, enforcing regulations when the industry fails to comply with them.

In 1967, based on its experience in regulating the food industry, FDA proposed regulations to establish CGMP criteria for the manufacturing, processing, packing, or holding of food, to bring about compliance with section 402(a)(4) of the act (see the Federal Register of December 15, 1967 (32 FR 17980)). Because comments resulted in significant changes in the proposal, the agency reproposed the regulations in the Federal Register of December 20, 1968 (33 FR 19023) and issued the final regulations in the Federal Register of April 26, 1969 (34 FR 6977). At the request of the General Accounting Office (GAO) in 1971, FDA inspected 97 food manufacturing plants of all types, which were selected at random from some 4,500 food manufacturing and processing plants located in 6 FDA districts. Insanitary conditions having the potential for or having already caused product adulteration were observed in many facilities. The results of the survey appear in the GAO report, "Dimensions of Insanitary Conditions in the Food Manufacturing Industry" (Ref. 11).

The agency initiated a series of actions to improve conditions in the food industry. In addition to its normal inspection programs, FDA held several meetings with representatives of various segments of the food industry to exchange ideas and gather information helpful for developing improved good manufacturing practices in the industry. Based on these discussions, FDA proposed CGMP regulations for cacao products and confectionaries (hereinafter referred to as the candy CGMP's) in the Federal Register of November 20, 1973 (38 FR 32554) and issued the final candy CGMP's in the Federal Register of June 4, 1975 (40 FR 24162); it also proposed analogous regulations for bakery foods in the Federal Register of February 12, 1976 (41 FR 6456) and tree nuts and peanuts in the Federal Register of June 30, 1976 (41 FR 27000). The agency selected these segments of the food industry as the first subjects of specific CGMP regulations due to the cooperation of the representatives of those segments. They also represent an approximate cross section of the food industry. The CGMP regulations for the specific segments of the food industry were proposed as merely complementary provisions to the CGMP regulations for the overall food

industry (21 CFR Part 110, the so-called umbrella CGMP's).

The agency's experience in regulating the food industry in general, including drafting CGMP proposals for other particular segments of the food industry and reviewing the comments on the outstanding CGMP proposals, has shown that problems to be addressed by those CGMP regulations are common throughout all segments of the food industry, e.g., personnel, plant construction, and sanitation. Accordingly, the agency believes that the most efficient way to proceed now is to revise the umbrella CGMP regulations rather than repetitively to propose identical regulations for numerous segments of the industry. Therefore, the agency is staying the rulemaking proceedings on the CGMP proposals for bakery foods and tree nuts and peanuts pending an evaluation of the comments on this proposal. After the comments are evaluated, the agency will determine what action to take with respect to the stayed rulemaking proceedings and will consider whether all or part of the candy CGMP's should continue in effect.

The CGMP regulations already in effect detail the practices to be followed to ensure (1) that food is manufactured, processed, packed, and held under conditions that are sanitary, and (2) that such food is safe, clean, and wholesome. In general, this notice proposes to revise and update the requirements for plant personnel; plant design and construction; sanitary operations, facilities, and controls; equipment and utensils; regulating and recording controls; processing operations; and coding and recordkeeping. Preliminary drafts of this proposal were reviewed by the Food Safety and Quality Service, United States Department of Agriculture, and the National Marine Fisheries Service, National Oceanographic and Atmospheric Administration, United States Department of Commerce. The agency has carefully considered the suggestions received from these two agencies and has incorporated them, where appropriate, into the proposal. Copies of the correspondence are on file with the Hearing Clerk, FDA (Refs. 12 and 13). The following is a section-by-section analysis of the proposal:

Definitions

Section 110.3 (21 CFR 110.3) includes definitions of new terms and revised definitions of previously used terms that have uniform applicability. To eliminate any possible misunderstanding, the agency is also revising the definitions to ensure that they are consistent with the other regulations in this subchapter. These definitions are based on the agency's experience in regulating foods, common usage in the regulated industry, and, in the case of new § 110.3 (l) and (p), the material in Refs. 14 and 15.

Current Good Manufacturing Practices

Section 110.5 (21 CFR 110.5) emphasizes that the CGMP regulations identify the applicable criteria for implementing the requirements of section 402(a) (3) and (4) of the act. Moreover, this section explains that foods covered by specific CGMP regulations in the subchapter are still subject to the requirements imposed by this part.

Under section 701(a) of the act (21 U.S.C. 371(a)), FDA has the authority to promulgate regulations for the efficient enforcement of the act, and such regulations have been held to have the force and effect of law. See *National Nutritional Foods Ass'n* v. *Weinberger*, 512 F. 2d 688, 695–698 (2d Cir., 1975). The courts have also expressly held that FDA has the authority to promulgate substantive regulations defining current good manufacturing practices for the food industry *National Confectioners Ass'n* v. *Califano*, 569 F. 2d 690 (D.C. Cir., 1978). See *Nova Scotia Food Products Corp.* v. *U.S.*, 568 F. 2d 240, 245–248 (2d Cir., 1978). Furthermore, since the promulgation of the CGMP regulations in 1969, the Secretary of Health, Education, and Welfare has delegated authority to exercise the functions vested in the Secretary under section 361 of the Public Health Service Act (42 U.S.C. 264) to the Commissioner of Food and Drugs (see 35 FR 606 (January 16, 1970), corrected at 35 FR 3001 (February 13, 1970), codified at 21 CFR 5.1(a)(4)). Under this provision, the Commissioner is authorized to issue and enforce regulations for any measures that, in the Commissioner's judgment, are necessary to prevent the introduction, transmission, or spread of food-borne communicable diseases from one State to another. Because this authority is designed to eliminate the introduction of diseases such as typhus from one State to another, this authority must of necessity be exercised upon the disease-causing substance within the State where the food is manufactured, processed, or held. Due to the nationwide, interrelated structure of the food industry, communicable diseases may, without proper intrastate food controls, easily spread interstate, as the annual Center for Disease Control reports on food-borne Salmonellosis show (Refs. 16 and 17). The Commissioner therefore assumes authority to promulgate regulations under the Public Health Service Act to assure that foods are manufactured, processed, packed, or held under sanitary conditions so as to be safe, wholesome, and otherwise fit for food. Regulations promulgated under that statute also have the force and effect of law. See *State of Louisiana* v. *Mathews*, 427 F. Supp. 174 (D. La., 1977).

Personnel

Section 110.10 (21 CFR 110.10) summarizes the responsibilities imposed on the plant management to take reasonable measures and precautions to satisfy the articulated criteria for disease control, cleanliness, and education and training. These standards and criteria will help to prevent the spread of disease among the workers and from the workers to the food processing area and the food itself.

Exclusions

Section 110.19 (21 CFR 110.19) codifies FDA's historical exemption from the "umbrella" CGMP regulations of establishments that are engaged in the harvesting, storage, or distribution of one or more raw agricultural commodities that are ordinarily cleaned, prepared, treated, or otherwise processed before being marketed to the consuming public. Subsequent handlers of the commodities would be subject to the CGMP regulations, and food from those commodities is thus brought into compliance with the act at the later stages of the manufacturing, processing, packing, or holding. The Commissioner, however, will issue special regulations when necessary to encompass any excluded operation.

Plants and Grounds

Section 110.20 (21 CFR 110.20) describes the general principles of plant design and construction that are necessary to protect food from insanitary conditions and unwholesomeness and also to prevent the spread of disease-causing microorganisms through food. The proposal includes a new subparagraph to explain ways to reduce the possibility of microorganism, chemical, filth, or other contamination of end products, raw materials, and packaging materials. It recommends separating each step in the operation, from receiving the raw materials, to packing and shipping the end product, to cleaning, sanitizing, and maintaining the operations. Several mechanisms of separating the operations are set out in the regulation: location, partition, air flow, enclosed systems, or any other effective means

that will separate the systems and prevent their contamination.

These requirements were adopted in the candy CGMP's, and FDA has found them useful in that area. Comments received in response to the candy CGMP proposal and proposals for bakery foods and tree nuts and peanuts CGMP regulations, which also included these provisions, interpreted them as requiring the affected parties to separate each step in their operations by partitions. The agency advises that the use of partitions is only one method of separating operations, and that other means are acceptable. However, the operations should be separated so as to ensure that no contamination occurs. Additionally, the new subparagraph recommends that the design of the plant permit management to take precautions to protect products in out-door bulk fermentation vessels from insanitary conditions.

Sanitary Operations

Section 110.35 (21 CFR 110.35) sets out the basic rules for sanitation and cleanliness of buildings, fixtures, and other physical facilities, equipment, and utensils. The rules describe the requirements for general maintenance, control of animals and vermin, sanitation of equipment and utensils, and storage and handling of cleaned equipment and utensils. This section has been expanded to emphasize and describe proper use of cleaning compounds, sanitizing agents, and pesticide chemicals to protect raw material, packaging material, and finished food from contamination.

Sanitary Facilities and Controls

Section 110.37 (21 CFR 110.37) lists and describes the minimally acceptable adequate sanitary facilities and accommodations for all the food-handling operations. These include, but are not limited to, water supply, plumbing, sewage disposal, toilet facilities, hand-washing facilities, and rubbish and offal disposal.

A new subparagraph added to paragraph (b) prohibits backflow or cross connection between piping systems that carry water for food processing use and piping systems that discharge waste water or sewage. This prohibition is necessary to prevent spread of filth or disease-causing microorganisms through the sanitation facilities. In addition, paragraph (e) is revised to describe better the requirements for hand-washing facilities and has adopted the paragraph used in the candy CGMP's, which the agency believes is applicable for all food handling operations.

Equipment and Utensils

Section 110.40 (21 CFR 110.40) describes the general rules for cleanliness and maintenance of equipment and utensils, which must be designed and constructed so that they can be cleaned and maintained to prevent adulteration of the food. To prevent problems that can arise in this area, the agency had added the following requirements:

(a) Food-contact surfaces must be corrosion free when in contact with food.

(b) Seams in food-contact surfaces must be smoothly bonded or maintained to minimize the accumulation of food particles. Surfaces such as stainless steel are not required; other surface materials also can be maintained to prevent microbial contamination.

(c) Surfaces of equipment that do not come in contact with food are to be constructed so that they can be kept clean by maintenance in accordance with the other provisions of the regulations.

(d) Systems that hold, convey, and process ingredients and products must be designed and constructed so that they also can be kept clean.

(e) Temperature-controlling, -re - cording, and -measuring devices on equipment used to control and prevent the growth of microorganisms must be accurate and effective for their designated use. Because killing the microorganisms is critical, the devices must ensure that the food is adequately processed.

(f) Freezer and cold storage compartments used for holding materials capable of supporting the growth of microorganisms must be fitted with suitable temperature-indicating or -recording devices.

(g) Instruments used for measuring or regulating conditions that control or prevent undesirable microbial growth in foods must be properly maintained (e.g., compressed air introduced into foods must be clean). Food-contact surfaces and gases, in addition to compressed air, must comply with the requirements of section 409 of the act (21 U.S.C. 348). Any pesticides used must be used in accordance with section 408 of the act (21 U.S.C. 346a) and the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 135 note).

(h) Although most former industrial uses of polychlorinated biphenyls (PCB's) have been curtailed, if not eliminated, the agency believes that it is necessary to retain a restricted uses paragraph for PCB's in the proposed regulation for the following reasons: PCB's represent a class of toxic industrial chemicals manufactured and sold under a variety of trade names, including: Aroclor (United States); Phenoclor (France); Colphen (Germany); and Kanaclor (Japan). PCB's are highly stable, heat resistant, nonflammable chemicals. Industrial uses of PCB's include, or did include in the past, their use as electrical transformer and capacitor fluids, heat transfer fluids, hydraulic fluids and plasticizers, and in formulations of lubricants, coatings, and inks. Their unique physical and chemical properties and widespread, uncontrolled industrial applications have caused PCB's to be a persistent and ubiquitous contaminant in the environment and to contaminate certain foods. In addition, incidents have occurred in which PCB's have directly contaminated animal feeds as a result of industrial accidents (leakage or spillage of PCB fluids from plant equipment). These accidents in turn cause the contamination of food intended for human consumption (meat, milk, and eggs). Because PCB's are toxic chemcials, the PCB contamination of food as a result of these accidents represents a hazard to human health. It is therefore necessary to place certain restrictions on the industrial uses of PCB's in food plants.

Processes and Controls

Section 110.80 (21 CFR 110.80) adds a quality control operation to ensure that all operations in the receiving, inspecting, transporting, packaging, segregating, preparing, processing, and storing of food are conducted in accordance with adequate sanitation principles. This program requirement is based on FDA's experience in conducting approximately 19,000 food establishment inspections annually. Most operations have control procedures of this nature, and quality control procedures of this type help to ensure that raw materials and finished products are fit for food, that packaging materials are safe and suitable, and that all are in compliance with the act.

The agency is also proposing to amend the paragraph on raw materials to establish new subparagraphs addressing the issue of the fitness of raw materials. These materials must comply with the act. They must be held under proper storage conditions, and they must not contain microorganisms that can produce food poisoning or other disease in humans, or they must be properly treated to destroy such microorganisms.

The agency has reexamined the requirement in the candy CGMP's (21 CFR 110.80(b)(1), and (4)(i), and (c)(1)) that such foods be held at temperatures below 40°F (4.4°C). As the refrigeration temperature rises, the shelf life of foods is generally shortened. Although some pathogenic bacteria can reproduce at temperatures between 40°F (4.4°C) and 45°F (7.2°C), growth is slow (Refs. 18 through 26). The agency has reviewed the added risk of allowing a maximum storage temperature of such foods of 45°F (7.2°C) rather than 40°F (4.4°C) and concludes that this risk is minimal.

On the other hand, the agency believes the added expenditure of energy and cost of maintaining foods at 40°F (4.4°C) versus 45°F (7.2°C) is significant. A refrigerator operating at an ambient air temperature of 70°F (21.1°C) requires 20 percent more energy to operate at a temperature of 40°F (4.4°C) than to operate at a temperature of 45°F (7.2°C) (Refs. 27 and 28). Therefore, the agency is proposing to require that materials capable of supporting rapid microbial growth be stored at a temperature of 45°F (7.2°C) or below.

The agency is also expanding paragraphs concerning processing operations by proposing to require that: (a) foods that can support the rapid growth of microorganisms be held so that the risk of such growth is minimized; (b) measures taken to destroy or prevent the growth of microorganisms of public health significance be adequate under the conditions of manufacture; (c) raw materials, work-in-process, rework, finished foods, and refuse be handled so that the risk of having a contaminated food is minimized; (d) measures be taken to prevent the inclusion of extraneous material in finished products; (e) adulterated materials be properly disposed of or, if it is feasible, be reconditioned; (f) mechanical processing be performed so as not to contaminate raw materials, ingredients, or finished products; (g) batters, breadings, sauces, and other preparations be treated or maintained so that they are free of contamination; (h) the filling, assembling, and packaging of food be performed so as not to contaminate the finished food products; (i) foods relying on low water activity for preventing the growth of most microorganisms be processed to, and maintained at, a safe moisture level; and (j) foods relying on low pH for preventing the growth of microorganisms of public health significance be maintained at a pH of 4.6 or below.

Coding

To emphasize the importance of this provision, new § 110.91 (21 CFR 110.91) deals expressly with product coding. In § 110.80(j) of the current umbrella GMP regulations, which this proposal would supersede, the agency suggests that meaningful coding of products should be used to enable positive lot identification. Positive lot identification facilitates identification and segregation of contaminated products or products that may be otherwise unfit for their intended use. The current regulations also recommend that records be retained for a period that exceeds the shelf life of the product, but for no more than 2 years.

In the past decade, voluntary product recalls by manufacturers have become one of FDA's most useful regulatory tools, and the agency has promulgated guidelines describing the policies and procedures that FDA follows and guidelines that firms should follow in the conduct of product recalls (see the Federal Register of June 16, 1978 (43 FR 26202)). In fiscal year 1975 there were 133 recalls of food products, including misbranding violations, and 163 in fiscal year 1978 (Ref. 6). These experiences have shown that product coding is an essential element of this regulatory tool. Congress has recognized the utility of product coding, as have many members of the food industry, who have developed guidelines for their segments of the industry (Ref. 34). Furthermore, the United States Court of Appeals for the District of Columbia Circuit recognized the self-evident rationality of this procedure in its opinion upholding the coding provision in the candy CGMP's. See *National Confectioners Ass'n v. Califano*, 569 F.2d 690, 695 (D.C. Cir., 1978).

Many companies are already coding products (Ref. 34), and, based upon coding's recognized utility and accepted use in many segments of the food industry, the agency believes product coding should be mandatory for all foods. Accordingly, the agency is proposing, except where specifically exempt, to require permanently legible marks at a readily visible location on each finished food package delivered or displayed to purchasers (except for over-the-counter retail sales at the site of manufacture), so that the code marks can be easily seen on the unopened package. The marks must identify at least the plant where the product was packed and the product lot or packaging lot. It is recognized that a packaging lot may contain food manufactured on more than 1 day but packaged on a single day.

The agency is proposing to exempt the following products from the requirement that code marks be placed on each finished food package: (a) individually wrapped confectionery, each piece weighing ⅛ ounce or less, subject to § 1.24(a)(4); (b) food received in bulk containers at a retail establishment, and subject to § 101.100(a)(2), and (c) food repackaged at a retail establishment subject to § 101.100(b) provided that the package in which the food item is shipped to the retailer shall bear a code mark. The agency is willing to consider other similar exemptions if they are considered necessary and if such exemptions will allow the easy recall of food items from the retailers, institutions, manufacturers, or repackers to whom the products are shipped.

This proposed coding requirement is somewhat more stringent than the coding provision in the candy CGMP's in that it does not, as a general rule, give the manufacturer the option of placing the code mark on the shipping container rather than on the individual finished food package. The agency believes, however, that the proposed requirement is consistent with the coding practices now used by much of the food industry and that it will facilitate identification of recalled products.

Warehousing and Distribution

Revised § 110.93 (21 CFR 110.93) describes and establishes the requirement that storage and transportation of finished foods be conducted under conditions that will prevent physical, chemical, and microbiological contamination.

Records

Section 110.100 (21 CFR 110.100) lists current recordkeeping requirements, amended to conform to those promulgated and upheld in the candy CGMP's. These recordkeeping requirements are correlated with the other CGMP requirements and require the affected parties to maintain (a) records on the results of examinations or copies of supplier guarantees or certifications verifying that the raw materials comply with the basic act and other FDA regulations under proposed § 110.80(a); (b) records of processes that are specified in proposed § 110.80(b) and are intended to destroy or prevent the growth of microorganisms of public health significance in the foods; and (c) distribution records that identify initial distribution of finished food under proposed § 110.93 to facilitate recalls. The agency proposes that these records

be kept for 2 years or for the shelf life of the product, whichever is shorter.

Natural or Unavoidable Defects

Section 110.110 (21 CFR 110.110) alerts all affected parties that current action levels for natural or unavoidable defects in food for human use that present no human health hazard are publicly available. Because the action levels for these defects are subject to revision, it is impractical to include them in the regulation, but they are available from FDA on request, and the regulation identifie show this information can be obtained.

For editorial consistency, the agency also proposes to revise § 20.100(c)(8) (21 CFR 20.100(c)(8)) to reflect a cross reference to proposed § 110.110(e), which contains cross-referenced action level provisions now located in § 110.99(e) (21 CFR 110.99(e)).

The agency plans to hold public hearings for the purpose of receiving information and views regarding the issues raised by this proposal and the impact the proposed regulations will have on the food industry, especially small businesses. The hearings will be held in Chicago, IL, on September 11, 1979; San Francisco, CA, on October 3, 1979; and Atlanta, GA, on October 24, 1979. Representatives of small businesses will be encouraged to participate. Specific information about these hearings will be published in the Federal Register on or about June 15, 1979.

The agency proposes that the final regulations based on this proposal be effective 180 days after the date of publication of the final regulations in the Federal Register.

The agency has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Proposed Amendments to the Federal Food, Drug, and Cosmetic Act and the Fair Packaging and Labeling Act to authorize a Uniform System of Coding for Packaged Food: Hearings on S. 3012—Amendment No. 1838, Before the Subcommittee for Consumers of the Senate Committee on Commerce, 93d Cong., 2d Sess. (1974).

Copies of the items listed above, except for items 2 through 8, are on file with the Hearing Clerk, FDA.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 302, 303, 304, 402(a), 701(a), 52 Stat. 1043–1046 as amended, 1055 (21 U.S.C. 332, 333, 334, 342(a), 371(a))), and the Public Health Service Act (sec. 361, 58 Stat. 703 (42 U.S.C. 264)), and the authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Chapter I of Title 21 of the Code of Federal Regulations be amended as follows:

1. In Part 20, § 20.100 is amended by revising paragraph (c)(8) to read as follows:

§ 20.100 Applicability; cross-reference to other regulations.

* * * * *

(c) * * *

(8) Action levels for natural and unavoidable defects in food for human use, in § 110.110(e) of this chapter.

* * * * *

2. By revising Part 110 to read as follows:

PART 110—CURRENT GOOD MANUFACTURING PRACTICE IN MANUFACTURING, PROCESSING, PACKING, OR HOLDING HUMAN FOOD

Subpart A—General Provisions

Sec.
110.3 Definitions.
110.5 Current good manufacturing practice.
110.10 Personnel.
110.19 Exclusions.

Subpart B—Buildings and Facilities

110.20 Plants and grounds.
110.35 Sanitary operations.
110.37 Sanitary facilities and controls.

Subpart C—Equipment

110.40 Equipment and utensils.

Subpart D [Reserved]

Subpart E—Production and Process Controls

110.80 Processes and controls.
110.91 Coding.
110.93 Warehousing and distribution.

Subpart F—Records and Reports

110.100 Records.

Subpart G—Defect Action Levels

110.110 Natural or unavoidable defects in food for human use that present no health hazard.

Authority: Secs. 302, 303, 304, 402(a), 701(a), 52 Stat. 1040–1046 as amended, 1055 (21 U.S.C. 332, 333, 334, 342(a), 371(a)); sec. 361, 58 Stat. 703 (42 U.S.C. 264)).

Subpart A—General Provisions

§ 110.3 Definitions.

The definitions and interpretations of terms in section 201 of the Federal Food, Drug, and Cosmetic Act are applicable to such terms when used in this part. The following definitions shall also apply:

(a) "Acid foods or acidified foods" means foods that have an equilibrium pH of 4.6 or below.

(b) "Adequate" means that which is needed to accomplish the intended purpose in keeping with good public health practice.

(c) "Batter" means a semifluid substance, usually composed of flour and other ingredients, in which principal components of food are dipped or with which they are coated.

(d) "Blanching" means a hot water or steam direct-scalding treatment of foodstuffs for a sufficient time and at a sufficient temperature to inactivate the naturally occurring enzymes.

(e) "Corrosion-free" as it applies to food-contact surfaces means that the surface material is free of corrosion that may cause contamination of the food.

(f) "Critical control point" means a point in a food process where lack of control may cause, allow, or contribute to adulteration of the final product or any raw materials used therein.

(g) "Food-contact surfaces" are those surfaces that contact food and those surfaces from which drainage onto foods or onto surfaces that contact food ordinarily occurs during the normal course of operations.

(h) "Lot" means a collection of primary containers or units of the same size, type, and style containing a finished product produced under conditions as nearly uniform as possible and designated by a common container code or marking; and, in any event, "lot" means no more than a day's production.

(i) "Plant" means the building or facility or parts thereof, used for or in connection with the manufacturing, processing, packaging, labeling, or holding of human food.

(j) "Quality control operation" means a planned and systematic procedure for all actions necessary to ensure that the food is free from adulteration.

(k) "Rework" means clean, unadulterated product, removed from processing, that is suitable for reprocessing and for use as food.

(l) "Safe-moisture level" is a level of moisture low enough to prevent the growth of microorganisms in the finished product. The maximum safe moisture level for a food is based on its water activity (a_w). An a_w will be considered safe for a food if adequate data are provided that demonstrate that the food at or below the given a_w will not support the growth of microorganisms.

(m) "Sanitize" means adequate treatment of surfaces by a process that is effective in destroying vegetative cells of microorganisms of public health significance and in substantially reducing numbers of other microorganisms. Such treatment shall not adversely affect the product and shall be safe for the consumer.

(n) "Shall" is used to state mandatory requirements.

(o) "Should" is used to state recommended or advisory procedures or to identify recommended equipment.

(p) "Water activity" (a_w) is a measure of the free moisture in a product and is the quotient of the water vapor pressure of the substance divided by the vapor pressure of pure water at the same temperature.

§ 110.5 Current good manufacturing practice.

(a) The criteria and definitions in this part shall apply in determining whether a food is adulterated (1) within the meaning of section 402(a)(3) of the act in that the food has been manufactured under such conditions that it is unfit as food; or (2) within the meaning of section 402(a)(4) of the act in that the food has been prepared, packed, or held under insanitary conditions whereby it may have become contaminated with filth, or whereby it may have been rendered injurious to health.

(b) Foods covered by specific current good manufacturing practice regulations also are subject to the requirements of those regulations. Compliance with the criteria and definitions in this part is necessary for the prevention and control of communicable diseases under section 361 of the Public Health Service Act [42 U.S.C. 264].

§ 110.10 Personnel.

The plant management shall take all reasonable measures and precautions to ensure the following:

(a) *Disease control.* No person, while affected by disease in a communicable form, or while a carrier of such disease, or while affected with boils, sores, infected wounds, or other abnormal sources of microbiological contamination, shall work in a food plant in any capacity in which there is a reasonable possibility of food or food ingredients becoming contaminated by that person, or of disease being transmitted by that person to other individuals.

(b) *Cleanliness.* All persons, while working in direct contact with food preparation, food ingredients, or food-contact surfaces shall conform to hygienic practices while those persons are on duty, to the extent necessary to prevent contamination of food products. The methods for maintaining cleanliness include, but are not limited to:

(1) Wearing proper outer garments in a manner that prevents the contamination of food.

(2) Maintaining a high degree of personal cleanliness.

(3) Washing hands thoroughly (and sanitizing if necessary to prevent contamination by undesirable microorganisms) in an adequate hand-washing facility before starting work, after each absence from the work station, and at any other time when the hands may have become soiled or contaminated.

(4) Removing all insecure jewelry and, during periods in which food is manipulated by hand, removing from hands any jewelry that cannot be adequately sanitized.

(5) If gloves are used in food handling, maintaining them in an intact, clean, and sanitary condition. The gloves should be of an impermeable material

except where their usage would be inappropriate or incompatible with the work involved.

(6) Wearing hair nets, headbands, caps, beard covers, or other effective hair restraints in an effective manner.

(7) Not storing clothing or other personal belongings in areas where food or food ingredients are exposed or in areas used for washing equipment or utensils.

(8) Not eating food, drinking beverages, or using tobacco in areas where food or food ingredients are exposed or in areas for washing equipment or utensils.

(9) Taking any other necessary precautions to prevent contamination of foods with microorganisms or foreign substances including, but not limited to, perspiration, hair, cosmetics, tobacco, chemicals, and medicants.

(c) *Education and training.* Personnel responsible for identifying sanitation failures or food contamination should have a background of education or experience, or a combination thereof, to provide a level of competency necessary for production of clean and safe food. Food handlers and supervisors should receive appropriate training in proper food handling techniques and food-protection principles and should be cognizant of the danger of poor personal hygiene and insanitary practices.

(d) *Supervision.* Responsibility for assuring compliance by all personnel with all requirements of this part shall be clearly assigned to competent supervisory personnel.

§ 110.19 Exclusions.

The following operations are excluded from coverage under these general regulations. The Commissioner, however, will issue special regulations when necessary to cover these excluded operations: Establishments engaged solely in the harvesting, storage, or distribution of one or more "raw agricultural commodities," as defined in section 201(r) of the act, which are ordinarily cleaned, prepared, treated, or otherwise processed before being marketed to the consuming public.

Subpart B—Buildings and Facilities

110.20 Plant and grounds.

(a) *Grounds.* The grounds about a food plant under the control of the operator shall be kept in a condition that will not cause food to be contaminated. The methods for adequate maintenance of grounds include, but are not limited to:

(1) Properly storing equipment, removing litter and waste, and cutting weeds or grass within the immediate vicinity of the plant buildings or structures that may constitute an attractant, breeding place, or harborage for rodents, insects, or other pests.

(2) Maintaining roads, yards, and parking lots so that they do not constitute a source of contamination in areas where food is exposed.

(3) Adequately draining areas that may contribute contamination to food products by seepage, by foot-borne filth, or by providing a breeding place for rodents, insects, or other pests.

If the plant grounds are bordered by grounds not under the operator's control and not maintained in the manner described in subparagraphs (1) through (3) of this paragraph, care shall be exercised in the plant by inspection, extermination, or other means to effect exclusion of pests, dirt, and other filth that may be a source of food contamination.

(b) *Plant construction and design.* Plant buildings and structures shall be suitable in size, construction, and design to facilitate maintenance and sanitary operations for food-processing purposes. The plant and facilities shall:

(1) Provide sufficient space for such placement of equipment and storage of materials as is necessary for sanitary operations and production of safe food.

(2) Permit the taking of proper precautions to reduce the potential for contamination of end products, raw materials, or food-packaging materials with microorganisms, chemicals, filth, or other extraneous material. The potential for contamination may be reduced by any effective means including the separation, by location, partition, air flow, enclosed systems, or other effective means, of the following operations:

(i) Receiving.

(ii) Raw material storage.

(iii) Food preparation and processing operations.

(iv) Weighing, wrapping, packaging, and packing.

(v) Finished product storage and shipping.

(vi) Portable equipment and utensil cleaning and sanitizing.

(vii) Equipment and vehicle maintenance.

(3) Permit the taking of proper precautions to protect products in outdoor bulk fermentation vessels. This may be accomplished by an effective means, including:

(i) Using protective coverings.

(ii) Controlling areas over and around the vessels to eliminate harborages for birds and rodents.

(iii) Checking on a regular basis for insect infestation.

(iv) Skimming the fermentation vessels frequently.

(4) Provide floors, walls, and ceilings that are of such construction as to be adequately cleanable and that shall be kept clean and in good repair. Fixtures, ducts, and pipes shall be installed in such a manner that drip or condensate does not contaminate foods, raw materials, or food-contact surfaces. Aisles or working spaces between equipment and walls shall be unobstructed and of sufficient width to permit employees to perform their duties without contamination of food or food-contact surfaces with clothing or personal contact.

(5) Provide adequate lighting in hand-washing areas, dressing and locker rooms, and toilet rooms and in all areas where food or food ingredients are examined, processed, or stored and where equipment and utensils are cleaned. Light bulbs, fixtures, skylights, or other glass suspended over exposed food in any step of preparation shall be of the safety type or otherwise protected to prevent food contamination in case of breakage.

(6) Provide adequate ventilation or control equipment to minimize odors and noxious fumes or vapors (including steam) in areas where they may contaminate food. Fans and other air-blowing equipment shall be located and operated in a manner that does not cause contamination of raw materials, work-in-process, rework, finished foods, food-packaging materials, and food-contact surfaces.

(7) Provide, where necessary, effective screening or other protection against birds, animals, and vermin (including, but not limited to, insects and rodents).

§ 110.35 Sanitary operations.

(a) *General maintenance.* Buildings, fixtures, and other physical facilities of the plant shall be kept in good repair and shall be maintained in a sanitary condition. Cleaning and sanitizing of utensils and equipment shall be carried out in a manner that prevents contamination of raw material, food-packaging material, or finished food. Detergents, sanitizers, and other supplies employed in cleaning and sanitizing procedures shall be free of significant microbiological contamination and shall be safe and effective for their intended uses. Only those toxic materials that are required to maintain sanitary conditions, for use in laboratory testing procedures, for plant and equipment maintenance and operation, or in manufacturing or

processing operations shall be used or stored in the plant. Poisonous or dangerous cleaning compounds, sanitizing agents, and pesticide chemicals shall be applied, stored, and held in a manner that prevents food or food-packaging material contamination. These materials shall be identified and used only in a manner and under conditions that will be safe for their intended use. All applicable regulations promulgated by the Environmental Protection Agency for the application, use, or holding of these materials shall be followed.

(b) *Animal and vermin control.* No animals or birds, other than those essential as raw materials, shall be allowed in any area of a food plant. Effective measures shall be taken to exclude pests from the processing areas and to protect against the contamination of foods in or on the premises by animals, birds, and vermin (including, but not limited to, rodents and insects). The use of insecticides or rodenticides is permitted only under precautions and restrictions that will prevent the contamination of food and food-packaging materials with illegal residues.

(c) *Sanitation of equipment and utensils.* All utensils and food-contact surfaces of equipment shall be cleaned as frequently as necessary to prevent contamination of food and food products.

(1) Food-contact surfaces of equipment used for processing or holding low-moisture raw materials or foods shall be in a dry, sanitary condition at the time of use. When the surfaces are wet-cleaned, they shall be sanitized when necessary and thoroughly dried before subsequent use.

(2) In wet processing, when cleaning is necessary to prevent the introduction of undesirable microorganisms into food products, all utensils and food-contact surfaces of equipment used in the plant shall be cleaned and sanitized before use and after any interruption during which the utensils and contact surfaces may have become contaminated. Where the equipment and utensils are used in a continuous production operation, the contact surfaces of the equipment and utensils shall be cleaned and sanitized on a predetermined schedule using adequate methods for cleaning and sanitizing.

(3) Non-food-contact surfaces of equipment used in the operation of food plants should be cleaned as frequently as necessary to minimize accumulation of dust, dirt, food particles, and other debris.

(4) Single-service articles (such as utensils intended for one-time use, paper cups, paper towels, etc.) should be stored in appropriate containers and shall be handled, dispensed, used, and disposed of in a manner that prevents contamination of food or food-contact surfaces.

(5) Sanitizing agents shall be effective and safe under conditions of use. Any facility, procedure, machine, or device is acceptable for cleaning and sanitizing equipment and utensils if it is established that the facility, procedure, machine, or device will routinely render equipment and utensils clean and provide adequate sanitizing treatment.

(d) *Storage and handling of cleaned portable equipment and utensils.* Cleaned and sanitized portable equipment and utensils with food-contact surfaces should be stored in a location and manner that protects food-contact surfaces from splash, dust, and other contamination.

§ 110.37 Sanitary facilities and controls.

Each plant shall be equipped with adequate sanitary facilities and accommodations including, but not limited to:

(a) *Water supply.* The water supply shall be sufficient for the operations intended and shall be derived from an adequate source. Any water that contacts foods or food-contact surfaces shall be safe and of adequate sanitary quality. Running water at a suitable temperature and under pressure as needed shall be provided in all areas where required for the processing of food, the cleaning of equipment, utensils, or containers, or for employee sanitary facilities.

(b) *Plumbing.* Plumbing shall be of adequate size and design and adequately installed and maintained to:

(1) Carry sufficient quantities of water to required locations throughout the plant.

(2) Properly convey sewage and liquid disposable waste from the plant.

(3) Neither constitute a source of contamination to foods, food products or ingredients, water supplies, equipment or utensils nor create an unsanitary condition.

(4) Provide adequate floor drainage in all areas where floors are subject to flooding-type cleaning or where normal operations release or discharge water or other liquid waste on the floor.

(5) Ensure that there is not backflow from, or crossconnection between, piping systems that carry water for food or food-processing use and piping systems that discharge waste water or sewage.

(c) *Sewage disposal.* Sewage disposal shall be made into an adequate sewerage system or disposed of through other adequate means.

(d) *Toilet facilities.* Each plant shall provide its employees with adequate toilet and associated hand-washing facilities within the plant. The facilities shall be maintained in a sanitary condition and kept in good repair at all times. Doors to toilet rooms shall be self-closing and shall not open directly into areas where food is exposed to airborne contamination, except where alternate means have been taken to prevent such contamination (such as double doors, positive air-flow systems, etc.).

(e) *Hand-washing facilities.* Adequate and readily accessible hand-washing and, if necessary, sanitizing facilities shall be provided in the plant for employees who may handle unprotected food, unprotected packaging materials, and food-contact surfaces. Such facilities shall be furnished with running water at a suitable temperature for hand washing, effective hand-cleaning and sanitizing preparations, sanitary towel service or suitable drying services, and, if necessary, sanitizing preparations. These facilities should be equipped with water control valves so designed and constructed as to prevent recontamination of clean, sanitized hands. Readily understandable signs directing employees handling unprotected food, unprotected food-packaging materials, or food-contact surfaces to wash their hands before they start work, after each absence from post of duty, and when their hands may have become soiled or contaminated, shall be conspicuously posted in the processing room(s) and in all other areas where employees may handle such food, materials, or surfaces. Where appropriate, such signs shall also direct employees to sanitize their hands. Refuse receptacles that are constructed and maintained in a manner that precludes contamination of the products shall be used where appropriate.

(f) *Rubbish and offal disposal.* Rubbish and any offal shall be so conveyed, stored, and disposed of as to minimize the development of odor, prevent waste from becoming an attractant and harborage or breeding place for vermin, and prevent contamination of food, food-contact surfaces, ground surfaces, and water supplies.

Subpart C—Equipment

§ 110.40 Equipment and utensils.

(a) All plant equipment and utensils shall be so designed and of such material and workmanship as to be adequately cleanable, and shall be properly maintained. The design, construction, and use of equipment and utensils shall preclude the adulteration of food with lubricants, fuel, metal fragments, contaminated water, or any other contaminants. All equipment should be so installed and maintained as to facilitate the cleaning of the equipment and of all adjacent spaces. Food-contact surfaces shall be corrosion free when in contact with food. They shall be made of nontoxic material that will withstand the environment of its intended use and the action of food ingredients, cleaning compounds, and sanitizing agents. All food-contact surfaces shall be maintained to prevent product contamination and shall be in compliance with section 409 of the act.

(b) Seams on food-contact surfaces shall be smoothly bonded or maintained so as to minimize accumulation of food particles or to prevent microbiological contamination in places where dirt or organic material might accumulate.

(c) Equipment that is in the processing or food-handling area and that does not come into contact with food shall be so constructed that it can be kept in a clean condition.

(d) Ingredient and product-holding, conveying, and processing systems that include, but are not limited to, gravimetric, pneumatic, closed, and automated systems shall be of a design and construction that enables them to be cleaned.

(e) Regulating and recording controls, thermometers, other temperature-measuring devices, and temperature-recording devices on equipment used to sterilize, pasteurize, or otherwise control or prevent growth of microorganisms in raw materials or products shall be accurate, effective, and adequate in number for their designated uses.

(f) Each freezer and cold storage compartment used for storing and holding raw materials or products capable of supporting growth of microorganisms shall be fitted with an indicating thermometer, temperature-measuring device, or temperature-recording device so installed as to show the temperature accurately within the compartment, and should be fitted with an automatic control for regulating temperature or with an automatic alarm system to indicate a significant temperature change in a manual operation.

(g) Instruments used for measuring or regulating pH, acidity, water activity, or other conditions that control or prevent undesirable microbial growth in foods shall be precise and properly maintained.

(h) All compressed air or other gases mechanically introduced into foods or used to clean food-contact surfaces or equipment shall be properly filtered or washed, shall be free of oil and other extraneous material that might contaminate the foods, and shall be in compliance with section 409 of the act.

(i) Restrictions on the industrial uses of polychlorinated biphenyls (PCB's) provided in § 109.15 of this chapter shall also be applicable to the industrial uses of PCB's in the production, handling, and storage of food. Equipment, utensils, and machinery for handling or processing food in or around a food plant shall not contain PCB's, except for electrical transformers and condensers containing PCB's in sealed containers.

Subpart D [Reserved]

Subpart E—Production and Process Controls

§ 110.80 Processes and controls.

All operations in the receiving, inspecting, transporting, packaging, segregating, preparing, processing, and storing of food shall be conducted in accordance with adequate sanitation principles. Appropriate quality control operations shall be employed to ensure that raw materials and finished products are fit for food, that food-packaging materials are safe and suitable, and that all of the foregoing materials are in compliance with the Federal Food, Drug, and Cosmetic Act. Overall sanitation of the plant shall be under the supervision of an individual assigned responsibility for this function. All reasonable precautions shall be taken to ensure that production procedures do not contribute contamination such as filth, harmful chemicals, undesirable microorganisms, or any other objectionable material to the processed food. Chemical, microbiological, or extraneous-material testing procedures shall be utilized where necessary to identify sanitation failures or food contamination, and all foods and ingredients that have become contaminated shall be rejected or treated or processed to eliminate the contamination.

(a) *Raw materials and ingredients.* (1) Raw materials and ingredients shall be inspected and segregated as necessary to ensure that they are clean and fit for processing into human food and shall be stored under conditions that will protect against contamination and minimize deterioration. Raw materials shall be washed or cleaned as required to remove soil or other contamination. Water used for washing, rinsing, or conveying of food products shall be of adequate quality, and water shall not be reused for washing, rinsing, or conveying products in a manner that may result in contamination of food products. Containers and carriers of raw ingredients should be inspected on receipt to ensure that their condition has not contributed to the contamination or deterioration of the products.

(2) Raw materials and ingredients shall not contain levels of microorganisms that may produce food poisoning or other disease in humans, or they shall be pasteurized or otherwise treated during processing operations to destroy such microorganisms.

(3) Raw materials susceptible to contamination with aflatoxin or other natural toxins shall be examined, sorted, or treated to ensure that the finished foods comply with current Food and Drug Administration requirements, guidelines, and action levels for poisonous or deleterious substances before these materials are incorporated into finished products. Compliance with this requirement may be accomplished by purchasing these materials under a supplier's guarantee or certification, or may be verified by analyzing these materials for aflatoxins and other natural toxins.

(4) Raw materials and rework susceptible to contamination or infestation by animals, birds, vermin, microorganisms, or extraneous material shall comply with current Food and Drug Administration regulations, guidelines, and action levels for natural or unavoidable defects before these materials are incorporated into finished products. Compliance with this requirement may be verified by any effective means, including examination of these materials for infestation and contamination.

(5) Raw materials shall be held in containers so designed and constructed as to prevent their contamination and shall be held at such temperature and relative humidity and in such a manner as to prevent their adulteration.

(6) Frozen raw materials shall be kept frozen except for the period of time actually required for processing and shall be defrosted in a manner that does not adversely affect their use as food.

(7) Liquid or dry ingredients received and stored in bulk form shall be held in a manner that prevents any direct or indirect contamination.

(b) *Processing operations.* (1) Processing equipment and utensils and finished product containers shall be maintained in a sanitary condition through frequent cleaning with appropriate cleaning agents, and by sanitization where indicated. Insofar as necessary, equipment shall be taken apart for thorough cleaning.

(2) All food processing, including packaging and storage, shall be conducted under such conditions and controls as are necessary to minimize the potential for undesirable bacterial or other microbiological growth, toxin formation, or deterioration or contamination of the processed product or ingredients. Compliance with this requirement may require careful monitoring of such physical factors as time, temperature, humidity, a_w, pH, pressure, flow rate, and such processing operations as freezing, dehydration, heat processing, acidification, and refrigeration to ensure that mechanical breakdowns, time delays, temperature fluctuations, and other factors do not contribute to the decomposition or contamination of the processed products.

(3) Foods that can support the rapid growth of microorganisms of public health significance or that are subject to decomposition as a result of microbial multiplication shall be held in a manner that minimizes the growth of those microorganisms. Compliance with this requirement may be accomplished by any effective means, including:

(i) Maintaining refrigerated foods at 45° F (7.2° C) or below as appropriate for the particular food involved.

(ii) Maintaining frozen foods at 0° F (−17.8° C) or below.

(iii) Maintaining hot foods at 140° F (60° C) or above.

(iv) Heat treating acid or acidified foods to destroy mesophilic microorganisms when those foods are to be held in hermetically sealed containers at ambient temperatures.

(4) Measures such as sterilizing, pasteurizing, freezing, refrigerating, controlling pH or controlling a_w that are taken to destroy or prevent the growth of microorganisms of public health significance shall be adequate under the conditions of manufacture for a given food to ensure destruction or the prevention of growth of those microorganisms.

(5) Rework shall be held in properly identified containers, shall be handled and stored as raw material, and shall meet raw material requirements before reprocessing.

(6) Work-in-process shall be handled in a manner that prevents its contamination.

(7) Effective measures shall be taken to prevent cross contamination between raw materials and finished foods, or between rework and these materials. When any of these materials are unprotected, they shall not be handled simultaneously in a receiving, loading, or shipping area if that handling could result in a contaminated product. Materials and products transported by conveyor shall be protected against contamination from extraneous material.

(8) Equipment, containers, and utensils used to convey, process, hold, or store raw materials, work-in-process, rework, or finished foods shall be constructed, handled, and maintained during processing or storage in a manner that prevents the contamination of raw materials, rework, or finished foods.

(9) Effective measures shall be taken to prevent the inclusion of metal or other extraneous material in the finished foods. Compliance with this requirement may be accomplished by using sieves, magnets, electronic metal detectors, or other suitable effective means.

(10) Adulterated materials shall be disposed of in a manner that prevents the contamination of raw materials, rework, or finished foods. If the adulterated product is reconditioned, it shall be reexamined and found to be free from adulteration before being incorporated into finished foods.

(11) Mechanical processing steps such as washing, peeling, trimming, cutting, sorting and inspecting, mashing, dewatering, cooling, shredding, extruding, drying, whipping, defatting, and forming shall be performed so as not to contaminate raw materials, ingredients, or finished foods. Compliance with this requirement may be accomplished by providing adequate physical protection of raw materials, ingredients, and food products from contaminants that may drip, drain, or be drawn into the food product, by adequate cleaning and sanitizing of all food-contact surfaces and by using time and temperature controls at and between each step in the process.

(12) Heat blanching, when required in the preparation of food, should be effected by heating the food to the required temperature, holding it at this temperature for the required time, and then either rapidly cooling the food or passing it to subsequent processing without delay. Thermophilic growth and contamination in blanchers should be minimized by the use of adequate operating temperatures and by cleaning. Where the blanched food is washed prior to filling, water used shall be safe and of adequate sanitary quality.

(13) Batters, breading, sauces, gravies, dressings, and other preparations shall be treated or maintained in such a manner that they are free of contamination. Compliance with this requirement may be accomplished by any effective means, including one or more of the following:

(i) Using ingredients free of contamination.

(ii) Employing adequate heat processes where applicable.

(iii) Using adequate time and temperature controls.

(iv) Providing adequate physical protection of components from contaminants that may drip, drain, or be drawn into them.

(v) Cooling to an adequate temperature during processing.

(vi) Disposing of batters at the end of each working day, or more frequently if required, to prevent significant microbial multiplication.

(14) Filling, assembling, and packaging and other operations shall be performed so as not to contaminate the finished food product. Compliance with this requirement may by accomplished by any effective means, including:

(i) Use of a quality control operation in which the critical control points within the food process are identified and controlled.

(ii) Adequate cleaning and sanitizing of all food-contact surfaces and food containers.

(iii) Using materials for food containers and food-packaging materials that are safe and suitable, as defined in § 130.3(d) of this chapter.

(iv) Providing physical protection from airborne contamination.

(v) Requiring the use of sanitary handling procedures by employees.

(15) Foods such as, but not limited to, dry mixes, nuts, intermediate moisture foods, and dehydrated foods, that rely on the control of a_w for preventing the growth of of microorganisms shall be processed to and maintained at a safe moisture level. Compliance with this requirement may be accomplished by any effective means, including employment of one or more of the following practices:

(i) Monitoring the a_w of ingredients and finished products.

(ii) Controlling the soluble solids-water ratio in finished products.

(iii) Protecting finished foods from moisture pickup, by use of a moisture barrier or by other means, so that the a_w of the product does not increase to an unsafe level.

(16) Food such as, but not limited to, acid and acidified foods, that rely on the control of pH for preventing the growth of microorganisms shall be monitored and maintained at a pH of 4.6 or below. Compliance with this requirement may be accomplished by any effective means, including employment of one or more of the following practices:

(i) Monitoring the pH of raw foods, ingredients, and finished products.

(ii) Controlling the amount of acid or acidified foods added to low-acid ingredients.

(17) When ice is used in contact with food products, it shall be made from water that is safe and of adequate sanitary quality, and shall be used only if it has been manufactured in accordance with adequate standards and stored, transported, and handled in a sanitary manner.

(18) Food-processing areas and equipment used for processing human food should not be used to process nonhuman food-grade animal feed or inedible products, unless there is no reasonable possibility for the contamination of the human food.

§ 110.91 Coding.

Permanently legible code marks shall be placed at a readily visible location on each finished food package delivered or displayed to purchasers so that the code marks can be readily seen on the unopened package. The marks shall identify at least the plant where the food was packed and the lot or packaging lot. This requirement does not apply to over-the-counter retail sales at the site of manufacture. The following foods are exempt from the requirement that coding marks be placed on each finished food package provided that the bulk containers received by the retail establishment contain code marks complying with this section:

(a) Individually wrapped pieces of "penny candy" and other confectionery entitled to exemption under § 1.24(a)(4) of this chapter.

(b) Foods entitled to exemption under § 101.100(a)(2) of this chapter.

(c) Foods entitled to exemption under § 101.100(b) of this chapter.

§ 110.93 Warehousing and distribution.

Storage and transportation of finished foods shall be under conditions that will prevent physical, chemical, and microbial contamination and will protect against undesirable deterioration of the food and the container. This deterioration includes, but is not limited to, contamination from insects, rodents and other vermin, toxic chemicals, pesticides, and the development of microorganisms of public health significance.

Subpart F—Records and Reports

§ 110.100 Records.

(a) Records of results of examinations and/or copies of suppliers' guarantees or certifications that verify compliance with Food and Drug Administration regulations, guidelines, or action levels of raw materials, food-packaging materials, and finished foods, shall be maintained.

(b) Processing and production records of processes intended to pasteurize or otherwise treat materials to destroy, prevent, or control the growth of microorganisms of public health significance shall be maintained, and shall contain sufficient information to permit a public health evaluation of the processed food.

(c) Distribution records shall be maintained to identify the initial distribution, except for over-the-counter retail sales at the site of manufacture, of the finished food to facilitate, when necessary, the segregation and recall of specific lots that may have become contaminated or otherwise unfit for their intended use.

(d) The records required by paragraphs (a), (b), and (c) of this section shall be retained for a period of time that exceeds the shelf life of the finished product, except that they need not be retained for more than 2 years from the date of manufacture.

Subpart G—Defect Action Levels

§ 110.110 Natural or unavoidable defects in food for human use that present no health hazard.

(a) Some foods, even when produced under current good manufacturing and/or processing practices, contain natural or unavoidable defects at lower levels that are not hazardous to health. The Food and Drug Administration establishes maximum levels for these defects in foods produced under good manufacturing and processing practices and uses these levels for recommending regulatory actions.

(b) Defect action levels are established for products whenever it is necessary and feasible to do so. These levels are subject to change upon the development of new technology or the availability of new information.

(c) Compliance with defect action levels does not excuse failure to observe either the requirement in section 402(a)(4) of the Federal Food, Drug, and Cosmetic Act that food may not be prepared, packed, or held under insanitary conditions or the other requirements in this part that food manufacturers shall observe current good manufacturing practices. Evidence obtained through factory inspection indicating such a violation renders the food unlawful, even though the amounts of natural or unavoidable defects are lower than the currently established action levels. The manufacturer of food shall at all times utilize quality control operations that will reduce natural or unavoidable defects to the lowest level currently feasible.

(d) The mixing of a food containing defects above the current defect action level with another lot of food is not permitted and renders the final food unlawful, regardless of the defect level of the final food.

(e) A compilation of the current action levels for natural and unavoidable defects in food for human use that present no health hazard may be obtained upon request from the Food and Drug Administration, Bureau of Foods, Industry Guidance Branch (HFF-342), Rm. 5425, 200 C St. SW., Washington, DC 20204.

Interested persons may, on or before December 31, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four Copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executeive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is a on file with the Hearing Clerk, Food and Drug Administration.

Dated: May 29, 1979.

Sherwin Gardner,

Acting Commissioner of Food and Drugs.

50 CFR Part 674

Fishery Management Plan for the High Seas Salmon; Fishery Off the Coast of Alaska

AGENCY: National Oceanic and Atmospheric Administration, Department of Commerce.

ACTION: Publication of FMP for Salmon off Coast of Alaska.

SUMMARY: On May 18, 1979, the National Marine Fisheries Services published interim emergency regulations implementing the approved portion of the Fishery Management Plan (FMP) for the Alaska Salmon Fishery. Due to an inadvertance, the FMP was not published at that time. The FMP is set forth below in its entirety.

DATES: Nonapplicable.

FOR FURTHER INFORMATION CONTACT: Mr. Harry L. Rietze, Director, Alaska Region, National Marine Fisheries Service, (907) 586–7221.

Signed at Washington, D.C. this 31st day of May, 1979

Winfred H. Meibohm,

Executive Director, National Marine Fisheries Service.

Authority: 16 USC 1801 *et seq.*

Summary, High Seas Salmon Fishery off the Coast of Alaska, East of 175° East Longitude

North Pacific Fishery Management Council

The salmon troll fishery off the coast of Alaska has historically been conducted from the U.S./Canada boundary (Dixon Entrance) to Middleton Island in the Gulf of Alaska, with intermittent efforts to the west as far as the Kodiak Island region.

The troll fishery is the only major U.S. fishery on salmon currently conducted in the Fishery Conservation Zone (see exceptions as noted in Sec. 8.2). Many vessels engaged in the offshore troll fishery participate in other types of fishing for salmon in State of Alaska waters, and for halibut, crab, etc., both in Alaska waters and the Fishery Conservation Zone (FCZ).

This fishery management plan is designed to promote conservation of the ocean salmon resource while allowing utilization of its stocks for food production.

Target species in the troll fishery are chinook *(Oncorhynchus tshawytscha)* and coho *(O. kisutch)* salmon. Pink salmon *(O. gorbuscha)*, sockeye *(O. nerka)*, and chum *(O. keta)* salmon are caught in insignificant numbers compared to the commercial harvest of chinook and coho.

A recreational fishery is conducted almost entirely within inshore and coastal waters of the State of Alaska.

The most concentrated effort on troll salmon is conducted on the Fairweather Grounds, a congregating place for salmon from both Alaskan and non-Alaskan areas. The migratory nature of the salmon and the mixture of stocks makes the management of this fishery complex.

There is a lack of biological information concerning the salmon in the troll fishery off the coast of Alaska; all information, however, indicates that stocks of wild chinook from Alaska are depressed and that the conduct of the troll fishery offshore is thought to be detrimental to remaining Alaska wild chinook stocks. This same effect is likewise detrimental to stocks of wild chinook entering the fishery from outside Alaska, but the nonselective nature of fishing in a mixed-stock fishery such as this is unavoidable.

It has been determined that controlling the catch is necessary for the future well-being of the stocks in this fishery.

There has been a prohibition on net fishing in offshore waters off the coast of Alaska since 1952. It is the intention of this plan to continue that prohibition.

The plan is designed to allow only a directed troll and recreational fishing effort for salmon in the offshore waters. Salmon present in these waters are the object also of intensive fishing in inshore areas. The offshore catch is but a fraction of the total annual coastwide catch.

Chinook spawn in the larger rivers of the Alaska mainland, with 33 populations identified in Southeastern Alaska east of Cape Suckling. West of Cape Suckling, and not included in the area managed for the salmon troll fishery, chinook spawn in similar river systems including the Copper, Cook Inlet system, Nushagak, Kuskokwim, and Yuokon Rivers. The contribution to the troll fishery of fish from these areas appears to be insignificant.

Important contributions of stocks to the troll fishery originate in the Columbia and Fraser River systems as well as in some Oregon and Washington coastal streams.

Coho in this fishery are primarily of Alaskan origin, with coho populations occurring in most of the 2,000-plus freshwater streams in Southeastern Alaska east of Cape Suckling. Again, the contribution of coho to the troll fishery from areas west of Cape Suckling appears to be insignificant.

A major concern of fishery specialists is the addition of significant numbers of hatchery fish to waters hosting native stocks. The problem is to avoid creating a dependency on hatchery fish to the detriment of the wild fish. There are indications that increased open ocean fishing pressure stimulated by successful hatchery programs may have affected adversely wild coho stocks in Oregon.

Foreign troll effort (all Canadian) was regulated by a Reciprocal Fisheries Agreement (1977) and occurred outside the U.S. 12-mile zone.

Total ex-vessel value of the commercial troll salmon landings in Southeastern Alaska (1975–76) was $14.5 million.

The plan addresses all salmon in the offshore waters off the coast of Alaska east of 175 degrees east longitude to Dixon Entrance. This area, encompassing more than 2,000 miles of straight-line coast, includes stocks of all five species of Pacific salmon. The fishing area managed by specific reference in the plan is small in proportion to the total ocean area. Management of the region west of the longitude of Cape Suckling and outside the limits of the troll fishery has been through successive restrictions and prohibitions on net fishing (since 1952) and trolling (since 1973). These prohibitions effectively restrict offshore fishing to a troll fishery east of the longitude of Cape Suckling.

Life history features of all salmon are included in the plan and maximum sustainable yield estimates have been developed solely from past catch data for all species of salmon off the coast of Alaska, with further MSY calculations for the area in which the troll fishery is conducted. Those values are (Nos. of fish):

MSY east and west of Cape Suckling

Chinooka (West)—247–267,000 (East)—296–316,000
Sockeye (West)—4,549–12,142,000 (East)—806–894,000
Coho (West)—602–662,000 (East)—959–1,115,000
Pink (West)—12,236–15,314,000 (East)—9,164–11,604,000
Chum (West)—3,662–4,180 (East)—1,822–2,201

Provisions for enforcement, cooperative research and permit and financing requirements for participants are also included in this plan.

The number of boats involved in the troll fishery increased from the early 1900s to 1974, when the State of Alaska passed legislation (Limited Entry) setting a limit of 900 units of power gear in the troll fishery.

The record year in the troll fishery was 1957 when 848,000 chinook were landed. There has since been a general decline which leveled off in 1965; the fishery is now reasonably stable with annual catches of 250–350,000 chinook.

The record coho catch was in 1951 when two million fish were landed. The catch has fluctuated between 300,000 and one million fish yearly since the late 1950s. From 1971 through 1976 an average of only 15.8 percent of chinook and 0.4 percent of coho taken in Southeast Alaska were reported taken in offshore waters.

Regulations for the offshore troll fishery have been basically the same since the 1950s. Prior to Alaskan statehood in 1959, it was managed by the U.S. Fish and Wildlife Service; since 1959, regulation has been by the State of Alaska through enforcement of its landing laws. A minimum length of 28 inches for chinook salmon was set in 1977; waters inside the surfline are open year-round with local exceptions designed to provide individual stock protection; a maximum of four lines may be fished within the three-mile limit (no similar restriction in offshore waters) and, since 1957, outside waters have been closed to all species from November 1 to April 14.

Catch statistics show that of the approximately 2,000 boats landing fish in 1976 in Southeastern Alaska, boats over 27' in length (970) accounted for 85 percent of the salmon caught by trolling.

The troll fishery for coho is closed from September 30 to June 14. There is no minimum size limit. Since 1973, all waters west of the longitude of Cape Suckling have been closed to salmon troll fishing. The June 15 opening is considered unrestrictive as coho do not show in the fishery in any numbers until mid-July.

The limited entry provision proposed for this fishery is one management concept used to control participation.

Finally, there is a statement of intent and the method for review of the plan following approval by the Secretary of Commerce.

Proposed Management Regime

Objectives

(1) Control expansion of the salmon troll fishery in the Fishery Conservation Zone.

(2) Allocate the salmon resource among user groups without disrupting present social and economic structures.

(3) Regulate the catch of salmon to assure adequate escapement for spawning.

(4) Reduce the catch of salmon with potential growth to increase the poundage yield from the troll fishery.

(5) Make cost effective the public investment in the high-seas salmon fishery.

(6) Promote the eventual development of a Pacific coast salmon fishery management plan.

Measures

Proposed measures for the conduct of the salmon troll fishery include size, sex, area, seasons, and gear regulations which are complementary with existing State of Alaska regulations.

Limited entry will be used as a method of meeting the objective of controlling expansion of this fishery.

Seasons—(1) All waters open for chinook, chum, sockeye, and pink salmon between April 15 and October 31 with the following exception: ALL WATERS WEST OF THE LONGITUDE OF CAPE SUCKLING HAVE NO OPEN SEASON. (2) Coho season is open between June 15 and September 20 except: ALL WATERS WEST OF THE LONGITUDE OF CAPE SUCKLING HAVE NO OPEN SEASON.

Gear—(1) Fishing with nets for salmon is not permitted in the Fishery Conservation Zone east of Cape Suckling. West of Cape Suckling, existing small-scale net fisheries conducted at False Pass (South Peninsula), Cook Inlet, and the Copper River Delta will be allowed under this plan. (2) Commercial fishing is allowed only by troll in the Fishery Conservation Zone. (3) Sport fishing is to be conducted with only a single, hand-held or closely attended rod with not more than one artificial lure or two flies or two single hooks attached.

Area—Trolling for salmon is permitted east of the longitude of Cape Suckling to Dixon Entrance on the U.S./Canadian border and within the described Fishery Conservation Zone.

Size—(1) Chinook salmon must be at least 28 inches in length overall (28 inches measured from the mid-point of the clavithral arch if headed). (2) All fin-clipped salmon must be landed head-on. (3) All other salmon no length restriction.

Sex—No restrictions.

Limited Entry—Limited entry for the offshore troll fishery is proposed as outlined in the regulations section.

2.0 Introduction

This plan is a management regime for ocean salmon off the coast of Alaska in response to the requirements of the Fishery Conservation and Management Act of 1976 (U.S. Public Law 94–265). It was developed at the direction of the North Pacific Fishery Management Council by a multi-agency team composed of members of the Alaska Department of Fish and Game (lead agency), the Washington Department of Fisheries, National Marine Fisheries Service, Alaska Commercial Fisheries Entry Commission, and industry.

2.1 *Goals and Objectives for Management Plan*

The Fishery Conservation and Management Act (FCMA) of 1976 sets forth in Section 2, Findings, Purposes and Policy, and Section 301, National Standards for Fishery Conservation and Management, a series of guidelines and principles which govern the development of fishery management plans for fisheries in the Conservation Zone. The Act calls for ". . . achieving, on a continuing basis, the optimum yield from each fishery" ((Sec. 301. (a)(1))). In Section 3., Definitions, optimum yield is defined as ". . . the amount of fish—(A) which will provide the greatest overall benefit to the Nation, with particular reference to food production and recreational opportunities; and (B) which is prescribed as such on the basis of the maximum sustainable yield from such fishery, as modified by any relevant economic, social, or ecological factor."

Thus defined, optimum yield management, along with the clarifying language in Sections 2 and 301 of the Act, requires consideration of a multiplicity of biological, economic, social, and ecological objectives. This is in essence the difficult task of defining a social function for fisheries management. It is however, a crucial factor in the development of a management plan, for there is no way in which the concept of optimum yield can be given any meaning without a clear specification of the relevant biological, social,and economic objectives to be served.

The management objectives of the High Seas Salmon Plan are:

(1) Control the expansion of the salmon troll fishery in the Fishery Conservation Zone.

(2) Allocate the salmon resource among user groups without disrupting present social and economic structures.

(3) Regulate the catch of salmon to assure adequate escapement for spawning.

(4) Reduce the catch of salmon with potential growth to increase the poundage yield from the troll fishery.

(5) Make cost effective the public investment in the high seas salmon fishery.

(6) Promote the eventual development of a Pacific Coast salmon fishery management plan.

It must be pointed out that these objectives cannot be totally accomplished by any plan for the FCZ alone and represent the Council's contribution to a set of total objectives for the fishery to be accomplished in concert with actions taken by the State of Alaska in their waters.

To that end this plan is formally considered by the Council an interim plan with a fully integrated 0–200 mile FMP planned for writing and development for the 1980 fishery.

2.2 *Operational Definitions of Terms Used*

A. *Determinants of Catch Levels.* 1. *Maximum Sustainable Yield* (MSY) is an average, over a reasonable period of time, of the largest catch which can be taken continuously by the *fishery* under current environmental conditions. It should normally be presented with a range of values around its point estimate.

The term *fishery* means:

a. One or more *stocks of fish* which can be treated as a unit for purposes of conservation and management and which are identified on the basis of geographical, scientific, technical, recreational, and economic characteristics.

b. Any fishing for such stocks.

The term "stock of fish" means a species, subspecies, geographical grouping, or other category of fish capable of management as a unit.

Where sufficient scientific data as to the biological characteristics of the stock do not exist, or the period of exploitation or investigation has not been long enough for adequate understanding of stock dynamics, the MSY will be estimated from the best information available.

2. *Acceptable Biological Catch* (ABC) is a seasonally determined catch that may differ from MSY for biological reasons. It may be lower or higher than MSY in some years for species with fluctuating recruitment. It may be set lower than MSY in order to rebuild overfished stocks.

3. *Optimum Yield* (OY) may be obtained by a plus or minus deviation from ABC for purposes of promoting economic, social, or ecological objectives as established by law and public participation processes. Ecological objectives, where they relate primarily to biological purposes and factors, are included in the determination of ABC. Where ecological objectives relate to resolving conflicts and accommodating competing uses and values, they are included as appropriate with economic and/or social objectives.

OY may be set higher than ABC in order to produce higher yields from other more desirable species in a multispecies fishery. It might be set lower than ABC in order to provide larger individuals or a higher average catch-per-unit of effort.

B. *Determination of Domestic Annual Fishing Capacity and Expected Harvest.* 1. *Domestic Annual Fishing Capacity* (DAC) is the total potential physical capacity of the fleets modified by

logistic factors. The components of the concept are:

a. An inventory of total potential physical capacity defined in terms of appropriate vessel and gear characteristics (e.g., size, horsepower, hold capacity, gear design, etc.).

b. Logistic factors determining total annual fishing capacity (e.g., variations in vessel and gear performance, trip length between fishing locations and landing points, weather constraints, etc.).

2. *Expected Domestic Annual Fishing Harvest* (DAH) is the domestic annual fishing capacity modified by other factors which will determine estimates of what the fleets will harvest (e.g., how fishermen will respond to price changes in the subject species and other species, etc.).

These concepts should be placed in a dynamic context of past trends and future projections. For example, physical fleet capacity should not simply be last season's inventory of vessels and hold measurements (although this is appropriate for present interim planning), but also next year's projected movement into and out of the fishery. Vessels under construction should be included and an estimate of attrition made.

The determination of domestic annual fishing capacity and expected harvest should be made on the best available information.

C. *Determination of Foreign Allowable Catch* (FAC) The foreign allowable catch is determined by deducting the domestic annual expected harvest from the optimum yield (OY—DAH=FAC).

D. *Determination of Areas Fished.* 1. *Offshore Waters:* Those waters seaward of the three-mile territorial jurisdiction.

2. *Coastal Waters:* Those waters under State control from the surfline to the three-mile territorial limit.

3. *Inshore Waters:* Those waters inside the surfline including all bays, sounds and straits.

E. *Other.* 1. *Troll:* A method of fishing in which a line with hook attached is drawn through the water behind a moving boat.

2. *Fishery Conservation Zone (FCZ):* A zone contiguous to the territorial sea of the United States, the inner boundary of which is the territorial sea boundary (3 nautical miles) and the outer boundary of which is a line drawn 200 nautical miles from the baseline from which the territorial sea is measured.

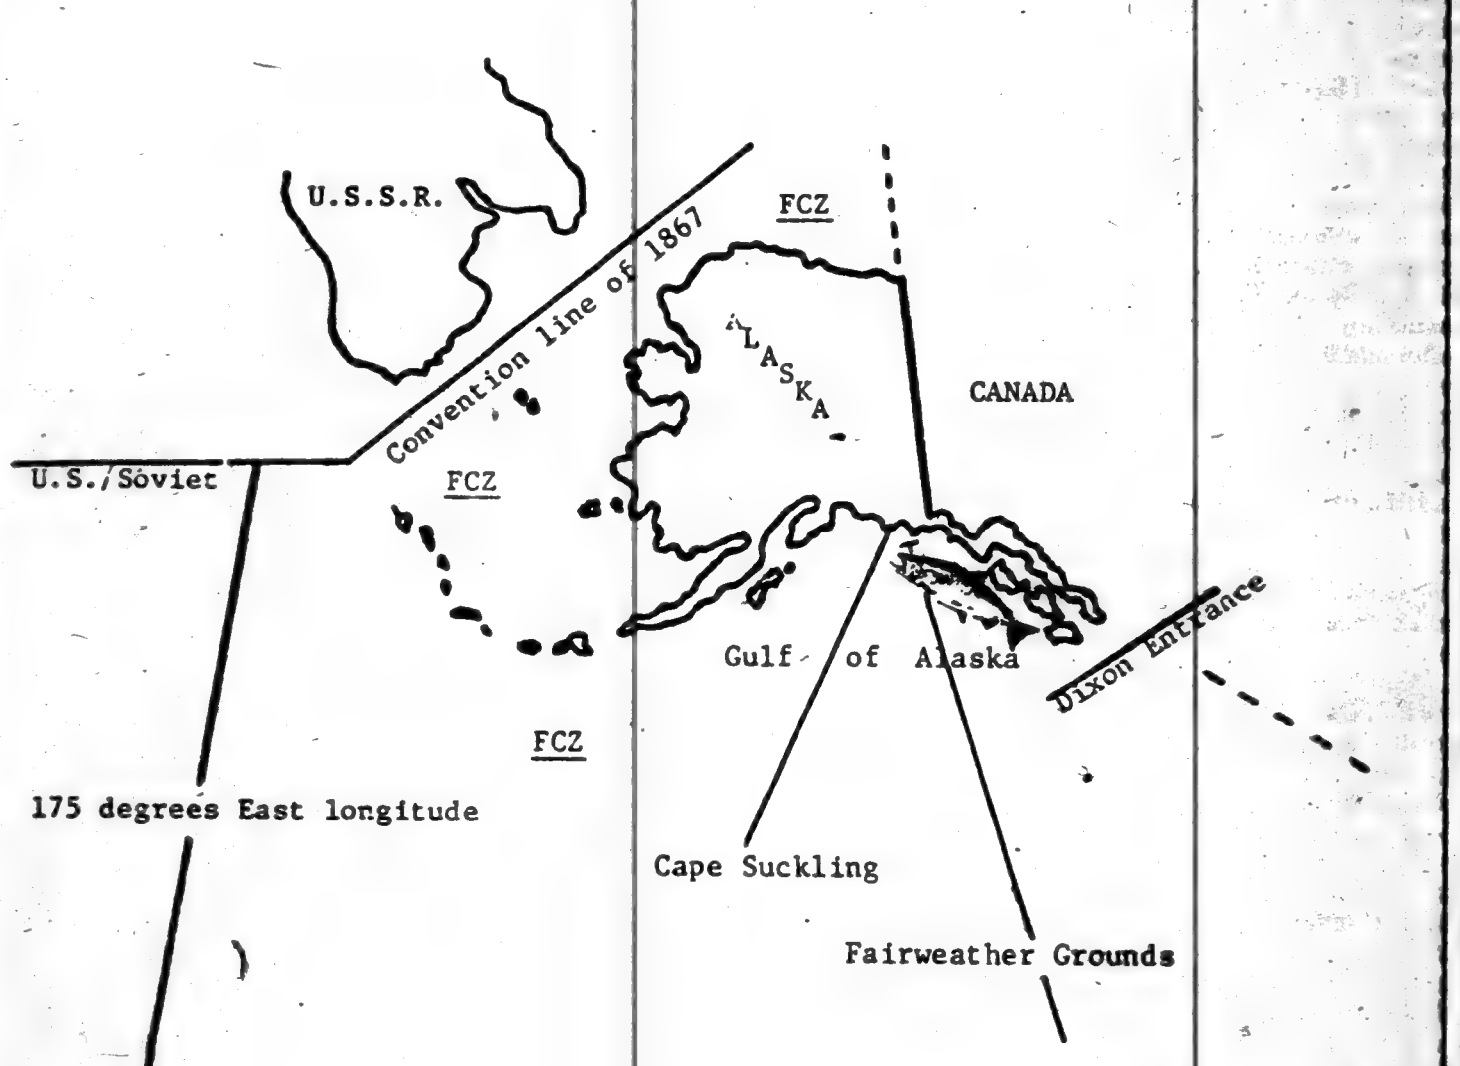
THE SALMON TROLL FISHERY OFF THE COAST OF ALASKA



BILLING CODE 3510-22-C

3.0 Description of Fishery

3.1 *Areas and Stocks Involved* (See Appendix 3.0 for additional material)

The ocean area for this fishery management plan is the water off the coast of Alaska east of 175° East longitude within the 200-mile Fishery Conservation Zone.

Fishing effort in the FCZ west of 175° east longitude is the subject of a separate international fisheries agreement between the United States, Canada, and Japan.

State of Alaska fishery management areas contiguous to the Fishery Conservation Zone in these waters are the Arctic-Yukon-Kuskokwim, Bristol Bay, Chignik/Alaska Peninsula (Aleutian), Kodiak, Cook Inlet, Prince William Sound, northern Southeastern, and Southeastern Alaska.

The specific fishery addressed in this FMP is the salmon troll fishery conducted east of the longitude of Cape Suckling off Southeastern Alaska. Special reference is made to the Fairweather Grounds portion of that fishery. This area is a mixed-stock fishery for Alaskan and non-Alaskan salmon, of which chinook and coho salmon are the target species.

All five species of Pacific salmon are present in the troll fishery, but pink, chum and sockeye are caught in insignificant amounts compared to the numbers of chinook and coho taken commercially.

In Southeastern Alaska, native chinook and coho salmon occur from Cape Suckling to Dixon Entrance. The chinook spawn in the larger rivers of the mainland and their tributaries. The Taku, Stikine, Alsek, Unuk, Situk, and Chickamin Rivers host important spawning populations. Other river systems are known to produce chinook. Coho populations occur in most of the 2,000-plus anadromous fish streams in Southeastern Alaska. Fish from these areas are present in the troll fishery. Stocks of King salmon of non-Alaskan origin known to be present in the troll fishery include those from the Columbia River and Oregon-Washington coastal streams.

West of the longitude of Cape Suckling, chinook spawn in several major river systems including the Copper, Susitna, Kvichak, Togiak, Kuskokwim, and Yukon. As in southeastern Alaska, coho are found in numerous stream and river systems. (Catalog of Salmon Spawning Rivers, ADF&G, Rev., 1975.)

3.2 *History of Exploitation*

3.2.1 *Domestic Fishery*

3.2.1.1 *Description of User Groups*

East of Cape Suckling the troll fishery is the only domestic salmon fishery in the offshore area. Net fishing of all types has been prohibited in this area since 1952 (International North Pacific Fisheries Convention 1952; North Pacific Fisheries Act of 1954) [16 USC1021–1032] and with specific exceptions off the remainder of the Pacific Coast (including Canada) since 1958. Chinook are harvested mostly by the troll fishery, with small numbers taken by gillnets, purse seines, and the recreational fishery. Coho are caught in inshore waters by nets and trolling in nearly the same proportion. Recreational coho catches are relatively small and are mostly taken in the territorial waters. Pink, chum, and sockeye salmon are harvested by the same user groups; the bulk is taken by net fisheries inshore.

3.2.1.2 *General Description of Fishing Effort*

The number of boats in the Alaska troll fishery has generally been increasing since the early 1900s. The clear and protected waters of Southeast Alaska are conducive to trolling for chinook and coho. Trolling is not feasible in areas north and west due to lack of fish, murky waters, or the use of nets, the combination of factors preventing the growth of the fishery in those areas. After the 1973 season, the Alaska Board of Fish and Game made trolling illegal in all areas of the State of Alaska except east of Cape Suckling.

The early troll effort was conducted in inshore waters closer to spawning streams of the fish. As the number of fish decreased and the amount of effort increased, gear conflicts occurred; fishing effort gradually moved outward to coastal and offshore areas and it was during this expansion of area that, in 1952, several fishermen from the Pelican area caught fish on the offshore Fairweather Grounds. After a lapse of several years, during which good runs of salmon in inshore areas made it unnecessary to prospect offshore, fishermen again ranged offshore to the Fairweather Grounds and the fishery became established.

Effort in the troll fishery increased steadily until 1974 when the State of Alaska passed limited entry legislation holding effort to 960 units of power troll gear.

Based on the existing data, 187 individual boats fished the offshore troll fishery during the three-year period 1975–1977; the most that were on the grounds in any one year during that period was 118.

3.2.1.3. *Catch Trends*

The greatest recorded catch of chinook in Alaska was in 1937 when 846,000 fish were landed. From 1937 to the early 1960s there was a general decline in chinook catches. Since 1965 the catch has been reasonably stable between 250,000 and 350,000 fish per season (Figs. 12 and 13, Appendix 4.0).

The record catch of coho was in 1951 when 2.0 million fish were landed. Since the late 1950s the coho catch has fluctuated between 300,000 and 1,000,000 fish annually. In 1976 there were 220,000 chinook and 510,000 coho caught by troll gear.

In 1977 there were 272,000 chinook and 507,000 coho caught by troll gear. Table 1 shows that, respectively, 18.5, 1.8, and 1.6 percent of troll caught chinook, coho, and pink were taken in Council waters. These figures are equivalent to 8 percent for chinook, 0.5 percent for coho, and .02 percent for pink of the state total caught by all gear types (Table 2).

Table 3 shows the 10-year statistics for the 3 major species by troll gear and all gear types. Figure 1 depicts the trends of troll catches for these species.

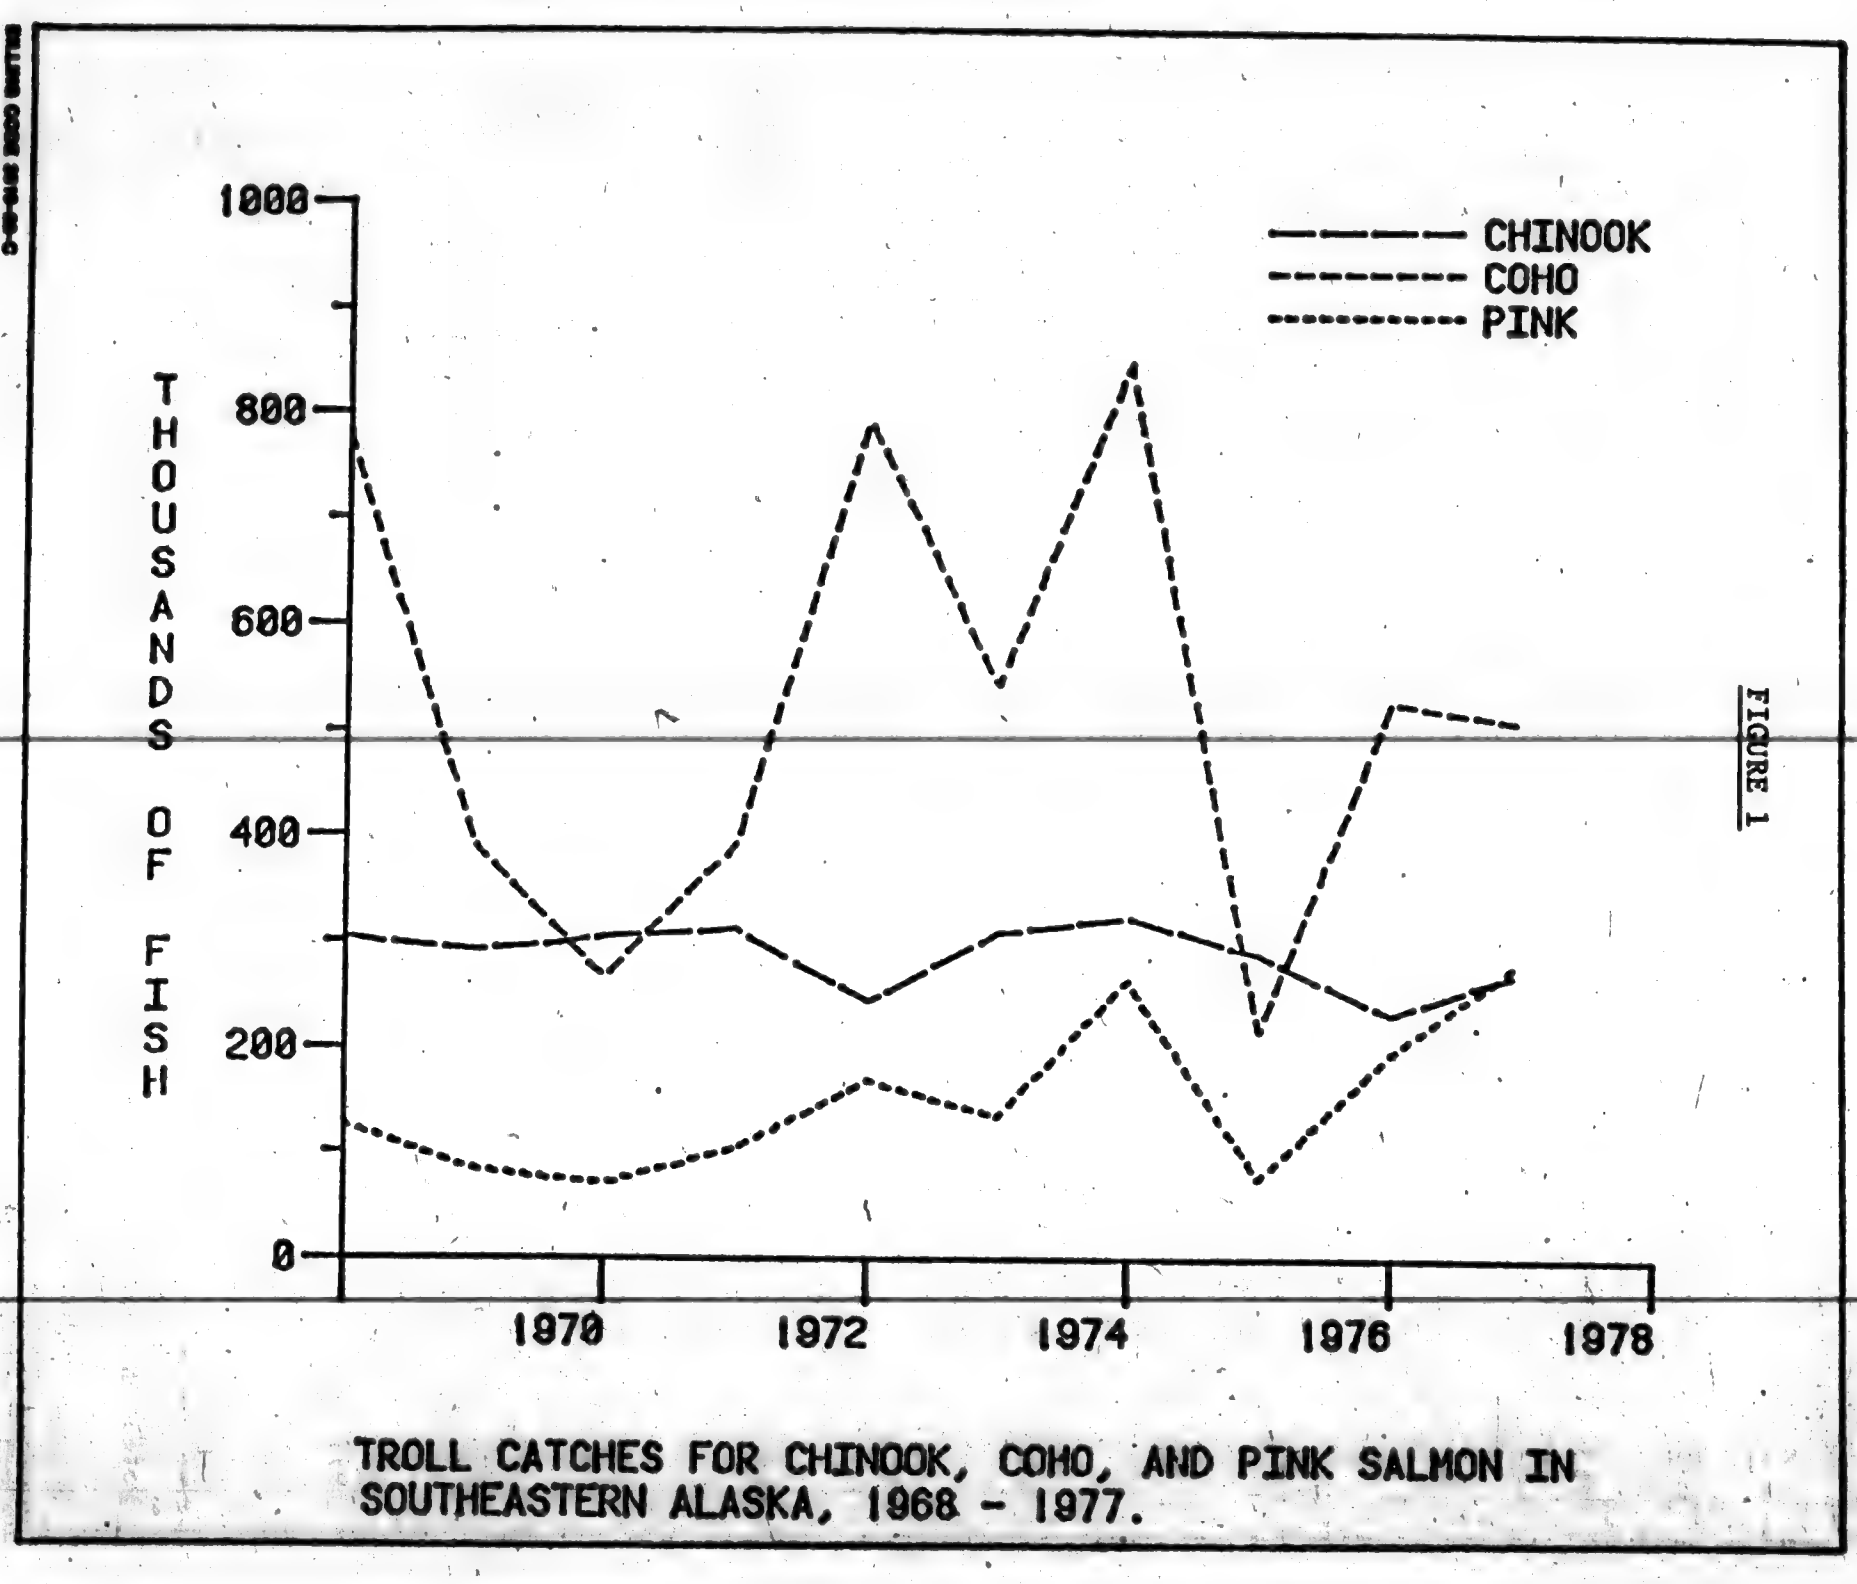

FIGURE 1

TROLL CATCHES FOR CHINOOK, COHO, AND PINK SALMON IN SOUTHEASTERN ALASKA, 1968 - 1977.

3.2.1.4 *Description of Vessels and Gear Employed*

Commercial trolling in Southeastern Alaska commenced in Ketchikan around the turn of the century with mechanically powered vessels entering the fishery in 1910. Power gurdies came into use in the early 1920's and later, the use of ice and refrigeration to maintain quality of unprocessed catch over extended periods of time lengthened the amount of time a commercial troller could spend fishing before returning to port.

The 2,076 commercial trolling vessels that landed fish in 1976 (power troll, 801; hand troll, 1,275) may be divided into two categories by size and area fished. The 1,106 boats under 27 feet in length do not fish in outside waters; the total troll catch by these fishermen is about 15 percent of the total.

The remainder of the catch was landed by 970 boats over 27 feet in length; the majority are power trollers which can fish for 10–14 days before delivering to a buyer. These boats are often highly mobile, fully equipped electronically, and very seaworthy.

There is no standardization of vessel types in this fishery; an endless variety of small, medium, and large size vessels participate.

3.2.2 *History of Foreign Exploitation* (3.2.2.1.–4.)

The foreign troll effort in the waters off Alaska has historically been Canadian. In some years of predicted large runs of albacore tuna *(Thunnas alalunga)* or salmon elsewhere on the coast, the Canadian effort off Alaska is minimal. In other years as many as 30 Canadian boats have fished in the offshore waters. In 1966 a total of 18,168 chinook, 1,732 coho, and 853 pinks was taken by Canadian boats that spent 1,048 boat days off Alaska. In 1976 there was no reported catch by Canadian trollers off Alaska (Annual Summary of British Columbia Catch Statistics 1976). This is thought to be in error on the basis of confirmed sightings of Canadian vessels on the Alaska fishing grounds by American fishermen.

3.3 *History of Management*

3.3.1 *Management Institutions, Policies, Jurisdiction*

Prior to statehood in 1959, management of salmon within 3 miles of the coast and all inshore waters of Southeast Alaska was under jurisdiction of the U.S. Fish and Wildlife Service. Regulations were established for the territorial waters in Washington, D.C., primarily to comply with Pacific coast states and Canadian regulations. Since statehood the Alaska Board of Fish and Game (now the Board of Fisheries) has set policy and regulations in accordance with proposals by the Alaska Department of Fish and Game, local advisory boards, and individuals. The Department of Fish and Game is responsible for in-season management, research, and implementation of regulations. The State and the Board of Fisheries exercise de-facto jurisdiction in the Pacific ocean waters beyond 3 miles under the terms of landing laws and other licensing requirements of U.S. Nationals. Due to disparities in regulations between the U.S. and Canada enforcement of Alaskan regulations pertaining to Canadian vessels in the contiguous zone has been generally ineffective.

Recognition of the coastwide nature of the management problems of chinook and coho led to the consideration of possible solutions initially under the auspices of the Pacific Marine Fisheries Commission (PMFC). The forum for coordinating both research efforts and ocean salmon fishery management regulations has been the PMFC Salmon-Steelhead Committee. This committee consists of fishery scientists from each member state (California, Oregon, Washington, Idaho, and Alaska).

3.3.2 *Domestic*

3.3.2.1 *Measures Employed to Regulate Fishery*

Regulations for the troll fishery have remained basically the same since the 1930's. In 1977, a 28-inch minimum total length size limit for chinook was imposed. Coastal and offshore waters are open to trolling from April 15 to October 31. Waters inside the surfline are open to trolling year-round with local exceptions to provide individual stock protection and conform to gillnet seasons (Alaska Commercial Fishing Regulations Finfish 1977). A maximum of four lines may be fished inside the 3-mile territorial limit. Beyond the 3-mile limit there is no restriction on the number of lines used.

The troll fishery is open to the taking of coho from June 15 to September 20. There is no minimum size limit for coho. In some years area closures are necessary to comply with gillnet closures for local stock protection.

3.3.2.2. *Purpose of Measures*

The 28-inch total length minimum size limit and the winter closure of offshore and coastal waters are intended to restrict the harvest of immature stocks of chinook salmon that have remaining growth potential. The offshore and coastal winter closure is basically of little or no consequence as weather conditions are more restrictive than the regulatory season. The coho season is unrestrictive because coho usually do not appear in the troll catch in substantial numbers prior to July 15 or after September 20. The four-line limit for troll vessels is imposed only in Alaska waters. Elsewhere on the coast the line limit is six lines; in some jurisdictions there is no line limit. Many Alaska resident trollers have more than four lines on board their boats and will fish with all their lines when outside State jurisdiction.

The purpose of limited entry as a management tool is to promote the conservation and sustained yield management of the fishery resource and the economic health and stability of commercial fishing. Without limited entry levels of participation many fisheries have impaired or threatened to impair the economic welfare of the fisheries, the overall efficiency of the harvest, and the sustained yield management of the fishery resources.

3.3.3 *Foreign* (3.3.3.1, 3.3.3.2)

The foreign salmon troll effort in this fishery has been Canadian, has been regulated by a Reciprocal Fisheries Agreement, and occurred outside 12 nautical miles.

3.3.4 *Effectiveness of Management Measures*

Ideally, the management of any fishery should be focused on optimum escapement and yield from the resource. While inshore and coastal regulations have decreased the take of chinook salmon in inside areas, the effort in offshore waters has increased, thereby partially nullifying any intended benefits from inshore and coastal troll or net fishery curtailment. The 28-inch minimum size limit was intended to restrict the take of immature chinook salmon that have reared in the ocean for only two years under the concept that these fish would then be available for harvest in subsequent years. However, the increased effort in areas where small fish predominate has reduced the intended benefits of the minimum size limits because of the release and subsequent mortality of undersized chinook (shakers) that are inadvertently caught by troll fishermen.

This history of size restrictions in the troll fishery shows that prior to 1971, the legal length limit for chinook was 26 inches (fork length); fork length was changed to total length commencing with the 1972 season and remained at 28

inches total length until the 1977 season when the 28-inch total length (head-on) measurement was adopted.

The minimum size limit was increased to 28 inches for the 1977 season to provide further protection of immature chinook.

4.0 Biological Descriptors

4.1 *Life History Features*

Five species of Pacific salmon are off Alaska—pink, chinook, coho, chum and sockeye—and all have somewhat similar life histories. They spawn in fresh water from late summer to late autumn and die soon after. The eggs are deposited in gravel and remain until they emerge as fry in late winter or early spring. The fry of some species go to sea almost immediately, but in other species the freshwater period may vary from a few weeks to one or more years.

The ocean life is one of feeding and rapid growth. During the ocean residence the color is metallic blue on the top, with black spots or specklings, and silvery on the undersurfaces.

As the fish enter fresh water a red color appears on the chinook, sockeye, and coho; chum salmon acquire a "calico" banding and pink salmon turn a mottled brown. Males of all species develop a distinctive "kype" or elongated nose.

The salmon are placed in the genus *Oncorhynchus* and are characterized by a comparatively large anal fin with 13–19 rays. (By comparison, trout and char have 8–12 rays.)

Approximately one-third and two-thirds of Southeastern Alaska coho salmon, respectively, have 3- and 4-year life cycles. The 3-year old fish spend 1 year and the 4-year old spend 2 years in freshwater. Both migrate to sea as smolts in the spring; the 3-year old fish migrate as age 1+ smolts at the beginning of their second year and the 4-year old fish migrate as age 2+ smolts at the beginning of their third year. A small percentage of Southeastern Alaska coho are 5-year old fish having spent 3 years in freshwater and migrating to sea as age 3+ smolts at the beginning of their fourth year. Ecological characteristics of freshwater nursery areas that influence growth of fry and fingerlings apparently determine if seaward migration occurs in the second, third, or fourth year of life (Crone and Bond, 1976). In 1969 and 1970 age determinations on a 5,406 fish sample of adult coho from purse seine, troll, and gillnet fisheries in Southeastern Alaska revealed that 27, 64, and 9 percent respectively, were 3-, 4-, and 5-year-old fish (Marriot and Gray, 1970).

Regardless of their total age, coho are generally available to the troll fishery only in their final year of life as they approach maturity. This is during the summer and early fall after spending one winter in ocean nurseries.

Ninety-five percent of Southeastern Alaska chinook salmon smolts migrate seaward after rearing in freshwater for one year. The remainder migrate after two years. Alaska male chinook salmon mature after 1 to 5 years at sea, while females mature after 3 or 4 ocean years (Kissner, 1977). Chinook are available to various troll fisheries for up to 5 years but cannot be legally landed until the latter part of their second ocean year when they exceed 28 inches total length. Discrete migration patterns of fish after leaving the freshwater environment are unknown.

Adult sockeye migrate in early summer from salt water back to their freshwater stream of origin. While at sea the sockeye is bright and silvery; upon entering freshwater, the adult acquires the characteristic red coloration. The maturation process takes from one to two months. After spawning, the eggs develop and the fry will spend one or more years in freshwater before migrating to sea as smolts. After two to four years in saltwater, mature fish will weigh from four to eight pounds. In the fourth, fifth or sixth year, the mature fish will return to freshwater to spawn.

Pink salmon mature at two years of age. Following the freshwater spawning and incubation and growth to fry stage, the outmigration occurs during early spring and the fish spends one winter in saltwater, returning as the smallest of Pacific salmon with an average weight of some three pounds. It is the most abundant salmon in Alaska, and the most affected by natural, cyclic fluctuations.

Chum salmon exhibit similar spawning and early life stage characteristics similar to pink salmon. The principal difference occurs after outmigration of fry to the ocean environment where they spend three to four years before returning to spawn.

4.2 *Stock Units*

For purposes of management in terms of the Council's jurisdiction in waters where intermingling of both Alaskan and non-Alaskan chinook and coho occurs, these stocks must be considered as a unit because present knowledge is not sufficient for the management of discrete stocks throughout their range.

In general, native and hatchery chinook from the following areas are known to make contributions to the Alaska troll fishery: California, Columbia River, Washington, and Oregon coastal streams, Puget Sound, northern and southern British Columbia including Vancouver Island, and Southeastern Alaska.

Fish from all areas intermingle and constitute the fishery against which the troll effort is directed. Nearly 99 percent of the chinook troll landings from the offshore area come from the Fairweather Grounds (Table 13, Appendix 4.0).

This averages 15.8% of the total Alaska troll landings in numbers of fish (Table 12, Appendix 4.0).

Troll landings of coho in Council waters average only 6.4 percent of the total Alaska coho troll catch.

4.3 *Catch and Effort Data Sources*

Prior to statehood, catch and effort data recorded for the troll fishery was lacking in detail necessary for effective management. Since statehood, concerted efforts have been made to improve all data gathering functions of the Alaska Department of Fish and Game. At present, the available data includes numbers of boats and landings, and catch (in numbers and pounds) by species, statistical area, and week. In addition, effort in numbers of boats by statistical area is recorded by Department of Fish and Game personnel during overflights along the outside coast from Cape Muzon to Lituya Bay.

4.4 *Survey and Sampling Data*

From 1971 to 1974 a troll logbook program was conducted under the auspices of the Alaska Department of Fish and Game's Ocean Troll Fishery Project to determine catch by fishing location, hours fished per day, and number of undersized chinook caught by time and area. In 1976, the Alaska Trollers Association re-established a troll logbook program. In 1973, a port sampling program was initiated in three major ports of landing: Sitka, Pelican, and Craig. Information has been gathered concerning age-class structure of the troll catch, stock contributions from hatcheries, migration routes of maturing salmon, and relative frequency of stock contributions under mark-sampling programs funded by the National Marine Fisheries Service's Columbia River Fisheries Program and the North Pacific Fisheries Management Council.

Attempts have been made to establish escapement trends for the major chinook and coho streams in Southeastern Alaska. Because of variable water conditions (turbidity, etc.) as well as the inaccessibility of

many of the rivers, some of the survey results are not comparable. However, surveys of river systems for which data are comparable clearly demonstrate the decline in Southeastern Alaska chinook stocks (Table AI–4). Because of the dynamic nature of the stocks in the troll fishery it is necessary that these programs be continued and refined in order to achieve effective management.

4.5 *Habitat*

Because of the anadromous nature of salmon, it is essential that freshwater and estuarine habitat protection be given primary consideration in any plan designed to achieve sustained yield. The loss in potential production from the destruction of spawning environment through the construction of dams, industrial development, and poor logging practices cannot be completely offset by fishery restrictions or artificial production. The decline of the chinook catch in the Alaskan ocean troll fishery since the 1930's has been correlated with hydroelectric dam construction on the Columbia River; some upriver stocks in that system have been lost completely (Pacific Fisheries Management Council 1977). The decline in natural fish together with a relatively stable troll fishery demonstrated an increased reliance on hatchery-produced chinook.

The loss of spawning and rearing habitat through poor logging practices, urbanization, and industrial pollution in Southeastern Alaska will jeopardize sustained yield from coho. Some streams that presently support coho will undoubtedly suffer adverse effects from continued misuse of the environment. Information on specific streams or particular habitat problem areas currently is limited. There are studies being conducted by the Alaska Department of Fish and Game that should provide useful data in this regard. They are currently cataloging Southeastern Alaska streams to advise the U.S. Forest Service during development of their comprehensive land use plans. There are a large number of streams involved and these assessments are not yet complete. Also, ADF&G intends to closely monitor the effect on the Keta River of the access road that will be constructed by U.S. Borax for the proposed molybdenum mine.

Further development of land use-oriented industries in the States of Washington and Oregon and in the Province of British Columbia may cause further reduction in the numbers of chinook available to Alaskan fishermen. However, the present status of these stocks cannot be solely attributed to lost environment and, as with the Southeastern Alaska native chinook stocks, can be attributed as well to the fisheries which intercept these stocks.

4.6 *Ecological Relationships*

The ecological relationships of principal concern to salmon off Alaska are embedded in food chain relationships: i.e., marine mammals (sea lions) eat salmon which eat herring (or krill or needlefish) which eat plankton which need nutrient energy, etc. Direct food chain relationships involving salmon are poorly understood. Several applied research projects address (to a degree) "ecological relationships and salmon" but none present a very clear understanding of the total picture.

A troll logbook program being conducted under a cooperative agreement between the Alaska Trollers Association, the Alaska Department of Fish & Game, the Alaska Sea Grant Program, the University of Alaska, and the National Marine Fisheries Service, NPFMC should eventually result in better information regarding feed abundance and type. Preliminary data indicates that salmon feed primarily on needlefish and krill in the FCZ and on herring in inside waters. Several forage fish studies have been conducted off Alaska which deal with the distribution, abundance, and biology of herring, capelin, euchelon, candlefish, and krill. As an example, the ADF&G conducts continuing studies of herring abundance and although these studies relate specifically to the herring fishery, they should be useful in assessing some food chain relationship of salmon.

The Outer Continental Shelf/ Environmental Assessment Program (OCSEAP) has also conducted forage fish studies off Alaska, but primarily for the area north and west of Cape Suckling and principally with little conclusive data regarding salmon.

The Marine Mammal Protection Act of 1972 (Pub. L. 92–522) imposed a moratorium on the taking of marine mammals and further preempted State management authority over marine mammals in favor of Federal management. The Sea lion population has increased substantially since that moratorium went into effect. Sea lions prey on salmon and this has an effect on salmon stocks. Sea lions also physically interfere with some salmon fishing operations.

4.7 *Quality of Data*

The domestic catch in numbers and pounds of fish by grade and species is recorded by the processors at the time of delivery. The boat identification number, the fisherman's name, and his limited entry permit number are also recorded at the time of sale. A standard form called a "fish ticket" is completed with the above information for each delivery (Fig. 9, App. 4.0) and is forwarded to the Alaska Department of Fish and Game. Summaries and analyses of catch are calculated from this basic fish ticket form. In addition, spot checks are conducted by the ADF&G to verify fish ticket information.

Data concerning species composition, relative native stock contributions, and discrete stock distribution by time and area are of poor quality, or in some cases, nonexistent. Data available from earlier studies may not be applicable to the present situation because of changing stock characteristics (declining natural runs and increasing hatchery production).

In general, the quality of catch data by gear, time, and area is good in the aggregate. Logbook summaries to determine areas of shaker* incidence are considered adequate but because of the dynamic nature of the troll fishery and chinook stocks involved, several more years of data will be required to differentiate all areas of shaker abundance in Southeastern Alaska. Data concerning age class structure of the troll catch and size frequency by age class are considered adequate. Spawning ground surveys and escapement counts are considered adequate to exemplify declining stock strengths. Tag recovery data on chinook of non-Alaskan origin is adequate to determine contribution of these stocks to the Alaskan troll fishery. Native chinook tagging began in 1977 and results have not yet been determined.

Catch by Canadians is reported by the Canadian government in the *Annual Summary of British Columbia Catch Statistics*. The catch data are reported in numbers of fish and pounds by species.

4.8 *Current Status of Stocks* (See Appendix 4.0 for additional information)

Native spring chinook salmon stocks are at a low level along the entire Pacific Coast.

Southeastern Alaska chinook stocks (all "spring" type) are also at a low level in most chinook systems monitored annually (Appendix, Table A, 1–4). While some cause for the decline of chinook in the Pacific Northwest can be attributed to loss or deterioration of spawning grounds and freshwater rearing areas such as mainstem and

*A "shaker" is a salmon of less than legal length that a fisherman releases (shakes off) from the hook.

tributary dams, industrialization and urbanization of rivers, and extensive watershed logging, none of these factors have significantly influenced the decline of Southeastern Alaska chinook. *All data indicate a major reason for population declines in Southeastern Alaska chinook is due to overharvest.* The chinook is the only species which is available to sport and commercial troll fisheries for three or four years, and in addition is often subjected to net fisheries near their river of origin.

Southeastern Alaska coho are below historic catch levels. Coho catches by all gear in Southeastern Alaska averaged 1.6 million fish per year during the thirty years from 1926–1955. This compares to about one million fish per year from 1960 to 1975 and about 800,000 fish per year from 1973 to 1975 (Alaska Salmon Fisheries Plan, 1976).

4.8 *Maximum Sustainable Yield (MSY)*

MSY is an average over a reasonable length of time of the catch which can be taken annually from a stock under current environmental conditions. MSY, as it applies to salmon management, is difficult, if not impossible, to evaluate in terms of any measurement of data other than past catches. The MSY for salmon is discussed in terms of total catch of salmon taken in the fisheries east and west of the longitude of Cape Suckling (for rationale see Section 8.3.1). While MSY is calculated as an average for each of the two areas, it is important that the complexity of the problems and importance or lack of importance of a single river system versus multiple river systems is understood.

Under ordinary management procedures using MSY, where recruitment requirements determine escapement goals for individual populations or groups of stocks, harvest levels should be based on surplus fish above recruitment requirements. Restrictions on terminal fisheries are therefore used to help achieve the proper balance between total catches and escapement.

The Alaska offshore troll fishery contributes to the total catch of salmon east of the longitude of Cape Suckling but is based on variable harvest levels of mixed stocks before the relative strength of individual runs are known. This fishery is based on salmon taken during an active growth period when natural mortality rates are low and when the high death rate of released undersized salmon increase the difficulty of justifying the fishery.

Achieving maximum poundage yields require eliminating harvests of salmon with remaining significant growth potential. The high-seas troll fishery creates a net effect of a major loss of salmon production in poundage yields as compared to the same fish taken closer to their natal streams.

The MSY figures (for five species of salmon, east of the longitude of Cape Suckling to Dixon Entrance and west of the longitude of Cape Suckling to 175° east longitude) are calculated from annual catches in all waters, State and Federal, off Alaska from 1953–1977.

The mean catch of chinook during an equal time period (25 years) prior to 1953 is statistically higher than the 25-year period used in the determination of MSY (see Table 4). The 1953–1977 period more accurately reflects current environmental conditions.

The MSY ranges are the average catches minus and plus one standard error.

4.8.2 *Acceptable Biological Catch (ABC)*

Acceptable Biological Catch (ABC) is a seasonally determined figure that may differ from MSY for biological reasons. The principles of salmon managment require ABC calculations to be made on the basis of the surplus assumed to prevail in any mix of river systems involved in the fishery.

In dealing with a mixed-stock fishery, in which diverse stocks mingle at different levels of abundance, and a fishery in which those diverse stocks consist of wild and hatchery fish from widely separated geographic areas, there are stocks which can be safely harvested but which cannot be separated from stocks within the fishery which should not be harvested.

If a fishery is allowed in a mixed-stock situation where certain stocks require protection, the inevitable consequence is that some from these stocks will be caught.

The offshore and coastal troll fishery in the FCZ (east of Cape Suckling) and Alaskan State waters is an example of such a situation. Wild Alaskan stocks of chinook are critically depressed and should not be harvested but are mixed with other stocks having a harvestable surplus.

The overall management of the five species of salmon off Alaska (east and west of Cape Suckling) requires an estimate of ABC be calculated from past annual catches (1971–1977) in all waters in and off Alaska. A range of ABC for each species is presented as a mean catch plus or minus one standard error (Table 5).

BILLING CODE 3510-22-M

TABLE 4

Average Annual Catch (MSY) From 1953-1977 Taken
East and West of Cape Suckling

	Pounds (in thousands)	Numbers of salmon (in thousands)
Chinook		
West	5,133 - 5,548	247 - 267
East	5,130 - 5,476	296 - 316
Sockeye		
West	26,384 - 70,424	4,549 - 12,142
East	4,775 - 5,284	808 - 894
Coho		
West	4,780 - 5,415	602 - 682
East	8,362 - 9,723	959 - 1,115
Pink		
West	44,784 - 56,049	12,236 - 15,314
East	36,289 - 45,952	9,164 - 11,604
Chum		
West	27,320 - 31,016	3,682 - 4,180
East	17,218 - 20,799	1,822 - 2,201

TABLE 5

Mean Annual Catch (1971-1977) Expressed as an ABC Range
For Salmon East and West of Cape Suckling

	Pounds	Numbers (of fish in thousands)
Chinook		
West	5,063 - 6,390	225 - 284
East	4,424 - 4,950	286 - 320
Sockeye		
West	43,531 - 65,811	6,697 - 9,817
East	3,566 - 4,717	669 - 885
Coho		
West	3,636 - 4,600	505 - 631
East	7,420 - 9,053	841 - 1,100
Pink		
West	29,972 - 45,599	7,382 - 11,051
East	25,716 - 37,489	6,494 - 9,467
Chum		
West	30,288 - 35,687	4,071 - 4,796
East	12,232 - 17,813	1,292 - 1,883

The years 1971–1977 were used for this derivation of ABC because (1) the use of recent catch data (7 years as opposed to 25 years) is essential in understanding changes and trends which occur in biological systems over time and (2) a seven-year period takes into account a recent full cycle of spawning for major chinook and coho stocks. Additionally, 1971 was the initiation of the first reliable fish ticket information which clarified landings by area for the first time.

Cape Suckling is an established boundary for management and statistical areas and separates Southeastern Alaska waters from the remainder of Alaskan waters. There is no known information which shows a significant mixing of stocks originating west and east of Cape Suckling.

4.9 *Estimates of Future Stock Conditions*

The future status of salmon in the offshore Alaska troll fishery is unclear. Non-Alaska fall chinook in the fishery presently are strongly supported by West Coast hatchery production. The future condition of these stocks will be closely tied to existing hatchery programs and the success of new coast-wide rehabilitation and enhancement programs. *Hatcheries for spring chinook have generally been financially unsuccessful. Until this problem is solved, maintaining spring chinook stocks will depend largely on natural production.* Reversing the severely depressed status of Southeastern Alaska chinook can only be achieved by stern conservation efforts that eliminate or restrict further harvest of these fish. Efforts are underway in Southeastern Alaska to develop spring chinook brood stocks for artificial propagation programs. However, these efforts will remain small until successful techniques are established. *Until that time, conserving these stocks with an ABC approaching zero is vitally important.*

Prospects for enhancement of coho production in Southeastern Alaska, in addition to conventional hatchery programs, include several different approaches to artifically recruiting smolts to ocean nurseries. These include utilizing estuarine and freshwater culture in net pens, floating raceways, and unused natural rearing areas. There may be a significant number of unused freshwater nurseries for coho production in Southeastern Alaska that are not accessible to natural runs due to geologic features of the area. Active research on these approaches is underway at several locations. Caution should guide their use and development, especially in relation to simultaneously maintaining viable native stocks in adjacent areas (Heard, in press).

4.10 *Non-target Species Mortality Other Than Salmon*

This is not a serious problem with the ocean salmon fishery. Although species such as the Pacific halibut (*Hippoglossus stenolepsis*), rockfish (genus *Sebastes*), and lingcod (*Ophiodon elongatus*) may be caught, the total catch is minor.

5.0 Catch and Capacity Descriptors

5.1 *Data and Analytical Approaches (5.1.1., 5.1.2.)*

There is insufficient data to quantitatively define capacities. Harvesting characteristics (section 3.5.2) and catch trends (section 3.2.1.3) substantiate the values for DAC and DAH discussed below.

5.2 *Domestic Annual Capacity (DAC)*

Capacity of the power troll fishery to harvest salmon is exceedingly difficult to estimate. In 1978, approximately 100 vessels with a mean keel length of 41 feet made landings from offshore waters. Because of the increased efficiency of the vessels in the fishery, due to technological advances in electronic gear and increased hold capacity, it is estimated that the DAC is substantially greater than the largest catch that could be realized from the offshore fishery.

Provisions of limited entry will restrict the number of fishermen who could conceivably fish; this does not necessarily limit fishing effort.

Larger boats and increased experience on the part of the fishermen plus increasing sophisticated electronic gear is the means by which effort can increase without numbers of fishermen increasing.

5.3 *Expected Domestic Annual Harvest (DAH)*

Based upon past performance of the troll fleet and market trends, the DAH for chinook and coho is expected to be equivalent to OY.

5.4 *Domestic Annual Processing Capacity*

Domestic processors have in the past been able to process the entire domestic harvest of troll-caught salmon, and it is expected that they will be able to process the harvest of salmon allowed by this plan.

6.0 Optimum Yield (OY)

Optimum Yield (OY) may be obtained by a plus or minus deviation from ABC because of economic, social, or ecological objectives as established by law and the public participation processes. Ecological objectives where they relate primarily to biological purposes and factors are included in the determination of ABC. Where ecological objectives relate to resolving conflicts and accommodating competing uses and values, they are included as appropriate with economic and social objectives in the determination of OY.

The optimum yield for all species in all areas is based on the acceptable biological catch for the years 1971–1977 modified by social and economic considerations. The OYs are expressed as ranges determined from past mean catches plus and minus one standard error.

It is necessary to take into consideration MSY, ABC, and OY based on all species, all areas, for purposes of management. The plan, however, is subdivided and deals primarily with the one active fishery in the FCZ off Southeast (east of Suckling) as this is the area of council jurisdiction as addressed by the FCMA.

Catches of pink, chum, and sockeye salmon are relatively insignificant in the troll fishery. The 1971–1977 average annual combined catch of pink, chum, and sockeye is less than five percent of the total offshore troll salmon harvest (Table 13, Appendix 4.0). Pink, chum, and sockeye salmon caught in the offshore are not considered significant in the overall optimum yield determination. Any catch likely to be realized in the troll fishery will be an acceptable by-catch.

Alternatives Considered

Two other concepts of optimum yield were considered in the development of this plan: (1) a greatly restricted OY essentially prohibiting trolling in the FCZ by certain time and area closures and (2) allowing OY and effort to expand according to current trends in the fishery (see also EIS, Section 12.5). The argument to greatly restrict and reduce the OY was considered unacceptable given the basic definitions of OY which mandates a consideration of relevant socio-economic factors. The preponderance of public testimony and socio-economic data did support this conclusion by showing the grave social and economic dislocation and hardships that would occur in several geographic areas and villages in Southeast Alaska. Likewise any expansion of effort or greatly increased catch or catch potential was not consistent with a principle management objective of controlling the expansion of the fishery. Neither was this alternative considered optimal in terms of the carefully considered balance of social and economic values and the biological principles of mixed stock management.

West of Cape Suckling: The optimum yield for waters west of Cape Suckling addressed by this plan is fully utilized by existing inshore net fisheries. (Table 6).

East of Cape Suckling: The optimum yield for salmon east of Cape Suckling is set equal to ABC (See Table 6).

BILLING CODE 3510-22-M

TABLE 6

OPTIMUM YIELD

For Salmon East and West of Cape Suckling

	Pounds	Numbers
	(of fish in thousands)	
Chinook		
West	5,063 - 6,390	225 - 284
East	4,424 - 4,950	286 - 320
Sockeye		
West	43,531 - 65,811	6,697 - 9,817
East	3,566 - 4,717	669 - 885
Coho		
West	3,636 - 4,600	505 - 631
East	7,420 - 9,053	841 - 1,100
Pink		
West	29,972 - 45,599	7,382 - 11,051
East	25,716 - 37,489	6,494 - 9,467
Chum		
West	30,288 - 35,687	4,071 - 4,796
East	12,232 - 17,813	1,292 - 1,883

7.0 Total Allowable Level of Foreign Fishery (TALFF)

The amount of U.S. Pacific Coast salmon available to the Alaskan Troll fishery will vary from year to year. At the highest conceivable level of abundance, it can be completely harvested by U.S. domestic fisheries. Therefore, in compliance with PL 94–265 there is no allowable foreign catch except as proposed by a Reciprocal Fishing Agreement with Canada, or as a temporary Japanese salmon fishery might be allowed under terms of the Protocol Amending the International North Pacific Fisheries Convention signed April 25, 1978, which requires approval of all parties to the convention before such fishery can occur.

8.0 Management Regime

8.1 *Objectives*

(1) Control the expansion of the salmon troll fishery in the Fishery Conservation Zone.

(2) Allocate the salmon resource among user groups without disrupting present social and economic structures.

(3) Regulate the catch of salmon to assure adequate escapement for spawning.

(4) Reduce the catch of salmon with potential growth to increase the poundage yield from the troll fishery.

(5) Make cost effective the public investment in the high-seas salmon fishery.

(6) Promote the eventual development of a Pacific Coast salmon fishery management plan.

8.2 *Areas, Fisheries, and Stocks Involved*

This plan covers salmon off the coast of Alaska east of 175° East longitude.

Two management units are established: the waters west of Cape Suckling and the waters east of Cape Suckling to Dixon Entrance.

There are presently no offshore salmon fisheries west of Cape Suckling in the FCZ with the exception of those historical fisheries managed by the State (North Pacific Act). These are the False Pass (South Peninsula), Cook Inlet, and Copper River net fisheries. These fisheries are technically in the FCZ, but are conducted and managed by the State of Alaska as inside fisheries. Thus, no fishery is discussed for the FCZ west of Cape Suckling.
